AMERICAN BUILDER

THE WORLD'S GREATEST BUILDING PAPER

IN THIS CONVENTION ISSUE . . .

1956 PRODUCT SHOW

COMBINED GUIDE TO SHOW AND CHECKLIST ON PAGE 253

JANUARY 1956

NuTone Announces the **WORLD'S FIRST** **"IN-BUILT"** Food Preparation Center!

1 *It's a Large Mixer* **2** *It's a Food Blender* **3** *It's a Knife Sharpener*

It's Here NOW!

THE KITCHEN APPLIANCE of the FUTURE

... saves precious workspace on kitchen counters

Here are the three most widely used kitchen appliances — a Food Mixer - Blender - Knife Sharpener - all *in-built* — completely recessed — fits flush with any counter space — operated from one powerful, sealed-in motor. Stainless steel counter plate holds the enclosed switch.

The Food Mixer is revolutionary in design — bowl is Anodized Aluminum — motor-driven — full 3½ quart — unbreakable — the world's finest mixer! . . . The Powerful Blender has 6 speeds — stainless steel blades — sealed in for safety. Women will love the unusual Electric Knife Sharpener — guaranteed to give finest blades a long-lasting sharpness!

Guaranteed by NuTone — one of the most dependable names in the Electrical industry. U.S. & Foreign Patents Pending.

- A. Stainless Steel Plate
- B. Selecto-Matic Drive Cover
- C. Recessed Speed Dial
- D. Adjustable mounting bracket
- E. Air discharge ports
- F. Removable plate for wiring

A BIG, NEW FEATURE FOR YOUR 1956 HOMES!

This world's first — NuTone *in-built* kitchen appliance will excite the enthusiasm of all home buyers. It will set a complete new small-appliance trend towards *in-built* construction — along with *in-built* ranges, refrigerators etc.

NuTone guarantees its Mixer - Blender - Sharpener to be as good or better than any nationally known individual appliance of its kind. We have independent laboratory tests to prove this claim!

Write for specifications and 4-color folder.

NuTone, Inc., Appliance Division, Dept. AB-1, Cincinnati 27, Ohio

Kwikset[®]

**SECURE-ALL
SAFE**

Helps You Sell Your Homes

Here is a new luxury feature at a cost so low you'll want to use it in every home you build. It's a feature your customers can see and appreciate for the convenient protection it affords home valuables. Fire, water and theft resistant, the Kwikset SECURE-ALL SAFE is easy to install in any standard 4" wall, between 16" studs.

Inspect the Kwikset SECURE-ALL SAFE—you'll see that this safe offers sales advantages you can advertise and demonstrate. You'll also find that no other residential wall safe offers so much value at so little cost.

STERLING HARDWARE MANUFACTURING CO. • CHICAGO 18, ILLINOIS

The Opportunity Page

(Keynote page of the AMERICAN BUILDER, which is opportunity cover to cover, advertising and editorial)

Unique builders' service

A new idea in trade-ins got started last month: the arrangement is made possible by a new corporation headed by Frank Kilbane, and formed by members of the Cleveland-Ohio Real Estate Traders Club. If a property traded in on a new house has not been resold by the Traders Club for the builder in 90 days, the corporation buys it outright, and gives the builder his cash. The club then tries to resell the trade-in at its own risk. They say the plan will prove a boom to builders who find themselves in a moderately "frozen condition."

Knock on wood

Builders who find many materials in short supply next year may find it easier to build with lumber. According to the National Lumber Manufacturers Association, the logic of the new opportunity in lumber runs like this: two federal programs that may come to pass in 1956—an expanded highway program and more liberal federal aid to education, including federal subsidies for school construction—will both compete against each other (and other types of construction) for available materials. That kind of demand will make it tough to buy many materials even now in short supply . . . except, of course, lumber.

New kind of pitch

Prospects of further hikes in building costs and labor for 1956 make it advisable for potential home buyers to put down their deposits as soon as possible, says Leonard Kohl of Kohl and Feld, Inc., New York City, N.Y., and Montclair, N.J. Now *there's* an idea for your next ad: tell them to act now and get, most probably, a better home

today at a lower price than would be possible later on.

Demand from a new source

Urban redevelopment programs will play a much bigger part in creating a demand for new housing in 1956 than most of the forecasters appreciate. Take Worcester, Mass., as an example of what is happening in many, many cities: approximately one square block of inhabited residential units was recently razed to make way for city-owned garages; still more units were wrecked to allow an express highway to be extended to the heart of town; and still more blocks will be cleared for an urban renewal development. In all, 300 homes were torn down. When those 300 families seek new shelter, either by buying or renting, the eventual outcome—on the grade-up system—will be 300 new homes sold by Worcester builders.

Opportunity in odd places

Speaking of urban redevelopment, you may recall an American Builder article several years ago about an alert Toledo, O., builder: when a super highway program called for the demolition of a number of sound houses, he bought them and moved them off their foundations to a new suburban site. He then modernized them, inside and out, and sold them at a good profit. It's still a good idea.

More about modernization

Dozens of magazines are playing up modernization starting now. One of most ambitious magazine programs is Better Homes & Gardens' Home Improvement Contest: \$25,000 will be given away in prizes during 1956 and the contest will be featured throughout the year in BH&G's pages. You simply can't afford not to hang out your remodeling shingle!

American Builder is published by the SIMMONS-BOARDMAN PUBLISHING CORPORATION, Emmett St., Bristol, Conn., with editorial and executive offices at 30 Church St., New York 7, N.Y.

James G. Lyne, President; Arthur J. McGinnis, Executive Vice President and Treasurer; Samuel O. Dunn, Chairman Emeritus; J. S. Crane, Vice President and Secretary; Fred A. Clark, Vice President

and Business Manager; Edward G. Gavin, Vice President and Editor; Bayne Sparks, Vice President; Robert G. Lewis, Vice President.

...“and the builder said we can choose from—

over **70**
patterns and colors!”

Textolite[®]

PLASTIC COUNTER AND WALL SURFACING

Ever stop to think how many new-home sales are clinched in the kitchen? More often than not, your “star salesman” is Mrs. Prospect, especially when the kitchen is equipped with long-wearing G-E Textolite counter tops!

G-E Textolite is designed to appeal to all your customers. There are over 70 breath-taking designs and colors . . . and because Textolite resists *heat, stains and scratches*, it gives “years of wear . . . with minutes of care!”

Why not give your kitchen that custom-made G-E quality look? Specify G-E Textolite plastic surfacing in your new homes—it’s easy to work with—and easy to sell.

SEE G-E TEXTOLITE AT THE NAHB SHOW, BOOTHS 111 AND 112,
CONRAD HILTON HOTEL, CHICAGO, JANUARY 22 TO JANUARY 26.

To The Editors:

American Builder
30 Church Street
New York 7, N. Y.

Looking Forward

I was very much interested in the "House of 1979" in the American Builder (August-1954), and we'd like to go into this idea further in connection with the 1956 Portland home show. Do you have any plans drawn for this type of house, or any further information on it other than that given in the "Builder"?

—Al Learman, Managing Director, Portland Home Show
 Portland, Ore.

"The house of 1979," theme for our 75th Anniversary Issue, was not an actual house. It was, however, a compilation of actual ideas in use in many houses; they were the most advanced ideas we could find and we brought them all together under one editorial "roof" in that issue. That's why no plans are available.

Still One Trillion!

Your December issue on page 3 (The Opportunity Page) reads One Trillion! "According to the wiring people, electrical consumption in 1963 will reach one trillion kilowatt hours compared with the present 540 million kwh." This means . . . an increase of 2000 fold. Impossible . . . where is your error?

—A. DeDoe, City Hall
 Kalamazoo, Mich.

"If it sounds like Arabian nights, remember the electrical progress since 1935"; that's a quote from the Washington (D.C.) Post, the newspaper that first published the story that went into our pages as an Op-

portunity item. And one trillion kwh is absolutely correct. An increase in the use of electrical gadgets will account for part of the seemingly fantastic statistic.

Here's Our Policy

. . . we would like to inquire about the possibility of securing reprints of the article, "Estate Planning for the Builder" (October American Builder, pp. 98-99).

—George H. Kelley, Manager of Sales Publications, New York Life Insurance Co.
 New York, N. Y.

American Builder is always pleased either to make available reprints of popular articles or to grant permission to do the reprinting yourself.

That's Our Editor!

Dear Ed Gavin: After warning you that our speakers usually speak from twenty-five to thirty minutes, I was delighted that you kept them on the edge of their seats for a full hour. It is pointless for me to tell you how interested they were when you saw for yourself. However, "the most interesting speech I've heard" was a typical comment which came to me and you may not have gotten.

Our entire Association joins me in thanking you for taking the time to visit Charlotte. Undoubtedly it was one of the top programs we have ever had.

—Robert W. Barker, Executive Director, Home Builders Association of Charlotte, Inc.
 Charlotte, N. C.

Our modest Editor tries to hide letters like this. He has a great file of them. We found the file and thought you might like to read just one.

—The Editors

AMERICAN BUILDER
OCTOBER 1955

8 PAGES OF SMART NEW WAYS TO USE PLYWOOD

A Plywood Workbook

1 Space divider
this page and next

2 Construction
techniques p. 81

3 Ideas for
modeling p. 84

4 Description and
design assist. 80-88

THIS WORKBOOK includes 100 ideas for new uses of plywood in the home and the most complete set of plans ever published for the modern builder. 100 pages.

This And Lots More

. . . I found on my return the October issue of American Builder. I'd like to say . . . that this is one of the most gratifying spreads (A Plywood Workbook, pp. 81-88) on the subject that we have seen . . .

. . . a tough subject for a down-to-earth builder publication to handle. Certainly your presentation was extremely skillful and effective. I personally have brought it to the attention of everybody in the office. . . .

—Thomas C. Sias, Douglas Fir Plywood Association
 Tacoma, Wash.

Naturally, we're happy to know that "A Plywood Workbook" rang a bell with you. It also rang bells with our builder-readers. In fact, we're now set to start a series on built-ins as a result of the popularity of our October issue. Look for the first article in February.

Make this Test

for Heat Flow in Buildings

Try this experiment. Take a piece of multiple accordion aluminum. (We'll send you some free samples.) Hold it very close to your cheek without touching. You'll be surprised! Notice how, in seconds, your cheek feels a glow of warmth. Why? Because the heat rays which are leaving your face (although without temperature), are being thrown back again at a 97% rate by this amazing insulation. Reflected to your cheek, the rays are now re-absorbed at a 90% rate and turned into heat.

THE BIG THIEF

The same thing happens in building spaces. This simple experiment illustrates an extremely important principle of heat flow. The greatest thief of fuel, of heat, and of comfort in buildings in winter, and of comfort and electricity for air-cooling in summer, is the flow of heat by Radiation.

Put multiple sheets of prefabricated accordion aluminum insulation inside wall and roof spaces, and you bar the path of this thief. For multiple accordion aluminum throws back, with 97% reflectivity, the heat rays that strike its surfaces. It also retards, most effectively, the flow of heat by Convection, Conduction, and Vapor Flow.

The tough aluminum sheets in multiple aluminum are almost completely impervious to water vapor, and are long and continuous. Infiltration under flat, stapled flanges is slight.

Where multiple aluminum is used, fortuitous vapor and water (for instance rain) which intrude into wall and similar spaces, will gradually flow out as vapor through exterior walls and roofs as pressure develops within, because vapor flows from areas of greater to less density. The vapor cannot back up through the continuous, almost completely impervious aluminum, so it flows out because exterior walls and roofs have substantial permeability compared to aluminum, far greater than the required 5 to 1 ratio.

For maximum uniform depth protection against heat loss and condensation formation, use **edge-to-edge** multiple aluminum,* each sheet of which automatically stretches from joist to joist.

*Patent applied for.

How thermal losses can be reduced by successive sheets of metal and air layers is described in the booklet, "Insulating Effect of Successive Air Spaces Bounded by Bright Metallic Surfaces" published by the American Society of Heating and Air-Conditioning Engineers. This report is well worth reading. Obtain it free—Send the coupon.

**COST OF EDGE-TO-EDGE INFRA
Multiple Aluminum Insulation
installed in new construction between

The Building Outlook

NORTHERN EDITION

SMALL TALK

IT FLOATS

A Cleveland chauffeur has just patented a design for a house that rises with high water and falls back into place when the flood recedes. He hopes to interest the prefab industry in going into full scale production.

THERE'S NO LIMIT

You haven't see the last on kitchen built-ins yet. Manufacturers of wood kitchen cabinets predict that refrigerators will follow the trail blazed by built-in wall ovens and ranges.

FULL SPEED AHEAD

The lumber industry will step up its program of technical assistance to builders, architects and engineers. Look for a new "how to do it" manual on recommended framing and construction details, more data on the cost of wood construction versus other materials.

SHARING THE LOAD

The New Jersey HBA feels that it has an answer to the school problem in a program that was introduced by past president Richard D. Hudson. Basically, it's one that covers the entire state and has one governing body empowered to tax industry (as well as home owners, of course) so that the burden is shared by everyone who benefits from free education. American Builder says: keep your eye on this program.

EVERYONE'S TALKING ABOUT a new sewage treatment plant at Hampton Lakes, N. J., that may well be the solution that builders are looking for when they face the sewage problem "out beyond the mains." The plant consists of three structures and would occupy 1,300 square feet of land if Moss Brothers and Sons, builders, hadn't seen to it that 98 percent of the plant would be *underground*. Each structure, built of reinforced concrete, will go down 18 feet; the tallest will have only 10 feet showing above ground, another will be completely at ground level, the third will show only two feet above ground. (For other late developments in sewage treatment, see our article on Community Facilities, page 80.)

IS IT A BOOM THAT WILL GO BUST? Arthur O. Dietz, president of C. I. T. Financial Corp., says that although the economy has hit an all time high, its current level is merely a step in a long term growth-curve that will see its most powerful upsurges in the 1960's. But now let's listen to Howard C. Sheperd, chairman of First National City Bank of New York: he says that our present business boom has got to slow down before it drifts into inflation and a cycle of boom and bust. "The boom cannot continue at the pace set this year," he warns.

BANKS ARE BEGINNING TO GET TOUGHER about extending mortgage credit to would-be home owners who are making heavy payments on new cars. A recent issue of U. S. News & World Report sums up the situation by quoting an El Paso, Tex., real estate broker: "The auto salesman is our biggest competitor." (American Builder has advised all along: get to your prospect before the auto dealers line him up for '56's).

Here's why Gypsum's short...

HOUSES ARE GETTING BIGGER—The average new house in '55 has 1 to 2 rooms more than the '40 model.

WALLBOARD IS GETTING THICKER—In '40, 3/8" was standard; in '55 the trend is toward 1/2" — takes more gypsum and more time to produce.

AND BUILDING IS BOOMING... 602,000 houses were built in '40; in '55 over 1.3 million units will be started!

and here's what's being done about it

Is construction at its peak?

By William C. Bober

If over-building worries you, read this analysis of our No. 1 Industry

Construction is today by all odds the biggest industry in the United States. In money expenditures, probably over \$65 billions in 1956, it far outranks either

agriculture or defense spending.

Its colossal size and its component parts are symbolized by the chart below. It shows that it is not merely a \$44 billion industry. That total is for new construction only.

In addition to that sum, it is likely that over \$21 billions will be spent in 1956 on modernizing, altering, maintaining and repairing the country's already existing 50 million dwelling units, plus the

immense existing non-residential plant of every class and description. This huge market, which we may well call the "modernization" market, accounts for almost one-third of the grand total of the construction industry.

This modernization market has been consistently underestimated. It was not until the Census Bureau's nation-wide sample survey in 1954 that the first real light was shed on

(Continued on page 298)

How 65.5 billion dollars in construction will be spent in 1956

PRIVATE NEW RESIDENTIAL
\$16,500,000,000

Includes: one- and two-family dwellings; multi-family dwellings, dormitories, hotels.

PRIVATE NEW NON-RESIDENTIAL
\$14,720,000,000

Includes: industrial; educational; commercial; hospitals; religious; farm; social; utilities; all other private.

PUBLIC CONSTRUCTION
\$13,100,000,000

Includes: educational; hospitals; industrial; residential; military; conservation; highways; sewage; water supply.

**MODERNIZATION, ALTERATION
AND MAINTENANCE**
\$21,200,000,000

Includes: Owner- and tenant-occupied dwellings; non-residential building; utilities; farm; highway; military; water supply and sewage disposal; all other.

Data by W. C. Bober based on estimates subject to change

Six of many project Andersen Flexivents®

"Flexivents increased our sales, helped cut construction costs," says Milton Fox, builder of Brentwood Oaks on Long Island. "We have used Flexivent Windows exclusively. They have proved to be a great asset in the construction and sale of our homes in Brentwood Oaks."

"Flexivents supply variety of appearance to our houses," say Earl Griffith and Bruce Pollock of Griffith-Pollock Building Corp., Flint, Mich. "With their buyer acceptance and low servicing cost, we find versatile Andersen Flexivents make ideal windows for us."

"We found Flexivents to be complaint-free, no costly callbacks," says Robert R. Wirsching, builder of home winning the NAHB Merit Award for Design in Region 14. "I have used Flexivents for the past year. I'm completely sold on them for contemporary homes I'm building."

Andersen WINDOWALLS are known by name to more home buyers and planners than any other window brand. Nationwide surveys show Andersen Windows are preferred 7 to 1 over the next brand of windows by these home buyers and planners. All across the country men who build homes for sale are finding that the Andersen Flexivent's high quality and unrivaled consumer acceptance, make it a prime selling feature for their houses. Discover the advantages Flexivents can bring you in the next project you build.

See the versatile Andersen Flexivent in our booth 569-572, Sherman Hotel, at the NAHB Convention.

builders who find help sell homes faster!

"We chose Flexivents for versatility plus buyer acceptance," says Roy Spande, builder of Westwood Gardens in St. Paul, Minnesota. "We find Flexivents offer economy of assembly and installation plus consumer acceptance that helps to sell our homes faster."

"Flexivents bring economy to our Lu-Re-Co project homes," says Carl E. Swartz, partner in J. J. Swartz Co., Decatur, Illinois. "Andersen Flexivents give us the wide range of appearance so much in demand in today's homes. We've installed over 1600 with no service calls."

"Good design... easy construction, quick sales with Flexivents," says Edward W. Pratt, president of Wake-Pratt Construction Co., in Royal Oak, Mich. "We like the clean, horizontal lines of Flexivents that give the impression of length to our houses."

Williams adds strong Buyer-Appeal

Sealed in Steel from Top

**THE GUARANTEE
OF QUALITY
YOUR PROSPECTS
WILL RECOGNIZE
IMMEDIATELY!**

"SEALED-in-STEEL" MEANS CLEANEST HEAT EVER!

Because the new Eureka Williams warm air units are completely sealed in steel—only *filtered* air can pass through the heat exchanger into the home. This prevents contamination from musty odors or basement dust...insures cleaner, more sanitary, more healthful warm air for the whole family's comfort and protection.

New Williams' Levelizer

Williams Quality Features Give Double Values!

FOR BUILDERS

- ★ Cost-Cutting, Labor-Saving Installations—Sealed in Steel Units need no grout work or expensive sealing-in.
- ★ Quick, Easy, Sure Adjustments with the new Williams' Levelizer
- ★ More Models to Choose From
- ★ New Lower Unit Costs
- ★ Added Appeals to House Buyers

FOR HOME BUYERS

- ★ Automatic All-Weather Comfort
- ★ New Lower Cost Operation
- ★ Whisper-Quiet Performance
- ★ Long-Life Dependability
- ★ Advanced New Styling
- ★ The Cleanest Heat Ever—Sealed In Steel From Top to Bottom

Williams Helps You Sell!

Williams sells your market with an exciting new Advertising and Promotion Program—more pull-power for your best prospects!

Eureka Williams' recent multi-million dollar plant expansion gives you all the benefits of today's most modern production and service facilities!

JANUARY 1956

MODELS TO FIT EVERY NEED

WARM AIR HEAT

Available in Lo-Boy, Hi-Boy, Counterflow or Suspended models for oil and all types of gas...natural, mixed or LP. Complete range of sizes. Top quality construction throughout. Heavy-gauge, durable, long-life, heat exchanger. Sealed-in-Steel for *cleanest* heat ever!

WET HEAT

Oil and gas fired cast iron, and oil fired welded steel boiler burner units, for hot water or steam in complete range of sizes for home installations. Extra strong quality construction in accordance with A. S. M. E. code. Gas boilers approved by A.G.A.

AIR CONDITIONING

New, modern, efficient units to fit every home, every need. Comprehensive selection of both air and water cooled units.

"We Cut Labor Costs 50% with our SKIL Radial Saw"

... and what's more, accurate SKIL cuts
give us better quality work!"

Says Mr. V. K. Nelson, Home Builder
Speedway City, Indiana

Savings in time and labor! These advantages put builders and contractors "on record" in favor of SKIL Radial Saws!

SKIL gives you much *faster* cutting than any other radial saw on the market. Exclusive "Retracto-Glide" Arm provides clear work area, eliminates over-arm interference, reduces set-up time as much as 30% because cutting head retracts *all the way*. Controls are within easy

reach of operating position. No time is wasted making adjustments.

Let SKIL break your wood-cutting bottlenecks, and improve the *quality* of your work, too! Quickly and easily sets up for bevel, miter, compound or any complicated cuts. See how a performance-proved SKIL Radial Saw can simplify your material handling, reduce costs and increase output for *you!*

NOW! AN ALL-NEW PORTABLE SKIL RADIAL SAW!

SKIL Model 649 delivers 25% more power
to blade than any other 1½ HP radial saw!

Lightweight, compact, versatile SKIL Saw goes *directly to the job*, eliminates material handling work. Can be carried through doors for trim cutting after framing is completed. More power, makes bigger cuts than any other radial saw in its class. Handles tough bevel miters even on 2 x 8's or larger. Makes every type of cut through all sizes of lumber used in home building, light construction and general woodworking. Operates from any AC or DC portable generator set of 1500 watts output. An excellent value for top efficiency at low cost!

**Model 450
SKIL RADIAL SAW**
Available from 2 to 7½ HP.
Depth of cut to 5¼". 19" cut-off
capacity on 1" stock, 33" rip
capacity. Greater capacity at
optional cost.

LOOK AT THESE STAND-OUT SKIL ADVANTAGES!

Clear work table! Provides plenty of layout room, more usable work area than other tables. No blind spots! No "ducking" under overarm!

Greater rigidity and support! Exclusive wide spacing of 8 grease-sealed ball bearings in the supporting head gives maximum strength and support.

Easy cut changeover! Because of short radius, cutting head is always moved back of fence through complete 180° arc. Any angle cut may be set up in one quick step!

- Router-Shaper Attachment for 3 times faster routing and shaping!
- Optional Accessories equip SKIL to cut metal, plastic, tile!
- Convenient Controls!
- Safety Switch prevents accidental operation!
- Wrap-Around Upper Blade Guard
- Anti-kickback articulated lower blade guard!

"finger pressure" deal.*

K&M also makes a variety of Asbestos-Cement roofing shingles you should investigate.

*with K&M Nu-Grain
Siding Shingles*

*six colors to put the gleam
in a prospect's eye!*

"We'll buy it" is a decision that can be powerfully influenced by the captivating colors of K&M Nu-Grain shingles. There's strong appeal, too, in the tasteful Nu-Grain wood-shake pattern, and in the horizontal shadow lines of the laid shingles. Shingles shown here are Nu-Grain Gray and Nu-Grain Brown. The other four Nu-Grain colors are Green, Red, Whitetone, and Canyon Coral. Choose any of the six exciting Nu-Grain colors—or combine two for siding that lends extra value and beauty to any home.

Beauty the years can't dim.

The color of K&M Nu-Grain Shingles is there to stay—defies sun and weather. Color is actually *built* in with ceramic granules imbedded into the shingles under hydraulic pressure. Nu-Grain Shingles won't burn, rot, or corrode—in fact, they become *harder* with age—because they're made of asbestos fiber and portland cement. A special silicone treatment resists water-borne dirt which ordinarily causes streaks under sills and other trim.

Get all the facts.

Check your *Sweet's Light Construction File* or *Sweet's Architectural File* for complete details on Nu-Grain Siding Shingles. Or write directly to us.

Upgrading of MPRs approved—with strings geared to price ranges, local conditions

While builders generally frown on Federal Housing Administration plans to step up its minimum property requirements another notch, an American Builder news roundup indicates that many are ready to give qualified endorsement if the upgrading process will:

1. Recognize different standards for various price ranges.

2. Permit changes to suit varying local conditions.

For instance, Mitchell Cope of Portland, Me., believes it to be in the best interests of the building business that a moderate increase in MPRs occur annually for these reasons:

"1. Per capita earning power increases in the United States from 2 to 3 per cent each year.

"2. It would assist in eliminating some causes of service calls for the builder.

"3. It would eventually prepare the way and form the basis for longer term mortgage financing."

However, before approving such FHA action, Cope suggests that "because of geographical location and soil conditions, the chief underwriter of each district should be able to qualify the requirements when necessary."

G. H. Wright Jr., president of Wright Construction Co., Raleigh, N. C., would take present controls as an average, keep them in effect for medium-price houses, lower them somewhat when dealing with low-cost homes and raise them for higher-price units.

Link valuation to quality

One of northern Indiana's larger builders specializing in low-cost homes feels strongly that while FHA should raise its sights on quality in several lines, "the builders' biggest problem is to get FHA to increase the valuation of the house enough to cover the use of true quality materials."

"Requirements for heating, water heaters and wiring are not high enough," he believes. "To replace or

repair these items at a future date is very costly for the home owner.

. . . There are still too many poor quality items of hardware, doors, windows, etc., accepted by FHA that should not be used by any builder."

On the other hand, he would relax FHA rules governing operations the buyer can easily add or do himself at a lower cost, such as painting gutters and downspouts, lawn seeding, use of concrete walks instead of stepping stones. For example, he points out that "a completed house could be given only two coats of paint on the exterior by the builder, while a third coat could be added a year later by the buyer, who could also paint the entire interior."

Pricing out of a market?

Several builders feel that new MPRs are out of line with the price of houses. "We are gradually pricing ourselves out of a market," declares Russell Showalter of Oklahoma City, newly elected president of the Oklahoma State Home Builders Assn.

"I do not think some of these requirements are properly thought out," he says, "with respect to cost in proportion to the benefit the home owner receives." In one such case, builders in his area sought a 60-day extension from FHA before it made effective a requirement to insulate under floors "in order to have time to get data to prove it was not necessary here."

Price appears to be the main reason why about half of the builders against any further advancing of the property requirement minimums. One developer in Louisiana reports that any more increases "would affect adversely the opportunities, and in some instances, even the possibility of home ownership."

Conflicting interpretations

A Texas developer now selling three to five houses a day with prices starting at \$9,000, insists that current "requirements and other red

tape imposed by FHA and VA have increased building costs tremendously."

Rather than change any more requirements, Dale J. Bellamah of Albuquerque, N. M., thinks that "far more important, from the position of the building industry, would be an authoritative clarification of conflicting opinion and interpretations of the present MPRs as now exist between different offices of the VA, between different offices of the FHA, and between offices of the VA and FHA. . . ."

"After all, both agencies work from the same book. Why then, can't the interpretation be the same. I say 'more reason rather than more restrictions'."

Bellamah points out that latest MPRs are at least as restrictive as most state and local building codes. Anything more stringent, he reasons, "would only increase the price of the dwelling, incommensurate with the increase in structural soundness or livability of the dwelling."

Each boost cuts out buyers

From Phoenix, Ariz., John C. Hall, builder of Hallcraft Homes, insists that too many people are already unable to own their own home because of the high cost of construction and property. . . . "Increasing the minimum property requirements will increase the cost of the minimum house, thus making another group of families who are now in the marginal income bracket ineligible for home ownership."

On the side of those favoring upward revision of most standards and cutbacks in some is Val Zimmerman, whose Zimmerman Homes operate in several price ranges at Milwaukee. FHA should consider, in his opinion, "the varying conditions of different parts of the country, with assistance and consultation of reputable builders actually operating there."

Gale A. Goodwin of Rapid City, S. D., would like to see a standardization of the minimum requirements for various price ranges.

Will supply lines keep filled in '56?

- Labor will be adequate, as will most materials
- In some areas, starts' slowdown may automatically solve the materials problems
- In other areas, builders will order early, use substitutes, even change their construction plans, if necessary, to keep production humming

"Number of housing starts in 1956 will determine extent of shortages. We will continue to build as many houses as we can sell. We will attempt to minimize material shortages by placing firm orders with rated firms and obtaining firm commitments from manufacturers whenever possible."

This answer, from Lawrence J. Goldrich, president of the Leslie Construction South Corp. of Norfolk, Va., fairly typified the attitude of builders answering a nationwide telegraphic survey by American Builder, which asked: "Do you foresee any material shortages or labor problems to interfere with your operations this year?"

Many were confident they would obtain sufficient materials in their area, but some were not so sure, despite manufacturers of critical lines such as cement and gypsum board rushing additional facilities to completion in time to pack up production schedules. Little worry over the labor supply was in evidence.

Considering the southeastern area, Goldrich reported "present indication and past experience points to shortages in gypsum products, fibre-board, wall sheathing and oak flooring."

Plan paving speed-up

"It wouldn't be a normal year if we weren't faced with some shortage of materials and labor difficulties," says Clair M. Wilson of the Wilson & Johnson Co., Omaha. "We expect some critical shortage in cement to develop sooner this year, probably late spring. Consequently, we plan to step up paving operations in our development." He anticipates a short supply of gypsum wallboard, but no labor problem.

From Tulsa, Okla., L. R. "Andy" Latch, head of the Metropolitan Building Co., declares: "We see no serious material or labor problems here to interfere with building operations. The mortgage picture is a most

serious deterrent, but we are hoping the 1956 political situation will thaw this threat."

Will substitute, if necessary

Like many builders, Allen K. Davidheiser of Pottstown, Pa., is getting used to shortages. "Sure, there will be material shortages in '56," he says. "We'll substitute as in the past, will use a different type of construction or may cut down production, but only as a last resort."

From the nearby Philadelphia area, Ralph Bodek of Upper Darby could "not foresee any material shortages or labor problems at the moment."

Goal: sell more houses in '56

"I'm very optimistic about the immediate future," is the word from Charles J. Lo Dolce at Berlin, Conn. He finds the material supply fair, although slightly more expensive, except for lumber prices, which are softening. As for labor: "men are available at higher hourly rates, but I'm concerned about carpenter labor

next spring because of need of carpenters in rebuilding flood area."

Lo Dolce, a transplanted Long Islander who turned to low-cost projects in the Hartford area several years ago, is most concerned about tight mortgage money. "Loosening of controls is very, very important; however, the market is very good and I should build and sell more houses in '56 than in '55 in spite of the fact selling prices will be higher."

Labor to ignore 'drop'?

Labor may pose a problem on Long Island this year, believes Victor E. Kohn of the Winster Co., Huntington, N. Y., who believes "labor will ignore published figures of a drop in housing units and drum for a steady increase. He notes glass, "sheetrock," rocklath and plumbing china as "very tight"; adds ominously that "copper tubing and some other items are not really short, but in supply only to those willing to feed kitty."

(Continued on page 306)

LOOKING AHEAD TO BIGGER 'PREFAB' MARKET

Senator John J. Sparkman of Alabama joins some delegates at the Prefabricated Home Manufacturers Institute convention in Lookout Mountain, Tenn. (from left): Thornton E. Stokes, Fort Payne, Ala.; Sparkman; P. S. Knox Jr., Thomson, Ga.; PHMI president; George E. Price, Lafayette, Ind., PHMI vice president; Charles E. Fry, Springfield, Ohio; Frank Baldus, Pittsburgh; Hart Anderson, Shakopee, Minn.; Harry H. Steidle, PHMI manager.

1956: A year of challenge to nation's home builders

The year ahead is going to be a good but highly competitive year for the home building industry. And like every year, it will produce its full share of problems. None appear insurmountable, but taken individually and together they offer a formidable challenge to the industry and its spokesman, the National Association of Home Builders. The principal problems, as I see them, are:

Dickerman

Top problem: mortgage money

Tightness of the supply of mortgage money in recent months has been one of the most critical problems confronting the home building industry. As we move into the year, it looks as though the greatest limiting factor on home building will be the availability of mortgage funds.

The tight mortgage situation, evident since last spring, has been complicated both by expanding credit demands from all sectors of the economy and by the efforts of those responsible for monetary policy to cope with this through general controls such as the Federal Reserve rediscount rate. The decline in housing starts which we now are witnessing, and which mean we will move into 1956 at a volume rate substantially under that of 12 months ago, reflects adjustments which have been taking place in the free money market, and not the mid-year credit restrictions.

While I believe there are good reasons for hoping that credit managers will ease the money supply during the course of the next year, I also feel certain that new sources of mortgage money must be sought out. The further exploration and development of pension funds as one good, new source should be continued. As we all know there are many technical and legal problems in this area which only time and diligent effort will solve.

Credit restrictions

Because of the lag and lead time factor in home building, because there are many months of business activity preceding housing starts, control actions affecting our industry always are slow in making their effects felt. Higher down payments

and lower amortization periods ordered by FHA and VA last July have not, as I have indicated, had any substantial direct effect on the market. When they do take hold, it will be on a declining market. It is to be hoped that officials responsible for the restrictions will recognize this situation and the hardships imposed and remove them before they have further adverse effects.

Rising building costs

I am deeply concerned about the continuing rise in building costs. New price increases of building materials are in the offing; money has become more costly in many areas; land prices have mushroomed upward; wages in the construction field are likely to increase in many cities. Repeated increases in construction requirements by FHA and VA and local communities also play an important role in pushing up ultimate sales prices.

Thus far, the home building industry, through improved techniques in planning, purchasing and construction, has been able to offset to a remarkable degree the steady rise in building costs. But this cannot continue indefinitely. As houses become more and more expensive, the industry and its associates move further and further away from the large market that exists in the lower income and minority housing fields. Ways and means must be found to bring decent economical housing within the reach of all of our people. This is not only an obligation but a necessity for our industry.

Community facilities

NAHB earlier this year designated community facilities as the "Number One Industry Problem" and there has been no reason to change that estimate of the situation. The need for good schools, roads, water and sewage facilities is greater than ever and poses a tremendous problem not only for builders but for the community. And, it is only by the efforts of all elements in the community that intelligent steps can be taken towards a solution.

Rehabilitation; legislation

The forthcoming year will see new and greater efforts to eliminate city slums and check deterioration of

older urban areas. The problem is great and progress at best has been slow. Meanwhile, time is running on during which the industry and our communities must get this job well under way—and before the anticipated great new housing demand of the mid-1960's absorbs our men, material and energies.

With 1956 a presidential election year, housing is certain to be a major topic of discussion in Congress, at the national conventions and during the campaigns. Many of the problems I have already outlined will be aired and it is likely that the operations of the Federal National Mortgage Association (Fannie Mae) and the FHA will be carefully reviewed. In addition, an extension of the GI Bill of Rights and, of course, the perennial issue of public housing will be up for debate. Without doubt, there will be some rousing battles before the year is over.

Bright spot: continuing demand

One bright spot in 1956—and it's very bright indeed—is the continuing demand of the American people for new and bigger houses. Here again, some refinement of mortgage credit devices and a more equitable flow of money will be necessary to meet this demand fully. From all present indications and the fine state of health of the general economy, builders can look forward to a good, albeit highly competitive market throughout the year.

Total housing will, in 1956, for the eighth consecutive year exceed one million starts. The consensus is an output of around 1.2 million units, a decrease of 50,000 to 100,000 units from the anticipated 1955 volume. Dollarwise—in view of increased building costs, bigger houses and increasing demand for more new expensive materials and equipment—1956 should be roughly equal to the \$14.6 billion estimated for 1955, the best business year in the history of the industry.

GI loans at peak

Revised Veterans Administration reports showed the agency guaranteed 64,497 GI home loans in October, totaling \$717,344,355, highest amount in the program's history. These figures brought the total for first 10 months of 1955 to 527,918 loans totaling nearly \$5.8 billion.

Battle continues on credit curbs

With all signs pointing to a continued high number of housing starts during 1956, the battle continues as to whether credit curbs are "good" or "bad."

Although he thinks housing starts on an annual basis of 2 million are "not out of the realm of possibility in the years ahead," Housing and Home Finance Agency Administrator Albert M. Cole is still engaged in carrying out the Eisenhower administration's policy to maintain starts on something like a 1.25 million basis in 1956.

Stating that his policy is one calculated to maintain a "high level" of starts in 1956, Cole indicated that 1.2 to 1.3 million is "high level" in the Eisenhower administration's book. He opined that there are neither funds nor market demand to sustain the 1.5 or 1.6 million starts which have been suggested for next year.

Cole's statements were echoed by federal officials appearing at a Senate Banking and Currency subcommittee hearing on government credit policies in housing and other fields.

LUMBER MANUFACTURERS' SELECTIONS FOR '56

New officials of the National Lumber Manufacturers Assn., elected at the 1955 annual meeting in Washington, D. C. (from left): Leo V. Bodine, executive vice president; Henry Bahr, secretary; Judd Greenman, board chairman; Lawrence D. Kellogg, president; Walter M. Leuthold, first vice president; J. R. Bemis, policy chairman.

Chairman William McChesney Martin, jr., Federal Reserve Board, joined the growing list of public officials who have said that credit restrictions are aimed at keeping inflationary pressures from getting out of hand. He conceded that general credit restrains as applied by the reserve board with increasing severity since April might have special effects on the housing industry, but said the board must keep its eye on the "general credit pool." Undersecretary Randolph W.

Burgess of the Treasury also said he was not worried about the housing situation.

Levitt has other ideas

William J. Levitt, builder of Levittown, Pa., sharply disagreed, telling the group that current restrictions would cut his business by about 20 per cent next year. He said that general credit controls are not flexible enough to meet special demands of home builders.

DEALER'S VIEWPOINT

By H. R. Northup, Executive Vice Pres., National Retail Lumber Dealers Assn.

Many advertisers ignore 'tell customers where to buy' rule

A good many national advertisers who manufacture products commonly sold in retail lumber yards are disregarding one of the fundamental rules of good advertising. The rule in question is the one that says an advertiser always should tell the reader where he can purchase the product being advertised.

A survey of advertisements published in 10 consumer magazines revealed that only one-third of the 135 companies advertising products carried in retail lumber yards advised the reader to "See your retail lumber dealer" or "building material dealer" or something similar.

The others either didn't tell the customer where the product can be obtained, advised him to consult the classified telephone directory, invited

him to write in for the name of the dealer, or suggested going to a hardware or department store.

Several outlets named

Oddly enough the list of manufacturers who did not refer the customer to his local lumber yard included six organizations producing wood or wood products. Possibly, these advertisers thought it unnecessary to tell the customer to go to his lumber dealer for something made of wood.

Quite a few advertisers named several types of outlets, suggesting, for example, that the customer go to his "hardware store, lumber dealer, or department store."

Some producers of standard lumber yard materials tell the reader to "See your (name of advertiser) dealer" instead of "See your lumber dealer."

Although the Saturday Evening Post survey showed that 82 per cent

of the lumber dealers handle paint, only two out of a dozen paint manufacturers listed the lumber yard as the place to buy their product. Most of them said "See your paint dealer" or "See your hardware dealer."

Both sides can benefit

Those manufacturers who suggest the lumber yard as the source or as one source of their product undoubtedly sell more than they otherwise would and, in addition, they do the retail lumber industry a good service by reminding the public to visit their lumber yard where they also may find other things they want or need.

Those few extra words in a magazine advertisement might also win wider distribution for the products in addition to giving the lumber dealer a larger share of the demand. If enough people ask for a product that a dealer hasn't been handling, he sooner or later decides to stock it.

Northup

OFFICERS INSTALLED AT WICHITA

Executives of Wichita Assn. of Home Builders, installed December 1, include (from left) Don Alldritt, secretary-treasurer; Erle W. Jennings, president; J. A. Hendrickson, third vice president; Lloyd Forsee, first vice president. David Jones is the new second vice president.

S. JERSEY BUILDERS HEAR FHA HEAD, EDITOR

Michael Albert, Camden, N. J., FHA director and Ed Gavin, American Builder editor (front, from left), speakers at recent meeting of Home Builders League of South Jersey, with Blaise Ravikio, president. In rear are Harold Sarshik and Charles Gemberling, former association presidents.

Scholz to build two show homes in 64 hours

In the last 64 hours before opening of the 1956 International Home Building Exposition May 12 at the New York Coliseum, **Scholz Homes Inc.** of Toledo plans to erect two houses, 1,692 sq. ft. and 968 sq. ft., complete to landscaping.

Following the signing of contracts, **Donald J. Scholz**, president, said that every newly developed technique would be used to get the job done on time, with construction, decorating, furnishing and landscaping teams being "stop watch scheduled" for maximum efficiency.

Robert A. Durk, managing director of the exposition to be held May 12-20, said negotiations are under way for two other houses to be erected within the same time limit. All are to be located on the coliseum's second floor.

Donald J. Scholz signing contract to erect two full-size houses in 1956 International Home Building Exposition, New York, next May. Looking on are **John Owen** (left), director of exhibits and **Robert A. Durk**, exposition managing director.

Albany to award show house

Home Builders Assn. of Albany, N. Y., plans to construct a house to be ready for inspection by February 15 and to be awarded as grand prize at its 1956 home show March 3-10, according to **Harold Green**, committee chairman. . . . Two 26-year-old architects, **Richard Fleischman** and **James Hawver**, won the \$1,500 top award in the "Ohio Home" contest sponsored by HBA of Greater Cleveland. Their design will be built in Cleveland's Public Hall as a feature of the annual home and flower show March 3-11. . . .

Other upcoming home shows: St. Louis, February 4-12; Philadelphia, February 13-18; Milwaukee, March 3-11; Rochester, N. Y., March 10-17; Detroit, April 7-15; Boston, April 14-21; Providence, R. I., April 23-28. . . . Madison, Wis., has set third week in May as date for its spring Parade of Homes. . . .

State groups elect

Earl R. Simpson of Brigantine, N.J., succeeds **Richard D. Hudson** as president of the New Jersey HBA. Other officers include **Louis V. Bossert** of Bordentown, first vice president; **William Marlon** of Elberon, second vice president; **Joseph Goldman** of Dumont, treasurer and **Charles A. Gemberling** of Haddonfield, secretary. . . . Ohio HBA elected **Raymond Sharp** of Cincinnati as president to succeed **Mel Kimmey** of Dayton. . . . **W. Howard Parsons**, veteran Erie, Pa., newspaperman, has taken over the post of executive director of the Pennsylvania State Assn. of Home Builders and is establishing a headquarters

at Harrisburg. . . . **Franklin B. Wimer**, president of the Franklin Land Co., was installed November 14 as president of the HBA of Metropolitan Pittsburgh, with **Calvin D. Crawford**, first vice president; **Russell T. Miller**, second vice president; **O. John Valentine**, treasurer; **Hayward V. McIntosh**, secretary. . . .

Long Island picks Zummo

Anthony S. Zummo of Queens Village, N.Y., NAHB labor committee chairman, takes office January 1 as president of the Long Island Home

Zummo

Builders Institute, while his predecessor, **Emil M. Keen**, becomes board chairman. **A. Sidney Roth** was elected first vice president; **Willard L. Bergman**, **Daniel B. Grady**, **Nathan S. Siegel** and **William Hetzel**, regional vice presidents; **Lester M. Tobin**, secretary, and **Frank A. Clauson**, treasurer. . . .

HBA of Greater Kansas City installed its new president, **E. R. "Gene" Elgin**, at its annual Christmas dinner-dance December 2, along with other officers: **Harry Steinbaum**, vice president; **John S. Kelly**, secretary; **George D. Mittong**, treasurer. . . . Northern Illinois HBA also chose its Christmas party as occasion to install new officers: **Lee Newman**, director-chairman; **John E. Birch**, vice chairman; **Merritt R. Evans**, secretary; **H. Victor Hoyer**, treasurer. . . . **Ralph Aldridge** is president of the new HBA of Howard County, at Kokomo, Ind.

AllianceWare
PORCELAIN ON STEEL

Bathtubs • Lavatories Closets • Sinks

FOR THE FINEST HOMES AND APARTMENTS

Whether your demand is for sanitary fixtures in glistening gleaming white or for units of matched color in pink, tan, blue, green or grey, you'll find your choice in AllianceWare—the most complete line of formed metal sanitary fixtures—preferred by an ever-increasing number of progressive builders and plumbers from coast to coast.

BATHTUBS

5-foot tubs—recess and corner models—of porcelain on steel each with an integral wall guard flange that prevents water leaks between tub and wall. The AllianceWare exclusive patented method of wall-hung installation keeps tub from setting and pulling away from the wall. AllianceWare design provides a "grab-rail" the full length of the tub for greater safety in entering and leaving the bath.

All AllianceWare tubs are available in white, pink, blue, green, grey, and tan.

For modernization
 —for a shower receptor.

The AllianceWare "Junior" — a 42" recess tub illustrated below — excellent for modernization jobs in limited space and for superior as a shower receptor.

LAVATORIES

Wall-hung shelf back lavatory of porcelain-on-steel with or without overflow.

Flat rim lavatory with deep and generous bowl for tile or linoleum installations.

All AllianceWare lavatories are available in white and five colors.

CLOSETS

Close-coupled combinations —one a reverse trap, the other a wash down—the types most popular in today's construction. Each style assures positive, quick flushing.

Available in white and five colors.

DE LUXE SINKS

Porcelain, metal formed from heavy, 14 gauge. These sinks have double bowls or single bowls. Sliding drain boards are optional on some models. May be mounted on standard sink cabinets. Several models may be installed on legs without cabinet.

FLAT-RIM SINKS

Single bowl or double bowl, with and without faucet ledge. Also sink and tray combinations with and without faucet ledge. The design of these sinks permits a continuous tile or linoleum drain-board to rest flush with the edges of the rim.

Write for the complete AllianceWare catalog of detailed specifications and installation diagrams.

Quality Approved

ALUMINUM WINDOWS

Builders everywhere are finding that houses actually do sell faster when they include such quality features as "Quality-Approved" aluminum windows. And that explains why aluminum windows are growing in popularity so rapidly.

A recent study of residential building by the U. S. Bureau of Labor Statistics shows that aluminum windows were used in 23.6% of the single-family houses completed during the first quarter of 1955 as against only 15.2% during the same period in '54.

The reason is quite clear. There is a definite trend to "Quality." Today's home buyers are looking for better value and more and more builders realize that "Quality-Approved" aluminum windows (double-hung, casement, awning, sliding, projected or jalousies) are a real sales asset.

To make your houses more salable, give them the magic Touch of Quality by including "Quality-Approved" aluminum windows, complete with screens and storm sash, all in a single-package mortgage.

For additional information consult Sweet's or any of the quality approved manufacturers listed below, or write direct to Dept. AB-61.

Traditional "two-story" plays tricks

For a sloping site, many builders would automatically reach for a split level plan. But H. V. McIntosh had a different idea. Knowing the inherent economies of the two-story, particularly in respect to framing, he stuck to a simple rectangular plan and gave his buyers certain options as to the number of bedrooms, amount of equipment, etc. they might require. He further departed from the traditional way of thinking by creating an upstairs playroom that leads directly to the back yard.

Considerable care went into the technical problems of this Alquippa, Pa. house—heating, lighting, garbage and trash disposal, etc. Its all-gas equipment includes the following:

dishwasher	incinerator
range and oven	refrigerator
Youngstown cabinets	furnace
water heater	washer and dryer

The refrigerator is a Servel; range and oven, Chambers; washer and dryer, Hamilton. The buyer gets all—no strings attached—plus an 30' x 150' lot for \$19,000. But McIntosh knocks \$1,000 off the list price for a buyer who has his own lot and thinks he can do without the incinerator and dishwasher supplied by the builder.

In a further effort to give the buyer what he wants, McIntosh makes it easy for him to have a four-bedroom house instead of a three—simply by taking out the playroom and moving over the upper level bathroom. This cuts down the length of the master bedroom somewhat, but it's still ample in size (12' x 13') for most people.

A surprisingly large amount of storage space is to be found in this two-story. One reason is the large closet in the carport. It alone accounts for over 100 cu. feet of storage space.

the MONTH for JANUARY

◀ **TAKING LEAVE** of the traditional all-brick front, builder Hayward V. McIntosh has varied lap siding with vertical, continued line of carport over front entrance. Street side of house is not too exposed, has Pella windows.

1. IT SMOOTHS OUT A SLOPE

DIRECT ENTRY to house can be made from either front or rear—without climbing long flight of steps. Upper level has door opening directly off playroom. House has conventional 2" x 6" rafters and ceiling joist construction with 4" batt insulation. Lower level has a slab floor.

2. IT LIGHTS UP A LOW KITCHEN

NO PICTURE WINDOW is to be found in this kitchen, but it nevertheless has adequate daylight because of windows on two sides. Built-in equipment is all gas; cabinets, steel. One of optional extra sales features in house is incinerator, located in corner of utility room.

SECOND FLOOR

FIRST FLOOR

3. IT PUTS A PLAYROOM UPSTAIRS

UP WHERE IT WON'T INTERFERE with housekeeping, playroom is on second level at head of stairs. Master bedroom is 19' long, may be reduced in size to make room for fourth bedroom. Lot levels off in rear to provide good play yard for children. Upper level has total of five closets.

4. IT RESCUES BASEMENT SPACE

"MAINLINER" LOWER LEVEL plan has large utility room containing mechanical core of house. Incinerator, forced air unit and laundry are located here. In revised version of plan (not shown) utility room was made even larger by removal of closet, which is now located under stairway.

New Oliver Jet Trencher for OC-3 Loader hooks up or detaches in 90 seconds

Exclusive 2-point hitch does the trick!

This new Jet Trencher is the perfect addition to the famous Oliver OC-3 Loader. It digs to 12 feet and lifts to 11½ feet—adds extra versatility without limiting tractor maneuverability or loader operation.

The exclusive hydraulic 2-point hitch makes hookup and removal a simple, one-man operation from the tractor seat. When the trencher is removed, the hitch holds the loader counterweight or quickly takes a number of handy attachments—scrapers, scarifiers, etc.

All new in design and construction, the Jet Trencher places all stress and strain on the trencher frame, not on the tractor. Its new mounting, offset to the side of the tractor, gives unmatched visibility and permits close parallel digging to walls, foundations. Full 180° boom swing gives straight side dumping.

Working from the loader hydraulic system, the Jet Trencher has powerful down pressure for digging

through tough soil. Hydraulic control gives smooth, cushioned operations and insures long-life, low-upkeep operation. See this new trencher and OC-3 Loader. Ask your Oliver Industrial Distributor for a demonstration.

Hydraulic 2-point hitch is adjusted to fit slots on sides of trencher as tractor is backed into position. Snap-on fittings connect hydraulic lines—seat is swung around and trencher is ready to operate. When not attached, trencher rests, as shown here, on stabilizer blade and bucket.

Building
Specialties*

**FOR
DOORS**

Numetal WEATHER STRIP

This complete package unit means easier handling for you . . . easier installation for your customers. M-D Numetal door sets are available with regular door bottoms or with threshold and exposed hook.

Numetal WEATHER STRIP

Sets for windows

Handy to buy, handy to use. Here in one attractive package is a complete M-D Numetal Weather Strip set for a single window. Available for all standard 28", 30", 32" and 36" double hung windows. M-D packaged sets save selling time . . . cut handling costs . . . make inventory easy.

HANDY PACKAGED SETS! Ready to hand customers! Ready to use!

Numetal DOOR BOTTOMS

Made of extra thick wool felt and heavy gauge stainless steel, brass or aluminum. Standard lengths—28", 30", 32", 36", 42" and 48"—packaged 1/2 doz. same length to carton. Special lengths available.

On-GARD COIL

WEATHER STRIP

This stainless steel or bronze coil weather strip is packed two ways—six 18 ft. rolls in free display carton, or in 100 ft. individual cartons.

BUILDERS

For highest quality and dependability always specify M-D products. Sold by hardware, lumber and building supply dealers throughout the country!

DEALERS

Order Today! Your order shipped same day it is received! All M-D products are fast sellers, nationally advertised.

Nu-WAY

WEATHER STRIP

Easiest in the world to put on

This easy-to-put-on weather strip makes friends as it makes you profits. Works perfectly on windows, storm sash or doors. Made of wool felt and white metal. Each individual carton contains one 18 ft. roll with nails and instructions. Packed 12 cartons in display case.

This free, colorful display case takes very little counter space . . . but does a big job of selling.

Nu GARD

Automatic DOOR BOTTOM

Here's the perfect automatic door bottom and draft eliminator for ALL doors. Completely solves old problem of clearing rug or floor every time door opens. Easily installed on right or left hand door. Smartly designed with silvery-satin finish—will not rust or tarnish. Furnished in standard lengths—28", 32", 36", 42" and 48". Packed in individual cartons.

UP automatically to clear carpet easily when door opens.

DOWN snugly against floor to seal out drafts when door closes.

Nu-CALK CALKING COMPOUND

World's best calking compound available in loads, with or without nozzle . . . hand squeeze tubes . . . or ½ pt., pt., qt. and gal. cans. Also 5-gal. and 55-gal. drums—gun or knife grade.

Nu-Glaze GLAZING COMPOUND

You can recommend this glazing compound with complete confidence that it always "stays put." Packed in ½ pt., pt. and qt. cans, 25 lb., 50 lb., 100 lb., and 880 lb. drums.

Nu-Phalt PLASTIC ASPHALT CEMENT

Ideal for sticking down asphalt shingles and general repair work on roofs and flashings. Comes in handy loads, with or without nozzle; 2½ lb. and 10 lb. cans; 50 lb. pails and 550 lb. drums.

MACKLANBURG-DUNCAN CO.

OKLAHOMA CITY 1, OKLAHOMA

Leaders in the Building Specialty Field for 35 years!

One of the four basic designs of the new houses being built in the Longmeadow Community, Pikesville, Md. In all, 120 homes will be built here on a 72 acre area. Each home will have approximately 42 squares of Flintkote Tapered Strip Shingles. Houses sell from \$33,000 to \$45,000. Korb Roofers, Inc., of Maryland are the Roofing Contractors.

"Flintkote Roofing helps sell the house,"

says Mr. Gordon Sugar, designer and builder of the beautiful LONGMEADOW Development

"Today roof color is very important in selling a modern type ranch house," explained Mr. Sugar. "For the large roof area is one of the first things a prospect sees.

"So we decided to *really* dress the roofs of our Longmeadow Development. To make a *wonderful* first impression! And to do this we selected Flintkote Tapered Strip Shingles. In those beautiful light pastel colors.

"As for the long-lasting protection! Flintkote Shingles have always been well known for that, too!"

Designers, architects and builders in every section of the country evidently agree with Mr. Sugar. For the trend to Flintkote roofing is even more pronounced than ever.

Use Flintkote roofing on your own new houses. You'll sell them faster . . . therefore, more profitably. And you'll insure your reputation for quality.

FLINTKOTE

The exquisite pastel shades of Flintkote Shado-Kool Tapered Strip Shingles add charm and character to a house.

Flintkote Tapers are 25% to 33% thicker at exposed areas than ordinary shingles. They are constructed to lie flat for better protection.

LUXURY LOCK FOR BUILDERS ON A BUDGET

THE 
Guardian
RESIDENTIAL
LOCK

Here's top quality with a low price tag! It's the CORBIN Guardian — specifically designed to give budget-priced residential construction the extra luxury of CORBIN locks throughout.

No other lock in the low-price field matches the Guardian in appearance, performance, and economy. Its external parts are rich, gleaming brass, bronze, or aluminum; with roses and knobs unmarred by screws. Internal parts are rust-resisting, precision-fitted. There are *no* die-cast parts. It's fully reversible to fit any door. And advanced features like the "Spring-Ring" rose plate make it really troublefree. Yet — the Guardian costs so little, is so easy to install, that it actually saves you *more* on every door!

Guardian Locks are available in 5 functions to meet every residential requirement. They're backed by a full guarantee on all parts and workmanship. Ask your CORBIN dealer for Guardian whether you're planning a unit or a project. You can't buy a better lock to save your money.

Portrait of a happy builder:

"222 homes in \$9,500 bracket... first group of 64 sold before completion... and every one with

"Pioneer" kitchens of birch, copper, and steel give \$9,500 homes the luxurious look of homes costing several times as much!

"The luxury of American Kitchens proved to be our most reasonable expenditure," says Mr. Cates, President of the Hines Building Corporation of Dallas. "They have been our main and most accepted selling point, and give our homes a luxurious look seldom found even in homes costing several times as much."

The "Pioneer" by American Kitchens is dramatic, exciting, modern—a stunning combination of natural birch and antique copper on a steel frame. It's easy to install and truly versatile—the "Pioneer" is perfect whether you're planning a simple kitchen center or a complete kitchen with matching appliances.

Most important, the "Pioneer" is a sales-clinching feature that adds comparatively little to your costs. Whether your homes sell for \$10,000 or \$40,000, home buyers immediately recognize the "Pioneer" as the finest in quality and styling. Builders from all sections of the country have been delighted with the luxury look of the "Pioneer"—it sells homes faster!

So if you haven't already discovered the advantages of the "Pioneer" and other American Kitchens products, mail the coupon at the right. Let us *prove* to you that American Kitchens can sell your homes faster!

American Kitchens of copper and birch on rugged steel frame..."

says Mr. C. Grady Cates, Jr., President, Hines Building Corp., Dallas, Texas

This is an aerial view of some of the homes being built by the Hines Building Corporation in Valwood Park, near Dallas. All 222 homes feature the birch and copper "Pioneer" by American Kitchens.

Here is how HINES BUILDING CORPORATION used the "Pioneer."

This is the "Pioneer" kitchen of one of the 222 homes the Hines Building Corporation is building in Valwood Park, a \$45,000,000 planned community near Dallas. The dramatic beauty of the natural birch and antique copper is a high spot of the home, blends perfectly with the overall design of the home.

For more elaborate kitchens, additional cabinets and accessories can be added, as well as matching antique copper appliances such as the famous American Kitchens "Roto-Tray" Dishwasher, the new American Kitchens "Set-In" Countertop Range, and the new American Kitchens "Set-In" Waist-High Oven. Both range and oven available in gas or electric models.

See the big American Kitchens display at the January Builders' Show, Conrad Hilton Hotel, Chicago!

ALUMINUM AWNING WINDOWS FOR EVERY NEED

now 100% weatherstripped

WARE MONUMENTAL AWNING

WARE AWNING - Intermediate

ECON-O-WARE AWNING

WHETHER IT'S A MONUMENTAL STRUCTURE, a fine residence, or a low-cost project, chances are there's a Ware awning window to suit your needs to a "T".

WARE MONUMENTAL AWNING WINDOW

- * Designed to meet the most rigid requirements
- * Perfected weathering — Koroseal weatherstripping imbedded in channel, perfect seating of ventilators
- * Heavy Extruded Sections — 1 1/4" ventilator depth. Minimum thickness of all structural members 1/2"
- * All moving parts bushed in self-lubricating nylon
- * Strip proof heavy compound operator concealed in center of sill, synchronized distribution of load, unparalleled load safety factor for aluminum awning windows

WARE AWNING WINDOW—Intermediate

- * Smooth sturdy CENTER SILL operator—a compound operator sealed and installed in sill at factory
- * Weatherstripped by premium vinyl locked in extruded channel unexposed to weather
- * Wide overlap of weathering members. Min. outside at jams 5/16". Heavy reinforced sill
- * Ventilators have equal height and drop, clean easily
- * Engineered for simple, speedy installation, designed for great diversity of application

ECON-O-WARE & ECON-O-WALL AWNING WINDOWS

- * Best value on the market: low-cost with quality features
- * Simple, attractive trouble-free design
- * Variable sizes and mullion combinations
- * Corners flash-welded — stainless steel bushings
- * NOW 100% weatherstripped

Whatever your window needs, be sure to get all the facts on the full Ware line . . . proven in thousands of installations from coast to coast

Dependable delivery assured thru regional warehouses in HOUSTON, ATLANTA, CHICAGO, and NEWARK. All windows manufactured in our giant 3 1/2 acre plant in Miami. Write Dept. AB-1

8 BASIC BUILDING MATERIALS

FROM 1 LEADING SOURCE—CERTAIN-TEED

SHINGLES

Certain-teed Asphalt Shingles come in a wide range of beautiful colors and blends, including pastels. For distinctive homes use Woodtex,® the extra-rugged asphalt shingle with attractive built-up graining.

SIDING

For lasting beauty, use Certain-teed Asbestos Cement Siding Shingles. Handsome range of colors and styles—never need repainting. Certain-teed Asphalt Shingle and Roll Sidings available in a choice of designs and colors.

WALLBOARD

Certain-teed Bestwall® Gypsum Wallboard comes with plain or predecorated wood-grain finishes. For fire-rated construction with single layer application, use Firestop Bestwall,® 5/8" thickness gives 1-hour fire resistance.

INSULATION

Certain-teed Fiberglas® Insulation—in batts, blankets, pouring wool, and in perimeter insulation—cuts heating costs up to 40%. Foil-enclosed batts and blankets for air-conditioned homes permit smaller units, help keep sales prices attractive.

PAINTS

For the perfect finishing touch to walls and ceilings: new Certain-teed Bestwall Paints, including popular alkyl flats and latex. Decorator colors—quick drying—easy to clean.

LATH

For smooth, fast plastering, specify Certain-teed Beaver® Gypsum Lath. Both plain and perforated. Strong—fireproof. Beaver Insulating Gypsum Lath with aluminum foil back provides insulation and an effective vapor barrier.

PLASTER

All Certain-teed Plasters are "Plastized"® for easy working. Use these famous brands: Acme,® Agatite,® Beaver,® Certain-teed,® Pure-Wite,® and Lite-Mix® for basecoat, finishing, gauging and molding plasters. Also Kalite® acoustical plaster.

SHEATHING

Your homes will have greater structural strength and fire resistance with Certain-teed Weather-Shield® Gypsum Sheathing. Tongue and groove V-edges—water-repellent core and paper. Actually costs less than most other sheathings.

*T.M. OCF Corp.

Inland Homes

...under roof in 1 day,
makes **WINTER BUILDING** profitable!

Speed of erection of the INLAND HOME package
lets you **build the year 'round!**

Why hibernate during winter months? Build continuously—snow and ice do not stop demand for good homes—in fact, it's easier to sell when others have slowed down on construction.

The Inland package is under roof in less than one day. By advance planning, with foundations or slabs in place you can erect an Inland Home almost any day. You are building when there are fewer material shortages—when mortgage processing is handled faster.

Winter building with Inland Homes gives you tremendous advantages both sales and profit wise.

We have a complete story that tells you how easy it is to build any one of more than 60 Inland Home models this winter. Write, wire or 'phone us NOW if you want to take advantage of winter building. No obligation.

Statistics show that there has been a definite trend toward an increase in winter building, with housing starts during December 1954 and January and February 1955 up 26% over same quarter in previous year.

Get your share!

This means only one thing. If you are to get your share of sales, you must include winter building—and if you want to insure trouble-free winter construction, you must buy a package that has been tailored for winter erection. The Inland package is winterized.

**IT'S A "MUST" FOR YOU
TO HAVE OUR STORY**

Inland Homes

INCORPORATION

Vornado[®]

REVOLUTIONARY PACKAGED
HOME AIR CONDITIONER

... just cools **BETTER**

The most Sensational Advance in Central Cooling

● **HIGH PERFORMANCE**

Twin systems with commercial compressors produce maximum cooling and constant humidity control.

● **LOWER COST**

Self-contained, air-cooled unit, and exclusive new prefabricated duct drastically lowers unit and installation costs.

● **FAST INSTALLATION**

Can be easily added to heating duct work, or a complete ready-to-assemble duct kit of Fiberglas is provided where needed.

● **FULLY GUARANTEED**

Factory warranty (backed by the experience of building over 7 million Vornado cooling appliances) assures satisfactory service.

● **FHA**

Designed and manufactured for use in FHA mortgage-insured properties.

Only Vornado has been successful in putting the practical features builders wanted in a low cost residential air conditioner. New engineering principles ... plus many years of manufacturing "know how" ... have been combined to develop this amazing air conditioner for the building trade.

Here for the first time is a central air conditioning unit you can easily install ... sell at a low price ... and confidently know it will give years of carefree, troublefree, air conditioning in the homes you build.

Look at These Amazing Facts!

Products of

THE O. A. SUTTON CORPORATION, Wichita, Kansas

Specialists in the manufacture of comfort cooling appliances

Vornado's GREAT NEW Pre-Engineered - Pre-Packaged - Ready for the Job

LOOK AT THESE AMAZING VORNADO UNIT FEATURES

EXCLUSIVE DIFFUSERS

Can be located any place in the ceiling area without affecting cooling efficiency. Unique fin arrangement allows direction of air any place desired.

TWIN COMPRESSORS

Two hermetically sealed, heavy duty compressor units. One compressor operates continuously... maintains a cold evaporator at all times... constantly removes humidity from the air. For economy of operation, second compressor "cycles" on and off as needed.

TWO HIGH CAPACITY EVAPORATOR BLOWERS

Each with twin air inlets... balanced to the large coil area of the evaporator for quiet movement of a large volume of cool air.

COMPLETELY AIR COOLED UNIT

Requires no water connections... completely eliminates expense of water systems and maintenance.

NO TROUBLESOME VALVES

Hermetically sealed unit eliminates costly "on the job" adjustments... seasonal maintenance calls.

NO EXPENSIVE OLD FASHIONED PLUMBING

Eliminates complicated water controls, pumps, towers... Stops water system maintenance expense.

ELECTRICAL CONTROL BOX

Is pre-wired for quick connection of manual 3-position switch or for automatic cooling with a thermostat.

CONDENSER FAN AND SLINGER RING ASSEMBLY

Pulls huge volumes of fresh outside air over condenser. One piece fan blade is perfectly balanced and tracked for vibrationless operation.

TWIN RUN CAPACITOR

Reduces amperage draw... makes possible the "cycling" on and off of the second compressor for Vornado Twin System cooling.

VORNADO Prefabricated DUCT EASILY INSTALLED

IT'S FEATHER QUIET

Ductwork... especially balanced to the unit... completely eliminates any air "whistle". Millions of intertwining glass fibers form microscopic air pockets to absorb noises.

IT'S AIR TIGHT

Vornaduct is a full three-quarters of an inch thick, presenting a barrier to entry of hot, outside air keeping inside air cool longer.

IT WILL NOT SWEAT

Reinforced aluminum foil vapor barrier around the outside prevents "sweating" (condensation of air-borne moisture) which can ruin ceilings and walls.

IT'S FLAME RESISTANT

The hard finish, flame resistant coating of all Fiberglas ducting gives you vital protection while assuring the efficiency of maximum air velocity.

● COMPLETELY SELF CONTAINED

Vornado puts residential air conditioning in a "package"... eliminates any extra plumbing... piping... water connections... or outside accessories. Everything is housed in the one small... compact... sturdy package.

● PRE-FABRICATED DUCTWORK

Vornado engineers successfully developed this low cost, prefabricated, insulated ductwork that drastically reduces your installation costs. Assembled by merely taping pre-scored sheets together... it is one of the most amazing new developments in the air conditioning field.

● SIMPLIFIED CONTROLS

One simple switch... plus a thermostat if desired... completely controls Vornado's powerful cooling operation. Can be set on "Hi" for extra hot days... or reduced to "Lo" for mild days and more economical operation. During winter months just turn unit "Off"... no start-up or pump-down problems.

● LOW PRICE TAG

Vornado is the first truly low cost... high quality air conditioner any builder can sell with confidence. You'll be amazed at the very few dollars Vornado adds to your construction costs.

Dramatic Sales Promotion Aids

Vornado helps you sell air conditioned homes with dramatic... well planned... attention getting... merchandising sales aids. Handout pieces, exterior signs, interior mobiles, decals, publicity stories, ad layouts... and many other promotional programs... all designed to give your air conditioned homes... excitement... attention... and extra sales appeal.

CENTRAL AIR CONDITIONERS

- Low Cost - Easily Installed - High Performance!

Here's Proof of Vornado's Tremendous BALANCED COOLING CAPACITY

Here are the results of tests conducted in St. Louis by Dr. E. M. Brooks, Professor of Geophysics and Geophysical Engineering. They prove without a doubt that Vornado does an effective job of cooling regardless of outside conditions. Notice how inside temperatures remained at an even 70 degrees and how humidity never exceeded 50%. These tests were conducted under normal living conditions . . . families with children . . . doors being opened and closed.

Outside temperatures reached as high as 92 degrees with humidity reaching the 75% point during test period.

Here's the chart showing Vornado's performance while outside conditions shown above existed. Notice how the temperature remained at an even 70 degrees and humidity never exceeded 50%. Children were running in and out during this extensive test too.

YES! Vornado Just Cools Better!

Houses of hip-roof design require only inclusion of an inconspicuous dormer to accommodate the unit.

This simple, gable installation allows installation with a minimum amount of effort. Prefabricated grille is available that can be painted with the house. Architectural treatments are limited only by the imagination of the designer.

Many builders have successfully tied the unit into existing furnace ductwork by installation through the basement wall. This particular type installation offers reduced cost in duct runs.

Hotpoint Spot-Less

... and helps sell your

**NEW PUSHBUTTON CONTROL
NEW 24-INCH WIDTH**

—same large capacity. Racks roll out separately, hold complete service for eight. And now, Push-button ease has been added. Same features available in 48-in. combination Dishwasher-Sink.

Here's Why You Should Include the New Hotpoint Dishwasher in Your Plans

Your homes sell faster—with less selling effort and expense—when you include a Hotpoint Dishwasher in the kitchen. The reason: Hotpoint helps you *pre-sell* your homes by *pre-selling* your prospects. Today, *there are more Hotpoint Dishwashers in use than any other brand!* This unprecedented acceptance will continue to grow, stimulated by Hotpoint's aggressive national advertising in leading magazines, and on the Ozzie and Harriet television show.

You can take advantage of this tremendous demand. Give your prospects what they *want*—a Hotpoint Dishwasher, built into the kitchen. They'll appreciate the quality... the exclusive features... the easy living... and the convenience of including the dishwasher in the mortgage! Get the complete story on Hotpoint Dishwashers before you plan your next project or home. Write Hotpoint, or see your Hotpoint Distributor Builder Specialist.

Hotpoint Disposall® food waste disposers... Kitchen Clean-Up Companions to Hotpoint Dishwashers

LOW-COST MODEL MW11

- Takes food waste continuously
- Quick, quiet, efficient grinding
- Dependable 1/4 hp split-phase motor
- Chrome-plated Cover and Sink-Stopper

Easiest of all to install!

1. A screw driver and an end wrench are the only tools needed to mount the MW11 securely to the sink.
2. Lower housing rotates through 360° to line up with existing drain opening.
3. Upper housing also turns through 360° to line up its knock-out plug exactly with the dishwasher drain line—greatly speeding up installation with a pump-drain dishwasher.

Put More Color in Your Kitchens with Hotpoint Colortones

The swing is to colors—and Hotpoint has 'em! Give your kitchen installations that added touch of beauty, with Hotpoint Colortones. Hotpoint Dishwashers are available in Sunburst Yellow, Meadow Green, Coral Pink, Seafoam Blue and Woodland Brown, as well as Classic White and Customline Stainless Satin-Chrome.

Look to **Hotpoint**

Action Outmodes All Other Methods homes faster!

Dishes Sparkle . . . Glasses Gleam . . . Silver Glistens

as a result of the combination of these two exclusive Hotpoint features . . .

- 1. Two complete Five-Minute Washes . . .
with Fresh Detergent Each Time**—to scrub away
every trace of food soil, to remove every trace of dulling film, to make everything sparkle and
gleam. This is Hotpoint Spot•Less Washing—World's Cleanest Automatic Dishwashing.

An equal amount of detergent is poured into the two cups of Hotpoint's automatic dual-detergent dispenser, and the tank-type cover is then cocked to seal off one of the cups. During the first of the two complete washes . . .

the detergent in the first cup mixes with the swirling water. Meanwhile, water has collected in both tanks of the cover . . . but, at the end of the first wash, it automatically drains out through a small hole in one of the tanks.

Weight of the water remaining in other tank causes cover to flip down, exposing fresh detergent for second wash. Hotpoint's two complete detergent washes get dishes cleaner than any other household dishwasher.

- 2. Two Thorough Rinses—with a Super
Wetting Agent in the Final Spot•Less Rinse**

Everything is rinsed twice—but now, drops of rinse water cannot cling to glasses or silver and deposit minerals that will spot them. "Rinse-Dry," a super wetting agent, is automatically injected in the second rinse. This super wetting agent breaks the surface

tension of the water, and drops cannot form to dry and leave spots.

This is Hotpoint Spot•Less Rinsing . . . the greatest dishwashing advancement since the development of the dual-detergent dispenser.

A few drops of "Rinse-Dry"—a super wetting agent—are automatically injected in the final rinse to provide Hotpoint's exclusive new Spot•Less Rinsing.

Compare the Results: The glass at the left was rinsed in plain water—see the water-drops that will cause spotting. The glass at the right was rinsed the Hotpoint way—no drops of water, no spotting.

This is Hotpoint Spot•Less Drying—the automatic result of Spot•Less Washing and Spot•Less Rinsing, followed by pure electric-heat drying.

**. . . the combination that makes Hotpoint Dishwashers
a bigger attraction in your kitchens!**

for the finest—first!

Columbia-matic

TENSION SCREENS

THEY CUT COSTS

The Columbia-matic TENSION SCREEN reduces labor costs *across-the-board!* Installs faster . . . requires no template, no special tools. Installs from inside for quick access to all windows. Cannot be taken down from outside . . . your protection against pilferage. Precision-made to your measurements, it fits exactly. Hardware can be preset in an uninterrupted production schedule . . . simply leave Columbia-matics wrapped in cartons, safe from damage. Aluminum, the Columbia-matic requires no painting, *yet costs no more!*

CUSTOMERS LOVE 'EM

Your customer will love their Columbia-matics for many reasons. Exclusive automatic tension keeps Columbia-matics drum-tight under all conditions, eliminates maintenance call backs. Light-weight, easy to handle, full length, they won't swell, stick, warp or rust-stain houses. With heavier hardware and tension bars containing up to 50% more aluminum than similar screens, Columbia-matics are built to give extra years of trouble-free service.

**NATIONALLY ADVERTISED..
CONSISTENTLY**

An aggressive, consistent advertising program pre-sells home-buying prospects in your area on Columbia-matic TENSION SCREENS. By way of high-impact ads in leading national magazines, Columbia-matic TENSION SCREENS have become a top name brand that your prospects recognize and want!

**Plus...the best service
in the industry!**

The Columbia-matic FACTORY SERVICE DEALER is equipped to give you immediate service . . . help you "buy right." He carries a complete stock of wanted sizes

and can provide emergency service on special sizes. An expert on builder screening needs, he will show you installation "short cuts" that will save time and money.

For complete details on the Columbia-matic TENSION SCREEN, see your local Factory Service Dealer, or write to:

*In the
Presbyterian Village of Detroit...*

*Thoughtful design provides new comfort and safety
for the aged!*

Eljer fixtures play an important role in this totally new concept in "homes for the aged"!

Gone are the frightening, austere buildings . . . the impersonal dormitory life. In their place is a warm, inviting small-town atmosphere . . . a real community to brighten the "sunset" years of their lives.

Choosing the Eljer Legation Bath is typical of the advanced thinking that developed this project. The Legation permits a "sitting" shower, reclining bath and even a foot bath! The new

6'-wide side rim seat makes it easier and safer to enter and leave the bath.

Eljer fixtures in cast iron, formed steel, and vitreous china are used throughout the project. And you can be certain that after decades of use, they will still remain lustrous and beautiful.

When you consider plumbing for any need . . . look to Eljer. For specifications and facts on this job-proved line of fixtures and fittings, see your plumbing contractor or write: Eljer Division of The Murray Corporation of America, Three Gateway Center, Pittsburgh 22, Pennsylvania.

The Case of the Carefree Carpenter

Here's the case and what's in it for you!

The Stanley No. 183 Builder's Kit contains a carefully selected, tested and proved collection of time-saving, cost-cutting door hanging equipment for the modern carpenter. Built around the versatile Stanley Electric Router, starring here as a hinge mortiser, this kit has what it takes for up-to-date door hanging.

The same $\frac{3}{4}$ hp motor that powers the router at 22,000 rpm powers the new J48 16" jointer plane — a real work eater when it comes to fitting doors.

Other vital accessories included in this builder's kit are:

Router base • Template guide • Straight and circular gauge Arbor • Mortising bits (2) • Grinding wheel • Grinding arbor Cutter grinding attachment • Door and jamb butt template Carrying case • Plane cutter

Your dealer has Stanley No. 183 Builder's Kit, or write Stanley Electric Tools, 400 Myrtle St., New Britain, Conn.

THE STANLEY WORKS, NEW BRITAIN, CONNECTICUT • HARDWARE • TOOLS • ELECTRIC TOOLS • STEEL • STEEL STRAPPING

... and the Round Cornered Hinge

Here's Stanley's famous RD241 hinge.

With round corners for use with electric mortisers. Check off the features that make this hinge the Standard of the World.

1. Flat button tips
2. Hole in the bottom for quick pin removal
3. Clean, accurate countersinking
4. Easily seated, non-rising, lubricated pin
5. Complete interchangeability of leaves
6. Smooth steel, toughened by cold rolling

Stanley Round Cornered Hinges are available in any size or finish desired, in plain joint or ball-bearing, either regular weight or extra heavy.

Your dealer has them, or write for details to Stanley Hardware, 101 Lake St., New Britain, Conn.

✓ **CHECK FOR WOOD CONSTRUCTION!**

Window units made of wood are naturally better . . . can't rust, won't sweat, cost less, blend perfectly with home's design inside and out.

Look at the *windows* when you look at a new home! From 30 to 70 per cent of a home's wall area is glass, and its use can mean a house that's dusty and drafty—or *clean and comfortable*. You are *sure* to get the best results with wood windows equipped with Zegers Dura-seal Combination Metal Weatherstrip & Sash Balance. Dura-seal keeps out cold and drafts, keeps your home warmer and cleaner in the winter—*actually saves up to 40 per cent in fuel!* It protects against dirt and dust in the summer, seals the house perfectly for air conditioning. Windows equipped with Dura-seal operate silently and smoothly—*at the touch of a finger.*

When you go house hunting, look for the Dura-seal sticker on the window glass and for the name embossed on the metal strip. It's your assurance of year-round weather protection and trouble-free, easy window operation.

Ask your builder or architect about Zegers Dura-seal . . . or get the whole story in the free booklet described below. Write for it today.

**a "BIG PLUS"
that Sells Homes!**

GAS-FIRED MODELS

Forced warm air units for every type of residential installation delivering from 64,000 to 90,000 B.T.U.'s at the bonnet. High Boy, Low Boy and Counterflo models all fully tested and approved by A. G. A.

OIL-FIRED MODELS

A complete line of warm air units for every type of installation delivering from 75,000 to 250,000 B.T.U.'s at the bonnet. All models equipped with high pressure burners to burn No. 2 fuel oil.

There is no substitute for **QUALITY** in home heating equipment...and that is why so many top builders install Kaustline Gas and Oil-fired Furnaces.

They *know* they can rely on Kaustline's most unique development, the "Tear-Drop" Designed Heat Exchanger System, to deliver quick, even heat with a minimum of fuel consumption.

They *know* they can depend on Kaustline warranty backed furnaces for efficient trouble-free operation and long years of service.

They *know* that Kaustline Engineering and Factory Assembly cuts their construction and installation costs to a minimum and that Kaustline Design saves valuable floor space.

So, whether you build modest homes or mansions...let Kaustline solve your heating problems.

TOPS IN QUALITY

There is a Kaustline Furnace or Winter

Air Conditioner for every type of home

In new construction, nailing is most economical. Simply fur out the joists, nail Cushiontone to furring, and your sound-conditioned ceiling is completed. No bother with plaster, gypsum board, or paint. In one fast installation, Armstrong Cushiontone provides a completely finished ceiling that won't crack.

New tongue-and-groove joint makes it easy to install Cushiontone by stapling it to furring. Nails can also be used. The snug-fitting joint assures a level surface with minimum effort and hides all staples and nail heads. Any carpenter can quickly install Cushiontone without special tools or training.

In remodeling, cementing is most practical if the old ceiling is sound. Prefinished Armstrong Cushiontone T & G offers a fast and economical way to cover cracked plaster ceilings. No preparatory work other than applying the cement is necessary. If ceiling is unsound, install 1" x 3" furring strips, then nail Cushiontone.

What's the best way to install sound conditioning?

*Methods vary with the job, but all
are quick, easy, economical when
you use Armstrong Cushiontone tile*

You get a beautiful job, no matter which method you use. Cushiontone's smooth white finish and Full Random design add a fresh decorative touch to any interior. The combination of Armstrong Cushiontone's quiet and beauty gives your homes a valuable new sales feature. For free promotional material, see your Armstrong lumber dealer or write Armstrong Cork Company, 4201 Rider Avenue, Lancaster, Pennsylvania.

Nationally advertised in leading magazines, Cushiontone is known to millions of families who want quiet at home. Whether you build or remodel, you'll find new profits in Cushiontone sound-conditioning ceilings.

Yes There's a Lot of Difference in OAK FLOORING

IT MAY look alike in the bundle; seem all the same delivered on the job. But, right there the difference begins: in how it joins up for the floor layer, how smooth it is after sanding, how it takes sealer and finish, how stabilized it stays through the years.

Royal Oak Flooring

supplies definite, affirmative qualification in each instance; with bundles prominently identified by authentic grade and registered trade marks; with engineered tongue and groove, precision machined to draw up without forcing; with advanced drying and seasoning to safeguard maximum stability and smoothness, free from cupping, buckling or shrinking; with texture of complete affinity for finishes that assures enduring beauty.

When the best in hardwood flooring is a "must," you can install Royal Oak Flooring, confident that these superiorities will hold in every installation, backed by Crossett's long and solid reputation for highest quality standards.

Sensational new Dry Wall Adhesive

for
bonding
gypsum
board
to
studs

BUILDER ANDY PLACE, South Bend, Indiana, uses Miracle Dry Wall Adhesive and Miracle method to speed dry wall installation, substantially reduces his costs!

**Eliminates
nail popping!**

Uses 50% less nails!

Lessens racking!

You speed dry wall installations, save substantially in time and costs. Taping and concealing are minimized, with so many less nail holes to fill! Racking, strain, and vibration are greatly reduced. Miracle Dry Wall Adhesive, formulated and developed specifically for installation of gypsum board to studs, does a better-than-ever dry wall job in every way!

Here's how: Before erecting gypsum board, Miracle Dry Wall Adhesive is applied to each stud full length, using a 2½ quart caulking gun with ¾" nozzle. Gypsum board is put up and nailed 18" o.c., with one or two nails on center of intermediate studs.

FREE: Colorful, illustrated brochure describes dry wall method, details time and cost saving. Write for your free copy without obligation today.

HEATFORMS* and Superior FORM DAMPERS

FOR BETTER & TROUBLE-FREE FIREPLACES

HEATFORM Model "A" for conventional fireplaces. (Damper is built-in).

HEATFORM Model "S" for modern corner fireplaces, with view of fire from front and either side. (Damper is built-in).

HEATFORM Model "M" for fireplaces with view of the fire from front and both sides. (Damper is built-in).

HEATFORM

The Superior Heat Circulating Fireplace Unit

(shown at left)

HEATFORM consists of fire-box, throat, smoke-dome, and properly hinged and operated damper. It is a perfect guide for masonry —hearth to flue.

HEATFORM air chambers capture and circulate heat (otherwise lost up the chimney by the old-fashioned fireplace) heating entire room and warming adjoining rooms.

HEATFORM adds but little to the cost of the finished fireplace, because it saves some materials and labor necessary in the construction of the ordinary fireplace.

SUPERIOR FORM DAMPERS

(shown at right)

To be used only when the extra heat of the HEATFORM is not essential.

Thirty years ago, our engineers found the ordinary dome damper was unsatisfactory, as it gave no protection against smoke troubles, nor was there any provision made to absorb metal expansion to prevent cracking of the masonry. Therefore, we developed the Superior Form Damper. Its wide throat, high form, and properly hinged and operated damper avoid construction mistakes and assure perfect draft.

After it rains
will your homes be selling you?

Rain-carrying equipment costs *little* but makes a *big* difference!

Will the homes you build today help you sell more homes a few months from now — or will they begin to take on a run-down look—paint-streaked and discolored, siding rotting, foundations undermined?

Rain-carrying equipment protects your reputation. It keeps roof-contaminated rain water from streaming down the siding and eroding the soil at the foundations. It guards your home in a hundred ways against the insidious inroads of moisture.

Rain-carrying equipment is not a *luxury*, not an "extra" which home owners can do without. It is as important to a house as a windshield is to an automobile.

Milcor Galvanized Gutter and Conductor Pipe cost so little that you can't afford to jeopardize your reputation by leaving them out. Besides, Milcor rain-carrying equipment has the *extra strength* of galvanized steel, is long-lasting and trouble-free.

Ask your building supply dealer — or write for Milcor Catalog No. 306.

BILT-WELL "LIVING-CONDITIONED" KITCHEN

SEE DETAILS INSIDE

NEW BILT-WELL "LIVING-CONDITIONED" KITCHEN OFFERS HOME BUILDERS TOP SALES FEATURES FOR '56!

... Plan now to build the BILT-WELL "Living-Conditioned" Kitchen into your homes this year and take advantage of the most dynamic kitchen promotion ever developed to help builders increase the sale of their homes!

More American women will see and read about the unique Living-Conditioned Kitchen this year in national advertising than any other kitchen ever designed!

This exciting and dramatic kitchen layout, scientifically planned by Living magazine to provide the housewife with the last word in kitchen beauty, convenience and utility, will carry the advertising weight of several different manufacturers who have combined their products to make this unusual kitchen "package" possible... BILT-WELL Cabinets—Thermador Ovens & Ranges—Formica Counter Tops—Elkay Sinks—Amerock Hardware—Insinkerator Dishwasher.

The Living-Conditioned Kitchen features BILT-WELL semi-assembled wood cabinets... the beautifully designed, modern cabinet line that has greater consumer acceptance than any other wood cabinet on the market today! And even more important, a complete kitchen of carton-packaged BILT-WELL cabinets can be assembled and installed in just a fraction of the time it takes to custom-build a kitchen... and at about half the cost!

Powerful Advertising and Merchandising Program designed to pre-sell the Living-Conditioned Kitchen to your home prospects!

1. Complete, detailed working blueprints on the Living-Conditioned Kitchen and its many variations available, free of charge to all participating builders. Professional consultation on construction details and decorating also available.
2. Living-Conditioned Kitchen Model Home Display Kit will be sent to all participating builders. Kit includes:
 - Living-Conditioned Kitchen signs for exterior and interior of model home.
 - Full-color "give-away" folders describing features of kitchen for model home visitors.
 - Easel-backed Living-Conditioned display for kitchen of model home.
 - Special ad mats, copy ideas, radio and TV spots for local advertising.
3. Dominant, full-color advertisements on Living-Conditioned Kitchen will appear regularly throughout 1956 in national magazines... Better Homes & Gardens—House Beautiful—Living for Young Homemakers. These ads will urge prospects to see the Living-Conditioned Kitchen and provide names of builders in the area who have the kitchen in their homes.

HERE'S WHAT AMERICA'S LEADING BUILDERS

CLIFF MAY
Cliff May Homes
Los Angeles, Calif.

"We have specified and selected BILT-WELL Cabinets for several reasons, one of which is the company behind them, and also the fine workmanship and packaging the cabinets have. Our CLIFF MAY HOMES dealers in California, Arizona and Nevada are very pleased with their installation."

C. E. BROCK
M. J. Brock & Sons, Inc.
Los Angeles, Calif.

"We have established a reputation for quality materials in residential construction and after using BILT-WELL Cabinets for better than a year, they have proven to be of the highest standard. We have found that the modern lines, rounded corners and beautiful finishes definitely make BILT-WELL Cabinets appealing to the customer. BILT-WELL Cabinets have been a distinct asset in the sales of our homes."

NEW LOUVER DOORS add distinctive charm to popular BILT-WELL Wardrobe Storage Cabinets and provide desirable air circulation.

UTILITY ROOM STORAGE

BATHROOM

DECREASE YOUR LABOR COSTS! INCREASE THE "SALEABILITY" OF YOUR HOMES...with BILT-WELL Multiple-Use Storage Cabinet Units!

Why use one type of cabinet in the kitchen and different types in other storage areas in the house when you can solve all storage problems easily, beautifully and economically with the popular BILT-WELL line of modern wood cabinets?

All BILT-WELL cabinets are designed to fit the Lu-re-co construction system and only BILT-WELL has the 45" upper cabinets that run to the ceiling, eliminating the need for building a drop ceiling or soffit.

Pictured below are just a few of the hundreds of builders across the country who have found that they can cut down on installation time and labor costs and add to the sales appeal of their homes by using BILT-WELL cabinets in the kitchen, utility room, bedroom, bathroom and other storage areas throughout the house.

If you are being pressed between consumer demand for a higher quality home and steadily rising labor costs, it will pay you to investigate BILT-WELL K-D, easy-to-install wood cabinets.

COMPLETE YOUR "LIVING-CONDITIONED" HOME WITH BILT-WELL ROOM-ENGINEERED WINDOWS AND FASHIONABLE BILT-WELL DOORS!

Proper light and ventilation conditioning are important attributes of the truly "Living-Conditioned" home. And you can add these important sales features to the homes you build when you choose from the complete line of BILT-WELL room-engineered window units. Highlight your "Living-Conditioned" home with decorator-styled BILT-WELL doors. Now, at last, you can have matching entrance and combination doors with the new BILT-WELL Com-o-dor screen or combination and its unique, harmonizing companion entrance door. Coupled with the famous Belvedere models, the BILT-WELL line of doors lend an air of distinction to any home!

BILT-WELL
LEVER OPERATOR

THE POPULAR BILT-WELL AWNING WINDOW FOR MULTIPLE-PURPOSE USE.

Now the famous BILT-WELL Awning Window is better than ever! Adding to the sales appeal of this popular unit is a new, attractive, fool-proof operating lever and double-insulating glass as an optional feature.

No other Awning Window offers such a combination of simple operation, maximum weathertightness and utmost flexibility of unit arrangement.

FASHIONABLE BILT-WELL CASEMENT WINDOW

Precisely made of clear, kiln-dried, insulating Ponderosa Pine, BILT-WELL Casements are double weatherstripped and double glazed for year 'round comfort and convenience. Easy to install and easy to operate, they offer lasting satisfaction.

BILT-WELL
PATENTED
WEATHER-STRIP

FAMOUS BILT-WELL DOUBLE-HUNG WINDOW

Only the BILT-WELL Double-Hung Window features built-in "thermostatic control". Weatherstripping is self-adjusting with changes in temperature and humidity providing constant, tight weather protection in all kinds of weather. Minimum friction plus perfect counter-balancing adds up to a window that is twice as weathertight with 1/10th the lifting effort.

BILT-WELL COM-O-DOR AND MATCHING ENTRANCE DOOR

Now it's available! An excitingly different screen or combination door with a specially designed entrance door to match. Com-o-dor comes with removable storm panels and unique decorative grilles. Together with its companion entrance door, the Com-o-dor permits unlimited decorating possibilities for both contemporary and traditional homes.

BILT-WELL BELVEDERE DOORS

Available in four different designs, the popular Belvedere door is the "high fashion" door of the industry. The Belvedere is made of the finest kiln-dried Ponderosa Pine. Stiles are of durable 5-ply construction.

EDITOR'S CHOICE:

The recent "Best Model Homes of 1955" contest by American Builder brought in so many good entries that the judges had a difficult time selecting the final winners. For this reason and in recognition of the many outstanding houses not otherwise honored, the editors have created a special award, "Editor's Choice." Among the first of those houses selected for this award (and the seal that goes with it) are these . . .

Four trend-setting houses for 1956

F. D. Kindred . . .

STYLED FOR OUTDOOR LIVING, this Lexington, Ky. house by F. D. Kindred represents brick cavity construction at its best. Kindred got six good prospects after opening house.

Westwood Properties . . .

MODULAR SPLIT LEVEL in medium price class by Virginia builder team of father and three sons hits new high in contemporary split-level construction.

Harvey Bream . . .

MINNESOTA BUILDER shows what happens when you set out to do something ultra special with a tri-level. Focal point of entire house is his family room. Big, roomy—with built-ins.

Modular Homes Inc.

IN TURNING OUT pre-fabs by the dozen this California company depends on the local builder to add the custom touch. That this can be done easily is evident in this award winner.

EDITOR'S CHOICE

F. D. KINDRED, LEXINGTON, KY.

There's much more here than

This solidly built, \$25,000 house is the work of F. D. Kindred, young president of the Lexington, Ky. HBA. Awake to the big trend towards more indoor-outdoor living, Kindred got architect L. Wayne Tune to design a one level, three bedroom house that would turn its back to the street and give its occupants a good chance to enjoy terrace living. The result is seen in the plan at the right and in the pictures shown here.

At no time did Kindred consider making the carport double as a terrace, as some builders try to do. To do so would have meant complete loss of privacy and would have been impractical as far as outdoor cooking is concerned. As it is, the owners of this house have a terrace easily accessible from both living and dining areas—plus a built-in oven and grill for outdoor barbecues.

The long, low roof line with its 1½:12 pitch, the row of clerestories, the flat-roofed carport and the breezeway-connected storage area in the rear—these are features worth studying. Of special interest is the carport, with its 3-inch steel columns imbedded in brick and the built-up roof beams (three 2 x 12's),

Sliding aluminum windows and doors (Pana-View) are used throughout the house.

The dining area is actually Kindred's idea of a family room, one end of which may be closed off with a folding door. The kitchen is based on the familiar U-plan. Some might prefer it closer to the terrace, but for most people it seems to be ideally situated, even from the point of view of play supervision.

3-BEDROOM, 2-BATH plan is familiar L shape. There's more storage behind carport, and utility room has 9-ft. storage cabinet. Fireplace has outdoor oven, grill.

◀ **TAPESTRY FINISH** red brick exterior has contrasting white roof, V-groove vertical siding and white trim. Entrance door is red. Planters appear at entrance and on terrace.

meets the eye

CUT-THROUGH VIEW of Kindred's wall and foundation. Plywood soffits have 2-in. ventilating slots just behind fascia board. House is well insulated for Kentucky climate. ▶

BUILT-IN BARBECUE oven and grill is at left of terrace, which gets good protection even in late fall. End wall, right, of bedroom is typical, finished to 9 inches thick. ▼

MODULAR HOUSE in McLean, Va. has exterior of common brick, plywood, with spots of architect-controlled color in window panels. Every effort was made by builders and architect to preserve sites, keep monotony out.

WESTWOOD PROPERTIES, McLEAN, VA.

EDITOR'S CHOICE

Will your

UPPER LEVEL

LOWSTUTER PLAN puts kitchen on central level, close to driveway, carport and main entry. Upper level is bedroom area. Lower level could be used as an apartment complete with living room, bedroom, bath and storage.

Any builder of split levels who still sticks to post-war designs should take a second look at the two houses shown here. They are about the truest contemporaries to come out of the Washington, D. C. and St. Paul areas. And although they represent two approaches to building—tract and custom—they have one thing in common—quality.

The Westwood Properties' house, above, is an engineer's dream. It's a tri-level built on a 4 foot module. Standard panels fit within this module with little or no cutting, and framing members around windows and entrances are left exposed and painted white to emphasize the module.

The Lowstuters (father and three sons), builder-owners of Westwood Properties, Inc., teamed with architect Richard L. Parli to produce a house that sells for \$20,325, including half acre lot, black top driveway and landscaping. The Lowstuters bend over backwards to preserve trees. In fact, they pay almost as much attention to siting and land planning as to the houses themselves.

In architect Parli's tri-level plan the major emphasis is on the middle or work level. Here is where the kitchen, utility and dining-living room are located. Two sliding glass doors add to the heat loss of the house, but this is not excessive. In fact gas company estimates place the yearly heat bill at \$155. The foil insulation in both ceiling and sidewalls helps to keep this figure down.

MAIN ENTRY to Bream house has louvered and solid doors. Siding is redwood battens over asbestos-cement panels.

FIREPLACE WALL of family room extends to living room level, sets at sharp angle. Built-in TV is at far right.

HARVEY BREAM, ST. PAUL, MINN.

next splits look like these?

EDITOR'S CHOICE

All the ideas builder Harvey Bream ever had about split levels are jelled in this one model. He has, for example, made the entrance stairway (below) a dramatic point of interest. He's turned the standard rectangular plan into an L, and he's done things with diagonals *(continued on page 76)*

JANUARY 1956

LIVING ROOM becomes quiet conversation area in Bream version. Beyond is acoustical ceiling of the family room. Brick wall is part of fireplace. It has built-in planter, shelf for books and wire sculpture, electrical outlets.

EXPANDED IRON serves to dignify and dramatize entrance landing, which leads down to family room, left, and up to stairway and sleeping area. Stairs and living area are carpeted. Horizontal paneling is knotty ash.

TURN PAGE FOR EXTERIOR OF BREAM HOUSE

REDWOOD 1 x 3's are used as battens over asbestos-cement panels for attractive, easy to maintain exterior. Small

areas between windows are stucco. Roof pitches equally in both directions, has J-M Seal-O-Matic shingles.

HARVEY BREAM, ST. PAUL, MINN. continued

and angles that most builders would shy completely away from. The result is this tri-level, representing the best in contemporary construction. True, it's not in the same price class (\$34,800) as the Lowstuter house but it's still an outstanding value.

Bream's big beef about split levels is that too often they are freakish in design, poorly sited and skimpy with materials. His house is none of these. His kitchen, for example, has the usual number of built-in appliances (Westinghouse) plus a Lazy Susan, pop-up mixer and sliding trays for pots and pans. His kitchen sink overlooks the breakfast area, which is separate

from the dining room. His utility room off the kitchen has 14 feet of storage space. His fireplace wall is almost a story and a half high. And his ground level family room has a studio high ceiling of acoustical plaster. The room combines common brick, Corktone asphalt tile flooring and knotty ash paneling, and connects with a furnace room in the rear, storage and garage in the front, powder room and kitchen to one side. With the kitchen at one end of the L. Bream's family room has truly become the center of the house. Will this be true of the next split level you build?

LOWER OR GROUND level has garage and storage areas under bedrooms. Note angle of fireplace wall in family room.

UPPER LEVEL has separate dressing room off master bedroom, two baths. House was designed for a 100 x 180 foot lot.

PRICED AT \$16,750, exclusive of lot, this California pre-fab is a good compromise between the hand-hewn look of

the past with today's production methods. Builders have choice of plans, roof pitches, flooring and carpets.

MODULAR HOMES INC., SACRAMENTO, CALIF.

EDITOR'S CHOICE

Part pre-fab, part custom

Under the rough board and batten skin of this house lurks a pre-fab. Yet there's no "factory-look" about it; in fact it looks custom-made. Cedar shakes and cut stone give no hint of the pre-fab panels and pre-cut posts and beams that lie underneath. Inside, it has nothing of a factory-built look, as you can see from the picture below.

RANCH PLANKS are laid over conventional floor or slab. All wall panels have redwood sills as well as plates.

A two-panel system is the basis of this house. The exterior system consists of 2 x 4's on 16-inch centers, with 1 x 12 redwood boards and battens. Interior panels are similar but finished with gypsum wallboard. Both types have fireblocking and let-in bracing. The house has the full approval of VA, FHA and the local Sacramento banks.

THREE BEDROOM plan has two baths, ample storage. Fireplace is optional. Double carport serves as terrace too.

Try built-in TV for a sharper

In a couple of years built-in TV wiring will be as standard as the bathtub. Right now it's a hot merchandising extra that too few builders are using.

A builder who fails to put enough electrical outlets in his houses might just as well hang up his hammer and go home; he's committing economic suicide. Today's homeowner either plans to or actually does own many electrical appliances; he expects the house he buys to make full provision for them.

With one exception: the television set.

You can plug a TV set in any outlet, but the antenna is a different story. The average buyer expects either to call in a service man to put it up, or else to climb up on the roof and do it himself, at the risk of a broken leg and a leaking roof. And the final result is generally unflattering to the house.

Why shouldn't the builder include a built-in

antenna system? It shouldn't cost more than sixty dollars at the most; at that price it's a merchandising bargain.

If the installation was made in a finished house, there would be little or no cost advantage in having the builder rather than the buyer do the job. It would be expensive, too, to put multiple outlets in walls already closed in. If, however, the system is put in while the house is being built, it's a relatively simple and much cheaper job.

There are three major points which will be of interest to the buyer:

First: the installation will be a clean one. Lead in wires will not run down the side of the house and in through a window, they will be neatly carried inside through a special fitting close to the mast. Only the antenna itself will be visible, and in strong reception areas it will often be possible to install it in the attic, completely out of sight.

Second: the use of multiple outlets gives the owner complete flexibility in the use of his set. Extra outlets permit it to be operated anywhere—in the family room, for instance, or in a bedroom if someone in the family is sick. And if there are two sets in the house, a special fitting will permit the use of both of them at the same time from the same antenna lead.

Third: the buyer whose house has built-in TV wiring will feel the same confidence in the system

It's cheap and easy to install in new construction

TYPICAL side wall installation. This method has the advantage of needing no supporting stays.

MOST COMMON type of roof installation. This method is the least unsightly when seen from the ground.

THROUGH ROOF fitting, used with the roof installation. It also is used where a chimney mount is employed.

RIGHT and wrong techniques of hooking up outlets. Only one set at a time can be used from such a system. ▶

sales picture . . .

that he does in the rest of the house; and should any defects appear, either in the installation or the equipment itself, he has the builder's guarantee to protect him.

A word of caution: Unless a builder plays with electronics as a hobby, he should have a television specialist make his installations. TV is tricky, and quite unlike conventional electrical work. For that reason the diagrams shown here are intended not as working drawings, but as rough sketches of the types of installations that are possible.

► **Note: TV lead-in wire is never installed in metal conduit. The current carried is so slight that there is no fire hazard. Special plastic conduit generally is used.**

WIRING diagram of the installations shown on the opposite page. Couplers permit the use of two sets off one lead in. Plumbing stack could be used as ground.

These are the fittings used in the installation of built-in TV wiring

LEFT: Standard wall plate sockets. They are available in either brown or ivory.

RIGHT: Combination wall plate, providing both antenna socket and electrical outlets.

LEFT: Plaster ring for outlets can be used in walls that are up to 1½ inches thick.

RIGHT: Black polyethylene tubing used for conduit. It has no effect on TV signal.

LEFT: Through-roof fitting. It is available for both round and flat antenna wire.

RIGHT: Exterior side wall fitting. It can be used with frame or masonry construction.

LEFT: Match-coupler permits operation of two sets from the same lead-in wire.

RIGHT: Three way fitting is both outlet and control switch for outlets in other rooms.

They're finding

Builders and health departments are doing some constructive worrying on the sewerage problem all over the country.

If it hasn't hit you yet, chances are you're still able to find land near sewerage facilities. Or, further out, you've been lucky enough to acquire land suitable for septic tanks.

But that kind of land is getting harder and harder to find. Even "marginal" land is getting scarce. Builders have to settle for "sub-marginal" land: it's either too heavy with clay or sitting on a stratum of limestone or a high water table; sewage either won't drain off at all or it *will* drain off right into a nearby well or underground reservoir.

That's why responsible health authorities will no longer automatically accept plans for septic tanks even where the usual minimum plot, 100 by 100, is allotted. And that's why the sewage aspect of the community facilities problem is perhaps the toughest and most expensive for the builder to solve. Often his only answer is this: he must create his own sewage-disposal system.

Why builders *must* take this decisive action on sewerage, and thus turn a bitter necessity into a public benefaction, is pointed up in recent statements by national and local authorities.

The problem

In the opening article of this series on Community Facilities last November we quoted Walter L. Picton, Deputy Director of the Division of the Water and Sewerage Industry and Utilities Division of the U. S. Department of Commerce. He said that the next ten years will see a population increase of 21 million that must be met by \$15 billions in additional water and sewerage facilities. The more of this the builder can initiate in the normal course of his operations, the easier that problem becomes.

The need is growing. A report by Benn J. Leland, chief sanitary engineer of the Cook County (Ill.) Department of Public Health, at the eighty-third annual meeting of the American Public Health Association, is typical of many observations of the septic tank problem. Generally, a fourth of an acre or 10,000 sq. ft. is the permitted site size, but with the type of clay soils in the Chicago area, a sanitary and adequate septic system cannot be installed if the site also includes a well to provide household water.

SOMETHING NEW on the face of the land; builders of Kingston Estates in New Jersey break the sewage disposal barrier by setting up their own public utility. Result: new acreage for development by themselves and fellow builders.

an answer to the sewerage problem

A similar situation was reported by Dr. Earle Brown, Commissioner of Health, Nassau County, Long Island, New York, at a panel on Sewage Disposal at the last meeting of the New York State HBA. "The day of the \$150-200 sewage disposal facility is no more. On the north shore, the common depth of clay is 60-80 ft. On the south shore of Long Island, there is a high water table. Most of the good land in the middle of the island is built up. Plans are now coming in for building on sub-marginal land."

The old ways, then, are getting harder to pass off on health department inspectors. To build at all, the developer must assume new responsibilities.

Meeting responsibility

It goes like this. Obviously, the "build-em, sell-em, and scam" type of builder who leaves wails and curses behind him can't hang around long enough to set up, manage, and finally liquidate a long-term proposition like a sewage disposal plant. And builders who do get together to set up such a facility will find themselves growing deeper and deeper into the community.

Harry Goodwin and his sons Dick and Howard, developers of Kingston Estates and founders of the Delaware Township Sewerage Corporation, N. J. (the plant appears in the upper left) find themselves in constant friendly contact with the new civic league, and lend their organizational and political experience to build a close-knit community. In addition to their initial \$135,000 investment to build the sewage plant for the first 300 homes, they brought in water a mile and a quarter from the Haddonfield system at a cost of \$33,000. They instituted a bus service, offering a guarantee of \$2,000. They offered ten acres for school facilities for the first new school in the township in a long time. And, by breaking the utility barrier, they opened up 1,000 acres in the adjoining township for development.

These builders are finding themselves the benevolent uncles in their "community of good neighbors in a good neighborhood." They contribute street speed control signs for the local association to put up. They offer prizes for Christmas decorations.

The Goodwins' Kingston Estates plant is one of several similar operations designed by John Osler, professional engineer of Collingswood, N. J. After the first 300 homes were in, the plant was expanded to handle 300 more Kingston units and then 300 more in fellow-builder Will Switzer's plan, and another 300 in Bob Scarborough's, when the two latter entered agreements with the Delaware Township Sewerage Corp. Eventually the facility will make possible the occupation of 3,000 new homes.

Similar expandable plants were planned by Osler for Tom Edwards and his Stafford Sewerage Corp., which is also used by Blaise Ravikio, president of the Home Builders' League of South Jersey; and for Harold Sarshik and his Woodcrest Colony, which that energetic young builder described at a panel of the N. J. HBA meeting in November.

It happens that all three of these are of the activated sludge type, because the basic problems were similar—to save initial capital expense, even at the price of later increased operation charges. But engineer Osler is careful to point out that the type of plant must be adapted to local conditions—"you don't take the same pill for a headache and for diarrhea." He estimates that an average charge per home owner runs to about \$44 a year to pay for construction and amortization of the plant. Thus the residents get sewerage service for less than any but the most ideal septic tank

(Continued on page 264)

HOW SOME BUILDERS HAVE SOLVED THE PROBLEM:

1. Harry Goodwin, Kingston Estates, Camden County, N. J., shares his Delaware Township Sewerage Corp. with two other builders, opens up 1,000 acres of new land.
2. Robert Moss established a private water company in Ewing Township, Mercer County, N. J., cooperating with locality and state.
3. Julius Gaines set up both water and sewerage facilities for his 10,000-home Carol City in Florida, and is opening them for use by other developments at fair charges.
4. Harold Sarshik set up his own sewerage plant for 1,500 units at Haddonfield, N.J.
5. Couchois and Miller built \$90,000 water system at Haslett, Mich., gave it to town when 400-unit plan was half completed, with everybody getting a good bargain.
6. Oscar R. Giesecke, Buffalo, got plans for a disposal plant for 350 units approved, will sell it to the town for \$1.
7. Myrtle Grove, Fla., started with a plant for 80 homes, will handle over 1,200.

Retirement homes:

Building houses for older, retired people is a multi-million dollar new market. Maybe you know it and still shy away from it. Maybe you think it's too complicated or too risky or too regional.

If that's the case: the Florida tract shown here proves you wrong on the first two counts; and the Detroit development on the next spread proves that retirement houses are not always in balmy climates.

The Florida tract house sells for between \$6500 and \$9000, depending on how fancy the retired buyer wants it. The Detroit development rents its units for \$65 to \$80 a month. Neither had any trouble finding people to fill them.

That's because a good part of our population over 65 years old does not have to live with its children or go to the poorhouse: a whopping 22.5 percent of our 14 million people over 65 have an income of better than \$3000 a year; another 13.1 percent can count on between \$2000 and \$3000. Within those groups, there is a strong nucleus of couples and individuals who have a backlog of funds that came either from savings or from the sale of a house.

Much of that market is ready now to buy retirement housing. A few builders are ready for them. One such builder is George E. Beauchamp of the Orange Gardens Corp., operating in Kissimmee in north central Florida; it's his tract house that we show on this spread. Here's what he did:

How one builder did it

Beauchamp's company bought 380 acres on the edge of Kissimmee for \$200 an acre plus development cost. They knew that choice of the site for a retirement project was important: it should be close to existing public services and facilities; it should be near health facilities; since some buyers would be retired younger couples, possibly with children, schools should not be too far away.

As for the retirement house itself, Beauchamp developed the model and its variations with K. C. Moore, Jr., an experienced builder from nearby Orlando. Moore's construction know-how was matched by Beauchamp's knowledge of what older people wanted in a house and by his conviction that cooperative retirement housing is hardly what the "better-off" part of the market has in mind. In short: Beauchamp's market would be like any other for housing: his buyers would want to see a model; if the model filled their particular needs, they would buy it.

Beauchamp's thinking was right. A model was

... this little

PULLMAN-STYLE KITCHEN has 6x8' folding curtain wall of split wood units. Cabinets are hung so top shelves can be reached without stepping on chair.

a multi-million \$\$\$ market . . .

house gets its share

EASY MAINTENANCE is important in a retirement house. Terrazzo floor in living room is not only efficient but handsome. Screened porch beyond is highly popular.

▲ **RETIREMENT HOME** in Florida's Orange Gardens avoids steps, noticeable inclines, thresholds (except at two exterior doors). Even ramp of drive rises only 8" in 30'.

▶ **DON'T MAKE IT TOO SMALL:** Orange Gardens house has 868 square feet plus carport. Storage space is 450 cubic feet. All closets are 24" deep. House costs \$6500-\$9000.

RETIREMENT HOMES, continued

SUPPORTS FOR BOLTS through towel bars and soap dishes are 2x6's; soap dish backs are put to rear of 2x4's; towel rod backs are put to front. Soap dish is recessed.

RETIREMENT HOUSE BATHROOM: all rods and soap dishes will support more than 500 pounds. Tub has 1" carborundum strips, variously colored, to prevent slipping.

opened in February, 1955, and attracted some 4,000 visitors. Since then, houses have been going up at a steady rate of from five to ten at a time. Each house takes about two months to complete.

Because he knows that retired people have set tastes and are making a big adjustment, Beauchamp offers them a wide choice in details: they can extend the basic plan, omit the carport, fill in the porch with jalousies, finish the floor in almost any material, substitute casement windows for jalousies on the model. Result: the buyer has the pleasant feeling of achieving an individually-styled home at a price range from \$6,500 to \$9,000.

In selling the house, Beauchamp allows plenty of time for prospects to make up their minds about those details. He believes in having a hostess in the model who makes no effort to sell; she talks "detail" for as long as the prospect wants.

How to get mortgages

Beauchamp does not minimize the difficulties of getting mortgages for buyers over 60 years old. Lenders naturally resist old age because of what it usually means in terms of restricted income, the possibility of the death of the income-possessor, the lower equity that is built up by which to decrease the mortgage, the adverse public relations that can easily result from a default.

But here's what helps to salt down the loans: the larger-than-usual down payments, the reasonably stable incomes of prospects, the hospitalization coverage that the borrowers usually have, their usually adequate life insurance. Sometimes a collateral bondsmen on paper is the feature that does it. Also on the plus-side with the lender is the fact that older people do not usually go in for consumer credit and have enough time to maintain the property beautifully.

Downpayments at Orange Gardens are larger than you might expect: usually half the total price. The minimum downpayment is \$1,250. In addition, Beau-

champ agrees to handle any defaults for the lender. This has served not only to put a floor under prices in the tract but to encourage the lender to go along.

Mortgages are conventional, with a term of 15 years. Thus, on the typical loan of \$4,000, monthly payments run about \$30. Taxes, nominal on homes in Florida, are extra.

The result of it all: company profit is hitting five percent; Beauchamp considers that a good return on a low investment.

Safety features in the bathroom

Homes at Orange Gardens look much like any others built for small families. But they're not. Because of the age of their occupants, these houses are constructed with special safety features; and the room that gets the builder's first consideration is the bathroom.

This 5x7' room is small enough so that no matter where you stand, you can grab something solid in case you fall. Doors are 34" wide to accommodate a wheel chair, if necessary. Grab bars are essential, but they can be camouflaged. The only grab bar that looks like one in the bathroom shown above is the 30" bar installed vertically at the end of the tub; two towel bars over the tub and the soap dishes are also grab bars.

Other "must" features for the bathroom: toilet close to the tub so it can be used as a seat when filling the tub; bathroom faucets within easy reach; a large medicine cabinet; carborundum strips in the tub to prevent slipping; supports for bolts in bathroom bars; lavatory height of 34 or 35 inches; no glass or thin tubing used for towel bars.

RENTED HOUSES AND APARTMENTS are preferred by some retired people. Presbyterian Village, Detroit, offers two-bedroom apartment with safety features: no steps or thresholds; non-slip floors; grab rails in bathrooms. ▶

OLDER PEOPLE WANT PLENTY OF LIGHT. Glass areas at Presbyterian Village, Detroit, are at minimum of 15 percent

of floor area; open window areas are seven percent. Builders have also provided space for outdoor living.

... they'll retire to a row house

... HERE'S HOW TO BUILD IT RIGHT ▶

COURT at Presbyterian Village is open and oriented toward a lively view. Residents don't feel cooped-in. Ideally, all

apartments should face south or southwest. Site should be in residential area, near all community facilities.

ROW HOUSE RETIREMENT, continued

Presbyterian Village in Detroit offers both institutional housing and rowhouse single-family units on a semi-subsidized basis. But the basic idea of a planned community, attractively sited and intelligently built, is highly adaptable to any builder who wants to enter the market for retirement homes. The idea is highly useful in building not only for couples but for the single person: 24.8 percent of all people over 65 years

old are alone. Presbyterian Village row houses are designed as two structures, one with four one-bedroom apartments, the other with two-bedroom units. Cost to build, including extensive landscaping and all kitchen equipment: about \$12,000 per unit. Apartments rent for \$65 and \$80 a month. Presbyterian Village was designed by architects Smith, Hinchman & Grylls, Inc.

LAUNDRY service room in the building with two-bedroom units serves one-bedroom units as well. All units are brick veneer on concrete slab grade.

GROUPINGS are easy with two basic building types. Each provides warm air heating. Radiant heat in floor was not considered suitable for old people.

EXTERIOR combines shingle and fieldstone in a choice of colors. Seaview home includes landscaped plot.

Extra entrance helps sales

The constant patter of little feet through the main rooms of the house is no problem in this split level. Reason: The recreation room boasts its own street entrance and lavatory.

Waxman Brothers are the builders of this house, which is one of their seven models at Seaview Village, a 2,000 unit development in the Canarsie section of Brooklyn, N. Y. Other features designed to sell Seaview include a sun deck, center hall entrance, cathedral ceilinged living room, and sliding door closets in the bedrooms. Morris Rothstein & Sons were the architects for the house.

BATHROOM features built-in 60 in. Vanity, with double sliding door mirrored medicine chest. Back splash is built up to meet frame of the mirror.

KITCHEN is highlighted by waist-high, fully automatic Martha Washington copper wall oven, with separate broiler compartment, four-burner countertop surface cooking unit. Natural birch cabinets with antiqued copper hardware blend with the rest of the room's decor.

1956 CONVENTION

NAHB's great show in Chicago, starting January 22, is bigger this year in two ways: more exhibits (400-plus!) and more discussion groups, clinics, panels and demonstrations

Here's what they'll talk about . . .

BUSINESS . . . will it boom a little or bust a little?

If you're uncertain about your building prospects in 1956, particularly for the second half, the NAHB convention is a good place this year to get a grip on yourself, for better or worse. Top subject of several sessions is "what's ahead?". Don't miss the panel, headed by NAHB economist Nat Rogg, that will include top officials of the Treasury, Federal Reserve and FHA.

CREDIT . . . will U.S. "policy" relax?

Hottest topic in Chicago, as it is even now where builders gather, will be credit. Resentment is bitter over federal policy-makers' attempt to curb inflation by curbing building through curbing credit. Count on this: builders will make themselves heard at the convention unless they get assurances of a new "easing-off" policy from government men invited to speak. Chances are, however, since 1956 is an election year, that kind words will be forthcoming.

NAHB PRESIDENT . . . who will be "the man who . . . ?"

It wouldn't be a good convention without plenty of politics in the halls of the Hilton and in smoke-filled rooms at the Sherman. On those terms, 1956 should be one of the best conventions. Here are four strong contenders: Joseph B. Haverstick of Dayton, O., Paul L. Burkhard of Glendale, Calif., Leonard L. Frank of Long Island, N.Y., and Franklin L. Burns of Denver. Our bet: the man who best appeals to the rank-and-file of the small builders will get the nod.

SPLIT LEVELS . . . have they had it?

Hard-headed builders and top architects are scheduled to give you the low-down on what's good for 1956 in house design. Don't be surprised if you hear that splits and ranches may be giving way, in some parts of the country, to a new demand for the peace, quiet and traditional living of the house with a cellar, a first floor and a second floor up a traditional flight of stairs.

MATERIALS . . . will shortages get worse before they get better?

Talk is that materials in increasingly short supply right now may take a turn for the worse. Will the auto industry, for example, take even more glass and steel away from you in 1956? Top economists at the convention will give you the answers. And it almost goes without saying that the biggest group of producers of building materials and equipment in housing history will be on hand to report.

PLASTICS . . . is it sooner than you think?

The use of plastics in building is developing so fast that it's hard to keep up with the times. To see how plastics may affect your work next year (and ten years from next year), better attend a special convention panel-discussion on "New developments in plastics in building."

SMALL BUILDERS . . . will they have a big year?

There's a strong feeling that big-volume builders and high-powered money men have dominated NAHB policies. That feeling will be thrashed out behind the scenes in Chicago and small builders may find themselves sharing the cat-bird seat. On the national scene, small builders can't help but get a break next year from such convention panel discussions as "Cooperative land purchasing for home builders" and numerous sessions on financing and business management. There's even a "how-to-do-it-better" circus. Our advice to smaller builders: this year's convention should be a "hot" one for you.

FHA STANDARDS . . . will they be stiffened in the Spring?

Insiders say that FHA (and VA) standards will be made tougher, despite your thinking that they're tough enough now. Look for a sharp give-and-take discussion at the convention at a panel of builders and FHA-VA officials. You should come away with some answers about *your* 1956 building techniques.

BUILT-INS . . . will the clamor for them continue?

Experts tell us the business of built-ins is still in its babyhood. They have already revolutionized kitchen and bathroom planning, of course; but now they're ready to spread throughout the house. In Chicago, you will see the greatest collection of new built-in devices, equipment and furniture ever assembled. Experts will be there to discuss their effect on home planning and merchandising.

HOT IDEAS . . . what's really new under the sun?

There's a ferment of new construction ideas at work in the building business today and the very best will be shown in Chicago at the Coliseum. You'll see walls tilted, panels constructed, slabs waterproofed . . . all of this and more demonstrated in life-size, action-exhibits for the first time.

PREFABRICATION . . . what's the youngster up to now?

Prefabricators are now accounting for ten percent of the home-building market and they look forward to gaining even a bigger share of it next year with new designs, new sales helps, new ideas for the small builder to use and profit by. Most of these will be covered in a major session on "Improving your business with prefab."

COMMUNITY FACILITIES . . . do you know where you stand?

What's called the "land crisis," which covers the whole problem of the growing shortage of community facilities, will get a thorough going-over in Chicago. If you don't know who should pay for new schools, where to get more land, how to develop it, what your responsibility is to a "new" neighborhood . . . and all the other questions that go with the problem . . . better not miss a meeting.

. . . here's what they'll look at

IDEAS TO BUILD WITH:

1956 PRODUCT SHOW

Sherman

Coliseum

Hilton

**Last year, two buildings held NAHB's show.
This year a bigger exhibit requires three.
That's how hot new products are in 1956,
a year when buyers are demanding more.**

1956 may well be a critical year—critical because the way you buy will influence the number of sales you will make. Buyers have more houses to choose from now. They're looking harder for the extras that make one house "interesting," but yours a "seller." It's time to take a fresh look at the products you'll build with in '56. Remember, the better you buy, the better you build, the better you sell.

Stainless steel double oven

"Masterpiece," a double oven with rotisserie, is styled in stainless steel. Double ovens are in a single 44 $\frac{1}{4}$ -in. by 28 $\frac{11}{16}$ -in. frame. Cabinet depth: 24-in. Each oven has its own bake, broil units.

HEATING AND AIR CONDITIONING DIVISION

Majestic

SUMMER-WINTER AIR CONDITIONERS

Gas-or-oil winter conditioners and matching electric summer conditioners furnish year-round comfort in any home. A full line of furnaces with up to 400,000 BTU output, and system-matching air conditioners in 2, 3, and 5-ton capacities, in companion units or with remote air-cooled compressors, are available.

Majestic THULMAN FIREPLACE

A UL-approved fireplace, factory-fabricated with required clearances built in to save on both initial cost and installation time. Complete with its own Thulman Chimney, it can be installed on a wood floor and framed in quickly and easily by one man.

Majestic THULMAN CHIMNEY

The pace-setter in the modern chimney field, this steel-and-aluminum chimney hangs on joists for economical, time-saving installation. UL-listed for all fuels and for zero clearance from combustibles because it has ample clearance built in.

Chimney top housings are now made with realistic wire-cut brick design embossed into the metal and painted brick red with gray mortar lines. Tile-like metal rain cap adds to attractive appearance.

Bell traps, sewer tile strainers and other quality castings.

Majestic UNDERGROUND RECEIVERS

For hidden rubbish disposal.

There's pride in selling prefabricated homes

...and more profit, too!

MORE HOMES UP

MORE OWNERS IN

IN RECORD TIME

Prefabricated homes are designed by the nation's leading architects. They're years ahead in styling. They're precision-engineered and produced to uniformly high standards of quality and workmanship.

You'll find prefabrication's mass production methods have many advantages for you. As one builder puts it, "You can build and sell three times more homes with one-third the overhead and one-third the grief." His statement helps explain why sales of prefabricated homes increased well over 200% between 1948 and 1955, compared to a 50% increase in total housing starts.

Write for a list of prefabricated home manufacturers serving your area.

Every Home Cottage or Mansion

Deserves the
Permanent Protection of

CAST IRON SOIL PIPE

and Fittings

"Can't you figure out some way to cut down the cost?"

Architects or contractors are often asked that question, after final plans are drawn. Usually the home builder wants plans trimmed "where it won't show."

But recognizing their responsibility to clients, reliable architects and contractors refuse to cut down on essentials that are vital to the permanent protection of a home and its enjoyment by the owner.

They know, for instance, that it never pays to compromise on quality in plumbing drainage, which once buried in the ground or house is

there to stay. That's why they specify permanent Cast Iron Pipe even where investment in the home is a very modest one.

Permanent Cast Iron Pipe costs a little more, but its first cost is *final*. It will last forever, never need root reaming or break down under heavy truck loads or ground settlement. Through the years it will perform its function—smoothly and without care or trouble.

When Cast Iron Pipe is specified—inside and out—there will never be any come-backs or complaints.

★ ★ ★ ★ ★ ★ ★

Our Company does not manufacture Cast Iron Pipe, but supplies many of the nation's leading foundries with quality pig iron from which pipe is made.

4-wheel drive supplies the extra traction to transport men, equipment, tools through mud and loose fill, in all kinds of weather. The Universal 'Jeep' carries up to 7 workers, up to half a ton of tools or supplies...pulls heavy trailer loads of materials.

How the Universal 'Jeep' saves you time and money

Grading and smoothing jobs are done quickly and easily by the Universal 'Jeep' with hydraulic lift and grader blade. Earth scoop is also available for terracing, leveling, landscaping.

The 'Jeep' Station Wagon serves your family and business needs. It's two vehicles in one—a passenger carrier and, with seats removed, a cargo vehicle for hauling...on or off the road.

Only the 4-wheel drive Universal 'Jeep' spreads its cost over so many jobs. This vehicle transports men, tools and equipment; hauls trailers; and supplies mobile power for welders...compressors...trenchers...and other equipment.

The Universal 'Jeep' travels at highway speeds in conventional 2-wheel drive. When your work calls for travel over unpaved roads, through mud, sand, or loose fill, the extra traction of it's 4-wheel drive takes you where other vehicles can't go.

Operating economy, long life, low maintenance costs and high resale value make the Universal 'Jeep' your best single investment. Your Willys dealer can show you why. See him today, or write for more information.

The name on the door means a lot

Whether the door is for an office, a home or a public institution, it will reflect the taste and judgment of its owner. And you can depend on this — Atlas Plywood is America's most popular choice in flush doors. Here's why —

Atlas Plywood doors give *guaranteed* satisfaction. Easy to finish, easy to hang, they stand up under years

of service. They are quality doors — quality-controlled in every step of manufacture from American forest to finished product. No chance of rejects caused by inferior adhesives, for instance. No chance of lost customers resulting from dissatisfaction after doors have been installed. Be sure that the name on the door you start with is **Atlas Plywood.**

RIGHT FOR EVERY PURPOSE. Where there's a "way" there's an Atlas Plywood flush door to make it more beautiful.

Through these doors enter the greatest builder profits

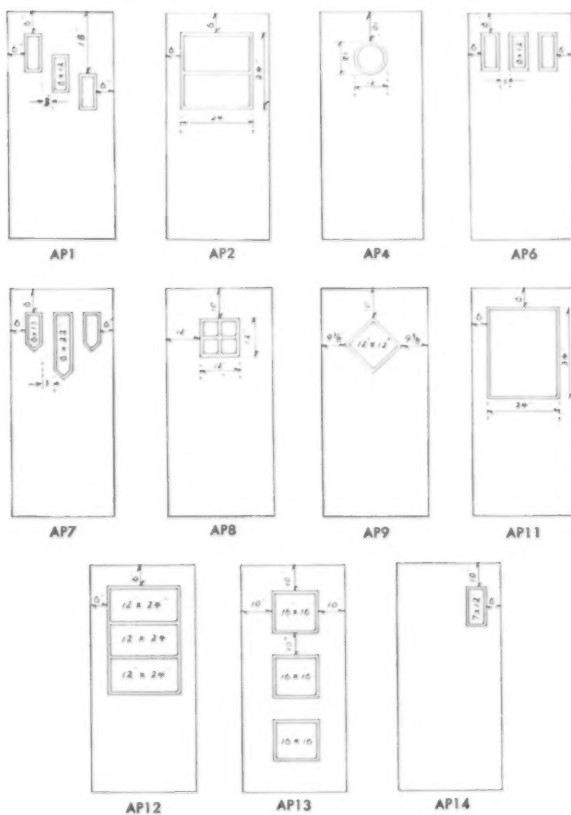

Your prospective home-owners can depend on the quality of Atlas Plywood flush doors — and you can literally bank on the profits. That's the dependable beauty of Atlas Plywood flush doors.

Atlas Plywood stands behind its guarantee for gluing, trimming, truing and sanding, because Atlas Plywood controls the quality at every step.

"Push-A-Matic" ventilating range hoods with 3-speed push-button controls for fan and light are now available. Hoods come in standard lengths, designed to fit all cabinet depths, 11½" to 12½". Price: \$32.60 to \$59.50.

► *Berns Mfg. Corp., Dept. AB, 3050 N. Rockwell St., Chicago 13, Ill. Booth No. 365—Hilton.*

Check No. 1067 on reply card, p. 168.

New design for locksets

Western Lock has a new design in locksets and matching cabinet hardware. Named "Sunray" the design features an inverted cone in the knob reflecting a geometrical pattern. Available in all standard finishes.

► *Western Lock Mfg. Co., Dept. AB, 211 N. Madison Ave., Los Angeles 4, Calif. Booth No. 433—Sherman.*

Check No. 1068 on reply card, p. 168.

Worthington air-conditioning

The new Worthington Flexi-Cool Air Conditioning unit is self-contained, can be arranged horizontally or vertically. Available in 2, 3, 5, and 7½-ton capacities, can be used with existing forced warm-air furnaces, with or without the fan section.

► *Worthington Corp., Dept. AB, Harrison, N. J. Booth No. 890—Coliseum.*

Check No. 1069 on reply card, p. 168.

Porcelain-on-steel bathtub

Ingersoll T-106 bathtub is a 5' recessed unit with acid-resisting, stain-proof white porcelain finish that is not affected by medicines, soaps or bleaches. A high tilting-in flange assures waterproof seal.

► *Ingersoll Products Div., Borg-Warner Corp., Dept. AB, 1000 West 120th St. Chicago 43, Ill. Booth Nos. 712-720—Coliseum.*

Check No. 1070 on reply card, p. 168.

Plate glass gives clear view

"Parallel-O-Plate" glass made by Libbey-Owens-Ford Glass Co. shows its clarity, as pictured on right of photo above. Two new grinding machines grind both surfaces of the glass, give it surface parallelism, little distortion.

► *Libbey, Owens, Ford Glass Co., Dept. AB, 608 Madison Ave., Toledo 3, Ohio. Booth Nos. 27, 28—Hilton.*

Check No. 1071 on reply card, p. 168.

Garage door package

A customized design package is provided at no extra cost with each Crawford Door Co. door. In the package: 8 round rosettes and patented studs; larger round and square rosettes; various moldings, brads, glue.

► *Crawford Door Co., Dept. AB, 20263 Hoover Road, Detroit 5, Mich. Booth No. 837—Coliseum.*

Check No. 1072 on reply card, p. 168.

Vinyl folding door

"Closur-Dor" is a heavy duty non-rigid folding door and fits up to a 32x80" opening. Door is electronically heat-sealed, has a steel leading edge with a security latch. Price of "Cloud White" embossed vinyl: \$8.95.

► *Closures, Inc., Dept. AB, 533 E. Forest Ave., Detroit, Michigan, Booth No. 214—Hilton.*

Check No. 1073 on reply card, p. 168.

Generator comes in 9 sizes

This electric hot-water generator by Precision is constructed of aluminum and copper and is available in nine sizes. It is designed for radiant panel, convector, baseboard and radiator type heating systems.

► *Precision Parts Corp., Dept. AB, 400 North First St., Nashville 7, Tenn. Booth No. 501—Sherman.*

Check No. 1074 on reply card, p. 168.

Folding door operates quietly

Pella wood folding doors operate quietly because of concealed spring connectors. Doors fold to a compact stack of only 2-in. or less for each foot of opening width. Nylon rollers add to its quiet operation by eliminating metal to metal contact.

► *Rolscreen Company, Dept. AB, Pella, Iowa. Booth No. 19—Hilton.*

Check No. 1075 on reply card, p. 168.

JANUARY 1956

*Dear Mr. Builder:
Now that it doesn't cost more,
we've got to have this stainless
steel sink in our new kitchen.*

Homemakers like the modern luxury look, the satiny feel, the forever lasting beauty of Carlton Stainless Steel Sinks. That's why Carlton Sinks put extra sales appeal into your kitchens . . . People want that permanent sparkle—know that a stainless steel sink is so much easier to keep bright and clean. And their first cost is their final cost—for Carlton Stainless Steel Sinks can never wear out!

Don't miss **BOOTHS
NO. 379-380
CONRAD HILTON
HOTEL**

When you are in Chicago for the National Home Builders Show, January 22nd-26th, we'll appreciate your stopping at the Carlton booth in the Conrad Hilton Hotel. Seeing our Stainless Steel Sinks is a lot more important than just reading about them!

Don't overlook the special Carlton rubberized undercoating that cuts dish-washing clatter; changes garbage disposal noise from a growl to a purr! See for yourself how stainless steel's extra resilience reduces dish chipping and breakage. Carlton's narrower wall between twin bowls almost eliminates the splash from a swinging faucet, while the deeper (7 3/4") bowl allows up to a full gallon more water capacity.

Special Note to Builders, Wholesalers, Architects:

A Carlton Stainless Steel Double Sink Bowl (32"x21") weighs only 17 pounds, makes installation much easier. Stainless steel, lighter than cast iron or porcelain on steel, saves you money on shipping costs, too. Write for free Catalog 56, illustrating our complete line, and send us the name of your distributor. SINK DIVISION, Carrollton Mfg. Co., Carrollton, Ohio.

BUILDERS MAKE MONEY WITH SAFETY "EXTRA"

Merchant builders report homes sell better when they feature Fire Hose Station, household form of the fire

hose cabinet used in major structures. "Most sales appeal I can get for \$40," says one.

Private builders and even remodeling contractors find this novel and practical product brings extra profit. "Anyone will pay \$100 for Safety," one states. "Especially in areas where it cuts insurance cost."

Fire Hose Station is a steel cabinet not much bigger than an album of phonograph records. It can be recessed between studs or simply wall-hung. Inside is 25 to 75 feet of fire-type hose on patented quick-release rack. Adjustable nozzle is locked on; valve at other end connects to standard cold water line. Door can match wall. By the leading manufacturer of Interior Fire Protection Equipment since 1887...

Delco-matic makes the garage door as mechanically up-to-date as the rest of the home; adds a new and different sales feature which will be used at least **FOUR TIMES EVERY DAY**—much oftener than many other conveniences.

Housewife operates Delco-matic from button in car or button inside home; can open and close door for kids taking out bikes, etc., without effort.

Delco-matic means safety after dark, comfort and convenience day and night in any weather.

**The most overdue
improvement in any fine home
has just arrived in a package
marked**

Delco-matic

How many fine homes reach the market with everything in them sparkling new and modern as can be—except the largest piece of moving equipment in the whole place, the garage door, which is still operated by hand, just as it was 20 years ago! And, the housewife will still have to get out of her car in rain, snow or midnight darkness to operate it! Can this be 1955?

GM-DELCO Delco-matic Garage Door Operator adds the final touch of modernity to ANY home. It eliminates the annoyance of an obsolete method and brings the garage door mechanically up-to-date with the rest of the home—as it should be.

Delco-matic is a new, simple, compact package unit with many wonderful features. It bears two famous names, General Motors and Delco, and it is sold, installed, warranted and serviced by Crawford, the nation's leading garage door specialists.

Responsible builders have a very special deal waiting for them at their local Crawford Door Sales Company, listed in the phone book under DOORS. Call now; it's worth while.

See the Delco-matic Display and get our Special Builder Offer at Booth 837 (Coliseum) N.A.H.B. Show, Chicago.

INSULATING SHEATHING

Celotex Insulating Sheathing is so strong, so effective, so durable we guarantee its performance *for the entire life of the building!* That's why progress-minded builders are using this Guarantee to help them make sales to value-minded home buyers.

WITH THIS GUARANTEE, YOU ACCOMPLISH TWO THINGS:

1. You win your prospect's confidence and trust by demonstrating that you use only the best . . . *genuine* Celotex Products . . . even where they can't be seen.

2. You stimulate sales by convincing prospects their dollars are working harder and getting more for them . . . in sturdier, better-insulated homes.

For only Celotex Insulating Sheathing is made from tough, interlocking, long Louisiana cane fibers (nature's "long-life" fibers), protected against dry rot and termite attack. Goes up 30% faster, with up to 15% less waste. Insulates and weatherproofs. Double-waterproofed . . . no wet-weather delays. And these are just a few of the *practical job advantages* that make so many builders specify *Celotex* Insulating Sheathing for every construction job.

Celotex National Ads do a brand name pre-selling job for you in LIFE and THE SATURDAY EVENING POST!

Throughout 1956 . . . month after month . . . you'll see ads that really *work* on America's future home buyers . . . part of an unprecedented national advertising campaign to *pre-sell* your prospects on the quality and value of Celotex Products.

These are powerful, colorful full-page ads in LIFE and THE SATURDAY EVENING POST that appeal to prospective home owners. Tie in by letting prospects know your homes are built with *genuine* Celotex Products . . . the brand name with nationwide preference created by over a third of a century of national advertising.

Now...for less money

Put more cost-cutting, portable electric power on your jobs!

That power-packed Onan Model 205AJ on the construction site above, delivers 2,500 watts of A.C. power, enough to operate several electrical tools or floodlights simultaneously. Powered by an Onan 4-cycle gasoline engine, it has all the 4-cycle advantages of quick starting, long life and easy maintenance, yet it weighs only 154 pounds, and costs less per watt of output than any electric plant in its size range.

This model and others in the new AJ and AK series, ranging in size from 500 to 2,500 watts, are all lighter in weight, more compact, and lower in cost than previous models. They are completely Onan built . . . powered by new, modern, short-stroke, single-cylinder Onan gasoline engines, direct-connected to Onan drip-proof all-climate generators.

Equipped with carrying frame or two-wheel, rubber tired dolly, these new electric plants can be taken anywhere . . . moved around easily on the job. Get all the facts on these new electric plants from your Onan distributor.

PRODUCTS SHOW: IDEAS TO BUILD WITH IN 1956

Gas units are built-ins

These built-in gas cooking units feature: automatic oven clock control; controlled top burner heat; seamless porcelain enamel oven and broiler; pyrex window in oven. Can be arranged in peninsula, island or straight-line counters. Available in color.

▶ *Caloric Appliance Corp., Dept. AB, 12 S. 12 St., Phila. 7, Pa. Booth Nos. 736, 753—Coliseum.*

Check No. 1139 on reply card, p. 168.

Weatherstrip and balance

Both weatherstripping and spring-sash balances are provided in the Dura-seal window unit. Spring housings are recessed into the sash, and provide pressure strong enough to be snug, but not so strong as to hinder sliding.

▶ *Zegers, Inc., Dept. AB, 8090 So. Chicago Ave., Chicago 17, Ill. Booth No. 11—Hilton.*

Check No. 1142 on reply card, p. 168.

Plastic-sealed windows

This aluminum awning window is low cost, has a highly effective vinyl weather-seal strip forced into channels in the metal frame. The window can be installed as it is delivered, with no vent adjusting on the job.

▶ *Superior Window Company, Dept. AB, 5300 N.W. 37th Ave., Miami, Fla. Booth Nos. 825 and 826—Coliseum.*

Check No. 1145 on reply card, p. 168.

Winter air conditioner

A counterflow type winter air conditioner designed for gas firing is available in 75,000, 100,000 and 125,000 Btu input ratings. Designated as model GCA, it's a fully assembled and wired unit.

▶ *American-Standard Air Conditioning Div., Dept. AB, 40 W. 40th St., N.Y.C. 18, Booth Nos. 139-141—Hilton.*

Check No. 1140 on reply card, p. 168.

Positive fitting threshold

A compressible vinyl strip that is compressed by the door makes this threshold a positive weatherseal. Besides hinged doors, it can be used with overhead garage doors. When the vinyl strip becomes worn, it can be easily replaced.

▶ *The Duralflex Co., Dept. AB, 3275 N. W. 37th St., Miami, Fla. Booth No. 814—Coliseum.*

Check No. 1143 on reply card, p. 168.

Sliding-door pocket frame

Grant No. 500 Series packaged sliding-door pocket frame can accommodate doors of thicknesses from 3/4" to 1 3/4". Any door height from 6' to 6' 8", or width from 2' to 3' may be used. Packed in easy-to-handle carton.

▶ *Grant Pulley & Hardware Corp., Dept. AB, 31-85 Whitestone Pkwy., Flushing 54, N. Y. Booth Nos. 301, 302—Hilton.*

Check No. 1146 on reply card, p. 168.

New saw is more powerful

An increase in power from 1/2 to 3/4 h.p. has been made in the 1956 "Power Shop" saw by DeWalt. Other improvements an easier-to-read bevel scale, dust proof electric boxes, a tamper-proof starting switch, and a newly designed combination blade.

▶ *DeWalt Inc., Dept. AB, Lancaster, Pa. Booth Nos. 872—Coliseum, and 32—Hilton.*

Check No. 1141 on reply card, p. 168.

Hardwood block flooring

Precision-cut bonded hardwood-block flooring for concrete-slab and wood sub-floors is not affected by heat and has super-thick selected red oak wearing surface; 9 x 9" blocks are cross-bond laminated for added strength.

▶ *Higgins Industries Inc., Dept. AB, P. O. Box 8169, New Orleans 22, La., Booth Nos. 549, 550—Sherman.*

Check No. 1144 on reply card, p. 168.

Aluminum sliding glass doors

New Glamour units come in KD multiples of 3' or 4'. Overall height: 6' 10". No extra mullions needed. Units are architecturally symmetrical, designed with separate frame and 2 separate door panels for easy installation.

▶ *Glamour Glass Wall-Dor Corp., Dept. AB, 4723 No. Pulaski Rd., Chicago 30, Ill., Booth No. 810—Coliseum.*

Check No. 1147 on reply card, p. 168.

NEW LOW COST FOLDING DOOR

CURTITION

Decorfold

Made of Colorful Hi-Impact Plastic!

Add sales impact for budget homes. Here now is an innovation in folding doors that helps you answer today's demand for functional design and roomier convenience in *any* price home. It's another Curtition model with quality that surpasses anything else on the market for the money.

Plastic creates strong appeal. With Curtition Decorfold you offer a door that's acid resistant, scuff proof...virtually damage proof...and easy to keep sparkling clean.

For standard openings and wardrobes. Curtition Decorfold opens with the *most compact stacking* of any folding door. Saves space in close quarters...provides *full access* to wardrobes and closets. Saves you money over sliding doors...with faster, simpler installations.

Doors are completely assembled with Nylon clip-glides and pull handles for both sides. Packaged with track, screws and friction catch — ready for installation. Sizes to fit openings up to 10' in width.

2'0" x 6'8" door, only \$21⁵⁰ retail

Fits new decorating trend

Curtition Decorfold's rich plastic surface provides a pleasing blend or contrast to soft fabrics, carpets, masonry and wood furnishings. Choice of soft colors; to fit any decorative scheme.

Simplified trouble-free design

No wobble or chatter because of newly engineered one piece nylon clip-glides. No moving parts to jam up or come loose, no warping. Decorfold is center-line suspended in a steel track. Finger touch to open or close.

A 24" door folds back to only 2"

Decorfold's compact stacking is unique in folding doors — 1" for every 12" of door. The slim line stack provides maximum clear opening and a rich, subtle pillar effect.

— a year-round display of our products in the fabulous, new NATIONAL HOUSING CENTER. Your business will benefit from the operation and services of this Center. Make every effort to visit it. (The Homasote-Nova Exhibit is at the elevators on the Second Floor.)

— Homasote insulating-building boards in a still wider range of sizes, thicknesses and densities — plus the new Wilson Air-cor Roof-Decking that makes condensation a problem of the past.

— new and expanded services to architects, builders and dealers — prompt service on current problems — new, more efficient sales aids and literature. Write today for the new 8-page brochure "The Homasote Line Today" — and the new 64-page "Homasote Handbook" that took 20 years to write and 46 years of manufacturing quality products to make it possible. You will find value in both books. Kindly address your inquiry to Dept. A-7.

TRENTON 3, NEW JERSEY

all eyes are on **WESLOCK'S**

SUNRAY

Weslock still leads as a style originator with SUNRAY, the newest and most beautiful creation in matching design residential locksets and cabinet hardware.

The secret is in the ingenious inverted cone design which reflects gleaming rays of light from any angle, and because the hand never touches the reflecting surface, the brilliance will last forever.

FACTORY: HUNTINGTON PARK, CALIFORNIA

PRODUCTS SHOW: IDEAS TO BUILD WITH IN 1956

Flush-type steel door jamb

Special "plaster" bead on nailing permits joint compound to be floated flush to edge of jamb in finishing wall. Jamb mounts on 1/2" dry wall after wall is installed, can be installed singly or in multiple units.

▶ *Trinco Metal Products, Dept. AB, 6304 Olive St. Rd., St. Louis 5, Mo., Booth No. 340—Hilton.*

Check No. 1148 on reply card, p. 168.

One-story, prefab home

Starlighter, a prefab one-story house, features double-wall construction. Furnished and included in package price is fir framing lumber above floor joists and all rough and finish nails and hardware.

▶ *Thyer Mfg. Co., Dept. AB, 2857 Wayne St., Toledo 9, Ohio, Booth Nos. 183, 184—Hilton.*

Check No. 1151 on reply card, p. 168.

Horizontal cooling unit

Available in one and two h.p. sizes, the Type 911 air-cooled unit can be hung from the ceiling in a shop or from basement ceiling joists, in attic or crawl space and connected with forced warm-air system.

▶ *Mueller Climatrol, Dept. AB, 2005 West Oklahoma Ave., Milwaukee 15, Wis., Booth Nos. 113, 115—Hilton.*

Check No. 1154 on reply card, p. 168.

Kelvinator's 1956 appliances

Kelvinator's 1956 line includes the "Foodarama," a built-in, 16 cu. ft. combination freezer-refrigerator, (pictured here). Four new ranges are all 40-in. wide. Built-ins include oven, surface cooking and griddle units.

▶ *Kelvinator Div., Dept. AB, Am. Motors Corp., 14250 Plymouth Rd., Detroit 32, Mich., Booth No. 1—Hilton.*

Check No. 1149 on reply card, p. 168.

Window-operating push bar

Push bar, (above) furnished with window at no extra cost, and Roto adjuster, at \$7 to \$8 list, are interchangeable on Modernaire awning-type convertible wood windows. Button disengages sash to open to 130 deg.

▶ *Modernaire Corp., Dept. AB, 3400 Kinsman Road, Cleveland 4, O., Booth No. 336—Hilton.*

Check No. 1152 on reply card, p. 168.

Southern pine lumber

Southern Pine lumber, adaptable for use under most severe exposure conditions, is being produced for the new exposure look in construction. Lumber is seasoned to minimize shrinkage.

▶ *Southern Pine Assn., Dept. AB, National Bank of Commerce Bldg., P. O. Box 1170, New Orleans 4, La., Booth Nos. 541-542—Sherman.*

Check No. 1155 on reply card, p. 168.

Recess medicine cabinets

Four series of cabinets permit wide choice: sliding-door cabinets with picture-type frames or with standard frames, deep drawn seamless or formed and welded body cabinets. All models with or without fluorescent fixture.

▶ *Hy-Plane Manufacturing Co., Dept. AB, 1822 Cadwallader St., Phila., 22, Pa., Booth No. 808—Coliseum.*

Check No. 1150 on reply card, p. 168.

Torsion spring garage door

"Live shaft" torsion springs, as well as stretch springs for counterbalance, are a hardware feature in a redesigned line of residential overdoors; also new hinges, improved twin rollers, stronger trussing on two-car doors.

▶ *McKee Door Co., Dept. AB, 110 Hanks Ave., Aurora, Ill., Booth Nos. 215, 216—Hilton.*

Check No. 1153 on reply card, p. 168.

Winter air conditioners

Automatic controls on Shana-Heat winter air conditioners regulate operation of furnace, supply right amount of heat to each room. Units include aluminum foil-faced glass wool blanket insulation; one-piece body construction.

▶ *Shana Manufacturing, Inc., Dept. AB, 188 W. Randolph St., Chicago 1, Ill., Booth No. 792—Coliseum.*

Check No. 1156 on reply card, p. 168.

**Patented Dur-O-wal Sets
the Pace for Reinforcing
Quality and Performance**

Masonry industry leaders
throughout the nation hail
butt-weld Dur-O-wal for per-
formance, quality and economy.
Masons prefer Dur-O-wal be-
cause it lays flat . . . works
fast . . . handles easily.

The masonry industry pre-
fers Dur-O-wal because it safe-
guards the beauty of masonry
by providing both vertical and
horizontal reinforcing in all
types of masonry walls.

**6 Reasons
why Dur-O-wal is
STRONGER, FASTER
AT LESS COST**

- Mechanical Bond every 8 inches of wall
- High Tensile Steel (100,000 p.s.i.), shipped in convenient 10 foot lengths
- Double Mortar Lock at each weld
- Electric Butt Welds place all rods on a single plane
- Knurled Side Rods lay straight and flat due to hardness of steel
- Trussed Design causes side rods to work together.

WINDOWS by VENTO

(STEEL OR ALUMINUM)

Exclusive Features in

VENTO Aluminum Awning Windows

- AUTOMATIC LOCKING**... No gadgets to turn, no gimmicks to operate, nothing to get out of order.
- WEATHER TIGHT**... VENTO alone keeps metal to metal contact plus metal to weatherstrip.
- UNLIMITED ADJUSTMENT**... Unique in ability to be quickly returned to proper adjustment.
- POWER PLUS OPERATOR**... Screw — not worm geared — operator working in self-lubricating nylon journals.
- EFFORTLESS OPERATION**... Nylon roller blocks at all friction points permit finger tip operation.

VENTO Steel Casement Windows

All casements drilled and tapped to receive storm sash and screens, operator arm guide channels attached with screws for easy removal and replacement, if necessary; ventilator frames constructed from the same heavy sections as the outside frame to provide greater rigidity and stronger ventilators.

VENTO Bonderized "Champion" Steel Basement Windows

Effortless operation gives any of three ventilation openings, or sash removal. Sturdy 14 gauge jamb fins for easy installation in block or poured concrete walls. An improved cam latch and slotted opening allow greater tolerance, insuring positive operation and latching under all conditions. Basement sash also made in Thrifty style in three standard sizes and in special sizes. Both Champion and Thrifty styles available in putty or puttyless glazing. For poured basement walls, window forms available for both Champion and Thrifty styles to suit individual specifications.

Aluminum sliding glass doors

Slide-View aluminum sliding glass doors feature type 6063-T5 aluminum alloy extrusions with corrosion-resistant Alumilite finish. They are weather-sealed on all 4 sides with continuous mohair weatherstripping.

▶ Slide View Door and Window Co., Dept. AB, 521 No. La Cienega Blvd., Los Angeles, Calif. Booth No. 233—Hilton. Check No. 1163 on reply card, p. 168.

House paint

SWP house paints are available in exterior velvet flat as well as regular gloss. With 91 new exterior colors to select from, the split pages of this Color Selector book help to choose the right go-together colors.

▶ The Sherwin-Williams Co., Dept. AB, 101 Prospect Ave., N.W., Cleveland, Ohio, Booth Nos. 515-516—Sherman. Check No. 1164 on reply card, p. 168.

Cooling exhaust fans

The Ultra twenty has a sturdy all-welded steel frame with baked-enamel finish. The fan is electrically reversible with 3 speeds in each position. Thermostat starts fan and stops it automatically when desired.

▶ The Lau Blower Co., Dept. AB, 2001 Home Ave., Dayton 7, Ohio, Booth No. 856-B—Coliseum.

EVEN ONE PANELED WALL HELPS SELL A HOUSE!

New cost-cutting installation method helps you add "sell" of paneled walls ...even to low cost housing!

WELDWOOD® CONTACT CEMENT PUTS UP PLYWOOD PANELS WITHOUT NAILS!

BONDS INSTANTLY
ON CONTACT

- Ends nail-setting, puttying and finishing nail holes!
- No change in plans... no special construction needed!
- Install plywood panels directly to studs or furring strips!
- Makes the use of *pre-finished* plywood more practical than ever!

Cash in on the increasing trend to paneled walls! The magic of Weldwood Contact Cement helps you! It's a revolutionary new concept in gluing that does away with clamps, presses, nails!

Weldwood Contact Cement is ready-to-use! In cans and drums at lumber yards, hardware and paint stores. If your dealer isn't yet stocked, write us for nearest source of supply.

New Way to Apply Micarta, Etc.

Weldwood Contact Cement is also the new improved way to apply plastic surfacing materials like Micarta to kitchen counters, bathroom and powder room surfaces, etc. Bonds equally sure on any base.

... AND FOR FINISHING PANELED WALLS, USE THESE WIZARDS WITH WOOD.

White Firzite® - for a modern "woody" pickled or blond finish. A "must" undercoater for fir plywood paint jobs.

Clear Firzite - for a smooth even finish on fir plywood stain jobs. Tames wild grain.

Satinlac® - for a rich satiny, natural wood finish. (See Sweet's Catalog for specifications.)

(See Sweet's Catalog for specifications.)

NOW GET ALL THE FACTS ON AIR CONDITIONING FIRSTHAND... **talk to your**

CLIMATE MAN's "see-it-yourself" demonstration kit gives you a real preview of air conditioning for any type of home you sell. Full-color transparencies show how Worthington residential units will look... how they'll fit.

And actual tests made on parts of the unit—like coils and filters—demonstrate the quality and operation of Worthington equipment. Kit proves it's easy to make Worthington air conditioning the big sales feature of your homes.

WORTHINGTON Climate Man

His unique "see-it-yourself" demonstration shows you how easy it is to air condition any home

You can't escape it! Air conditioning is the *right* sales feature for any new home.

But, before you make room for it in your plans, talk to the Worthington CLIMATE MAN. His unique demonstration will give you facts and figures that make it easy to include a Worthington residential unit in every home you build.

No matter what type of home you offer, there's a water or air-cooled Worthington unit to help you sell it faster. For limited space, the CLIMATE MAN can show you the remarkable new add-on FLEXI-COOL—that comes in sections, goes anywhere—even in a closet. And you'll learn all about Worthington's Year-Round Air Conditioner—the unit that provides summer cooling and winter heat in one compact cabinet.

Before he's finished, the CLIMATE MAN will map out an actual installation for any home you wish, showing where the Worthington unit fits . . . and how it will look. And he'll wind up the demonstration by showing you key parts that make up these dependable Worthington units.

Don't miss this demonstration. It's the quickest and most complete answer to all your air conditioning questions. Call your Worthington dealer and make an appointment today. Worthington Corporation, Air Conditioning and Refrigeration Division, Section A.6.53-AB, Harrison, N. J. A.6.53

Sectional FLEXI-COOL units fit any home—anywhere. Blower, filters and cooling section come in one package or separate units to fit requirements of any installation, air or water-cooled.

Filter test demonstration dramatizes high efficiency of Worthington viscous-type throw-away filters. Condenser coils and exterior finish are also demonstrated.

New Year-Round Air Conditioner—more compact and better looking—heats in the winter, cools in summer. Optional air conditioning slides in like a drawer, can be added at any time.

More than 5 million home owners will read about the CLIMATE MAN in the *Post, House and Garden* and *Business Week*. Campaign helps you sell Worthington air conditioned homes.

Air-cooled air conditioner, designed for installation where water is at a premium, is completely electric. It operates without a drop of water—and keeps hottest homes pleasantly cool.

See the Worthington Exhibit at the National Association of Home Builders Show, Booth No. 890

he shut
his
door

to new
customers!

A few years ago his firm was kept pretty busy by its regular customers. So one day he decided, "We've got all the business we need—why look for more?"

Today he's out of business. He just wasn't aware of this vital statistic: 15% of most firm's customers turn over each year. Multiply this by 7 and see what can happen.

It's downright risky to count on today's customers for tomorrow's business. Few can afford to stop adding new customers on a *regular* basis. But first you have to find them . . . and that's where Dodge Reports come in.

Dodge Reports tell you all you need to know about

potential new customers—right in your own territory. These daily reports give you their names, show what they're in the market for, tell where to reach them and when to see them to close the business.

These people are going to be customers for someone . . . why not for you?

We'd like you to see some Dodge Reports covering construction in whatever area you do business—and will include our new booklet telling how men in your line use Dodge Reports to land profitable new customers.

Just mail the coupon *today*. No obligation, of course.

"CHAMP" Forms with cross members on 24" centers, being erected for house foundation in Skokie, Illinois. Contractor, Harding Bros., Northbrook, Illinois

New Design Lowers Form Costs

It's SYMONS New "Champ" Form

"CHAMP" Form Panel
Cross members on 12" centers

Rail Plates

JUST 3 PIECES

Connecting Bolt

2-Way Form Tie

Tightening Wedge

The new Symons "CHAMP" Form brings to the builder an efficient and accurate form at a cost approximately 20% less than Symons Standard Panel Form. Although designed for light, commercial and residential construction, contractors report the "CHAMP" is equally satisfactory for use on high pours.

CONSTRUCTION FEATURES—The panel has a 2x4 frame with 2x4 cross members that lay flat against 3/4" plywood face. The cross members are placed on 12" or 24" centers depending on whether forms are to be used for residential or commercial construction. Pressure against form is transmitted directly to tie through rail plates which are located at each end of cross members and attached to frame.

INTERCHANGEABLE FEATURE— "CHAMP" Forms are made in the same sizes as Symons Standard Panel Forms—2 ft. wide, and 4', 6' or 8' long. Special sizes will be made

to order. The hardware and ties used on Symons Standard Panel Form are also used on the "CHAMP" form. This makes it possible to use Symons Standard and "CHAMP" Forms interchangeably.

"CHAMP" Forms may be rented with purchase option—all rentals to apply on purchase price.

SYMONS CLAMP & MFG. CO. Dept. A-6
4261 Diversey Avenue, Chicago 39, Illinois

Please send additional information on the new "CHAMP" Form.

“Alfol Insulation adds a big sales feature at no extra cost: superior summer comfort”

“In Cincinnati,” writes homebuilder Joseph J. Robers, Jr., “superior summer comfort is a feature that buyers really look for. By using Alfol Reflective Insulation, we have it. This adds substantially to our sales story . . . yet adds nothing extra to our costs!”

The “Cool Feel”

As Mr. Robers knows, Alfol provides effective protection against winter heat loss and delivers a substantial “bonus” in summertime efficiency. It actually makes a difference your prospects will notice! We call it the “Cool Feel.”

601

The original reflective insulation blanket, Alfol consists of multiple aluminum foil sheets that space themselves automatically, reflect 95% of all radiant heat. Application is fast, easy, almost foolproof. Kraft and duplex backing adds extra support, provides your FHA-required positive vapor barrier.

Free data book

Why not send today for a free copy of the new 24-page Alfol data book. Learn how you can add greater summer comfort to your sales package . . . with the Alfol “Cool Feel.”

Open-beam design Roof Deck saves

It's Roof Deck . . . comparable insulation to 2" wood deck plus 1" fiberboard. Made in 2'x8' panels, easy to lift and handle. Cuts application time as much as 45%. Eliminates need for separate roof boards, insulation, lath and plaster and ceiling finishing.

It's Insulation with vapor barrier . . . meets heat loss requirements for roof and ceiling in any climate. The built-in vapor barrier ends all worries about condensation. Absorbs sound better than wood or plaster. Remarkably tough, withstands roof-top traffic during construction.

And finished ceiling . . . interior ceiling of this Ray Hunke house shows how underside of Insulite Roof Deck requires no further finishing. White, flame-resistant surface is applied at factory. Lay Roof Deck over pre-finished beams and ceiling is done.

N. A. H. B. Convention

Stop in and see us, booth 116-117, Hilton Hotel

sells fast...Insulite up to \$25 per sq.

"Buyers sure like high beamed ceilings," says Ray Hunke, successful young Wichita builder. "They regard them as a touch of real luxury. Yet with Insulite Roof Deck, I can actually beat conventional construction by about \$15 per square. And compared with other open-beam methods, Insulite Roof Deck saves me \$20 to \$25 per square—that's \$275 on a small home."

Hunke has now built and sold more than 600 homes—thanks, in large part, to his own smart design ideas. The trim, handsome home below features his highly popular exposed beam construction.

Want complete information on this modern roof-and-ceiling method? For easy-to-follow details, cost-comparison sheets and pictures, write Insulite, Minneapolis 2, Minn.

STRIP OAK FLOORS OVER CONCRETE

**Low-cost installation method
proven successful in thousands of homes**

FREE MANUAL GIVES SIMPLE STEP-BY-STEP INSTRUCTIONS

If you're building homes on concrete slab foundations, send for this free Oak Flooring installation manual. It shows you how to use the "screeds-in-mastic" method for laying strip Oak Flooring over concrete without the expense of a wood subfloor.

Builders throughout the country are using this fully-approved, economical method to give even lowest-cost homes the unequalled sales appeal of Oak Flooring. It may be used with any approved type of slab construction. No special tools are necessary. Carpenters or floor layers can do the job quickly, easily and successfully . . . without any previous experience.

Short lengths of 2x4 screeds are laid in an asphalt mastic which anchors them to the slab. Strip Oak Flooring is nailed to the screeds. Sanding and finishing follow in the usual manner . . . or prefinished flooring may be used.

No other floor gives you ALL these advantages

More than 8 out of 10 home buyers, builders and architects prefer Oak Floors for their unmatched beauty, lifetime durability and easy maintenance. For slab foundation homes Oak Floors have these additional advantages that increase salability:

Oak Floors have high insulating value . . . prevent costly heat loss through the concrete slab.

Oak Floors have natural resilience that counteracts the uncomfortable hardness of concrete.

You know you're right when you specify Oak Floors for slab-on-ground construction.

Illustrated is PREWAY'S four-element electric Counterchef in "302" Satin Stainless Steel. Available, too, in two-element units. PREWAY gas Counterchefs also designed in two or four-burner units, in "302" Satin Stainless Steel or White Porcelain Enamel.

The Most Complete Line of Built-in Cooking Equipment for the Home.

As every home builder knows, the one best way to beat today's profit squeeze — and tomorrow's — is to make each unit of area, each man-hour of labor, each dollar of investment more productive. Whip-cracking won't do it, but careful planning will . . . planning based on accurate up-to-the-minute knowledge.

For example, if you have the facts on PREWAY, you know you can readily trim a hundred dollars or more from the cost of a modern kitchen by using Wallchef and Counterchef Bilt-Ins. These fully approved units, with patented features and all automatic controls, are the easiest to install. You gain time, save on labor! And because they are judged the world's most beautiful built-ins, available in a wide range of finishes, they add a special note of luster to the appearance of your kitchen.

Investigate the potential Wallchef and Counterchef units offer you. Plan to see them at the Chicago Show or at the distributor's display room in your area . . . and write today for product bulletins on the type that interests you — gas or electric.

PREWAY Inc.

8156 Second St., N.
Wisconsin Rapids, Wisconsin

Plexiglas door handle

A luxurious door handle made of sparkling clear Plexiglass is standard equipment on Nudor aluminum sliding doors. It adds new beauty to the door handle and lends itself to any interior decor.

▶ Nudor Mfg. Corp., Dept. AB, 7326 Fulton Ave., North Hollywood, Calif., Booth No. 376—Hilton.

Check No. 1217 on reply card, p. 168.

Spacemaster folding door

A folding door, the Modernfold Spacemaster, opens entirely within the doorway. Ideal on closets and wardrobes, they permit use of floor and wall space up to the opening. Door installation: about 30 minutes. Suggested price: \$22.45.

▶ New Castle Products, Dept. AB, New Castle, Ind. Booth Nos. 86, 87—Hilton.

Check No. 1218 on reply card, p. 168.

Gravity drain dishwasher

An electric rod heater preheats the porcelain enamel tub to prevent cooling of entering water. There is also a pre-rinse before the dishwashing and power-rinse cycles. Trays roll out on nylon bearings for easy loading.

▶ In-Sink-Erator Manufacturing Co., Dept. AB, Racine, Wis., Booth No. 858—Coliseum.

Check No. 1219 on reply card, p. 168.

"My Berger Convertible paid for itself on this one job alone!"

says F. E. Fitzpatrick,
Building Contractor, Westwood, N. J.

"When I signed the contract to build this house, I had my fingers crossed. The specifications gave me no leeway—grades had to be on the button. So I decided to take out "job insurance" by getting a transit level I could trust—a Berger Convertible. So far, I've used it for leveling foundations, setting forms, locating buried survey stakes, setting the first course of siding and establishing some tricky grades. Before this job was finished, my Berger Convertible paid for itself."

That's because the Berger Convertible is built for builders. The new, ultra-sharp, 22-power, 10 1/2" internal focusing telescope gives you a crisp, clear, right side up image over long sights as well as at distances as close as three feet. Rugged brass and bronze construction—dust protected leveling, clamp and tangent screws—it takes the bumps in the field and stays on the job without time lost for repair.

Why the new Berger Convertible with 3-ft. short focus is the best buy . . . Compare

TELESCOPE:	Short focus 3 feet; erect image; power 22 diameters; diameter of objective 35 mm.
OPTICS:	Coated—brilliant, clear image
FOOT PLATE:	Forged brass; trivet integral
YOKE FRAME:	Cast bronze
HORIZONTAL CIRCLE:	Forged brass, with double vernier reading to five minutes
VERTICAL ARC:	With double vernier reading to five minutes
LEVELING BASE:	Four screws; nickel silver leveling screws with cold and heat-resistant heads
SPINDLE:	Forged steel
SHIFTING PIECE:	For setting over a point
TANGENT PIECE:	Brass
TELESCOPE CLAMP:	Brass
POSITIVE LOCKING MECHANISM:	Converts instrument from transit to level with ease and speed and stays in adjustment at all positions
PLATE LEVEL:	In addition to telescope vial
CASE:	Mahogany transit case
STRAP:	Padded leather handle

Quick delivery—thanks to enlarged capacity.

Price \$219*, complete with mahogany transit case, tripod, plumb bob, sun shade and instruction manual.

Write for literature on the Berger Convertible, our 12" Dumpy Level, Service Transit-Level and Duplex Level. And ask about our Engineers' Transits and Levels.

*What every builder can
learn about women ...
from me !...*

- 1** The woman you want to sell is already sold on this G-E Monogram... We know that 55 out of 100 women believe G.E. makes the best home appliances. This is based on an actual survey.

- 2** She likes the smart, compact **AIR-WALL** register. She loves the way **AIR-WALL** actually blankets walls with warm air in the winter (this keeps cold outdoors)...and covers them with cool air in summer (this keeps heat out). Cozy idea, isn't it?

- 3** **AIR-WALL** saves floor space—lots of it! And here's another **BIG PLUS**... **AIR-WALL** air is clean, filtered. Saves housework time...cuts cleaning bills...fabrics and furniture stay fresh as new longer. Mister, have you any idea what this means to a woman? Why, it's the millennium!

- 4** It's all automatically regulated by the G-E thermostat. (And only G.E. has Musitherm Heating Control.) No more furnace tending...husbands stay happier, more comfortable, too. Yes, they do-o-ol I **KNOW!**

- 5** Sell space, saving, cleanliness, comfort, youthfulness through better living. A woman is a woman with a heart overflowing for the man —**YOU**—who makes life easier.

- 6** **MR. BUILDER**... To sell women and men, check your G-E Heating Contractor today. Get the facts and selling features of G-E **AIR-WALL** System* of Home Heating and Cooling.

GENERAL  ELECTRIC

Home Heating and Cooling Dept., Bloomfield, N. J.

REG. TRADEMARK GENERAL ELECTRIC CO.

3 builder-proven ways to put more "sell" into your homes

PITTSBURGH WALL MIRRORS, like the copper-back one installed in this bathroom, are sure to put more "buying urge" into your homes. Mirrors give a room a more luxurious and spacious look . . . make any home more attractive and "worth more" to the buyer.

PITTSBURGH FULL-LENGTH DOOR MIRRORS—in bedrooms, entrance halls, bathrooms, and other places in the homes you build—can do a lot, *and at very little additional cost*, to help you sign up buyers. A full 68" high, they are available in 16, 18, 20, 22, and 24-inch widths. They fit more than 90% of all interior millwork doors.

*Every nickel you spend on glass shows.
And the results far outweigh the cost.*

Build it better with

Pittsburgh Glass

BUILDERS ALL OVER THE COUNTRY have found that there's nothing like large glass openings—especially when they're glazed with Twindow® . . . the window with insulation *built-in*—to give homes they build the feeling of more-than-average value. They find that their homes sell faster, too. Twindow is practical for any home, regardless of its price class. Fact is, more and more home buyers are *demanding* Twindow units—not only for picture windows, but for all other windows as well. They know how much Twindow means in comfort and lowered heating and air-conditioning costs. There are fifty-seven Twindow standard sizes to fit almost any requirement.

THIS CUTAWAY VIEW shows the construction of a Twindow unit, using two pieces of Pittsburgh Polished Plate Glass. The hermetically-sealed air-space between these panes gives Twindow nearly twice the insulating value of single-glazed windows. An exclusive feature of Twindow is its stainless steel frame. This protects the seal and glass edges, makes handling quick, safe, and easy.

See Sweet's Builders Catalog for detailed information on Pittsburgh Plate Glass Company products.

LOW PRICED PORTABLE HEATER

THE HERMAN NELSON

"THRIFTY"™

For Home Builders • Plasterers • Bricklayers • Carpenters • Plumbers

Never before a Herman Nelson Portable Heater at this low price! The "Thrifty" is especially designed for smaller building jobs—framing, plastering, plumbing, masonry work. It offers outstanding economy—with low first cost, low operating cost. It may be used indoors or out, and canvas ducts may be used to spot heat where wanted. "Sealed flame" indirect firing insures complete safety and dependability. Fewer moving parts insure longer, trouble-free service.

The "Thrifty" operates continuously for 18 hours maximum without re-fueling. Oil-fired, it uses only 0.7 to 1.25 gallons of fuel per hour. Safety controls protect against overheating—flame failure—motor failure. Heat output can be regulated. Electric motor powered. Capacity 50,000 to 170,000 BTU per hour. No other unit at or near its price can match the performance and safety of the new Herman Nelson "Thrifty" Portable Air Heater!

More Living Area In Every Home You Build

... AT LESS COST!

WARREN FOLDING DOORS

as much as **\$1,000**

worth of floor space saved in every home by eliminating space wasted for storing doors... as high as 90 square feet made useful... with Warren Folding Doors.

Compare the Sales Appeal

The style and beauty of Warren Folding Doors will help sell your homes. Smart buyers will love the way two rooms can be made into one... the way a wardrobe closet is "wide-open" with the swish of a Warren Folding Door... and they'll love, too, the way corners are left clear for completing their decorating and furnishing schemes.

Compare the Cost

No precise fitting — no mouldings or hinges are needed. Warren Folding Doors glide on an overhead track that can be installed in minutes. Both ends can be left unattached for "Free-Swinging" doors. Warren Doors come complete with screws ready for installation.

Compare the Quality

Warren Folding Doors are fashioned from 3/8" wide basswood slats rightly woven with heavy Seine Cord. Sturdy moulding members are attached to the ends. Ten high-gloss special enamel finishes, plus natural, are available. There's a color that's right for every interior decor. Warren Folding Doors are perfect for wardrobes, closets, room dividers... at almost all inside entrances.

Modern homes have telephones where family members sleep, work and play.

Work center of the home is the kitchen, ideal place for a wall telephone.

Multiple telephone outlets and concealed telephone wiring are quality features in any home, large or small. Convenience-minded buyers are looking for them. Sales-minded builders are providing them. Both parties benefit.

BELL TELEPHONE SYSTEM

Your Bell telephone company will be glad to help you work out economical concealed wiring installations. Just call your nearest business office and ask for *Architects and Builders Service*. For details on home telephone wiring, see Sweet's Light Construction File, 8i/Be. For commercial installations, Sweet's Architectural File, 32a/Be.

1956 PRODUCTS SHOW

20-inch window fans

A new series of low-priced 20" window fans featuring clean styling has four models: in the J20 series: straight exhaust (J20); portable (JP20); reversible (JR20); and portable-reversible (JPR20); close spaced grilles.

► *International Oil Burner Co., Fan Div., Dept. AB, 3800 Park, St. Louis, Mo., Booth No. 54—Hilton.*

Check No. 1247 on reply card, p. 168.

New telephone features

Color—8 hues—is prominently promoted for new telephone installations. Other features are hands-free speaker-phones, automatic answering and recording devices, portable phones, illuminated dials.

► *Illinois Bell Telephone Co., Dept. AB, 208 W. Washington St., Chicago 6, Ill., Booth Nos. 225, 226—Hilton.*

Check No. 1248 on reply card, p. 168.

Rolling-door hardware

Rolling-door hardware is made in 2-track types; one has built-in plaster ground, permitting sheet rock or plaster to be laid at track edge; other has built-in fascia strip, eliminates need for track-front valance or trim.

► *Washington Steel Products, Dept. AB, 1940 E. 11th, Tacoma 2, Wash., Booth No. 419—Sherman.*

Check No. 1249 on reply card, p. 168.

BOOTH 391, CONRAD HILTON HOTEL, CHICAGO

JANUARY 22-26

Aluminum and glass have become the two brightest names in building products. Coupled together—in sliding doors, in windows, and in their many other uses for home and commercial building—they give economy, durability and easier installation. For these reasons, more and more builders, contractors, architects are specifying—*aluminum*.

Now comes TRIMVIEW. A new line of aluminum extrusions for glass—designed *for the first time by glass men*. TRIMVIEW METAL PRODUCTS offers you a complete line of aluminum components of unsurpassed quality and beauty of design; engineered by expert craftsmen to fit the exacting standards and requirements of the builder . . . competitively priced to meet your building costs.

COVINA, CALIFORNIA

PRODUCTS SHOW: IDEAS TO BUILD WITH IN 1956

Moisture-vapor barrier

Moisture penetration can be virtually stopped by using Visqueen film (of Bakelite polyethylene) as a moisture-vapor barrier under concrete slabs, in crawl spaces, over subflooring, on warm side of exterior walls.

▶ *Visking Corp., Dept. AB, P. O. Box 1410, Terre Haute, Ind., Booth Nos. 369-370—Hilton.*

Check No. 1250 on reply card, p. 168.

Lavatory hanger

The "Uni-Lox" 1-piece hanger eliminates necessity of aligning separate hanger blocks for mounting vitreous china lavatories. Multiple screw holes make for secure fastening in any type wall construction.

▶ *Universal-Rundle Corp., Dept. AB, 217 N. Mill Street, New Castle, Pa., Booth Nos. 8, 9—Hilton.*

Check No. 1253 on reply card, p. 168.

Scholz package home

Scholz Homes offer a complete packaged home including pre-assembled and built-in plumbing, heating and electrical components, prefinished floor, wall and roof units and pre-applied bath tile panels. Many other features.

▶ *Scholz Homes Inc., Dept. AB, 2001 No. Westwood, Toledo 6, Ohio, Booth Nos. 347, 348—Hilton.*

Check No. 1256 on reply card, p. 168.

Cool-air system

With this attic installation of Warren Webster cool-air system, 4 key rooms are supplied from single plenum chamber, with common return through ceiling grille. Individual ducts to separate register eliminates supply plenum.

▶ *Warren Webster & Co., Dept. AB, 17th & Federal Sts., Camden, N. J., Booth No. 108—Hilton.*

Check No. 1251 on reply card, p. 168.

Taylor Made garage door

The Taylor Made garage door is a steel, zinc coated, receding type. It is available either as a package unit or completely assembled. Total assembly can be accomplished in 12 min. or less; 7x8 door is \$55.00.

▶ *Taylor Made Garage Doors, Inc., Dept. AB, 19800 Fitzpatrick, Detroit, Mich., Booth No. 846—Coliseum.*

Check No. 1254 on reply card, p. 168.

Baseboard hot-air heat

The advantages of both a hot-air system and a radiant system are combined in Thermo-Base baseboard heating. Its area provides 20% or more radiant heat with the speed of hot air systems.

▶ *Gerwin Industries, Inc., Dept. AB, 214 Spring St., Michigan City, Ind., Booth No. 880—Coliseum.*

Check No. 1257 on reply card, p. 168.

Custom-designed kitchens

Wood-Metal Kitchens offer colonial or contemporary designs in 12 new decorator colors and 10 natural wood finishes. They are available in birch, knotty pine, or oak. Built-in equipment is easily accommodated.

▶ *Wood-Metal Kitchens, Dept. AB, Kreamer, Snyder County, Pa., Booth Nos. 739-740—Coliseum.*

Check No. 1252 on reply card, p. 168.

Sliding windows

The Kota Casement Glider resembles a casement window, but ventilators slide, is fabricated of heavy extruded aluminum with custom trim. Other Kota products at Products Show include sliding doors and double-hung windows.

▶ *Kota Products, Inc., Dept. AB, North Country Rd., Rocky Point, N. Y., Booth Nos. 317-319—Hilton.*

Check No. 1255 on reply card, p. 168.

Prefab summer cottage

A summer cottage of attractive contemporary design is the latest in the Techbuilt line of prefabricated packages. A wide variety of sizes and the number of rooms and layouts is available.

▶ *Techbuilt, Inc., 55 Brattle St., Dept. AB, Cambridge 38, Mass., Booth No. 157—Hilton.*

Check No. 1258 on reply card, p. 168.

VITROLINER

Vitroliner Prefab Chimneys Offer Complete Flexibility

5 DIAMETERS—for all types of installations—from ranch houses to 2 story homes, commercial and industrial buildings.

FOR ALL FUELS—oil, gas, coal and wood.

SELECTION OF DESIGNS—The **STANDARD** Top and Housing, for homes and buildings.

The **"DELUXE"** Top and Housing for larger type homes and buildings.

The **STANDARD** Housing is available in a Flat Surface Finish, factory painted a solid grey, or a red or buff "Brick Effect" Finish, that looks like real brick.

The **"DELUXE"** has a flat grey finish and can be painted to match the roof color on the job.

For quotation, send us "X", "Y" and roof pitch dimensions.

Visit our Booth No. 104 at the NAHB Jan. Convention

the "IMPERIAL"

Specially designed and built for deluxe installations, it is the finest residential garage door available.

When you want the very best, install the IMPERIAL... a garage door that will please the most discriminating home buyer. The IMPERIAL's clean, modern, strikingly simple lines enhance the architectural features of any fine home while keeping the garage door in its proper place.

Feather-touch ease of operation...the weatherproof durability of steel construction...the extra protection of bonderizing...strict adherence to exacting specifications and dimensions...and innumerable other exclusive features contribute added value and lasting beauty to your better homes. The IMPERIAL is available in over 100 standard sizes for every residential installation.

There's a Morrison Roly-Door for every overhead door

a Complete Line!

the "NIAGARA"

... a NEW 7-section, low-cost garage door

... for multiple-house projects and low budget installations

Now, you can add to the value and saleability of your lower priced homes with a NIAGARA. It costs no more than ordinary wood or one-piece metal doors... well within the limits of the most modest building budget.

This means you can offer today's feature-conscious home buyers all the sales-closing advantages of an all-steel, sectional overhead door. Economically durable, it won't rot, warp, shrink or absorb moisture. It's good looking and fits into any style or type of house. It can be painted any color and is guaranteed for one year.

Easy, convenient operation is the NIAGARA's biggest selling point. It goes up completely inside the garage, at a touch. No "shin-busting", swinging out motion to avoid, no dangerous, unsightly projections. Its horizontal design provides safe, convenient handholds anywhere on the door, eliminating pinched fingers, stooping and stretching. The NIAGARA comes in two popular widths—8 and 9 feet—and two heights—7 feet and 6 feet 6 inches.

If the garage door you're now using offers any less, change to the NIAGARA. Remember—it adds to the value of your houses and costs no more than an ordinary garage door.

the "COMMERCIAL-INDUSTRIAL"

For every application from refreshment stands and baggage counters to warehouses, loading docks and industrial plants.

Where maximum strength, minimum weight, easy operation, rugged durability and a neat functional appearance are required, you can't do better than the COMMERCIAL-INDUSTRIAL. They're built to withstand all kinds of weather plus the rigors of years of daily use. When open, they're up safely out of the way completely inside the building. They don't occupy valuable floor, driveway or loading space. Nothing is exposed to wind or weather damage. When they're down, they provide a weatherproof closure of maximum security.

Thanks to their unique design and construction, COMMERCIAL-INDUSTRIALS retain their ease of operation and distinctive good looks with minimum attention and maintenance. They can be operated manually, electrically or by remote control, and they range from 8 to 20 feet in width and from 6 feet 6 inches to 14 feet in height.

PRODUCTS SHOW: IDEAS TO BUILD WITH IN 1956

Pre-wired furnace

Named the "Venko," this heating unit is shipped completely wired. This eliminates delay in installation, reduces danger of missing parts. Its crate is designed so that one man can handle the package.

▶ *L. O. Koven & Brother, Inc., Dept. AB, 154 Ogden Ave., Jersey City, N. J. Booth No. 838—Coliseum.*

Check No. 1259 on reply card, p. 168.

Double-sealed insulation

Known as "Twinsulation," this rock wool insulation is sealed to both sides of its covering. Aluminum foil serves as a heat reflector and vapor barrier on one side, and helps make the entire blanket more effective.

▶ *National Gypsum Co. Dept. AB, 325 Delaware Ave., Buffalo 2, N. Y. Booth No. 12—Hilton.*

Check No. 1262 on reply card, p. 168.

Flexible suspension ceiling

The Accesso suspended acoustical ceiling permits ceiling tiles to be put in place as fast as they can be handled, and to be removed easily for maintenance of utilities above, or the installation of lights.

▶ *BeadeX Mfg. Co., Dept. AB, 4615 8th Ave. NW, Seattle 7, Wash. Booth No. 811—Coliseum.*

Check No. 1265 on reply card, p. 168.

Fluorescent shield

Manufactured from Bakelite vinyl, this new fluorescent light shield controls illumination and brings out the natural color and texture of objects lighted. The sheet will not shatter, and is flexible. It can be used for whole-ceiling lighting.

▶ *Bakelite Co., Div. Union Carbide & Carbon Corp., Dept. AB, 260 Madison Ave., N. Y. Booths 888-889—Coliseum.*

Check No. 1260 on reply card, p. 168.

Historic floor style

Parkay, Inc., has available luxury floors of historic significance in addition to their regular lines. Pictured above is the "Monticello," patterned after one of the floor designs in Thomas Jefferson's home.

▶ *Wood Mosaic Corp., Dept. AB, Parkay Div. 5000 Crittenden Dr., Lexington, Ky. Booth Nos. 472-473—Sherman.*

Check No. 1263 on reply card, p. 168.

Cabinets for built-ins

One cabinet that fits practically all built-in ovens and burner tops is achieved by adjustable oven supports to take care of vertical adjustments; the opening for the oven is scribed in the field, thus getting best work height for housewife.

▶ *Lyon Metal Products, Inc., Dept. AB, Aurora, Ill., Booth Nos. 703, 709—Coliseum.*

Check No. 1266 on reply card, p. 168.

Sliding-door frames

This sliding-door package includes the door pocket, complete with all hardware, precut and ready to assemble jambs. Units are available for either lath and plaster, or dry-wall construction.

▶ *Nordahl Mfg. Co. Dept. AB, 180 Alameda Ave., Burbank, Calif. Booth Nos. 239-240—Hilton.*

Check No. 1261 on reply card, p. 168.

New color service

In addition to their regular architectural rendering and scale-model service, this California firm now offers professional color consultation to builders, particularly those putting up large developments.

▶ *Qvale and Associates, Dept. AB, 2525 W 7th St., Los Angeles 57, Calif. Booth Nos. 324-326—Hilton.*

Check No. 1264 on reply card, p. 168.

Automatic dishwasher

A new undercounter automatic dishwasher with pushbutton control has lighted control dial to permit manual operation. Automatic device injects solution that "makes water wetter" into final rinse water.

▶ *Hotpoint Co., Dept. AB, 5600 West Taylor St., Chicago, Ill. Booth Nos. 84, 85, 102, 103—Hilton.*

Check No. 1267 on reply card, p. 168.

Check No. 1279 on reply card, p. 168.

BUILDERS AND ARCHITECTS
are cordially invited to visit the
KOHLER EXHIBIT

at the National Housing Center,
 Washington, D.C.

The Kohler exhibit on the second floor of the National Housing Center displays a representative selection of Kohler plumbing fixtures and fittings, together with other Kohler products.

Kohler Co. welcomes the opportunity, afforded by this new project, to provide builders and architects with information about its products and their functions, as well as evidence about Kohler quality. We believe you will find it interesting and instructive to stop at the Kohler exhibit when visiting this "show case" of American home building.

*Be sure to visit our exhibit at the N.A.H.B. Convention
 in the Conrad Hilton Hotel—January 22-26.*

Kohler Electric Plants, shown in the exhibit, provide a convenient, portable, cost-saving source of electricity for power tools and lighting used in home-building and other construction. Sizes from 500 watts to 35 KW include stand-by models for protection when central station power fails.

Kohler Co., Kohler, Wisconsin • Established 1873

Range hood, door chimes

Range hoods and a complete line of door chimes will be added to the list of products of the Progress Mfg. Co. early in 1956. The company presently manufactures all-purpose lighting fixtures, and ventilating fans.

▶ *The Progress Mfg. Co., Inc., Castor Ave. and Tulip St., Philadelphia 34, Pa. Booth Nos. 721-722—Coliseum.*
Check No. 1289 on reply card, p. 168.

Non-mortise hinge

Non-mortise hinge for wood residential doors comes in sizes up to 1¾-in. thick. Only a screwdriver is needed to hang the door. Design assures exact ¼-in. clearance between door and jamb. Made in 3½-in. size.

▶ *McKinney Mfg. Co., Dept. AB, 1715 Liverpool St., Pittsburgh 33, Pa. Booth No. 217—Hilton.*
Check No. 1292 on reply card, p. 168.

Weatherproof panels

A resin-impregnated facing on the outside surface makes Weldwood "Duraply" virtually weatherproof. The surface treatment keeps down grain, prevents checking, gives good results with 2 paint coats instead of 3.

▶ *U. S. Plywood Corp., Dept. AB, 55 West 44th Street, New York 36, N. Y. Booth No. 147-149—Hilton.*
Check No. 1295 on reply card, p. 168.

Sliding-glass door unit

The Capri, a new-type sliding glass-door unit, suitable for installation in any area regardless of severity of cold or heat, is designed for 1" Thermopane insulating glass, with alternate version for ¼" plate glass.

▶ *T. V. Walker & Son, Inc., Dept. AB, P.O. Box 547, Burbank, Cal. Booth No. 479-480—Sherman.*
Check No. 1290 on reply card, p. 168.

Water, heat piping

A complete line of red brass pipe and copper tubing will be shown at the convention by Anaconda. Included will be copper tubing for water supply and waste lines, and preformed copper heating panels.

▶ *The American Brass Company, Dept. AB, Waterbury, Connecticut. Booth No. 145-146—Hilton.*
Check No. 1293 on reply card, p. 168.

Super-fast dryer

A drying cycle of only 20 to 27 minutes is a feature of the new Bendix Super Fast Dryer. This speed is faster than most washer cycles, and will thus eliminate piling up of wet clothes between the 2 appliances.

▶ *Crosley & Bendix Home Appliances, Div. of Avco Mfg. Corp., Cincinnati 25, Ohio. Booth Nos. 158-163—Hilton.*
Check No. 1296 on reply card, p. 168.

Factory-primed siding

Economy, durability and ease of application are claimed for this factory-primed siding. The prime coat is a synthetic resin emulsion that permits excellent adhesion and harness of the second coat.

▶ *The Upson Company, Dept. AB, Stevens St., Lockport, New York. Booth No. 20—Hilton.*
Check No. 1291 on reply card, p. 168.

Folding stairway

Double hinges on folding joints have been added to Precision & Simplex folding stairways. The double hinge makes the stairways strong and rigid. Bolted braces beneath each of the steps have also been added.

▶ *Precision Parts Corp., Dept. AB, 400 North First St., Nashville, Tenn. Booth No. 501—Sherman.*
Check No. 1294 on reply card, p. 168.

Lockset finishes

Kwikset offers 7 different "400" line color combinations. Available in brass and black, bronze and black, bronze and aluminum, chrome and black, aluminum and bronze, aluminum, black and solid black.

NOW! UNEXCELLED PERFORMANCE FROM INSTO HOT SALAMANDERS AND INFRA-RED HEATERS

Accepted and Approved
By Thousands of Users!

INSTO-HOT No. 1405 CYLINDER MOUNTED

No. 1405 Cylinder Mounted Salamander when attached to the No. 35 Insto-Gas Cylinder makes a self contained unit, that is easy to carry anywhere. No pressure regulator required. Maximum BTU input over 150,000 per hour.

INSTO-HOT No. 1410 FLOOR-TYPE

No. 1410 Floor-type Salamander is attached to the cylinder by means of high pressure Insto-Gas Hose. No pressure regulator required. Maximum BTU input over 150,000 per hour.

INSTO-HOT No. 1415 WITH AUTOMATIC CONTROLS

No. 1415 Salamander is equipped with 100% safety shutoff valve with Thermopilot (AGA Approved Controls). The New No. 1415 has a pressure regulator mounted on the Salamander which makes it unnecessary to have cylinder near by. Perfect operation with over 50' of hose is assured. Maximum BTU input 100,000 per hour.

INSTO-HOT INFRA-RED HEATERS No. 1420

Sunrays are now duplicated by this revolutionary heater that has scored tremendous success in Europe. The ceramic catalyst burners give off intense infra-red heat energy. Just like sunrays, these Infra-red rays will heat ANYTHING, ANYWHERE, ANYTIME.

(Schwank Patented)

How to lay up the corners of Concrete Masonry Walls

The old saying, "Work well begun is half done," is especially true in laying up concrete masonry walls. Laying a quality concrete masonry wall begins at the corners. If you lay the corners with care it is much easier to get the rest of the wall plumb, level and straight. This is the best way to do it:

1 Lay the first course of block at the corner in a full bed of mortar. Make sure that the block are in horizontal alignment, at proper grade and plumb.

2 Above the first course, form bed joints by applying mortar only to the top horizontal face shells of the block in the last course laid. Form head joints by buttering vertical face shells of either the block to be placed or the previous one laid. In the first method you save time by setting three or four block on end and buttering all in one operation. Some masons butter the vertical face shells of both the block to be laid and the one last laid to insure well-filled head joints.

3 The corners of a concrete masonry wall must be built first, usually four or five courses higher than the center of the wall. As you lay each course check it with a level to be sure it is in perfect alignment.

4 Make a second check with the level as you lay each course of block at the corners to be sure that it is level.

5 Make a third essential check with a level on each corner block so you know it is plumb on both sides of the corner.

6 As you proceed each way from the corner use a level to make certain that the block faces all are in the same plane.

7 Use a course-pole, or story-pole (a board marked at 8 in. intervals) to assure that each course is laid at the right height.

8 To keep horizontal spacing accurate place level diagonally across courses. Corresponding block corners should be in line.

For more information write for a free, illustrated booklet, "Recommended Practices for Laying Concrete Block." Mailed only in U. S. and Canada. Address Dept. 1-3.

Covered track and hanger

A watershed track (No. 109) designed to handle doors weighing up to 350 lbs. has an interlocking joint for perfect alignment; no brackets needed. Hanger (No. 66) has pressed steel wheels with roller bearings. Vertical and lateral adjustments can be made.

► *Frantz Mfg. Co., Dept. AB, Sterling, Ill.*
Check No. 1326 on reply card, p. 168.

First Order 1,400... Builder to continue with REYNOLDS ALUMINUM WINDOWS

**J. P. MEGILL
BUILDER**
101 THOMAS AVENUE
BROOMALL PA
Newtown Square 9118

October 23, 1964

Reynolds Metals Company
2031 South Ninth Street
Louisville, Kentucky

Gentlemen:

I want to express the satisfaction I have experienced by using your Aluminum Casement windows for the first time in my building experience.

When I put up my first two model houses for the Brookthorpe Hills Development, my intention was to use another type of window. One of your salesmen arrived at an opportune time because I had become interested in aluminum as a window material. His explanation of the advantages of the aluminum casement impressed me to the extent that I changed my plans and have included your window in all the houses in this development. The reaction of the home buyers has convinced me that this was a wise choice indeed. The non-painting feature alone would be enough to sell this window to any conscientious builder. When you combine this with good looks and economy, you have a product that is hard to resist. When I start the next section of my development next Spring, you may be sure that I will continue to include the Reynolds Casement.

It may be of interest to you to know that I also insist on using your reflective insulation for all the attics of my development. The slight additional cost is more than justified by the comments of home buyers who remark on the tremendous difference it makes in reducing upper floor heat during the hot season.

Sincerely yours,

J. P. Megill
J. P. Megill

See why J. P. Megill backs up his choice of Reynolds Aluminum Windows by using 1,400 throughout his latest development—with more to come. Read his letter.

These are Reynolds Aluminum casement windows and casement-picture combinations. They are distinguished by their "satinized" finish and by many superior design features including watertight lip and flash-welded corners.

In addition Reynolds Aluminum Windows are produced in these types: Traverse (horizontal sliding), Double-Hung, Awning, Basement and Utility. Quality controlled by Reynolds from prime metal to final assembly. Write for complete catalog. **Reynolds Metals Company, Window Division, 2003 South Ninth Street, Louisville 1, Kentucky.**

Note that all Megill Homes also feature...

**REYNOLDS ALUMINUM
REFLECTIVE INSULATION**

Superior efficiency at much less cost than most bulk insulations. Embossed foil on both sides (Type B) or one side (Type C), of tough kraft paper. In rolls of 250 sq. ft., 25", 33" and 36" wide. **Reynolds Metals Company, Building Products Division, 2003 South 9th Street, Louisville 1, Kentucky.**

See us at the NAHB Show—Booths 227, 228, 229

We have a New Product too

The NEW American Builder Marketing Directory
and Technical Guide for 1956 (April Issue)!

Improvement of Quality is Progress

The principle of progress in the manufacturing of any product is improvement of quality. Change for change's sake is not in itself progress. American Builder is ever advertent of its service pledge to the building industry in contemplating any progressive step in publishing philosophy. We take justifiable pride in the fact that our annual Catalog Directory has always been the most complete of its kind ever published in the building industry. To maintain the leadership we have enjoyed in this field;

we, like every other successful manufacturer, have spent thousands of man-hours in improving the quality of a recognized, reputable product. That is why the 1956 April issue has that "forward look" on its covers, and, between these covers is the meat of American Builder Catalog Directory's real progress; up-to-the-minute estimating, designing and buying information unequalled anywhere in the building industry.

American Builder
1956 Directory

ANOTHER EXCLUSIVE IN THE BUILDING FIELD

IT FILLS! IT SPREADS! IT DIGS! SHAWNEE® SCRAPER

Approved for Mounting with International Harvester
"300" Industrial Tractor

Dig as deeply as you want with this $\frac{9}{16}$ yd. scraper. Its 66" cutting blade is wider than any point on the tractor or the scraper and digging depth is unlimited. Loads easily, dumps smoothly with hydraulic control which provides bucket lift and down-pressure. A low-priced tool, ideal for use where larger equipment is too cumbersome or costly for efficient operation.

Digs fast, efficiently—note side clearance.

SAVE DIGGING COSTS WITH THE

SHAWNEE SCOUT DITCHER

**DIGS
12 FEET
DEEP!**

Fits most all makes of tractors. Digs 12' deep through hard, rocky soil. Loads to height of 8½'. Digs fast at surprisingly low cost saves money and time!

PATENT NOS.
2,669,367
2,682,346

2000 LB. LIFT—9 FT. LOADING HEIGHT

SHAWNEE "SPECIAL" LOADER

Adaptable to most tractors. Single or twin bucket cylinders, depending upon tractor installation. Installs or removes from tractor in approximately 10 minutes. Attachments include snow bucket, street broom, bulldozer, angle-dozer, crane hook, etc.

Two-wheel hydraulic scraper

Two-wheel hydraulic scraper for mounting on "30" Utility Tractor has a capacity of $\frac{5}{8}$ yd.; is hydraulically controlled from driver's seat. The 66" wide cutting blade extends beyond wheels and sides of scraper enabling unlimited digging depth. Weight: 900 lbs.

► Shawnee Mfg. Co., Dept. AB, 1947 N. Topeka Ave., Topeka, Kansas. Check No. 1354 on reply card, p. 168.

Wind-free plummets

An optical-type and a telescopic-rod type plummet are automatic, wind free, designed to fit both European and American tripods. The optical model is self-leveling, with a double-image sighting system. The rod model has an 8 minute level vial.

► David White Co., Dept. AB, 315 W. Court St., Milwaukee 12, Wis. Check No. 1357 on reply card, p. 168.

Hardboard as concrete liner

Machine-riated Forestex Forest Hardboard was used as a concrete liner to provide an ashlar stone finish for Disneyland building. Wood strips were nailed to the hardboard to create a mortar joint effect. Form oil was applied before pouring concrete.

► Forest Fiber Products Co., Dept. AB, P.O. Box 68, Forest Grove, Ore. Check No. 1360 on reply card, p. 168.

Fireplace unit

Three-Star Heatilator Fireplace with Pressure-Seal Damper is designed for air-conditioned homes. Damper prevents escape of summer cooling by sealing the fireplace throat. Dome design is easily adapted to any size or shape flue. Helps reduce sharp angles.

► Heatilator, Inc., Dept. AB, East Brighton Ave., Syracuse, N. Y. Check No. 1355 on reply card, p. 168.

Key-in-knob lock design

Styling feature of new Portrait design of Dexter's Regal line is the $5\frac{3}{4}$ " square escutcheon, mountable as either diamond or square. It has a 5" backset, is available with pin or disc tumbler cylinder, deadlocking or spring latch. Solid brass exterior.

► Dexter Lock Div., Dept. AB, Dexter Industries, Inc., Grand Rapids, Mich. Check No. 1358 on reply card, p. 168.

Greaseproof floor tile

This plastic-asbestos tile can be installed on, above, or below grade and over wood or concrete. Vitachrome is formulated to meet the Interim Federal Specification SS-T-307 (CSA-FSS). It comes in standard 9 x 9 and special 12 x 12, $\frac{1}{8}$ " and $\frac{3}{16}$ " thick.

► The Flintkote Co., Tile-Tex Div., Dept. AB, Chicago Heights, Ill. Check No. 1361 on reply card, p. 168.

Pre-pasted vinyl wall tiles

Expanded color line of Bolta-Wall vinyl tile has bamboo-textured pattern in turquoise, yellow, beige, light blue, deep green, natural, white, grey, tea rose, also in mahogany texture in five shades. Size 8x8, installed simply by wetting with water, pressing on surface.

► Bolta Products, Dept. AB, Div. General Tire Rubber Co., Lawrence, Mass. Check No. 1356 on reply card, p. 168.

New laminate pattern

Eight decorator colors are available in the new Catalina pattern of the Lamin-Art plastic laminate line, in 24 sheet sizes for economy in fabrication of sink and counter tops and other surfaces. It comes in satin and gloss finishes, regular and coving stock.

► Fabricon Products, Dept. AB, 6430 East Slauson Ave., Los Angeles, Calif. Check No. 1359 on reply card, p. 168.

Triple dry-wall tool

Three blades fit into an aluminum blade clamp with plastic handle in this dry-wall finishing tool which uses shearing action to virtually eliminate sanding of joint and nail spots. Three blades include 8 x 4 curved-edge blade and 11 x 4 straight-edge blade.

► Goldblatt Tool Co., Dept. AB, 1960 Walnut St., Kansas City 8, Mo. Check No. 1362 on reply card, p. 168.

For the news

look to

Here's a simple way to achieve *window variety* in the homes you design or build—with Curtis Silentite Convertible windows. You can use the Convertible as an awning window, as a right- or left-swinging casement—for window walls—and in endless other arrangements. You can have Curtis Convertibles with or without accompanying louvres, with or without operators, as operating windows or as stationary sash. All in all, there are more than a thousand window combinations possible with Curtis Convertibles—adaptable to any type of wall.

New Zytel nylon hardware—for lifetime service

What a bundle of advantages you'll find in Curtis Silentite double-hung windows. Here is a complete window unit offering finger-tip operation throughout its life, maximum weather-tightness, easy installation, and with a frame adaptable to any type of wall construction. Known as "floating" windows, these double-hung windows have self-adjusting weather-strips that assure year-round comfort and economy. Like all Curtis Silentite wood windows, they are preservative, water-repellent treated for long life. Many different sash designs to choose from.

CURT

in windows...

Curtis

It's a 90-year-old habit with Curtis—designing and producing wood window units that make *news*. Every Curtis window type contains a hatful of exclusive features. Features, for instance, that make operation practically effortless. New ways to provide better, more efficient weather-tightness. New adaptability. And new economy, too!

If you think that's inclined to be boastful, we invite you to look into these wood windows for yourself. They're fully described in Sweet's—and available for inspection and sale at leading lumber and building materials dealers throughout the country. We think you'll agree that Curtis introduces a new conception of livability—into its Silentite window line.

For more complete information and literature, write Curtis Companies Service Bureau, Clinton, Iowa.

Designed to banish "casement blues." Curtis Silentite casements forever end the annoyance of sticking, swinging, slamming or rattling. Here is a complete pre-fit unit we believe to be the most weather-tight casement ever made—saves up to 17% of heating or air conditioning costs. No outside hardware to rust—no inside hardware projecting to get in the way. Curtis Silentite casement locks securely in any open position—allows ventilation with safety for young children and discouragement for prowlers. Ideal for use with picture sash as shown here.

Two events to mark on your calendar—the Curtis exhibit at the N.A.H.B. show in Chicago and the permanent Curtis woodwork exhibit at the National Housing Center in Washington. Photo shows part of the permanent Curtis display in new housing center. N.A.H.B. Show—Sherman Hotel, Booths 579-580-581. Also Booth 746, Coliseum.

PRODUCTS SHOW: IDEAS TO BUILD WITH IN 1956

Recessed fluorescent light

A flushed recessed fixture with dropped plexiglas diffuser is called Atlas Model 62. Designed for easy maintenance, the unit has all wiring connected to a removable pan, independent of the housing. Available with 14, 15, 20, 49-watt fluorescents.

▶ Atlas Electric Products Co., Dept. AB, 319 Ten Eyck St., Brooklyn 6, N.Y.

Check No. 1363 on reply card, p. 168.

Introduces 3-inch fittings

These 3-in. quarter bends and tees are used for storm drains, overflow lines and other non-sanitary conductor lines. Will adequately handle at a 1% grade, the run-off of 822 sq. ft. of roof based upon a maximum rate of rainfall of 4-in. per hour.

▶ Orangeburg Manufacturing Company, Dept. AB, Inc., Orangeburg, N.Y.

Check No. 1366 on reply card, p. 168.

New borer by Mall

This Mall underwalk and driveway borer, bores holes 4 to 10 times faster than other methods. Has a gasoline engine, and without removing any soil will make a 2-in. diameter hole. Portability provided by its rubber-tired wheels, which allows it to be rolled.

▶ Mall Tool Co., Dept. AB, 7725 South Chicago Ave., Chicago 19, Illinois.

Check No. 1369 on reply card, p. 168.

Barbecue controls heat

The proper cooking temperatures can be maintained by turning a crank which raises or lowers the fire basket to any position 3" to 30" from the meat. Cooking surface is 19 x 20, outside measurement of frame 24 x 23, retail price \$49.95. Chrome-plated spit extra.

▶ Grillcraft Co., Dept. AB, 477 E. Seventh St., St. Paul, Minn.

Check No. 1364 on reply card, p. 168.

Lux-Right steel areawalls

Lux-Right steel areawalls for basement and window wells come in a wide range of sizes. Widths vary from 31-in. to 91-in. in 8 standard heights. Sturdiness and durability are assured by use of 14 and 16-gauge copper-alloy steel.

▶ Saint Paul Corrugating Co., Dept. AB, South End Wabasha Bridge, Saint Paul 1, Minn.

Check No. 1367 on reply card, p. 168.

Salamander added to line

New Insto-Hot salamander, No. 1415, is equipped with 100 per cent safety shutoff and pilot light, has mounted pressure regulator making nearby cylinder unnecessary; also advanced burner design providing complete combustion.

▶ Insto-Gas Corporation, Dept. AB, 1977 East Woodbridge, Detroit 7, Mich.

Check No. 1370 on reply card, p. 168.

Chalk line reel

The Evans chalk line, also designed to be used as a plumb bob, has a flush rewind handle, mechanical brake, and combination hook and ring securing device. Also new is a cartridge with 1/2" mouth for spill-proof reloading. One ounce refills are marked with color.

▶ Evans Rule Co., Dept. AB, 400-416 Trumbull, Elizabeth, N. J.

Check No. 1365 on reply card, p. 168.

Ash dump by Superior

The outside dimensions of this ash dump are 9 1/2 x 5 1/2 in., rough-in-dimensions: 8 1/4 x 4 1/2 in., with a 1 1/2-in. flange to hold it securely into the masonry. When door is in open position, it provides its full width through which ashes can be dropped.

▶ Superior Fireplace Co., Dept. AB, 1708 E. 15 St., Los Angeles 21, Calif.

Check No. 1368 on reply card, p. 168.

L-shaped prefab series

Basement equipped, these prefabricated Inland homes in the No. 820 and 820-G series have 1,144 sq. ft. of living space, with bath and a half, plus 36x24-ft. basement, attached garage, three bedrooms. One elevation shows fireplace, another a front porch.

▶ Inland Homes Corp., Dept. AB, 501 College St., Box 915, Piqua, Ohio.

Check No. 1371 on reply card, p. 168.

WELDTEX. Here in painted fir, also in gum and Philippine mahogany. Prices from \$28**.

PLANKTEX. In natural or pre-finished Philippine mahogany. Pre-finished costs \$47**.

V-PLANK. In oak, walnut, Korina®, Honduras mahogany, Samara®, cherry. From \$52.

SEA SWIRL. Clear, weathered-look paneling without knots—\$630**; knotty Surfwood—\$24**.

SAMARA V-PLANK in this basement recreation room costs only \$52 for a 12' x 8' wall (for built-ins use regular Samara).
In Canada, Weldwood Plywood Ltd.

TEXTURED WOODS

Give homes new beauty, a new kind of appeal with Weldwood textured woods . . . at a cost as low as \$24 for an 8' x 12' wall!

Weldtex®—patented by Weldwood. Only from Weldwood can you get the original striated paneling that started the textured wood trend: fine for natural or painted finish. Comes also in exterior grade for siding; striations assure no grain raising or checking. Thicknesses: interior 5/16", 3/4" in fir only; exterior 3/8".

Planktex® combines the striations of Weldtex with alternate bands of smooth wood. Comes unfinished or completely pre-finished ready to apply. Thickness—5/16".

Sea Swirl® and **Surfwood®** look like weathered driftwood: fine for dens, playrooms, cabins; texture hides nail holes. Thickness—5/16".

V-Plank® features vertical grooves that give the effect of random planking. Comes already pre-finished by skilled woodcraftsmen. Thickness—1/4".

New low-cost hardwoods include beautiful mahogany-toned Samara and blond Nakora (1/4" and 3/4" thick). Both woods have unusual swirly grain patterns that give a dramatic look to any room. And look how little they cost: Samara—\$24** and Nakora—\$34**.

All panels available in standard 4' x 8' sheets, as well as other sizes.

Send coupon for more details or see your lumber dealer. To see the complete Weldwood line visit any of our 87 branch offices in principal cities.

**For a 12' x 8' wall

PRODUCTS SHOW: IDEAS TO BUILD WITH IN 1956

New cooling units

Two and three ton unit, air-cooled and water-cooled, for both residential and commercial installation, are being added to the stove line of Perfection Industries. The residential models use a centrifugal type blower. Air-cooled units have a remote condenser.

▶ *Perfection Stove Co., Dept. AB, 7609 Platt Ave., Cleveland 4, Ohio.*
Check No. 1372 on reply card, p. 168.

Convactor coil in heater

This winter air conditioner, The Challenger, is a furnace with a built-in hot-water system. It features the Metrofin Coil Unit, a fin-type convactor coil which surrounds the hot-water jacket, and almost doubles recovery rate of water tank with no extra load on heater.

▶ *Metromatic Mfg. Co., Dept. AB, Medford, Mass.*
Check No. 1375 on reply card, p. 168.

Pool package

A complete pool package, delivered to the pool site includes all fittings and a filtration system. Construction requires no special equipment. Has pre-cast concrete wall sections grooved to fit into each other. Walls are pre-pressed to prevent cracking.

▶ *National Pool Equipment Co., Dept. AB, P. O. Box 888, Birmingham, Ala.*
Check No. 1378 on reply card, p. 168.

Sliding glass doors

Slide Master's new engineering process provides a weather seal and prevents rattle or side play. Sliding-glass doors have no bind, no warp, no painting, repairs or adjustments required; give silent, smooth action.

▶ *Slide Master Glass Door & Window Co., Dept. AB, 9015 Wilshire Blvd., Beverly Hills, Calif.*
Check No. 1373 on reply card, p. 168.

Low-cost circular saw

New bench model tilting arbor 10-inch circular saw, provides a large capacity low-cost portable "second" saw for builders, etc. Saw cuts stock up to 3 1/8", weighs slightly over 200 lbs., is operated by 1-hp motor.

▶ *Delta Power Tool Div., Rockwell Manufacturing Company Dept. AB, 443 North Lexington Ave., Pittsburgh, Pa.*
Check No. 1376 on reply card, p. 168.

Plywood filler

Damaged plywood can be saved with the use of Miracle Wood. By filling in the damaged spots and power sanding, the plywood can be used as a new production piece. Advantages: can be power sanded, planed and will readily accept a stain.

▶ *Newton Mfg. Co., Inc., Dept. AB, Nashua, New Hampshire.*
Check No. 1379 on reply card, p. 168.

Completely assembled lowboy

The gas fired automatic lowboy winter air conditioning furnace uses the most efficient Kaustine single-port up-shot mushroom-type gas burner. The G72LB is rated at 72,000 Btu at bonnet, the G90LB at 90,000 Btu at bonnet, guaranteed 10 years.

▶ *Kaustine Furnace & Tank Co., Dept. AB, Perry, N.Y.*

Check No. 1374 on reply card, p. 168.

New design for living

This built-in range and oven has work-saving conveniences: a large low-temp. oven at easy viewing height with automatic signal lights and clock timer, broiler and rotisserie. Cooking top has automatic top-burner control and comes in 42" or compact 36" sizes.

▶ *O'Keele & Merritt Co., Dept. AB, 3700 E. Olympic Blvd., Los Angeles 23, Calif.*

Check No. 1377 on reply card, p. 168.

5600 home designs

Best Homes for 1956 will feature "The Silent Architect"—an unusual visual demonstrator that permits choice of some 5600 possible "Freestyle" home designs. Many features are included such as deluxe kitchens with built in waist-high ovens.

▶ *W. G. Best Homes Co., Inc., Dept. AB, Effingham, Ill.*

Check No. 1380 on reply card, p. 168.

BUILDER:
Gerald E. Hall Construction Co.
Coral Gables, Fla.

ARCHITECT:
Harry E. Penny
South Miami, Fla.

SQUARE FOOT AREAS:

House	1752
Carport	468
Porch	188
Total square foot area	2408

Total cost of house on full acre,
including landscaping \$23,894.00

PLAIN TINTED wall surfaces of stucco on concrete blocks, an economically framed gable roof, a pleasing arrangement of openings, an effective plan and good color treatment, make for a well designed house.

This house says "yes"

to a buyer's whims

This house gives a buyer what he wants, even if he wants to turn the floor plan around. The house can turn its back to the street and give the owner relaxed living with a rear-yard view. Or it can face the street—a traditional front elevation. The design is so versatile that fabrication costs remain constant whatever the buyer's choice.

Exterior and interior of the model house shown here can be varied by a switch in the position of the major rooms; thus virtually a brand new model is created without altering the roof profile. Shown here is the rear living room; but living room, dining room and kitchen can be located in reverse order with a large bank of windows toward the road.

Straight line partitioning permits this "flipover;" that is, the end cross walls of these rooms are continuous. Thus the changeover can be made without encroaching on surrounding rooms. The bedrooms too can be flipped either way so that the master can have a choice of exposure. The solid wall between

bedrooms two and three can be replaced with a folding partition if necessary.

This spirit of variety is also manifested in the floor materials, with 9 x 9 inch parquet squares in quarter-sawed oak for the bedrooms and terrazzo for the others, except the kitchen where rubber tile is used.

Space and flexibility are the keynote of this South Florida house. An additional lift is given to the living room by the sloping cypress ceiling. A two-level effect is obtained by the drop in the dining room ceiling and the light cove above. The solid glass wall with its sliding panel literally makes one large area of the living room and the adjoining porch.

A feature of this house is the fact that it can quickly adjust to changes. In the event the installation of a pool is considered, then bedroom number four and its adjoining bath can be converted to serve as a "cubana." This can be done by substituting a door for the window in the bath to permit bathers to take a shower before entering the house. Otherwise the room and bath in this wing is ideal as a guest room or den.

This latest "Hallmark" home that is currently shown, contains four bedrooms, three baths and a load of unusual features. It can best be described as Florida at a high level . . . at moderate cost.

◀ **THE TERRACE** is separated from the living room by a series of jalousies and plain glass openings. Access to these areas is through the adjoining screen porch. The masonry of the fireplace extends out to form a closure for the terrace.

▲ **A FEELING OF SPACE** is obtained in the living room with the all glass wall to porch, half of which is a sliding glass door, and the full length jalousie openings to terrace. The ceiling following the slope of the roof is covered with cypress. Walls are plastered.

◀ **THIS COLORFUL KITCHEN** is compact, yet provides plenty of work area. The drop leaf table provides space for a quick snack. The area in back of the cabinets, which is part of the kitchen, is used for storage with the laundry equipment at the far end.

Harry E. Penny, Architect

GENERAL INFORMATION

House—Type	masonry and stucco
Area	1,752 sq. ft.
Cube	19,272 cu. ft.
Carport—Area	468 sq. ft.
Cube	5,148 cu. ft.
Porch—Area	188 sq. ft.
Terraces—Area	164 sq. ft.

EXCAVATING

Trench for foundation	386 lin. ft.
Chimney and column footing	1 fireplace footing
(Some fill under slabs may be required)	

CEMENT WORK

Foundations	350 cu. ft.
Concrete work	2,400 sq. ft.
(incl. carport, terraces, etc.)	
Thickness	4"
Waterproofing	Integral in slab
Miscellaneous	6" x 6" x 10" wire mesh reinforcing throughout; porch and terrace to be colored concrete; 315 sq. ft. terrazzo finish on concrete slab.

MASONRY

Type	concrete block
Walls	2,300 sq. ft.; 60 sq. ft. face brick at fireplace
Window sills	material not indicated
Chimney	3" dia. flue

Flue lining	metal
Fireplace	for gas log
Lintel	1
Miscellaneous	1 precast concrete window frame; 8" x 16" concrete block reinforced lintels over all openings; 2 1/2" dia. x 4' long corner rods in all corners; 38 1/2" x 10" anchor bolts for ceiling plate.

MILLWORK

Windows—type	jalousies material not indicated
Windows glazed including trim	2—22; 12—24; 1—28; 5—23; 2—33; 4—36; 1 fixed light 36" x 72"
Exterior doors	wood and aluminum 2—2'6" x 6'8"; 1—3' x 6'. Aluminum slide door size not given 1—2'6" x 6'8" with jalousie
Exterior millwork	Flower boxes included in masonry
Interior doors, including jams and trim	3—2'0" x 6'8"; 2—2'2" x 6'8"; 4—2'6" x 6'8"; 3 sets sliding doors on wardrobes
Special interior doors	folding on closet 1 sliding door with fixed section in living room, size not given
Special interior millwork	Fireplace mantel wood shelf living room bookcase, kitchen cases, bathroom cases, dining room screen

CARPENTRY

Beams and girders	3—2" x 12"—14'0"
Studding and plates	190—2" x 4"—8'0"; 550 lin. ft. 2" x 4"
Ceiling joist	43—2" x 6"—30'0"; 20—2" x 6"—14'0"; 150 lin. ft. 2" x 6"
Roof rafters	72—2" x 8"—18'0"; 38—2" x 8"—20'0"; 25—2" x 8"—22'0"
Roof sheathing	3,900 b.f.m.
Furring	1,600 lin. ft. treated 1" x 2"
Joist strap anchors	58
Flooring—hardwood	500 sq. ft. parquet floor
Exterior material—soffits	480 sq. ft. exterior grade plywood 250 lin. ft. 1" x 10" eaves 150 lin. ft. 4" wide copper screen porches aluminum columns, screens, and door

SHEET METAL

Drip and gravel stop	256 lin. ft. metal
----------------------	--------------------

ROOFING

Type	asphalt and gravel
Area	31 squares

INTERIOR WALLS AND CEILINGS

Area to be covered	5,800 sq. ft.
--------------------	---------------

NOW!

STYROFOAM

brings entirely new type of
perimeter insulation to homes!

*No other material like it! An expanded plastic,
its remarkable insulating properties provide
lifetime protection against cold*

Styrofoam® (a Dow plastic foam) is the same insulation that's proved so outstandingly effective in industrial refrigeration work. Field tests and actual use by building contractors and architects prove it's just as permanently effective, just as economical in perimeter application!

Look at these outstanding advantages!

HEAT WON'T READILY PENETRATE IT . . . Styrofoam has a low "K" factor (0.25). And it stays low indefinitely.

DOESN'T ABSORB WATER . . . Because it has a non-interconnecting cellular structure. Here's the secret of its constantly low "K" factor. No exterior coatings needed, either.

RESISTS ROT, MOLD, VERMIN, DETERIORATION . . . Styrofoam has no food value so it's vermin and fungus resistant . . . won't rot, either. It lasts and lasts.

LIGHTEST RIGID INSULATION EVER MADE . . . Has an average density of 1.8 lbs. per cubic foot . . . can be installed in large pieces, cutting labor costs.

HIGH COMPRESSIVE STRENGTH . . . Average strength of 3,000 lbs. per square foot. Concrete floors can be poured right over it.

EASY TO HANDLE . . . It's light, clean . . . can be cut and shaped with ordinary tools . . . easily bonded to itself and other materials.

ECONOMICAL . . . Its ease of handling cuts time and installation costs. Its constantly low insulation value brings lower fuel bills.

Here's how Styrofoam is used in perimeter applications

Styrofoam is being used in a vertical position for perimeter insulation. It can be adhered in place or held by back fill. Minimum F.H.A. requirements in vertical position are one to two inches thick from floor line to a depth of 12"-24" below grade line depending on climatic conditions.

In this perimeter heating application, Styrofoam is used both vertically above grade and horizontally from outer edge of slab on the grade. One inch thick Styrofoam perimeter insulation in a 1'-1 1/2' combined vertical and horizontal width is accepted by F.H.A. for perimeter, radial and radiant type slab heating systems.

Styrofoam used in a horizontal position for perimeter insulation. One to two inches of Styrofoam is used for a distance of 12"-24" in from perimeter, meeting F.H.A. minimum requirements in various climatic areas. Due to the strength and moisture resistance of Styrofoam, the concrete floor can be poured directly over it without compressing the Styrofoam.

For further information on Styrofoam send in the coupon below or contact your nearest distributor of Styrofoam.

**PROFIT FROM THE NEW
BERMICO PROMOTION
IN BETTER HOMES AND GARDENS—
SATURDAY EVENING POST**

*Today's pipe
for
tomorrow's homes!*

Match the marvels of your "kitchen of tomorrow" today! Be sure you use modern Bermico house-to-sewer connections.

Bermico is root-proof, corrosion-proof, installs faster and easier and at lower cost.

Best buy all around is Bermico, made of tough wood fibre impregnated with pitch.

Perfect for modern house-to-sewer connections, septic tanks,

downspout drains—new or replacement—perforated pipe for land drainage. It lasts and lasts! Complete line of Wyes, Tees and Bends. Ask your plumbing and heating contractor or building materials dealer about Bermico—or write Dept. BL-7, Brown Company, 150 Causeway Street, Boston 14, Mass.

America's most modern communitities today include Bermico bituminized fibre pipe in building codes. Yours should, too.

BERMICO

10 MILLION FAMILIES are reading BERMICO advertisements this year! That's going to make a lot of your customers ask about "Today's pipe for tomorrow's homes." Make the most of this new BERMICO promotion. Sell BERMICO for repeated sales and steady profits. Brown Company, Dept. HB-1, 150 Causeway Street, Boston 14, Mass.

To Bermico Dealers—Send your name and address and we will ship you brand new sales literature to give prospects and to increase your sales. We will refer direct inquiries in your territory to you.

**MANUFACTURE PRECISION PREFITTED
DOOR UNITS INEXPENSIVELY**

High speed assembly of wood doors, jams and trim can now be accomplished economically with Z & K Prehung Door Manufacturing Equipment. Machines come pre-set and the first unit will be perfect even with unskilled help. Equipment is inexpensive and takes up very little space.

You can offer complete precision units (exterior or interior) with a split jamb and trim—both sides ready to be installed. Be the one to cash in on this business in your area. Write for further information today.

PORTABLE ELECTRIC TOOLS

Service . . . one of 42 Black & Decker factory service branches is located "next door" to you. Staffed by experts to give fast, efficient service, genuine replacement parts.

**We don't buy motors
—we build them!**

More than enough power for the job your B&D Saw is designed to do! Each motor built specifically for the individual tool—compact, rugged universal type motors completely built by *Black & Decker!*

IT'S NOT IN HERE

THE HIDDEN VENTILATOR

... IT'S UNDER HERE!

The New

FASCO POWER-HOOD

Model #1075

**The Most Advanced Ventilator
In Home Building History**

**The Vent Is In The Hood — Not In The Cabinet
One Hood Adjusts To Fit Any Size Cabinet From 30" to 42"**

★ **Self-Contained Unit —**

Hood, High-efficiency Ventilator, and 3-Speed Push-Button Control all in one, easily-installed unit. No cabinet cutting — no loss of cabinet space by ventilator or duct installation.

★ **Adjustable Modern Hood —**

Adjusts to fit easily in any space 30 in. to 42 in.—exclusive design allows perfect fit to non-plumb installations where walls or cabinets are not exactly square.

★ **Installation Time Slashed —**

Needs only duct opening and six sheet metal screws. Light and ventilator pre-wired—just pull in BX and make one installation.

★ **Unique Drop-In Ventilator —**

Fasco's exclusive high efficiency radial impeller wheel plus heavy-duty motor draws more vapors with whisper quiet. Gives high volume . . . even on long duct installations.

★ **Push-Button Control —**

Fingertip control of ultra high, normal and low ventilator speeds; plus under-hood light.

★ **Unmatched Consumer Appeal**

Modern curved contour design . . . no sharp, dirt catching edges. Large, adjustable grease tray traps grease from stove vapors . . . lifts out for easy cleaning.

Available in Kitchen White or Colonial Copper finishes; or Stainless Steel.

See POWER-HOOD and other FASCO "FIRSTS" at the NAHB SHOW, HOTEL SHERMAN, BOOTH 438.

To simplify
specification of
PALCO*
Architectural Quality
Redwood

IN THE 1956

SWEET'S ARCHITECTURAL FILE

—or send coupon below for your free personal copy

Because redwood grows differently — behaves differently — and should be manufactured differently from any other wood, it possesses certain highly desirable qualities. But these advantages can be realized fully *only* when specifications call for the grade and type best suited to the intended service. In brief, simple form, The Pacific Lumber Company has outlined some basic considerations not generally known — and fully recognized only recently even by the Redwood industry itself. This information is now available to the builder or architect who specifies redwood in Section 5a-Pa of the 1956 Sweet's Architectural File — or as a direct reference bulletin available on request. Send the coupon at right for your personal copy.

Along with highest uniformity of grade, *Palco Architectural Quality Redwood* offers an exclusive combination of advantages which assure full benefit from redwood's inherent premium qualities. But because The Pacific Lumber Company has developed the most modern manufacturing facilities and procedures, you can specify this premium quality in premium wood — at no extra premium in price!

*Air
Conditioning
Problems?*

Airtemp EXPERIENCE is your best guarantee of trouble-free installations!

It's true! In air conditioning, as in building, there is no substitute for experience! And when you specify Airtemp, engineered by Chrysler, your Airtemp Dealer brings you the benefit of Airtemp's 21 years of specialized experience in residential air conditioning.

A factory-trained air conditioning specialist, your Airtemp Dealer is thoroughly familiar with builders' problems. From the flexible Airtemp "Spacesaver" line, including waterless and water-cooled equipment, he can meet every requirement of your site, plan and budget. He will efficiently handle every detail—from initial layout to final testing. And he will even supply service whenever it's needed *after* a house is sold!

Your nearby Airtemp Dealer not only offers

you the greatest help you can have to simplify your air conditioning installations. He now offers you, in addition, a Merchandising Program *individualized* to your homes and your market to produce the quickest sales ever.

This comprehensive program includes personalized builder literature, personalized announcement cards, publicity kit, newspaper mats, product easel cards, billboard design, individual benefit display cards and a builder-tested co-operative plan. Call your Airtemp Dealer (he's listed in the Yellow Pages) for all the details.

**THE FORWARD LOOK IN
AIR CONDITIONING • HEATING FOR HOMES, BUSINESS, INDUSTRY**

DAYTON 1, OHIO

Best way to put up ceiling tile: Use a Bostitch T5-8 Tacker with Bostitch 9/16" or 1/2" staples. Press nose of tacker firmly into cove formed by tile flange. Squeeze the lever. You can drive three staples 4" apart in about three seconds and go on to next tile. You never mar the face of the tiles, and you can wear gloves to keep them clean.

Fastest way to apply insulation: Use either the Bostitch T5-8 Tacker or H2B Hammer, with Bostitch 3/8" staples. The hammer is faster with a little practice. You can drive staples with a flick of your wrist—*much* faster than hammer and nails. One hand is free to position the insulation. Available at your building supply dealer or local Bostitch office.

Install ceiling tile and insulation the way leading manufacturers approve

In co-operation with leading makers of ceiling tile and insulation, Bostitch has prepared a booklet which gives detailed instructions for installing these

materials. The following firms have contributed important information for this booklet and approve this method of installation.

- | | |
|--|---|
| Armstrong Cork Company | makers of Temlok® Tile, Temlok® Plank and Cushiontone®. |
| The Celotex Corporation | makers of Celotex Tile Board and Finish Plank and Celotex Regular and Reflective Rock Wool Blankets. |
| Infra Insulation, Inc. | makers of Infra Multiple Aluminum Thermal Insulation. |
| Minnesota & Ontario Paper Company | makers of Insulite Tile Board, Plank, and Interior Board. |
| National Gypsum Company | makers of Gold Bond Insulation Board Products and Rock Wool Insulation. |
| Reynolds Metals Company | makers of Reynolds Reflective Aluminum Insulation. |
| United States Gypsum Company | makers of Twin-Tile, Panel-Tile, Quietone, Auditone, USG Insulation Plank, and Red Top Insulating Wool. |
| American Sisalkraft Corporation | makers of Sisalkraft and Sisalation. |
| Wood Conversion Company | makers of Balsam-Wool and Nu-Wood Ceiling Tile. |

More power, comfort and capacity

**Up to 44% more USABLE POWER
than any comparable truck**

For ready, responsive power that saves road time . . . for rugged power that makes long tough pulls easy . . . GO FORD in '56! Ford's new F-100, for example, delivers more usable power than any other ½-tonner—up to 44% more. Only a Ford Pickup gives you a choice of Short Stroke engines: new 133-h.p. Six or new 167-h.p. Y-8. Short Stroke design means more miles per gallon . . . less engine wear per mile!

**YOU'LL FIND ALL
THESE MONEY-
MAKING FEATURES
ONLY IN THE '56
FORD TRUCKS**

Most power per dollar—proved by comparisons of net horsepower and suggested list prices of all truck lines!

Highest compression ratios in any trucks, stretch gas mileage. Short Stroke power standard in every 1956 Ford Truck!

Biggest brakes in the ½-ton field—179 sq. in. lining area. New thicker, longer-lived linings last up to 33% longer!

than any other Pickup - '56 Ford!

Biggest body in the 1/2-ton field— new Ford 8-foot Pickup

Want the room to haul bigger loads and handle long, bulky objects with ease? This new 8-footer's got it! It gives you up to 19.6 cu. ft. more loadspace than any other 1/2-tonner. And don't be afraid to pile on the load. Ford's F-100 has the sturdiest chassis in the 1/2-ton field!

Ford's new F-100 8-ft. box (shown) is mounted on a 118-in. wheelbase chassis. Standard 6 1/2-ft. box is mounted on a 110-in. wheelbase. Custom Cab shown is available at extra cost.

DRIVER TIME and ENERGY SAVED with exclusive DRIVERIZED CAB; New LIFEGUARD safety, too

Only one cab offers such driving ease and safety—the '56 Ford Driverized Cab! It has a new full-wrap windshield . . . the widest of all standard rear windows (with full-wrap rear window

available) . . . exclusive seat shock snubbers and level-action suspension. Plus Lifeguard safety features! Take a Test Drive today—and feel the difference in the new '56 Ford Trucks!

New tubeless tires standard on every model. Run up to 25° cooler, give extra miles, resist punctures and blowouts!

Lifeguard steering wheel helps protect driver from steering column in case of accident. Only Ford has it!

Lifeguard door latches give extra protection against doors springing open on impact. Only on Ford Trucks!

Fordomatic Drive (available at extra cost). Pays for itself in time and work saved, eliminates shifting, makes driving a pleasure.

The Door that Gives You More —of Everything!

Beauty —the Frantz No. 566 Sectional Overhead shown above, with its smart modern lines, is the finest in garage door design. It's the door that is made for ranch-style homes—the last word in streamlined beauty!

Quality —Compare the 14 construction features, many of them exclusively Frantz and available nowhere else...the patented *adjustable brakes, the 2-way Spring Adjustment, Automatic Latch-Lock, Cross Angles, and other advancements. Doors are 1 3/8" thick, of kiln dried lumber, with 1/4" fir plywood panels. All hardware, except springs and angles, is zinc plated to prevent rust—the outside handle is chrome-plated.

Easy Operation, Installation

*Just turn the
latch...it opens
itself!*

The exclusive Glide-O-Matic action opens the door with a turn of the handle. There is no rebound, thanks to the patented *adjustable brakes! Parts are prefitted for easy assembly and fast installation. Standard headroom 13 1/2"—or with low headroom device—6" for single opening sizes and 8" for double width doors.

Low Cost—In spite of the luxury and prestige of the Frantz No. 500 series, modern production techniques have brought the cost to within easy reach of the modest homeowner. Other models cost even less.

Variety —the Frantz 500 series is available in various sizes for single and double width openings. Other Frantz models in sectional, rigid (one-piece) types, and Frantz hardware sets, provide one of the widest and most complete lines available anywhere! Write for Catalogues No. 302 and 107 today.

FRANTZ ROSETTES
Smart door ornaments in many designs add decorative distinction when painted in contrasting colors. Demountable, easy to apply, low in cost. Write for Rosette Catalog.

New *Prefabricated* Fireplace

**No masonry required
Installs in 4 to 6 man-hours:**

Never before has it been possible to install a real wood-burning fireplace so easily and economically. Costly fireplace and chimney masonry becomes a thing of the past. No reinforcing of floors or walls is necessary. Complete in itself, it does not need to be enclosed in a mantel or other expensive finishing materials. Can be installed by semi-skilled workmen in 4 to 6 man-hours.

The Uni-bilt Fireplace provides a high prestige feature in the homes you build. Blends with any style architecture . . . can be painted to harmonize with any color scheme. Adds value the buyer can actually see at a price he can afford.

Underwriters' Approved! Uni-bilt Fireplace is approved by Underwriters' Laboratories for installation directly against any wall, floor, ceiling or roof material with complete safety.

See how easily the Uni-bilt Fireplace is installed.

The fireplace simply bolts to the studding. The chimney sections are then extended through the roof and the chimney housing flashed in place. No special tools needed.

Now include a fireplace in your homes.

Home buyers want real wood-burning fireplaces. Now you can provide the sales appeal of an open fireplace within reach of even the most modest home.

For greater Volume Profits

BUILDERS ARE USING NATIONAL HOMES

National homes are a brand-name product purchased by one out of every 48 of today's home-buyers. Demand for our homes is increasing and we have expanded our facilities to produce 290 homes a day — 37,500 houses more a year!

We are now ready to expand our organization. We want project builders who will concentrate on the budget-priced Pacemakers, other builders to specialize in either Custom-Line or Luxury homes, and still another type of builder whose operations are suitable to scattered lot construction.

National Homes builder-dealer franchises are non-exclusive and our experience has shown that more than one can profit in an area. Indeed, increased public attention and interest in the added operations quickly result in a greater volume of National homes sold and built.

Investigate the advantages offered you by a National Homes builder-dealer franchise—wide public acceptance, assistance in financing through National Homes Acceptance Corporation, two open house promotions each year backed by powerful advertising, quick turnover of capital, volume profits, counsel and help with codes, zoning, etc.

Qualified conventional builders can get in on the ground floor of the most successful building operation in the country! For more details on how you may profit, contact me personally. James R. Price, President. National Homes Corporation, Lafayette, Ind.

PLASTER GROUND* ALUMINUM TRACK

*Pat. Applied for

WALLBOARD WITH METAL TRIM

PLASTER WITH METAL BEAD

Labor costs cut substantially with this track that becomes an integral part of the door frame. When used in combination with the new "Washington" double-wheeled hangers, this Plaster Ground track will carry doors weighing up to 100 lbs., and is ideal for dormitory or commercial installations.

Used with plaster or wallboard, this track eliminates the necessity for a valance or fascia strip, although if one is preferred, the alternate method of using wallboard with wood trim is suggested.

Pictured here is a typical example of the attractive new Rusco Multi-Lite Window, Rusco's Screen and Storm Door Combination and the all-metal Door Canopy.

RUSCO
Picturamic Vented
multi-lite
PRIME WINDOW
made of hot-dipped,
tubular, galvanized steel

*Other popular RUSCO
PRIME WINDOWS!*

- The Horizontal Slide
- The Vertical Slide
- 3 and 4-light Fulvue

*And RUSCO has more
plus features—!*

- No on-the-job glazing, painting, fitting or later adjusting
- Available with insulating sash (optional) that provides MAGICPANEL® year-round, rain-proof, draft-free, filtered-screen ventilation
- Built-in felt weatherstripping
- Fiberglass Screen that won't rot, corrode or stain—never needs painting
- Sliding glass panels removable from the inside for easy cleaning
- Glass replacement is quick and easy with Rusco's vinyl plastic spline that serves as "putty" and can be reused.

Here's a major step forward in the Prime Window field! The new Rusco Multi-lite Picturamic Vented Window answers the demand from builders for a steel prime window that complements the long, low lines of the popular ranch-type home and gives light plus ventilation.

Like every Rusco Steel Window, it adds to your profit, too, because it's a complete, packaged window. You save on field labor, installation time, painting, glazing and adjustment. The total installed cost of Rusco is often less than the cheapest window!

Home buyers like the new and beautiful look Rusco Prime Windows give to a home, too. And because consumers are pre-conditioned by Rusco national advertising and the Rusco quality reputation to expect a better home when it's equipped with Russell products, your selling job is easier.

Call your Rusco man or write us for full information on Rusco Steel Prime Windows.

"Now we sell homes complete with carpet and sell twice as many" says Donald Scholz of Toledo, Ohio.

Top Michigan builder calls carpet "The best silent salesman."

"Carpet sells homes faster" says leading Dallas builder.

"Homes sell faster when you include carpet in the price" says leading California builder.

Pittsburgh builder offers carpeted homes to bring out 15,000 prospects.

Hundreds of builders are proving it: you can sell homes faster with carpet in the package

All over the country, builders have learned that they sell homes much faster with carpet included in the purchase price of the home.

The builders you see here... and many, many more... are cashing in on the great desire people have for carpet. They know that carpet is one of their best selling tools.

Why? Because surveys show women prefer carpet 13 to 1 - for its beauty, comfort, quiet, safety, warmth

and easy care. But when they're buying a new house, their cash and credit are tied up. They feel they can't afford carpet.

And that's how smart builders cash in. They include carpet in the purchase price and a sale is made.

Get together with your local carpet retailer to see what carpet can do for you. Or write the Carpet Institute for information on selling homes complete with carpet.

Home means more with carpet on the floor - more quiet • comfort • beauty • safety • easier care

Do You Consider

THESE 4 IMPORTANT FACTORS

WHEN YOU SPECIFY GLUED LAMINATED WOOD MEMBERS?

PRODUCT QUALITY No matter how hard we try—we can't say it better than this contractor who wrote, "Our contract will be more profitable to us because accurately fabricated Rilco members were assembled and erected with surprising speed." Rilco quality also contributes to a "good job" and helps assure "owner satisfaction."

SERVICE Detailed drawings are provided to speed field work—save erection costs. Experienced Rilco service engineers are available to give bidding and on-the-job advice.

DELIVERY delays cost money and create ill will. Rilco plants are strategically located for shorter hauls and complete assurance of delivery when promised.

PRICE initially is seldom the true factor in determining the final cost. Considering all of the above advantages, completed cost is lower with Rilco.

Your reason for ordering Rilco arches, beams, rafters or trusses for your next school, church gymnasium, store, commercial or industrial building could be any of the above. Together they add up to an important ingredient . . . integrity.

For more information contact:

RILCO
works wonders with wood

SIX IMPORTANT FACTS

TO KEEP IN MIND ABOUT

Thermopane®

(Made in the U. S. solely by LIBBEY • OWENS • FORD)

- 1 *Thermopane* is a registered trade-mark of the Libbey-Owens-Ford Glass Company.
- 2 Only Libbey-Owens-Ford makes *Thermopane* insulating glass.
- 3 Only Libbey-Owens-Ford can use *Thermopane* in connection with transparent insulating units.
- 4 Only *Thermopane* has the Bondermetic Seal* which bonds the panes of glass into one unit to prevent dirt and moisture from entering the dry air space.
- 5 The name "*Thermopane*" can and should be used when referring to the Libbey-Owens-Ford product only.
- 6 The word "*Thermopane*" can never legally be used when referring to any other brand of multiple-glazing construction.

We make these statements because the function of a trade-mark is to identify unequivocally the manufacturer of a product . . . to eliminate the possibility of confusion in the mind of the public concerning the producer of a specified product . . . to assure that the customer gets what he orders.

We are sure that architects, contractors and others who are familiar with the superiority and advantages of *Thermopane* will welcome these statements . . . will refrain from using our trade-mark in referring to any construction or product not made by the Libbey-Owens-Ford Glass Company.

We believe that our readers will understand L·O·F's pride in *Thermopane* and our sincere desire to have *Thermopane* continue to enjoy its individuality. Libbey-Owens-Ford Glass Company, 608 Madison Avenue, Toledo 3, Ohio. ®

LIBBEY • OWENS • FORD

Thermopane®

INSULATING GLASS

IS ALSO AVAILABLE IN
3-PANE AND 4-PANE UNITS

3 and 4-pane units are available for refrigerated cases and for unusually severe conditions requiring low coefficient of heat transfer.

New! Just \$99⁵⁰!
World's only
orbital-action
bayonet saw!

Now—the first *real* improvement since portable jig saws were invented! It's Porter-Cable's revolutionary new Model 148—designed around a wholly new principle, *guaranteed to outperform any other portable jig saw at any price.*

Orbital action makes the difference. Blade teeth are in contact *only* on the cutting stroke—*back away* on the relief stroke. Harmful "drag" is completely gone—and performance reaches a new high.

By actual test, the Model 148 cuts up to 4 times faster than the best conventional up-and-down saws. It has a full 2" capacity in wood— $\frac{3}{4}$ " in aluminum, $\frac{1}{4}$ " in steel. Its cool, comfortable grip and perfect balance make easy work of any job. Get the whole amazing story from your Porter-Cable dealer—or write today for full information.

The Window with the **WIDE** Look
Gains **WIDE** Acceptance

The new Ceko-Sterling Aluminum Sliding Window

● It had to happen—the Ceko-Sterling Aluminum Sliding Window with the Wide Look gets wide acceptance. That's because Ceko Wide Look design and the long, low, sprawling concept of today's contemporary homes go well together. Builders across the nation now are putting this newest Ceko window creation in the homes they build. They know features sell homes, and they realize customer benefits like these make the Ceko-Sterling Aluminum Sliding Window a wanted feature: Easy operation—sash slides in anti-friction sill track; easy to clean—sill track is removable—an exclusive feature; high window placement affords privacy. Here's a window that's easy to install—just set it in the rough opening, square it, and nail through the integral fin-trim, bring siding to trim stop and caulk. Glass dimensions are in even inches, thus reducing glass costs up to 30%. The sash can be bench glazed without mastic and easily inserted in window frame after installation. On your next building project consult Ceko, makers of the widest line of windows in the market. You'll find what you need—better engineering, too, for better performance. Send for free brochure, fully detailing all information on the new Ceko-Sterling Aluminum Sliding Window. See the Ceko Window line displayed at the National Association of Home Builders Exposition—Conrad Hilton Hotel—January 22-26—Booth 40-42.

Mor-Sun Air Conditioners are water or air-cooled and are perfectly matched with Mor-Sun Furnaces for complete year 'round comfort, convenience and

economy. Home buyers are "pre-sold" by a strong, consistent national and local advertising and sales promotion program.

All this adds up to more homes "SOLD" when you install Mor-Sun.

Before you build another house or plan another project, get all the facts about Mor-Sun from your Mor-Sun Distributor or Dealer who is listed in the Yellow Pages of your telephone directory—or write directly to *Mor-Sun Furnace Division, MORRISON STEEL PRODUCTS, INC., 605 Amherst Street, Buffalo 7, New York.*

● There's a Mor-Sun Warm Air Furnace and Air Conditioner for every home heating and cooling requirement... the right size... the right price... for new construction or modernization.

This gleaming, modern coal preparation plant at Valier, Illinois, made of Kaiser Aluminum, was built for The Old Ben Coal Corp. by the McNally Pittsburgh Mfg. Corp., Pittsburgh, Kansas.

“No building maintenance problems with Kaiser Aluminum roofing and siding”

says Mr. J. W. MacDonald, Vice-President Engineering,
The Old Ben Coal Corp., Christopher, Illinois

“FUMES AND GASES seem to have no effect on our corrugated aluminum coal-preparation plant. It is completely rust-proof and never needs painting or any other expensive upkeep.

“That’s particularly important in the coal industry where building maintenance is often a major item of cost.

“We like the way that aluminum keeps the interior cool on hot summer days.

“In our opinion, aluminum is the ideal building material for coal-processing plants. A recent contract for another preparation plant will again require provision of corrugated industrial aluminum roofing and siding.”

Not only does Kaiser Aluminum Industrial Roofing provide greater protection and lower maintenance . . . it also assures *immediate savings*. Its light weight reduces transportation and handling costs. And it often requires lighter, less expensive supporting structures.

Whatever you’re building—figure first in Kaiser Aluminum—for better value at lower cost! For A.I.A. File and complete information, contact any Kaiser Aluminum sales office listed in your telephone directory. Or write Kaiser Aluminum & Chemical Sales, Inc. *General Sales Office*, Palmolive Bldg., Chicago 11, Illinois; *Executive Office*, Kaiser Bldg., Oakland 12, California.

Kaiser Aluminum

Industrial Roofing and Siding

Light Weight—Reduces transportation costs. So easy to handle that construction is faster, lower in cost. Often permits the use of lighter, less expensive framing.

Strong—The increased depth ($\frac{3}{8}$ "") of the corrugations of Kaiser Aluminum sheet provides greater load carrying capacities over the longer spans of modern industrial construction.

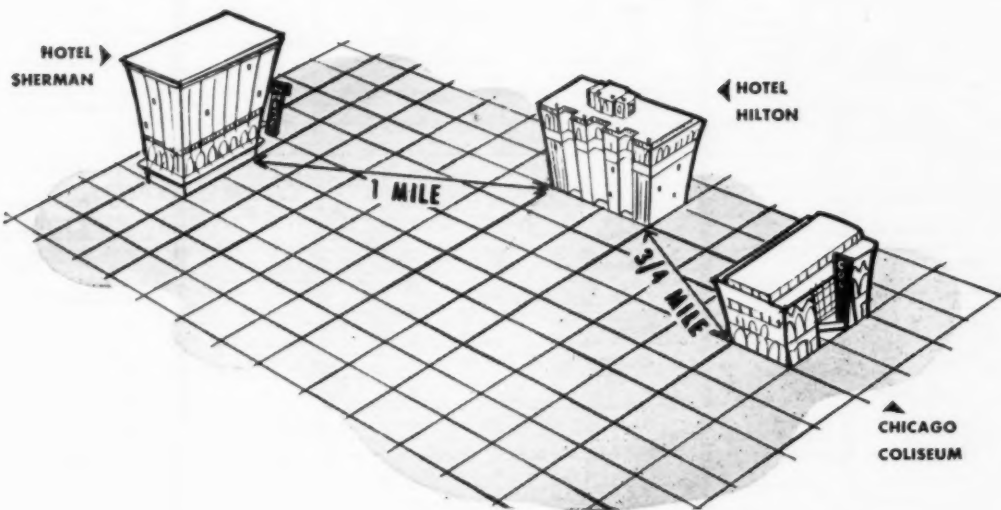

Corrosion Resistance—High resistance to most industrial fumes,

Can’t streak with red rust. Maintains attractive appearance indefinitely.

Low Maintenance—Never needs painting. Resists heavy winds and hail.

Cooler, Brighter Interiors—By reflecting hot sun rays, aluminum keeps interiors as much as 15° cooler. Aluminum’s high reflectivity insures extra interior light.

SCHOLZ

California Contemporary

AND *Ranch Western* HOMES

... present the most revolutionary homes of the decade!

.. in Nathan Manilow's "Highland Park Highlands"

In Chicago . . . nine beautifully furnished models, as shown above, will be on display to N. A. H. B. members throughout the week of their convention. Open from 9 AM to 11 PM daily, transportation will be provided to and from the exhibit without charge. Inquire at the Scholz Homes Booth, third floor, Hilton Hotel.

Don't fail to see the highlight of the convention!

SCHOLZ HOMES, INC., 2001 N. WESTWOOD, TOLEDO 7, OHIO

SEWERAGE PROBLEM . . .

(Continued from page 31)

would cost, and the local and state governments benefit from public utility taxation.

A much larger but essentially similar venture is Julius Gaines' 10,000 unit Carol City, 15 miles northwest of downtown Miami. A completely planned community, Carol City has its own schools, churches, and shopping centers. When completed in three years, it will be Florida's ninth largest city.

The Dade County Commission encouraged the private financing of the utility. The first section was completed at a cost of \$450,000. The total cost will be \$4 million, to be passed on to the homeowners. The Carol City Utility, Inc., has two plants, one to soften, filter, and chlorinate water, the other to treat sewage for Carol City and about 5,000 homes of other subdivisions nearby. The disposal plant is of the activated sludge type. The water is taken from wells 65 ft. deep and is pumped into the 150,000 gallon tank at 350 gpm.

The utility cost is in line with that of neighboring municipalities. Monthly sewage rates are \$2.50 for one bathroom, \$3 for two-bathroom homes. The cost of water for two adults and two children comes to about \$4.10 a month, at 10,000 gallons.

Dade County, as *Public Works* magazine reports (Aug. 1955, p. 81), has growing pains, and there is no central authority responsible for utilities. But a study by the Metropolitan Municipal Board, an advisory body, recommends a merger of all county services under a metropolitan government. So septic tanks are probably doomed in the Miami area, and Gaines' Carol City is a good example of builder leadership.

Another example of the trend toward metropolitanization mentioned several times in this series is the set-up of Indianapolis and Marion County, Ind. All the city and county public health activities have been consolidated in a new municipal corporation which has all the powers of the usual municipality. It can make and adopt ordinances, levy taxes, buy and sell property, issue bonds, etc. It has a five man board, three from the city, two from the county, at token salaries. The local health boards have been dissolved.

Another procedure

The utility plant was handled somewhat differently from the public utility technique in a Michigan town recent-

COMPACT sewage treatment plant set up as the Carol City Utility, Inc., to serve Julius Gaines' 10,000-home development.

Water plant may be seen in center background. Carol City will be Florida's ninth largest city.

ly. Couchois and Miller began construction last spring of 400 homes in the \$15,000 range in Haslett's suburbs, east of Lansing. The firm built a water pumping station and distribution system designed to supply 600 homes.

After completing 200 of the homes the builders turned over the system to Meridian Township officials without charge. The cost of \$90,000 will be charged against the cost of improving the lots in the subdivision which will benefit.

The promise of "city water service in the country" appealed to home buyers. Deeding the system to the local township relieved the builder of responsibility after the ball was started rolling. Officials were happy to own a debt-free water district, which is expected to show a profit within three years. The town's only capital expense was the cost of \$30 to set a meter for each customer. Homeowners have a rate 50% under that of the township's other district. L. T. Miller, partner in the building firm, points out that some version of the plan will be necessary wherever FHA officials require a public water system for lots narrower than 100 ft., to avoid locating wells and septic tanks too close together.

The cost of the water system divided among 600 users came to \$150 each—

much cheaper than the cost of separate drillings.

Cooperation is the key

"Builders should get together, four or five at a time, to command enough credit to finance and build a sewage disposal plant." That was the advice of Oscar R. Giesecke of Buffalo at the panel of the New York State HBA mentioned above, a couple of hours before he was elected president for the coming year. He narrated his own experiences in planning and getting approval for a plant for a subdivision. His wait from January to September, with four revisions of plan required, he accepted philosophically as part of the process of getting new procedures accepted. Eventually he plans to sell the plant to the town for \$1, having passed on the cost of \$70,000 for 350 units to the home buyers.

Another speaker on the panel, William D. Jones, acting regional administrator, New York, of the Community Facilities Administration, FHA, reminded the builders of Law 560, 83d Congress, which authorizes HHFA to advance funds to public bodies for the planning of public works. Usually the priority is given to sanitation works.

An interesting technical develop-

REPUBLIC

World's Widest Range of Standard Steels

Steel makes the ideal window. It can't warp, swell, shrink or rot. Steel is quick to install and to adjust. And, you simply paint steel windows to match both interior and exterior colors. Paint them right along with walls and trim. All types of Truscon Steel Windows come to you in prime condition for painting. Truscon Steel Double-Hung Windows are electrogalvanized, Bonderized and prime coat painted. Stainless steel weatherstripping and motor type spring balances are built in. Now available in window sizes up to 6' 5½" high and 4' wide. Truscon Steel Casements and Ranch Windows offer the same "paint to match" features. All immediately available from Truscon warehouses all over the country. See your dealer or Sweet's File for more facts.

Now! Republic is introducing "Harmony Hues." Three lovely colors at no extra cost. Color style your kitchens in Tempo Turquoise, Largo Yellow, Prelude Pink—colors carefully selected to harmonize with all major appliances . . . whether you select them or your customers buy them later. In contemporary or traditional homes, "Harmony Hues" were created to go well with today's most fashionable decorating materials. Republic Steel Kitchens, more than ever, give you and your buyers *most for your money*. More than ever you can create customized kitchens using standard Republic cabinets. Put this dramatic, wanted feature in your homes at not one penny more! See your distributor for quick-to-the-site delivery.

Now! Truscon can offer interior steel doors finish-painted in your choice of any one of 26 contemporary colors! If you're building as few as ten houses, you can take advantage of this color feature available in lots of 200 or more swing or slide doors. Truscon Steel Doors save you dollars on framing, fitting, hanging and finishing. They're quick and easy to install. No cutting, planing, sanding needed. Now, finish-painted in color means more savings. They refuse to stick or bind because steel can't swell or warp. Truscon Interior Swing Doors are sound-deadened. Sliding Doors glide noiselessly on nylon rollers. Both types are flush, trim, modern. Get the Truscon color story from your nearest Truscon District Sales Office or send coupon below.

MORE PROFITS

*when you
Manufacture
Your Own
Jalousies!*

If you are a window dealer or distributor —or a building supply house—here is your opportunity to become a window manufacturer . . . **FOR LESS MONEY THAN YOU PRESENTLY HAVE INVESTED IN INVENTORY!**

For a rock-bottom cost, we set up an entire window manufacturing plant for you . . . install all the machinery necessary to manufacture windows! We train you at our own Miami manufacturing plant where you learn how to produce a better quality jalousie window priced to sell below dealer-distributor competition! When your plant is set up, you receive a fully protected territory . . . as much as an entire state or more!

HERE'S HOW WE SAVE YOU MONEY... HELP YOU BEAT THE COMPETITION!

- **QUANTITY BUYING** . . . Effect substantial savings on aluminum poundage alone at today's prices. This means that you can buy small quantities of extrusions and still get huge co-op buying prices on raw material.
- **ENGINEERING KNOW-HOW** . . . You get a top quality designed window with no costly investment in design, drawings, or plant set-up.
- **NO HEAVY INVESTMENT IN MACHINERY** . . . You don't have to amortize machinery or dies because we put the machinery right in your plant at no cost to you and you have the use of the mechanical dies free of charge.
- **FREIGHT SAVINGS** . . . You have no freight costs resulting from shipping windows in from several states away. This savings when passed on to the customer beats competition.
- **SIMPLIFIED MANUFACTURE** . . . Simplified manufacturing procedure eliminates the need of costly inventories. You can run standard or special sizes at the same price. Using streamlined procedures you need not keep heavy "personnel" payrolls going, thus keeping your variable costs in line with your sales so you always operate at a profit.
- **NATIONAL ADVERTISING** . . . When our campaign is started you get the benefit of **BRANDED MERCHANDISE**, and a name that is known. Leads from builders, architects, dealers, and consumers in your area are supplied to you free of charge.

THAT'S THE STORY IN A NUTSHELL

*Find out more about this low investment—
big profit deal and write, wire, or phone Tapco now.*

LEGAL:

Zoning laws must not ignore economic "facts of life"

By John F. McCarthy

Attorney-at-law

In a recent decision, the Supreme Court of Illinois considered the problem of zoning for the purpose of reducing traffic and avoiding congestion on streets and highways. This is a widespread metropolitan problem and the Court's observations are quite timely. For the case itself, see *The Exchange National Bank of Chicago vs. The County of Cook*, 129 NE 2d 11.

This case involved a tract of vacant land on the west side of Cicero Avenue near 76th Street just outside the limits of the City of Chicago. The property was zoned for single family dwellings. The owners sought a reclassification of the property for use for industrial purposes. It appeared that the owners had entered into a contract to sell the land to a corporation which planned to use it as a truck terminal. The County Board refused the zoning change.

The evidence showed that plaintiff's land, although zoned for single family dwellings, was surrounded completely by heavy industrial areas. The Court concluded that it would be both practically and economically unsound to develop the land for residential purposes. The County attempted to justify its refusal to reclassify the property on the ground that it would increase traffic and congestion on Cicero Avenue. It was not disputed that Cicero Avenue was a main, heavily traveled congested artery of traffic. Witnesses testified variously that between 30,000 and 50,000 vehicles per day passed plaintiff's land.

The Court held that the County should have permitted the zoning

change to industrial that had been requested. The Court observed that zoning laws and regulations must be reasonable. It agreed that municipalities must have a wide discretion in the development of an area and in the adoption of zoning regulations. This discretion, it said, must not be interfered with unless exercised in a clearly arbitrary and unreasonable manner.

The Court held that zoning for the purpose of reducing traffic and avoiding congestion was permissible, but that regulation for such a purpose must be guided by the same considerations as governed zoning generally. It pointed out that such regulations were invalid where the public interest was insignificant or non-existent and the private interest would suffer.

Applying those principles to the evidence before it, the Court observed that the daily flow of vehicles on Cicero Avenue would not be increased greatly by the operation of the proposed truck terminal on plaintiff's land. On the other hand, the Court pointed out that if the County continued to enforce the residential classification, the plaintiff's property might be useless and plaintiff's damages would be considerable. The Court concluded "that the plaintiff's property is wholly unsuited for residential purposes, that to so restrict its use has the effect of destroying substantial values, and that the public interest which will be subserved is so insignificant as to render the ordinance unreasonable and therefore violative of due process and equal protection guaranties."

As easy to move as an electric hand saw!

- 1. New Money-Saving features . . .** No DC brushes; just two easy-to-get-at collector ring brushes . . . No commutator or DC windings . . . No intermediate couplings; armature keys directly to shaft. Fewer parts to wear out — longer trouble-free generator service.
- 2. Constant Voltage . . .** less than 4% change from no load to full 1500 watt capacity . . . assures long service life for your electric tools . . . guarantees top performance at all times.
- 3. Overload Capacity . . .** 1500 watt continuous duty with generous overload capacity prevents tool stalling under heavy loads . . . insures uninterrupted service even when starting loads exceed operating loads.
- 4. Compact and Lightweight . . .** one man can easily carry this generator wherever you need electricity to power time-saving elec-

tric tools. No need for long, hazardous power-consuming cables.

Whatever tools you want to operate — electric saws, drills, floodlights, grinders, belt sanders, hammers, — the new Homelite 35A115 generator can save you money. For a free demonstration or additional information, call your nearest Homelite representative, or write:

SAVE EVEN MORE! New Homelite electronic idle control unit, available as optional accessory, runs engine at idle speed when no current is drawn . . . automatically brings engine to full speed when load is

applied. Ask your Homelite representative to show you how this easily-installed accessory reduces engine wear . . . increases service life . . . cuts fuel consumption.

ALL NEW DESIGN!

Pour faster with a Jaeger

Look how this mixer puts out stiff concrete as fast as you can take it. You charge in only 5 to 7 seconds with Jaeger's "Skip Shaker" loader. You mix and remix more thoroughly with Jaeger's criss-cross action, then discharge in another 5 to 7 seconds with Jaeger's big bucket and flight blades and special "catch all" spoon.

With that speed you can really turn out yardage with a mixer that's as rugged as it is fast. Your Jaeger has a bigger engine, automotive transmission, Timken bearing drum rollers and heavy duty drum with machined steel tracks—all to give you years of service with low upkeep and without costly breakdowns on your jobs.

Available in 3½, 6, 11, and 165 sizes. Ask for Catalog M-10.

LEARN TO ESTIMATE

You can estimate building construction costs quickly and accurately, and bid on profitable commercial and industrial jobs without worry about "What did I leave out?" or "Am I bidding too high, or worse yet, too low?" Become a successful building contractor by devoting some spare time to the study of our estimating course.

WHAT WE TEACH

We teach you to read plans, list and figure the cost of materials, estimate the costs of labor, and the other things that you need to know to bid on construction work with confidence. The labor cost data that we supply is not vague and theoretical—it is specific, complete, and accurate—it gives you the actual cost of labor required to do work in your locality at today's wage scales. We teach you to prepare estimates complete in every detail.

OUR GUARANTEE

Best of all you don't need to pay us one cent unless you decide that our course is what you need and want. We will send you plans, specifications, estimate sheets, cost data, and complete instructions for ten days study, so that you can see for yourself what this course can do for you. Mail the coupon today—we will do the rest.

CONSTRUCTION COST INSTITUTE

Dept. A156—Box 8788
University Station—Denver 10, Colorado

Send me your course on how to estimate building construction costs for ten days study. If I decide to keep it, I will send you 19.75 (payable in two monthly payments) as full payment. Otherwise I will return the course, and there is no further obligation.

Exhaust fans for ventilation control

Controlled ventilation by means of exhaust fans is becoming a must in the modern home. Even in the air conditioned home a well ventilated kitchen is a definite requirement. Not only does the kitchen fan remove cooking odors and heat, but it also plays a large part in the removal of excess moisture from food preparation, thus reducing the load of dehumidifying from the air conditioning plant. Likewise it is important to consider this type of fan for bath, laundry and other rooms where controlled ventilation is a factor.

Generally there are two major types of kitchen fans—wall and ceiling—and some of these can be used in either position. Another type, also available, is designed to be mounted outside the building, either in the wall or roof, and more than one room may be exhausted by the same fan. Thus by means of ducts and operating grills, one fan may serve the kitchen, bath and laundry.

Increasing in popularity among builders is the combination range hood and fan. Designed to harmonize with the decor of the kitchen, these units consist of a metal hood with built-in fan and light.

On the facing page are construction details showing the various installation practices which may be followed if the fan must be located where the discharge carries through ducts to the exterior of the building. These details also apply to the installation of range hoods.

The second data page in this series is provided as an aid to the installation of the attic type exhaust fans. In addition to construction details this chart also gives general recommended locations as well as the formulas for estimating the size fan necessary to exhaust a given space properly.

Where ventilation requirements exceed the capacities of the fan desired it is wise to install two units. For example: a rambling type home may be better served by installing fans at opposite ends of the building, thus obtaining a more even air movement throughout all rooms.

Technical guide . . .

KITCHEN & BATHROOM VENTILATING FAN INSTALLATION

CEILING

GENERAL INSTALLATION RULES

Kitchen ventilating fans should be installed as close to the range as possible. Ceiling fans directly over the appliance; wall fans should be located 12 to 18 in. above the top of the range.

Where discharge ductwork is necessary ducts should be as large as the fan outlet opening throughout. For best results limit ducts length to 10 ft.

Elbows tend to restrict air flow. Keep runs as direct if practical.

For best results install fan that will change air in the room every two or three minutes. The following formula aids in estimating fan size needed.

$\frac{\text{Cu. Ft. of Room}}{\text{Minutes Air Change}} = \text{CFM Fan Capacity}$

INSIDE WALL

OUTSIDE WALL

ATTIC & EXHAUST FAN INSTALLATION

GENERAL INSTALLATION RULES

Where fans are installed to discharge directly to outside they should be located with prevailing winds. Fans discharging directly into attic should be centrally located if possible.

Flat roofed buildings without adequate attic space should be provided with a penthouse for fan location. Either vertical or horizontal units may be used.

Provide adequate protection against fire in all installations. Various devices are available to insure fan cut-off and closing of intake louvers.

MINIMUM AREAS FOR DISCHARGE OPENING

TYPE OF OPENING	SQUARE FEET PER 1000 CFM FREE AIR FAN DELIVERY
Wood louvres backed with 1/2" hardware cloth. 40% minimum free area.....	2.27 Sq. Ft. per 1000 CFM
Metal louvres backed with 1/2" hardware cloth. 50% minimum free area.....	1.82 Sq. Ft. per 1000 CFM
Plain opening covered with 1/2" hardware cloth. 80% minimum free area.....	1.14 Sq. Ft. per 1000 CFM
Automatic or manual shutters, 90% minimum free area.....	1.01 Sq. Ft. per 1000 CFM

ESTIMATING FAN REQUIREMENTS

The following formula will aid in determining the size of the fan required to adequately ventilate a given area:

$$\frac{\text{*Cu. Ft. Volume of Area}}{\text{**Rate of Air Change}} = \text{CFM (Fan Capacity)}$$

*When estimating cubic feet contents, closets, and other unoccupied areas may be deducted.

**Select rate of air change according to locality from map at the right.

Example:
 Volume = 15,000 Cu. Ft.
 Desirable air change = 1 1/2 Minutes
 $\frac{15,000}{1.5} = 10,000 \text{ CFM (Fan Capacity)}$

FAN LOCATIONS

<p>SUCTION BOX</p>	<p>ATTIC STAIRWAY</p>	<p>GABLE INSTALLATION</p>	<p>ATTIC WALL</p>
<p>PENT HOUSE</p>	<p>BASEMENT</p>	<p>The installation of attic fans generally follows the three methods shown at top of page. In homes with basements it is sometimes practical, and equally effective, to install the fan in a compartment beneath the basement stairs allowing the discharge to exhaust directly into the basement proper. Intake and discharge louvers should follow the same rules that apply to attic installation. The same precautions should be taken against fire.</p>	<p>VERTICAL DISCHARGE</p>

GRAHAM SECTIONAL GARAGE DOORS ARE "ARCHITECTURALLY CORRECT"

Custom Designed
TO THE ARCHITECTURE
OF YOUR LOCALITY

You get so much more with a Graham Door!

Priced as low as
ordinary looking doors!

ARTISTICALLY DESIGNED
to erase the "warehouse look"
from your beautiful homes.

LONE STAR

CAPE COD

House sales start at the curb. Your front elevation is your best advertisement to "cruising shoppers". Don't spoil the looks of your homes with ordinary, warehouse-type garage doors. Catch the shopper's eye, install "custom-designed" GRAHAM flush, sectional doors. Then . . . whether you build in Maine or Michigan, Florida or North Dakota, you'll be sure your homes are ARCHITECTURALLY CORRECT!

BASKETWEAVE

Be SURE to visit the GRAHAM exhibit at the NAHB Convention: Booth # 878, in the Coliseum.

Successful Builder Cuts Heating Installation Costs with *Vulcan* **TRIMLINE** Baseboard

. . . improves quality, efficiency and salability!

Nat Siegel, Long Island builder, cut heating installation costs, improved quality, efficiency and salability by selecting VULCAN TRIMLINE for his 200-home development at West Brightwaters, L. I. Here's how he did it:

- Less materials used because TRIMLINE requires fewer parts (one-piece back and top).
- Simple method of installation saved man-hours — fewer joints, less fittings and cover snaps on — quick!
- TRIMLINE is I-B-R rated for top efficiency, a vital selling factor, seal of approval.

Learn How You Can Cut Your Costs With Trimline

Write today for VULCAN's free Catalog 54 that tells you how you can cut installation costs.

Nat Siegel, president of FERN HOMES, Brightwaters, Long Island.

TRIMLINE installed at 200-home development by FERN HOMES.

Increase your know-how

with these practical books covering
all phases **LIGHT CONSTRUCTION**

ESTIMATING

2. SIMPLIFIED CARPENTRY ESTIMATING*

By J. W. Wilson and C. M. Rogers

Everything needed to take-off a bill of materials from a set of plans and specifications for a frame house. Many helpful tables and short cuts that simplify the work. \$3.75

3. BUILDING ESTIMATOR'S REFERENCE BOOK VEST POCKET ESTIMATOR

By Frank R. Walker

Two companion books containing latest estimating and cost data on everything that goes into a house. Most complete available. \$12.00

4. CONTRACTOR'S MATERIAL LIST

A 10-column take-off form for complete listing of materials and labor costs. \$1.00

5. SPECIFICATIONS

Full set of detailed house specifications (and item index) with spaces for inserting pertinent descriptive data. \$.50

BRICKWORK & MASONRY

6. ART OF BRICKLAYING

By J. E. Roy

Basic bricklaying job instruction. Many illustrations, glossary, special scaffolding and cement block chapters. \$4.00

7. MASONRY SIMPLIFIED VOL. I (Tools-Materials-Practice)

8. MASONRY SIMPLIFIED VOL. II (Practical Construction)

By Datzell and Townsend

Practical masonry procedures in the various phases of construction from concrete forms to fireplaces and septic tanks. Includes discussions of new products such as glass blocks, waterproofing mixtures and insulating blocks. Each vol. \$5.00; \$10.00 for both.

HEATING & PLUMBING

9. HEATING, COOLING AND AIR CONDITIONING HANDBOOK

Mandy reference manual and practical instruction book. 706 pages; 351 illustrations. \$4.00

10. HOW TO DESIGN AND INSTALL PLUMBING

By A. J. Matthias, Jr.

Every step in the design and installation of the plumbing system to fulfill blueprint requirements and specifications. \$4.25

ELECTRIC WIRING

11. INTERIOR ELECTRIC WIRING AND ESTIMATING

By Uhl, Nelson & Dunlap

How-to-do-it book of wiring and estimating. \$4.25

12. WESTINGHOUSE HOME WIRING HANDBOOK

By A. C. Bredahl

Guide for planning wiring of moderate-priced homes. With emphasis on safety, effectiveness and efficiency. \$1.00

1. RICHEY'S REFERENCE HANDBOOK*

By H. G. Richey

For construction engineers, architects and builders. Here, in one handy volume, is a whole library of information covering all the building trades. Twenty-three chapters, over 400 tables, 544 drawings and a 20-page index. A completely new kind of handbook stressing actual building practice and what-to-use and how-to-do-it instructions. An American Builder publication sold on a ten-day inspection privilege (see coupon).

1600 pages—\$9.95

PLAN BOOKS

13. HOMES FOR LIVING*

By Samuel Paul, Architect

While designed for prospective homeowners in the "dreaming" stage, builders find this book useful as a source of ideas and suggestions to customers. Sketches and detailed floor plans for 80 houses in a wide variety of popular styles, divided into three general price brackets according to family income. Complete plans and specifications for these houses are also available. \$3.95

14. SUNSET WESTERN RANCH HOUSES

Authoritative book on the California ranch house, with thorough pictorial descriptions, ground floor and site drawings. \$3.00

15. DUPLEX AND APARTMENT HOUSES

By J. W. Lindstrom

Floor plan sketches and brief descriptions of 35 duplexes, 11 four-apartment buildings, and five larger ones ranging from six to twelve apartments. \$1.50

MISCELLANEOUS

22. PRACTICAL ACCOUNTING AND COST KEEPING FOR CONTRACTORS

By Frank R. Walker

Complete instructions and examples showing proper methods of keeping time and compiling costs on all classes of construction work. \$3.00

CARPENTRY & BUILDING

16. HOUSE CONSTRUCTION DETAILS*

By Nelson L. Burbank

Exact working guide for every detail of house construction from foundation to finish. Tells dimensions, materials, processes and step-by-step working methods. \$4.95

17. HOUSE CARPENTRY AND JOINERY*

By Nelson L. Burbank

Every step in carpentry in and around the house clearly explained and illustrated. Covers every job from foundation to interior trim. \$4.75

18. HOW TO BUILD CABINETS FOR THE MODERN KITCHEN*

By R. P. Stevenson

New book gives step-by-step directions, material lists, building pointers and includes detailed working drawings for making every type of cabinet. \$4.95

19. FUNDAMENTALS OF CARPENTRY

By W. E. Durban

Complete house carpentry in two volumes. An outstanding value. \$8.00

20. THE STEEL SQUARE

By Gilbert Townsend

Instructions in fundamentals plus step-by-step house construction problems solved by proper steel square use. \$2.50

21. STAIR BUILDING

By Gilbert Townsend

Fully-illustrated explanation of every problem in design and construction of stairs. \$2.95

23. PAINTING AND DECORATING CRAFTSMAN'S MANUAL

Sponsored by the Painting and Decorating Contractors of America. \$2.00

24. ARCHITECTURAL DRAWING FOR THE BUILDING TRADES

By Kenny & McGrail

Practical drawing instruction for builders, contractors, student, and draftsmen. Excellent show-how illustrations. \$4.80

FREE with orders of \$5.00 or more

25. Modern Methods of Home Heating*—J. L. Shank

Standard heating systems illustrated with 17 floor plans with heating outlets. 40 photos of equipment and installations; 25 boiler and piping diagrams; 11 heat loss calculating tables. \$.25

*Starred books are our publications sold with 10-day inspection privilege with full refund.

easy to apply...economical, too...

hpi HARDWOOD PLYWOOD wall paneling to satisfy your customers!

Yes, Mr. Builder, you can readily satisfy your customer requests for beautiful Hardwood Plywood wall paneling without frightening them over estimate figures. Your time and labor savings with Hardwood Plywood panels will often offset the slight additional materials cost, and prefinished panels offer big savings, too.

HPI Hardwood Plywood is available in Birch, Cherry, Gum, Mahogany, Maple, Oak, Walnut and other handsomely grained species. Each of your homes can

have individual beauty—each distinctively different. And Hardwood Plywood is sturdy, trouble-free—will cut upkeep and maintenance costs—last as long as the house. You'll be pleased and satisfied, too, with the amazing difference a paneled room or even a dramatic Hardwood Plywood accent wall can make in the appearance of your finished house. The beautiful results will lead to additional home sales wherever you build.

Write for your free copy of "A Treasury of Hardwood Plywood," filled with practical ideas and information on selection and use of Hardwood Plywoods.

CONSISTENT QUALITY . . . CUSTOMER-PLEASING BEAUTY

The HPI seal, advertised nationally to your prospects in top-circulation consumer magazines identifies American mills operating under a rigid quality control program. It is your assurance of uniform grading, highest standards.

Framing a barn roof for maximum capacity . . .

QUESTION: I would like to know the plumb cut, side bevel, top cut and side bevel and the length of the rafters for the gable of a gambrel type barn roof in which the upper rafters rise nine inches per foot. This rafter is attached at its lower end to the gable rafter, and at the upper end to the ridge pole extended.

O. W., Bryan, Ohio

ANSWER: The drawing above covers the details on this type of barn roof. The rafters spaced 2'0" on center provide 500 square feet of mow cross sectional area. This design has been checked for the following conditions of loading:

1. Wind blowing at an angle of 90 degrees to the side wall, with a velocity of 70 miles per hour.

2. Wind of same velocity blowing against the end of the barn where the large hay mow door is open into the wind.

3. Hay track load of 1000 pounds at the peak of the roof.

Overcoming spring in joists

QUESTION: My problem is to eliminate

some of the spring that now occurs in the present 2x6 floor joists that are spaced 12 in. on center and that extend over a span of 9 and 11 ft. My plan is to reinforce the present girders and then provide new intermediate beams at right angles, supported at the posts. How would you suggest securing the new beams?

L. D. W., Lyons, Colo.

ANSWER: The plan that you suggest is satisfactory if cross bridging alone will not eliminate the springing of the joists. A solution to supporting the underhung beams to the new girders is shown in the drawing. A plan of the new beams is also shown.

Wrong slope to porch floor

QUESTION: We are faced with a problem wherein a porch floor slopes in toward the house instead of away. The slope is only 1/2" in 6' and we would like to know how to put a topping on the porch floor, reversing the slope without breaking in the concrete.

I. R., Cranford, New Jersey

ANSWER: The problem of placing a new topping on the concrete porch floor depends primarily on how much room is available at the threshold. Since for structural reasons you do not wish to cut away the old concrete, the new topping, designed to pitch away from the house, must be at least 2 1/2 in. thick at the base of the house and graduated downward to 1 1/2 in. thick at the outer edge. The surface should be roughened with a pick or grinding tool.

Which is the best way?

QUESTION: Please tell us the best way to fasten 4"x10" rafter beams to a 4"x14" ridge beam. The roof pitch is 2-12. Construction is 2"x6" planking, 2" insulation and a built up roof. The rafter beams span 14'0" and are 6'0" o.c. The ridge beam spans

**DOUBLE DIPPED
IN MOLTEN ZINC
TO CHECK FORMATION
OF STAINS, STREAKS
AND RUST**

- Reduce Maintenance • Keep Property Neat, Clean
- Save on Painting • Uphold Property Value

The savings just begin when you use Maze STORMGUARD NAILS to apply roofing, siding and trim. Especially designed to check formation of ugly stains, streaks and rust at less cost per nail than non-ferrous nails, they reduce building maintenance and painting costs—offer substantial first cost savings.

Developed through 8 years of research and testing, STORMGUARD NAILS have a solid steel core for strength—a heavy zinc coating for corrosion resistance, applied by an exclusive Maze DOUBLE DIPPING process. STORMGUARD is the new choice in a stain-checking nail for exterior use.

THE IDEAL NAILS FOR

ROOFING

SIDING

TRIM

For roofing, siding and trim . . . to check formation of stains, streaks and rust . . . there are STORMGUARD NAILS in standard lengths and gauges; all required sizes.

FIG. 3

FIG. 4

ANSWER: The examples above indicate the customary way in which this problem can be solved. Fig. 2 indicates a steel plate placed on top of the rafter and the ridge beam. This is nailed to the wood members from the top. Fig. 3 shows a ledger board nailed to the side of the ridge beam which in turn supports each rafter. Fig 4 is to support the rafters on steel joist hangers. This is the most economical method. Toenailing the 4x10's to the 4x14 ridge rafters is possible but very impractical. 8-50 penny-weight spikes would be required at each end. Prebored holes would be required for each nail which would destroy the effectiveness of the rafter.

Builder's kitchen for a young family

See it at Chicago

— during N. A. H. B. convention
exhibit space 710-711

Chicago Coliseum

Designed by Mutschler in cooperation with Redbook magazine, this *New Freedom Gas Kitchen* is really more than a kitchen. It's a multi-purpose room that incorporates kitchen, laundry and living area for growing families . . . the big market for builders.

Cabinetwork is in fruitwood finish, with French blue countertops. Featured are built-in gas appliances, including the regular model gas refrigerator in a brick alcove. Also, a large table that pulls out from a floor cabinet, adjustable shelf/trays as described at left, sliding wire vegetable bins and many other fine Mutschler features.

If you are building quality homes, you'll want to investigate the advantages of Mutschler hardwood kitchens . . . with design, plan and décor tailored to your particular needs. And, they are inexpensive, too!

See us at the N. A. H. B. show in Chicago, or send coupon at the left for further details.

These adjustable, sliding shelf/trays (exclusive with Mutschler) now make kitchen storage completely adaptable. They may be removed with contents and carried like a tray, and rearranged for height of storage without tools. Extra shelf/trays available to add at any time. This is an important selling point to families that are growing up and expanding.

Sink enclosures can be easy

Enclosing a sink with a cabinet not only provides additional storage space, but also improves the appearance of the kitchen. How to do this is just one of the many ideas to be found in "How to Build Cabinets for the Modern Kitchen," recently published by Simmons-Boardman.

The above plan proposes that the upper edges of all four cabinet walls fit inside the recess formed by the roll rim. This will allow the rim to overlap the cabinet on all sides. However, if cabinet width and length are slightly increased, the sink can be made to rest on the bottom edge of the rim.

If the cabinet is to provide full sink support, it would be advisable to use 3/4" plywood for all four sides. Otherwise, lesser material might be chosen. Use nom. 1" x 4" pine for the base and nom. 1" x 2" and nom. 2" x 2" for the framing.

Other sink ideas:

A kitchen sink doesn't always have to be backed up to a wall. It may be located in a "peninsula" of cabinets jutting from the wall or in an "island" in the middle of the room. Before using such a location, be sure that piping water and installing drain will present no difficulty or costly plumbing problems.

Federal outlook for '56 + 5%

A record-breaking sum of \$44 billion for new construction spending is expected in 1956, 5% above the \$42 billion peak for 1955, according to estimates prepared jointly by the Labor and Commerce Depts.

Private construction outlays in 1956 are set slightly above 1955's \$30 billion total. Public construction will rise 10% in 1956.

The value of private nonfarm residential construction will stay near the 1955 level of over \$16 billion. A decrease in the dollar value of new home building will be largely offset by greater outlays for re-

modeling of older homes and for construction of motels and other nonhousekeeping residential units.

Most of the increase in private construction between 1955 and 1956 is anticipated from the rise in spending for new nonresidential buildings to \$8.7 billion, with industrial building showing the largest relative gain—17%—over 1955.

Spending for stores and other service establishments in 1956 will rise to \$2 1/4 billion, 17% over 1955's total and 80% above that for 1954. A record \$850 million is seen for religious buildings in 1956.

ALL UNDER ONE TENT

World's Biggest Line of Water Systems

DEMING

FOR HOMES BEYOND THE CITY MAINS

Modern living demands Running Water. It's one of the first considerations when building beyond city mains.

Make sure the water systems you specify, or buy, are right for type and capacity. Make doubly sure they are built for dependable, low cost operation, easy maintenance and long life.

Every condition—every requirement—can be met exactly when you STANDARDIZE on

the Deming line. This concentrates responsibility in one complete reliable source. It's a sound policy that pays off for builders, sellers and buyers of homes beyond reach of city water.

Specify *DEMING* . . . the World's Biggest Line of Water Systems . . . "All Under One Tent." Write for free catalog information and names of your local Deming Distributors.

REMEMBER: May is National Water Systems Month

How to do it better

Ideas for the man on the job

Reinforce front porch concrete slab . . .

When we have a concrete front porch slab to pour for a house, we carry the load as shown in the above drawing.

First, a pocket is formed in the foundation block wall by laying up a course of 3-inch block at the point where the porch slab is to tie into the house. Then, before backfilling, we go down into undisturbed soil and lay up

two cinder block piers, dry. These are braced temporarily during backfilling. Then a grid of steel reinforcing rods is set up across the piers and the pocket and the concrete poured, on top of the fill. All wood in contact with the concrete is treated with a preservative.

J. Mack, Elmira, N. Y.

Can you do it better . . . faster . . . cheaper?
We'd like to know about it . . .

SEND US . . .

- A brief written description
- A simple sketch
- Snapshots, if possible
- A picture of yourself, and your name and address

You are American Builder's main source of better building methods, so send us your ideas. Good sketches are most important; a free hand drawing is fine so long as it's clear. If we publish your idea, we'll send you \$25 for your trouble. Mail contributions to: American Builder, 30 Church St., New York 7, N. Y.

NEW! SALEM HOOD

Rich . . . stunning . . . and distinctive with the look of true hand craftsmanship. This is Trade-Wind's striking new early American ventilating hood, made in exclusive Duometal — two sheets of genuine copper and steel laminated together. Beautiful antiqued finish to match the new copper stove tops. 30", 36", 39", 42" and 48" lengths including baffle. Underhood light available. Competitively priced.

THE HITS OF THE SHOW... FROM *TRADE-WIND*

STATIONARY HOOD

This is the popular Trade-Wind design which can be used with any kitchen decorating scheme and materially increases the efficiency of the ventilator. Available in both copper and stainless steel with brushed finish. Includes the exclusive baffle for even distribution. 30", 36", 39", 42", and 48" lengths.

**MODEL 3501 VENTILATOR
550 CFM**

Recognized as the only complete system. Two inlets—one under the hood—the second at ceiling level. Both inlets equipped with washable filters. Powerful dual centrifugal blowers. 4-speed switch. Use with any of the striking Trade-Wind hoods.

**MODEL 2501 & 1501
VENTILATOR
425 & 300 CFM**

Dual blowers. Interchangeable horizontal or vertical discharge. Built-in backdraft damper. Available with metal filter. Use with any Trade-Wind hood.

**MODEL 1701
LIGHT/VENTILATOR**

Another exclusive Trade-Wind design providing both ventilation and light in the bathroom. Mounts flush in ceiling. Beautiful chrome and glass grille. 100 CFM ventilator with built-in backdraft damper. Uses 2 75W lamps. Time delay switch available.

How to do it better— Ideas for the man on the job

Better framing detail over door

Here is a better way to frame over all door heads, regardless of whether the partitions are bearing or non-bearing. When this practice is followed, there are less chances for cracks in the walls around the door openings.

W. F. Weaver, Baltimore, Md.

Vertical "I" beam provides extra rigidity for concrete block wall

When laying up concrete block foundation walls in heavy clay soils that hold moisture and produce lateral pressures, a four-inch steel "I" beam placed vertically against the inside of the wall will add rigidity to the wall. Concrete block wall spans over 20 feet will hold back clay soil pressures when reinforced this way. The bottom of the steel "I" beam is embedded in the poured concrete footing, trued up, and braced before the concrete blocks are laid.

Start Building with Thyer for a Banner Year

"Silver Platter"

Profit System

Financing Service. Your local Thyer Factory Representative will be glad to help you arrange construction and permanent financing for FHA, VA or conventional loans.

Local Field Service. Thyer Factory Representatives located in 33 states are ready to assist you in land development, arranging financing, erecting and planning local advertising and model home showings.

Turn-Key Contracting Service. For developers who wish to build 100 or more houses at a time, Thyer can provide a turn-key building service that delivers houses at a bonded contract price. (At present this service is available in all Southern and in most Northern States.)

National Advertising Support. A hard-hitting program in national consumer magazines pre-sells your prospects—helps create buyer interest in Thyer Homes.

"Thyer fabricated structural units commended by Parents' Magazine"

● You can spot a Thyer open house a mile away! . . . brilliant Thyer pennants and streamers mark the beginning of a banner year.

And behind every Thyer "open house" lies weeks of carefully planned local promotion guaranteed to put house hunters in a buying mood. Newspaper ads and radio or TV commercials, plus display cards, mailing pieces, etc., all help to pre-sell your local market.

Add a lid and pan rack as a built-in bonus

A kitchen with convenient utensil storage means a home with added sales potential. This lid and pan rack, placed near the range and/or in the mixing center, is one of many built-ins described in the book recently published by Simmons-Boardman, "How to Build Cabinets for the Modern Kitchen." Lids and flat pans are stored upright. Bins of two different widths provide for pans and lids of different thickness. Rear downward slant of shelves prevent round tins from falling out.

To make: Cut $\frac{3}{8}$ " x $\frac{3}{4}$ " rabbets in the ends of top and bottom pieces to take side pieces. Rabbet all four pieces $\frac{1}{4}$ " x $\frac{3}{8}$ " for the $\frac{1}{4}$ " plywood back. Cut $\frac{3}{4}$ " dados $\frac{1}{4}$ " deep in the sides for two shelves, slanting them as shown. Stopped dados are indicated in top and bottom surface of upper shelf for the partitions, but they can be full dados. Corresponding dados are needed in the 8" bottom shelf and under side of the cabinet top. Cut partitions $\frac{1}{4}$ " off square as shown. To get exactly the same angle on all partitions, clamp together and cut all at once. After fitting partitions into dados, position shelves between sides of cabinet for rear downward slant.

MATERIALS:

$\frac{3}{4}$ " plywood (4' x 4' panel) to make—
2 pc. 12" x 30"—sides.
2 pc. 12" x 19 $\frac{1}{2}$ "—top and bottom.
1 pc. 12" x 18 $\frac{1}{2}$ "—top shelf.
1 pc. 8" x 18 $\frac{1}{2}$ "—bottom shelf.
1 pc. 16 $\frac{1}{4}$ " x 28 $\frac{1}{4}$ "—door.
2 pc. 2" x 2"—rack ends.
 $\frac{1}{4}$ " plywood (4' x 4' panel) to make—

1 pc. 18 $\frac{3}{4}$ " x 29 $\frac{1}{4}$ "—back.
5 pc. 9" x 10 $\frac{1}{2}$ "—lower partitions.
5 pc. 9" x 12 $\frac{1}{2}$ "—upper partitions.
1 pc. 2 $\frac{1}{4}$ " x 15"—rack front.
1 pc. 2" x 15"—rack bottom.
2 pc. $\frac{3}{4}$ " x 1 $\frac{5}{8}$ " x 30" pine—front facing strips.
1 pc. $\frac{3}{4}$ " x 1 $\frac{5}{8}$ " x 19 $\frac{1}{2}$ " pine—top facing strip.

aluminum WINDOWS and DOORS

by **GENERAL BRONZE CORPORATION**

ALWINTITE DIVISION - GARDEN CITY, N. Y.

YOU can always depend on ALWINTITE for leadership in design, engineering and precision manufacture. ALWINTITE was *FIRST* to introduce the low-cost aluminum residential window; *FIRST* to bring out an aluminum horizontal sliding window; *FIRST* to introduce an aluminum VIEWall window unit.

ALWINTITE window and door products are engineered to enhance your reputation as a quality-minded builder, — to save you many hours of installation time, — and to give years of trouble-free service. That's why you can always depend on ALWINTITE — products of General Bronze, world's foremost producer of aluminum windows and curtain walls.

ALWINTITE distributors — selected for their reputation for service, dependability and integrity — are located in every important area. They maintain complete warehouse stocks and are anxious to serve you. For latest catalog, write to ALWINTITE DIVISION, GENERAL BRONZE CORP., Garden City, N. Y. Attn. Dept. AB-561

An economical face lifting for a store

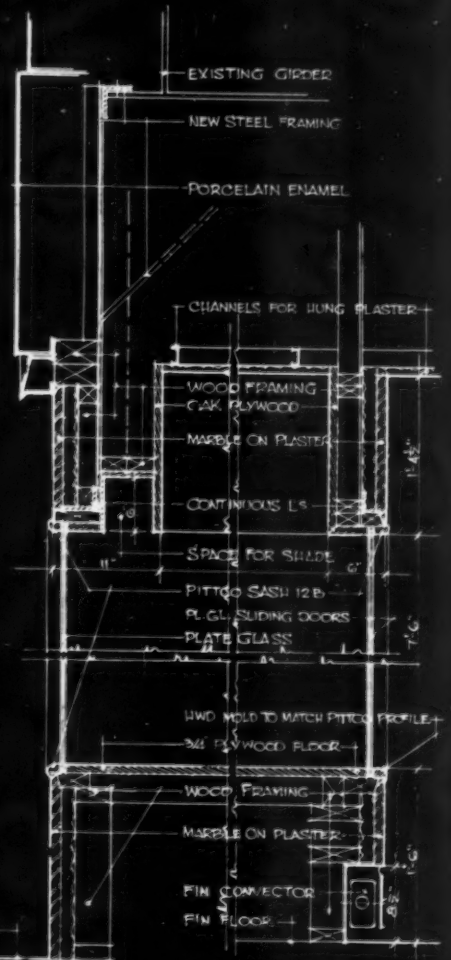

AMERICAN BUILDER'S BETTER DETAIL PLATE . . . NO. D-135: STORE FRONT REMODELING

PARTIAL ELEVATION . . .

PARTIAL PLAN . . .

SECTION 'A-A' . . .

SECTION 'C-C' . . .

PLAN 3' . . .

front . . .

Plain wall surfaces that extend from the sidewalk to the roof-line is the order of the day in the remodeling of this outmoded commercial building shown in the plate at left.

The all-glass front, entrance and side street return is completely surrounded with a marble veneer. This includes the old column supports, effectively worked into the revised store front plan. The inside of these columns are faced with hardwood veneer in the same manner as the inside of the show windows.

The entire surface above the first floor is faced with a series of individual 16-gauge porcelain enamel pans. These are set in groups of three horizontally and then separated with alumilited aluminum divider strips of 16-gauge, recessed one inch back from the face of the metal pans.

The divider strips and pans are rigidly secured to wood blocking attached to the old masonry wall. Space is allowed in the setting for ample caulking.

In the new front, the display signs are considered an integral part of the overall design. Letters vary from 4 to 8 inches in depth. These are of a porcelain enamel channel type, with multiple neon tube inserts in each letter.

Windows above the first floor level have always been a necessary adjunct to the successful operation of an upper level sales area. Air conditioning has done away with them, and has given the designer unlimited scope with respect to the design of the front, and in the use of new and more economical materials with low maintenance.

Quality-Tested Aluminum Doors*

Contractor Edward Krist standardizes on McKinney Non-Mortise Hinges for lower time and labor costs.

TWO CARPENTERS HANG 90 DOORS

PER DAY

in Krist
Hillside Happy Homes
Puente, California

WITH MCKINNEY NON-MORTISE HINGES

Door hanging time and labor costs were drastically cut during the construction of 257 homes in suburban Los Angeles tracts by builder Edward Krist. Two carpenters with power screw drivers—the only tools needed—averaged hanging 90 doors in an eight-hour day using McKinney Non-Mortise Hinges.

McKinney Non-Mortise Hinges eliminate mortising of doors and jambs with

no chiseling, no cutting. The self-aligning hinges are simply screwed on the surface of the edge of the door and jamb. In addition to speeding up the job of door hanging they provide strong, durable, easy-acting hinges for every door, exterior and interior. Available in three quality finishes—dull brass, bonderized prime coat, and bright nickel. Order now from your Building Supply or Hardware Dealer.

See this unique Non-Mortise Hinge in the McKinney Booth #217
Conrad Hilton Hotel, at the N.A.H.B. Show

BOBER FORECAST . . .

(Continued from page 13)

its immense size. The Survey makes compulsory a mental readjustment which hasn't taken place as yet with most of us. In 1956, almost \$8 billion may be spent in the owner-occupied residential modernization market alone. Around 2.8 billions may be spent in the tenant-occupied sector.

We must therefore cease to speak of construction as a \$44 billion market. It is, or in 1956 will be, a \$65 billion market.

The growing family

We have now had a number of years of very active construction. Yet the industry keeps surging, year after year, onward and upward to ever higher levels. What makes it tick that way?

First of all, above all other reasons, the immensity of the change in population growth since before the War. Our birthrate since the 1930's has risen 50%. In that decade our population increased by about 9,000,000. In this decade it will be about 27,000,000—an almost incredible increase. We are headed towards a population of 200,000,000 by approximately 1968 which is only a dozen years hence. Families with 3 or 4 or even more children are becoming a natural concomitant of our prosperity and the American standard of living.

But even these figures fail to give adequate expression to the dynamic impact of population-growth on our economy. It is necessary to understand how enormously that impact has increased since a year or so before Pearl Harbor.

In the 1920's and 1930's the future of our country, and of course the construction industry with it, was threatened by a slowdown in the birthrate that would have sent us tailspinning into a stationary and ultimately declining population.

Our potential market

By 1940 we had actually half a million fewer children under 15 than two decades earlier. Then came the great reversal. Shortly before Pearl Harbor the birthrate suddenly surged upward at a spectacular rate. Ever since, it has stayed on a lofty plateau. Instead of declining by another half million as in the preceding 20 years, the number of children in this country will have increased from 1940 to 1960 by no less than 21,000,000!

That has changed everything—absolutely everything. And there we have the most fundamental differ-

ence between the business boom of the Twenties and that of today.

Never in the history of the world has so immense and so sudden a population-reversal been recorded. These children, or almost all of them, are rapidly growing up into adult producers, consumers, and home-wanters. In only a few more years, the vanguard of this mighty flood of young adults will reach market after market.

And the result is that everything in the U.S. is rapidly becoming *too small*—literally everything, from our factory plant to our housing plant and everything that lies between or is remotely connected with the requirements of people. And that, of course, is the construction industry's meat.

At the same time, technological progress is advancing at an accelerated rate the like of which no age has even seen. Only yesterday the annual increase of the output per man hour of the American economy was rated at 2%. Now it is 3% compounded annually, an almost incredible rate of acceleration in a period of less than a decade. And in manufacturing the rate is rising to 5 and even 6% per year—a rate of change that is something new in even our national experience. To summarize:

Expansion means construction

Population growth is making everything too small. Technological progress is making everything obsolete. Technology is placing into our hands the power to satisfy the ever-increasing demands of a spectacularly growing population. Add these things together and you get the main reason why we are in the midst of the greatest era of expansion in all our history.

And of course, expansion means construction.

Our present era of expansion is not approaching its end as happened to the boom of the Twenties in 1929. On the contrary, it is just hitting its stride. Major expansion lies ahead, not behind. It could not be otherwise. The flood of children that is now pouring thru our schools has not yet had time to transform itself into a corresponding flood of adult producers, consumers, and home-wanters.

The year 1956 must therefore be seen in its proper historical setting. It is not at the beginning of the period of postwar expansion because ten years of boom lie behind it. And as business prosperity never advances in an unbroken line, we could have a dip in some business sectors, if for no other reason than

that the boom must occasionally come up for air and catch its breath.

But, far less, is 1956 at the end of a period of expansion. It is not even well along towards the middle. To repeat myself, there can be no end to expansion until the torrent of children has fully reached adulthood, and that will only begin to happen in another five years or so.

There are some differences between this year and last. The stock market break, which is rapidly repairing itself, may or may not cause some deferment of projects. Automobiles had a tremendous year

in 1955 that will be hard to duplicate in 1956. We have tighter money than a year ago, and this is having minor effects in the home building market. We have had a very rapid rise in consumer-debt and the rate may require some temporary slackening.

Yet so powerful is the surge of the business tide that it is more than likely that 1956 will sweep aside all obstacles. Our money managers, the Federal Reserve System, are as interested as anybody in keeping prosperity at the highest possible level

(Continued from preceding page)

commensurate with the need to hold inflation in check. There are already small but definite signs that credit is in the first stage of being eased in the vitally important home building sector.

It is often said that the home-mortgage debt is too high. But let's look at it objectively. In 1945, at the end of the War, about 51% of all our occupied non-farm homes were owner-occupied. By 1955 that percentage had risen to 55. Of our total of 44,000,000 non-farm homes, over 24,240,000 are now owner-occupied. If the percentage had stayed at 51 it would only have been 22,440,000.

Thus, as a result of the increase in home ownership and the relative decline in tenancy, we now have 1,800,000 more owned homes than we would have had at the old ratio. As these homes carry an average mortgage debt of \$8,000 the aggregate mortgage debt has naturally increased by \$14.4 billions.

But the rental liability has been reduced proportionally as people must have homes. Today it makes very little difference financially whether they pay for occupancy in form of monthly home-ownership payments or monthly rental installments. In effect, people have used the money they save on rent to pay for homes. But home-ownership debt is recorded as debt and looks big, whereas rent-liability is not so recorded and almost never publicized.

The migration factor

Every year since 1949 we have had a more-than-a-million-new-homes year. We will continue to have such years because population growth, demolition, and housing obsolescence demand them. In 1956 at least 800,000 new homes will be required for new family formation in the non-farm areas. True, farm families are decreasing; but abandoned farm dwellings don't add to the housing supply where needed, which is in the cities and suburbs. We are now demolishing homes at the rate of 250,000 to 300,000 a year. Thus, mere family formation and demolition combined will require considerably over a million new homes next year.

We started about 1,250,000 new homes in 1955. It may be a little less in 1956, between 1,200,000 and 1,100,000. But that will merely build backlogs for the following year.

The fact is that family formation is by no means any longer the only big factor that makes for housing demand. One of the very biggest factors is migration. People continually

pour out of the older parts of the United States—the New England, Middle Atlantic, and part of the Prairie States—into the newer and less developed regions in the South and West, and the Great Lake cities with their enormous industries.

So great has been this flood of people that considerably over half of all new homes erected in 1954 were in the South and West. And undoubtedly the same will be true of 1955, 1956, and thereafter. The growth of these regions is an immense construction stimulus.

But the greatest flood of migration is to the suburbs. In the 5 years between April 1950 and April 1955 the country's 168 standard metropolitan areas accounted for almost its entire population growth. But that growth was seven times as fast in the suburbs of these metropolitan areas as in the old central cities.

Home replacements

The result is that you can have heavy vacancy ratios in the old central cities side by side with a ceaseless intense demand for new homes in the suburbs. And that, in fact, is what we are getting.

It is only in areas and regions that people move *to*, not in areas and regions people move *from*, that rising vacancy ratios have any real significance. An empty house in Portland, Maine does not add to the housing supply if the direction of migration is towards Portland, Oregon. And empty dwellings in the central cities do not add to the housing supply for people seeking homes in the suburbs.

In areas and regions where people move to, vacancy ratios remain abnormally low. This insures further massive homebuilding.

For the first time in our history we are developing a true home replacement market—not so much thru demolition of old homes as by people moving out from these into new homes. For the first time in our history the average American family can afford a new home. The average annual family income is now \$4,400. That is enough to carry payments on a new house costing 2½ times that, or \$11,000. For that price the home builder has been giving excellent value.

Average income rise

In a couple of years or so, unless we get a general business decline of which there is today no sign, fully half of all American families will have an annual income of \$5,000 or over. That carries a \$12,500 new dwelling. And for that price the

typical American builder is giving his customer something so attractive that it is pulling people out of old homes into new at a spectacular rate.

Thus, the postwar distribution-of-income pattern operates as a mighty engine of homebuilding activity. Add to that family formation which will keep climbing ever higher as our innumerable postwar youngsters get into the adult age-groups, the migratory instincts of our people, the modernity with which modern homes are now designed and hence the rapidly growing obsolescence of existing dwellings. The answer is an annual demand for new homes that will soon reach 1½ million a year, plus an almost staggering demand for modernization to bring the existing housing plant up to date. Fortunately, because of our spectacular population growth, there will be a vast market for both the new and the modernized old.

POLIO isn't licked yet!

Here are
19 REASONS
 why these new 1956
AMF De Walt Power Saws
 speed your cutting...
 lower your costs

MODEL GW-1 WITH 10" SAW. With 1½ hp direct-drive motor, 120/240 voltage change switch, 10" saw blade cuts 3" deep, rips 26" wide, cross-cuts 16" wide on 1" stock. Steel base with welded carrying handles, carries through 30" door. Safety key switch, guard, anti-kickback device. Weighs only 183 lbs. \$382.50 complete delivered.

Larger sizes available

Use your De Walt for framing, concrete forms, interior trim work, special built-ins... for every cutting need.

Join the thousands of builders who have found an AMF De Walt the one modern, cost-saving way to cut and finish lumber, in the shop or on the job.

The modern, versatile, job-proved De Walt Power Saw...

- 1 Does everything on the job, from framing to finishing.
- 2 Saves as much as 60% in power tool costs.
- 3 Instantly adjusts for any cut you want.
- 4 Gives machine-tool accuracy on all cuts—makes fitting easier, faster, finer.
- 5 Cuts lumber waste... salvages odd sizes.
- 6 Gives far safer, easier top-side cutting.
- 7 Saves as much as 90% in layout and marking time.
- 8 Reduces worker fatigue—operators like De Walt's easy handling.
- 9 Has big capacity in either size... with powerful, compact, direct-drive motor.
- 10 Complete in every way... sets up instantly on the job.
- 11 Conveniently lightweight... easily carries to any spot on the job site.
- 12 Gives modern, straight-line materials handling.
- 13 Has quick-set stops for all popular angle cuts.
- 14 Makes possible production-line cutting on the job.
- 15 Does special millwork... without mill costs.
- 16 Cuts all popular building materials including aluminum.
- 17 Has Underwriters' Laboratories, Inc. and Canadian Standards Association Approval for your extra protection.
- 18 Makes work go faster, more efficiently... one saw operator keeps a dozen or more carpenters busy nailing.
- 19 Custom-built, direct-drive motor minimizes maintenance.

MODEL MB-F WITH 9" SAW. Portable, with new ¾ hp direct-drive motor, 120 V. 9" all-purpose saw blade cuts 2½" deep, rips 24" wide, cross-cuts 15" wide on 1" stock. Safety key switch, safety guard, and anti-kickback device. Weighs only 140 lbs. \$239 complete delivered.

NEWS (continued)

Urban renewal is urged on cities

Any city which fails to get an urban renewal plan under way in the near future will "face municipal bankruptcy by 1965," warns Administrator Albert M. Cole, Housing and Home Finance Agency.

Citing the farm-to-city trend, Cole predicted that city and town population will be higher by 25 to 28 million persons in ten years.

"What we have to do is renew our urban pattern," he noted. "We must gradually reshape . . . until decent living has become a reality for all. But a gradual transition does not mean an easy transition. It does not mean that a city can renew itself at its convenience. . . . Urban renewal can be successfully accomplished only on an area-wide basis."

Rehabilitation loans

Meanwhile, Federal Housing Administration has advised its field office directors that consideration may be given to insuring mortgages under provisions of section 207 of the National Housing Act "on any building which might be deemed eligible for rehabilitation by reason of location and convenience and prospective occupancy appeal."

At least 25 per cent of the proceeds of these loans must be devoted to new physical improvements.

High lumber output

Leo V. Bodine, executive vice president, National Lumber Manufacturers Assn., is another who believes credit would seem to hold the key to the pace of new construction during 1956, especially in home building.

Particularly because this is an election year, we may expect prompt easing of present reins in home mortgage activity if home building shows signs of falling off, he noted.

Bodine foresees a market for some 12 billion board feet of lumber—or roughly a third of the association's annual production in recent years—in estimates of approximately 1.2 million non-farm housing starts in 1956.

He also noted that 1955 production of hardwood flooring gained 15 per cent over 1954. Output totaled 958 million board feet in the first nine months of 1955. This compared to less than 836 million board feet in the corresponding 1954 period.

MIDCONTINENT

Adhesive COMPANY

111 SUNSHINE DRIVE, GROVE CITY, OHIO • Phone Grove City 6-6343

TO: ALL BUILDERS, BUILDING SUPPLY DEALERS AND TILE CONTRACTORS

SUBJECT: NEW ROLTITE PLASTIC WALL TILE ADHESIVE

Encouraged by the success of Roltite Cement in revolutionizing the installation of decorative laminates, we decided to spread the magic of Roltite to other jobs in the building industry. A wall tile adhesive was one of the first projects we selected. But we were determined not to bring such an adhesive onto the market until we were sure that we had a product at least as good as the one really satisfactory wall tile adhesive previously available. After five years in the laboratory and two years in the field, testing more than 8,000 formulas, we finally have the product--not just as good--but actually better than the previous best . . .

1. SPREADS EASIER -- not stringy, no thin ridges.
2. DRIES FASTER -- you can start the job sooner.
3. LONGER OPEN TIME -- up to 4 hours.
4. LESS ODOR -- almost none at all.
5. WHITER -- Standard grade OK for most jobs -- Super-Bright White available where exceptional whiteness is required.
6. NO BLEEDING to adjoining surfaces.
7. Of course it surpasses all requirements of Industry's Commercial Standards #CS - 168 - 50.
8. Will not support bacteria or fungus and is not attacked by insects. (At one point, certain tests were delayed for three months while we located a supply of the right species of ant for test purposes.)

There are two more reasons why we are confident that you will quickly come to prefer it over any other brand. One is absolute uniformity, batch to batch and can to can. The other is Roltite's emphasis on giving you all the information you need to get the most from the product. Complete specifications and technical data in the Roltite Technical Bulletin. Complete instructions for using it right on the label and in the illustrated instruction folder which is supplied free with every can. (There's a free spreader with every can, too.)

Ask your Roltite dealer or distributor to show you this helpful literature and to give you the complete story on new Roltite Wall Tile Adhesive. Or drop us a line and we'll send you all the details plus the name of your nearest source.

New Double-Duty

REMINGTON STUD DRIVER

**Sets both 1/4" and 3/8" studs in
steel or concrete — in seconds!**

Light-, medium- or heavy-duty fastening, the new Model 455 Remington Stud Driver speeds the job. It sets *two* different size studs . . . up to 6 studs per minute, either size . . . and offers new possibilities in anchoring conduit clips, steel frames, wood forms and many other fixtures.

Powerful 22 and 32 caliber cartridges drive 1/4" and 3/8" studs *solidly* into steel or concrete. For special medium-duty work, the smaller cartridge is used with the larger stud. Result: the greatest flexibility ever in a cartridge-powered tool! Just clip coupon for details about this cost-saving fastening method.

"If It's Remington—It's Right!"

Supply Lines—

(Continued from page 24)

In St. Paul, Minn., Harvey B. Bream of M. B. Bream & Son, expects a low supply of cement and gypsum products; reports that "these are items which are impossible to stock and we frankly do not have a solution. We will probably be at the mercy of their market."

Slowdown will level supply

Jack B. Bracy, whose Bralei Homes, Inc., erects modern low-cost units in Little Rock, Ark., predicts that "supply of both labor and material will probably improve in the months ahead as a result of a slowdown in housing starts."

W. D. Jemison Jr., of W. D. Jemison & Sons, Memphis, agrees that a slowdown will take care of material scarcity, indicates that manpower is adequate in his territory, with no excessive wage rise in prospect.

Only one possible shortage comes to mind to George Brown of the Brown & Vaughn Development Co., Pittsburgh: steel I beams. "I do not know how serious it might develop."

No problems at all are anticipated during the early part of the year in the growing Corpus Christi, Texas, area, reports R. O. Woodson, local home builder association president.

Loans priced at 98%

Recent average typical prices being offered for FHA-insured mortgages ranged from 97.6 to 100 per cent of the outstanding amounts of the loans involved. National average was 98.2 per cent, compared to 99.5 per cent at beginning of 1955.

Commissioner Norman P. Mason also released figures showing that quotations were at a par generally in Northeastern states; 98.6 per cent in Middle Atlantic states; 97.6 per cent in the Southeast; 98.3 per cent in North Central states; 97.7 per cent in the Southwest; and 97.9 per cent in the West. He emphasized the quotations are the generally recognized local market and not based on FHA records of actual transactions.

Debt rate up sharply

Outstanding debt on one-to-four-family, non-farm houses rose to a record annual rate of about \$13 billion during 1955's first three quarters, according to the Federal Reserve Board. This compared with \$9.5 billion in the first three quarters of 1954 and \$7.5 billion in the like 1953 period.

Introducing . . .

Decorator

by

National Lock

DECORATOR . . . for the homeowner who wants the very latest in modern cabinet hardware. This distinctive new line by National Lock includes Knobs, Pulls, Backplates in concave and taper designs. Inset hinges for $\frac{3}{4}$ " flush or $\frac{3}{8}$ " offset doors. Wait'll you see it! This magnificent L & H Classic... the newest addition to the famous L & H line of "Custom-Bilt" Electric Ranges. 6500 cubic inches of **usable** oven space. It's fully automatic, satiny-smooth in gleaming stainless steel and just the ticket to send sales soaring! It's designed for America's growing families—no cramped quarters here—this Classic is **high** (full 18"), **wide** (full 18"), deep (19 $\frac{7}{8}$ "), and **handsome** as a stack of shining, new silver dollars. Fits into standard 24" cabinet. Take a look at this new Classic... you'll get a totally new two-way concept; what a built-in oven should be... and the profits you can build by featuring this magnificent built-in oven. There's a lot more than beauty—check these features: perfectly balanced air-cooled door, recessed infra-red smokeless broiler, space-saver baking element, Dual-Range Electric Timer, slanted control panel, heat deflecting hood... but why go on—see it for yourself! Your L & H distributor will provide you with literature and further information.

SEWERAGE PROBLEM . . .

(Continued from page 264)

ment in recent sewage disposal plants is the need to locate the buildings quite close to the homes served. The odor-producing buildings must be closed in, as at the plant at Myrtle Grove, Fla., and the Golden Gate Motel-Hotel north of Miami Beach. The former development started with a temporary installation for the first 80 homes, with plans to expand facilities by 300-home steps. At first 1200 homes were the expected limit cited to the bidder, but then another development was brought in on the deal.

The Motel-Hotel, one of the largest in the U. S., has facilities for 1240 persons in a limited space.

Some practical guidance

Sage advice on the technique of setting up a water or sewage utility is offered by Robert I. Moss as a result of his experience with his small privately owned water company in Ewing Township, Mercer County, N. J. In his talk at the N. J. HBA annual meeting he pointed out that state agencies were very cooperative, but "intend that the utility facilities be created as a permanent community facility and not as a temporary expedient for the development of real estate." Moss reminded his hearers of the importance of starting processing early and to keep careful records, so that apportionment of costs between building company and utility can be explained to Public Utility Commissioners. His detailed recommendations follow:

Procedure for starting a water supply company

Four Government bodies have to be negotiated with:

- 1) The local government body gives
 - a) permission to incorporate
 - b) franchise to use streets.
- 2) State Water Policy Commission gives
 - a) permission to drive wells or tap streams
 - b) permission to divert and use a specific quantity of water.
- 3) State Board of Health gives
 - a) approval of water supply
 - b) approval of plans and specifications for water supply and equipment.
- 4) Board of Public Utility Commissioners gives
 - a) approval of franchise to use streets

ACCESSWAY: Provides easy access under houses with no basements. Square Type. The right angle corners let doors swing wide open.

- (Continued from page 310)
- b) supervision and approval of water company financing
 - c) supervision and approval of rates
 - d) supervision of rules and regulations of water utility
 - e) supervision and controls of water utility system of accounts
 - f) general supervision of all utility business.

The specific steps are:

- 1) secure a competent attorney and engineer and with them;
- 2) from the local government body get permission to incorporate;
- 3) from the local government body get franchise to use streets;
- 4) from the Board of Public Utility Commissioners get approval of franchise to use streets; from the State Water Policy Commission get permission to drive your well or tap your stream; from the State Water Policy Commission also get permission to divert and use the specific quantity of water you will require as determined by the engineer; also from the State Board of Health get approval of your water supply and approval of plans and specifications for the water supply and equipment.

All the items listed as step #4 should be done simultaneously because each department requires the previous approval of the other departments.

This apparent impossibility is solved by cooperation between departments.

- 5) At any time after the Board of Public Utilities Commissioners have approved the above mentioned franchise to use the streets, you request from the Board of Public Utilities Commissioners approval of the water company financing.
- 6) You request of the Board of Public Utilities Commissioners approval of your water rates. If when you file the water rates with the Board of Public Utilities Commissioners there is no objection made, you are in business provided construction is completed and all the previously referred approvals have been obtained.

This has been the third in American Builder's series on Community Facilities. Future issues will contain further material on this subject.

The Month Ahead

TRAVEL FOR PROFIT

If you're planning a late-January and early-February vacation, why not include a tour of some of America's outstanding home projects. NAHB headquarters can help you route your trip. And American Builder can also give you leads.

MORE POWER TO YOU

As you can see in this issue, or at the Chicago NAHB show, 1956 will see striking progress in new tools, power equipment, machinery for speeding up construction. February is a good month to overhaul and tune up what you have and to place orders for new items that you will want on hand for an early Spring start.

HOW'S YOUR OHI?

When the government kicks off Operation Home Improvement this month, better take a look at your own office or displays. Do they indicate that you house your own business in the way you expect your customers to house themselves? Appraise what you have and if it doesn't look top-notch, start your own OHI in February.

NEW BUSINESS

Speaking of OHI, you may not know that many consumer shelter-magazines are tying-in to the campaign in a big way. House Beautiful, for example, will devote its entire February issue to modernization. So be prepared next month for many inquiries from new customers.

Better business ahead

We told you early in December that the government would ease up on credit when it began to look like starts next year would drop to less than 1.25 million. We said that the first sign would be a return to the 30-year maximum repayment period on home loans backed by FHA and VA. Between the press date of our January issue and the time you read this paragraph, that "first sign" may have occurred: if it has not, look for it very soon, certainly by next month. We do not think that the new down payment requirements, imposed July 30, will be eased at the same time; we think that will come later, when election year politics go into high gear. In the meantime, our advice for February: be ready for increased demand from those customers whose monthly incomes would not stretch far enough to cover the higher monthly payments of the 25-year repayment term.

Deadline

February should be your absolute deadline for anticipating your needs for materials that may be in short supply next year; you should begin to get commitments on them next month. That's because, if the money market turns soft (as we think it will) and Operation Home Improvement gets off to a flying start (as we think it will), shortages will be even more acute than you had feared.

Do your share

Title I is due to expire next September. Join the strong move that will start next month to push legislation for a permanent Title I. Do this by writing to your congressman. Make it short, but make it clear why you think a permanent Title I would be a good thing. Follow up your letter every month thereafter with a postcard.

Walls Formica Grey Milano No. 2-EM-1
 Vanity Top Pink Milano No. 4-EM-1
 Vanity Base, Brachen Maple No. 37-GP-44

Your prospects will be asking for
the new luxury look of Formica Milano

When this bathroom is shown to millions of prospective new home owners, Formica pattern, Milano, will be on its way.

Milano will appear in full color ads in bathrooms and kitchens in many national magazines in the coming months. You'll want to know about it first.

Produced by Formica's exclusive Kaleidoscopic process the beautiful design never repeats itself but gives millions of different subtle color shadings in an ever-changing pattern.

Milano will be introduced to the builders and to the press at the Chicago N.A.H.B. show at the Conrad Hilton Hotel. Be sure and visit us at space 170-171 and see this newest pattern and more than 70 other colors of the world's most famous laminated plastic.

Because their customers know and trust the Formica brand name, builders the country over use it to help create profitable sales.

SLIDING DOOR HARDWARE

It's Different

SERVES EVERY THICKNESS OF DOOR... EASY TO INSTALL!

The interior sliding door has won popular acclaim for its convenience and space saving features. Each door glides into its own recessed pocket instead of swinging out into the room like the conventional hinged variety of door.

Hangers are made in two popular styles, the No. 185 2-wheel, adjustable type, and the No. 182 single-wheel design. Large Nylon wheels $1\frac{3}{8}$ inches in diameter carry the door load with ease, and require fewer revolutions in operation. Never need lubrication.

Track is 16-gauge Steel, Hot Galvanized and is furnished in 44, 56, 60 and 68 inch lengths. Track fits every door thickness.
