Building services

All the expertise at a glance: Only at Light+Building.

Its unique interaction concept makes Light+Building the world's most important event for intelligent building technology. And after its successful debut in 2000, it has become even more comprehensive in scope. On an area of some 119,000 square metres, more than 2,000 exhibitors from all over the world are looking forward to your visit. Discover groundbreaking innovations, establish valuable new contacts. Also taking place will be the Building Performance Congress and an extensive programme of accompanying events. In short: all you need to know for your future success. You will be welcome at Light+Building 2002!

At *Architectural Lighting*, we began a tradition in 1998 of ending each year with our Lighting Source Directory so that you could begin each new year with the most up-to-date and comprehensive guide to the manufacturers of the products you specify. On the following pages, you will find about 1,300 listings and the types of lamps, fixtures, components and such each company has to offer. It is our hope that you will use this handy resource to locate a favorite manufacturer, rediscover one with which you may have lost contact or introduce your firm to a contact you first spot here. However you use it, we anticipate it will be an essential item on your bookshelf!

Speaking of tradition, as *Architectural Lighting* plans for the coming year, I'd like to turn your focus to another "annual issue," which we debuted in 2001 and are looking forward to publishing again in March 2002: The *Architectural Lighting* Hall of Fame. And you are significant to its success, as the candidates are reader-nominated. We've heard from many of you throughout the year through letters and email, suggesting those lighting designers, educators, industry members—both living and deceased—that you believe should qualify for this honor. Last year, the inaugural inductees—Howard Brandston, Lesley Wheel, William Lam, Motoko Ishii, Sonny Sonnenfeld, David DiLaura, Abe Feder, Edison Price and James Nuckolls—were an esteemed group of people who not only helped to establish the lighting industry but who continue to shape it. Please take a moment to fill out the form below and drop it in the mail. Or, if you're the type who'd much rather hit a "send" button, email your nominations to me at ctrauthwein@vpubusinesspublicationsusa.com (yes, it's a new address; yes, it's a mouthful!).

From all of us at *Architectural Lighting*, here's to a new year filled with happiness, prosperity, good health and, most of all, peace ...

Christina Trauthwein,
Editor-in-Chief

Your Opinion Does Matter!
Cast your vote for the 2002 *Architectural Lighting*

Hall of Fame

Please fill out the following, and mail to: Christina Trauthwein, *Architectural Lighting* Magazine, 770 Broadway, New York, NY 10003.

I would like to nominate the following to be inducted into the *Architectural Lighting* Hall of Fame:

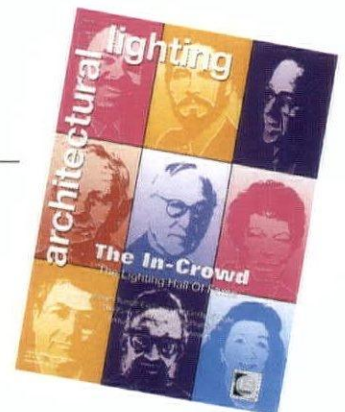

For "Living Legend": _____

___ Lighting Designer ___ Educator ___ Industry Professional

For "Remembering..." (posthumous): _____

___ Lighting Designer ___ Educator ___ Industry Professional

Because:

"I should've bought Aromat ballasts!"

Saving a few cents on unproven ballasts isn't worth the headaches later on. Only **NAiS** brand Metal Halide Electronic Ballasts from Aromat have a **long history of "hyper-reliability"**. NAiS brand MHEB's have successfully operated lamps through many, many lamp life cycles. Other MHEB's have never even been through one entire lamp life cycle.

And remember, lamp company "approvals" only evaluate ballasts for short-term *lamp performance*, they do NOT guarantee the quality and reliability of the ballast itself. Only Aromat can claim a staggeringly **low 0.0063% failure rate** for our 550,000 units already installed all over North America.

Over **95% of North American OEMs specify Aromat as their sole supplier** for MHEB's and so should you. Having already developed MHEB's in all shapes and sizes for all types of fixtures, lamps, and input voltages, Aromat is the undisputed leader in the MHEB market. And Aromat backs up our products with **superior application engineering support and customer service**.

So don't risk your next project on just any ballast. Specify **NAiS** brand Metal Halide Electronic Ballasts from Aromat... **"The Ones That Work."**

NightLife®
Landscape Lighting

Introducing the Latest Lighting Idea to Hatch at HADCO

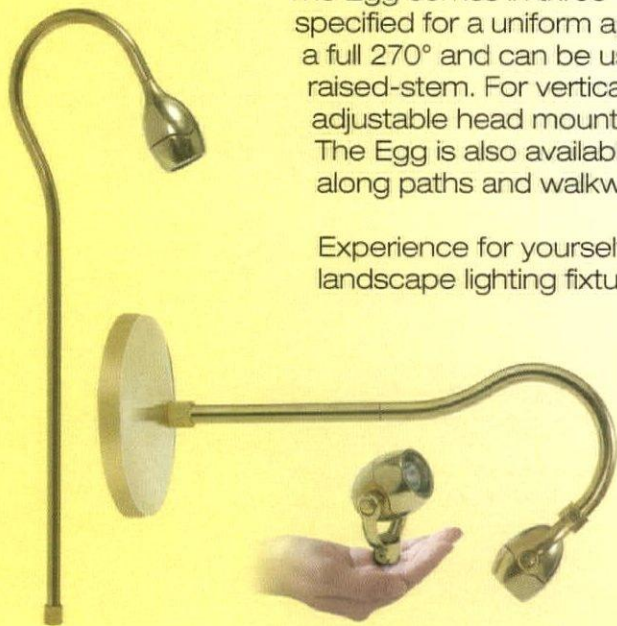

The beauty of solid brass comes alive with the introduction of HADCO's newest original landscape fixture series—The Egg. Small enough to fit into the palm or your hand, The Egg is a departure from traditional landscape lighting fixtures because of its miniature size and indestructible die-cast brass construction. It produces a brilliant flood lighting pattern suitable for illuminating gardens, architectural features and signage using a low voltage 20-watt MR-8 lamp.

The Egg comes in three distinct mounting styles that can be specified for a uniform appearance. The swivel-head bullet adjusts a full 270° and can be used for ground-level mounting or on a raised-stem. For vertical surfaces, a brass bracket model with adjustable head mounts quickly to walls for signs and displays. The Egg is also available as a stake-mounted fixture for lighting along paths and walkways.

Experience for yourself the quality that is built into every NightLife landscape lighting fixture.

From breathtaking illuminated sculptures of glass and metal to small mood-lighting fixtures, table and floor lamps. Illumination Lighting has manufactured custom lighting fixtures for many distinct and unique projects. We combine competitive modern manufacturing with creative design capabilities to approach lighting as functional art in architecture. Our portfolio of installed lighting fixtures supports our claim as being amongst the leading makers of site-specific lighting.

A Tradition of Innovation Continues...

Ciros fixture with clear coat finish. Hollywood Stock Exchange, Los Angeles, CA
Interior Architect: Gabor Studios Architecture Design, LLC Photographer: Mark Dell Aquila

Litecontrol is a recognized leader in the development of high-design architectural fluorescent lighting systems. We understand the need for high quality fixtures to satisfy a broad range of design and budgetary requirements.

That's why only Litecontrol can offer three "Value" tiers (Good-Better-Best) for many fixture types. Just the right combination of price and performance to meet your needs. Select the distribution you want and see what we can offer.

From sophisticated to simple; from integrated design to quick-shipment; from design-driven to cost-driven. Count on Litecontrol for the choices you demand....

seeTouch™ Wallstations with Backlit Engraving

GRAFIK

The Reviews A

"Lutron's elegant seeTouch allow me to create the lighting for my restaurant. The simplicity makes it easy on my staff to use."

**Daniel Boulud, Chef/
Restaurant Daniel (★★★)
Café Boulud,
db bistro moderne**

"SeeTouch is perfectly simple. It requires no training. Just a touch, and the perfect lighting are recalled. Plus with the capability, our users will have from anywhere in the ballroom."

**Dan Wilcox
Audio-Visual Manager
Wyndham Orlando Resort**

"SeeTouch makes complex lighting configurations simple to use. A professor can enter any lecture and have intuitive mastery of the lighting."

**Glenna Falk
Manager, Multimedia Classroom
NC State University**

LSD Light Shaping Diffusers are holographically recorded, randomized surface-relief structures that enable high-transmission efficiency (up to 92 percent) and controlled angular distribution while providing high-quality homogenized light. They work very well for many optical applications such as automotive, laser, fiber-optic, LED, filament illumination, machine vision and displays.

PowerClone Emergency Power and Lighting Systems will soon become the new standard by which all emergency power and lighting equipment is measured.

APC and RedGate Technologies have combined strengths to address the need for more flexible and efficient emergency lighting by introducing PowerClone. As a leader in the power protection industry, APC and RedGate provide their customers superior products that address real customer needs. Emergency lighting is an essential part of the building infrastructure. Without adequate backup protection from a trusted source, people could literally be left in the dark resulting in a potentially dangerous situation. Although city, state and national life safety codes require sufficient emergency lighting and regular testing of this equipment, most electrical engineers asked agree that if tested today, probably 75% would fail to pass code requirements. This represents a real problem in today's facilities. PowerClones are preconfigured to perform a self-test every 14 days, ensuring customers the emergency lighting environment is safe all the time ...particularly before an actual emergency occurs.

PowerClone Emergency Power and Lighting Systems provide

FULL LIGHT output from every lamp or fixture. Models provide from **650W to 3750W** of output in 120Vac or 277Vac. **Line-interactive design is approximately 98% efficient.** PowerClone is **compatible with all lamp types, including H.I.D.;** standard or electronic ballasts. **RedGate's patented ECI modules** allow lamps to utilize dimming devices, sensors and most controls, and work with switched fixtures or circuits.

PowerClone's modular design has a small footprint, allows for easy installation and requires NO special startup. All PowerClone products are **UL924, UL1449 and UL1778 listed.**

The superior dependability of APC and PowerClone can now provide commercial/industrial/institutional facilities the safest, most secure and productive UL924 power management. PowerClone provides emergency power and lighting solutions that redefine SAFETY and SECURITY and KEEP YOU GOING in your business or workplace environment.

company profile

Zumtobel Staff Lighting, Inc.

A global company with U.S. manufacturing facilities in Highland, NY and Garfield, NJ, Zumtobel Staff Lighting is the only indoor lighting company that can offer you a complete line of downlighting, track and linear fluorescent systems with European design, produced in North America. We are able to offer you the product breadth of a major domestic lighting supplier and the quality you'd expect from a European company.

Zumtobel Staff offers you single-source specification on national and international projects. Our North American production facilities allow us to deliver the highest quality lighting with the fast turn-around required by today's market conditions at a competitive price.

Our products, designed by top European and American designers, consistently represent an advancement of the state of the art of lighting. They have been specified by leading architects, lighting designers, interior designers and engineers for some of North America's most prestigious projects, including AT&T, IBM, MCI/Worldcom, Nike, Saks Fifth Avenue, the Guggenheim Museum and the Getty Center.

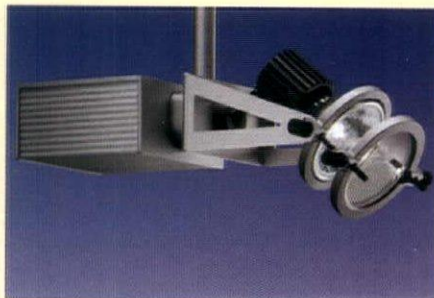

Zumtobel Staff products are chosen for aesthetics, performance and because they supply a superior lighting solution. For example:

Orea—Orea is a direct/indirect luminaire, featuring new SLC "waveguide" technology that results in a minimal profile and light-weight appearance. Orea's patented microprism structure (offered exclusively in North America by Zumtobel Staff Lighting) directs light downward for optimum lighting wherever it is positioned. This makes it ideal for display terminals tilted at extreme angles as well as flat-screen displays. Orea utilizes energy-saving T5 or T5/HO lamps. Now available—Orea for continuous run!

Copa—Copa pendant-mounted luminaires marry decorative design with an industrial aesthetic. Copa features a die-cast ballast enclosure, a faceted reflector (choice of polycarbonate or aluminum) and a choice of CFL triple-tube, metal halide or long-life QL lamps. Copa offers high-profile, high-efficiency performance in any space with open or high ceilings. Copa is ideal for retail, high-tech open-office or industrial environments.

Spirit—Spirit is a diverse family of track fixtures, each with a distinctive, contemporary form, die-cast components and a variety of finishes, lamps and accessories. Lamp options include MR16, PAR30, 42W triple-tube and T6 MasterColor. Spirit is ideal for accenting displays and merchandise and provides a fresh, contemporary design element.

To see this year's innovative lighting solutions, ask us for a copy of Innovations 2001 today. For more information, email us at zsl@zumtobelstaff.com, call us at (800) 932-0633 or visit our website at www.zumtobelstaffusa.com.

Bruck Lighting Systems

The perfect synonym for the perfect synthesis of atmosphere and functionality in lighting technology.

Bruck is internationally recognized as a leader in the development of innovative lighting systems with particular emphasis in the application of low-voltage, halogen light sources. The pioneer of a new approach to design, Bruck places three-dimensional technology at the forefront. Since the beginning, Bruck has been a developer and promoter of new standards in aesthetics, product quality and safety.

Bruck Lighting offers a high diversity of product styles developed from the needs and imagination of our customers and our designers. The range of styles facilitates discreet highlighting within an architectural frame, as well as vibrant illumination of a room or interior space. Following are some of the more popular Bruck systems:

Flex-Line—a unique track that flexes (not bends) to allow for curved or linear installation. Can be installed vertically, horizontally or on a sloped ceiling. Lightweight and easy to install.

V/A—a low-profile track system constructed of two hollow copper tubes, which can change direction and elevation in straight or pre-curved sections.

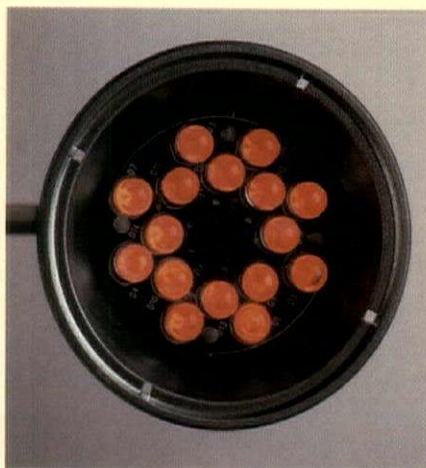

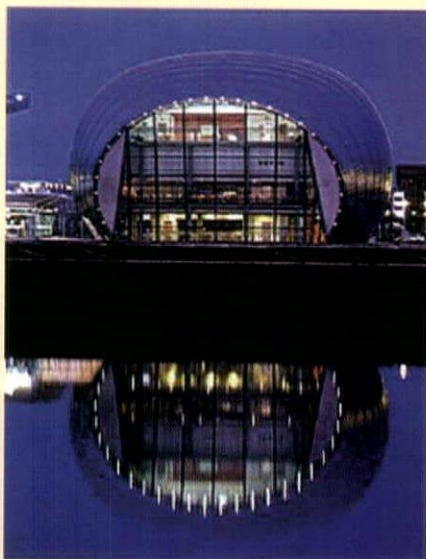

High-Line—a lighting system of two copper stranded cables, which are braced parallel to each other. This system can be spanned from wall to wall, wall to ceiling or ceiling to ceiling.

BOA—introduced in 2000, a 12V, low-profile, two-circuit track system with dual switching ability that allows utilization of up to 600W of power.

In addition to providing the above German-manufactured products, Bruck U.S. manufactures the Orion M Series utilizing an MR16 housing or Edison-based lamps with LEDs. By incorporating LED technology into our lighting systems, we offer a light source with UV emission and minimal heat to help provide worry-free lighting for your next application. The Orion M Series has up to 10,000 hours of lamp life.

We have over 35 employees at Bruck Lighting Systems in Southern California and over 100 at our headquarters in Germany. Our staff takes pride in our customer service, our professionalism, our quick delivery and the quality of our product.

Competence and know-how, technical and artistic innovations, aesthetics with the highest functionality. For more information, please contact us directly by phone at (714) 424-0500 or visit our website at www.brucklighting.com.

company profile

Wila Lighting, LLC

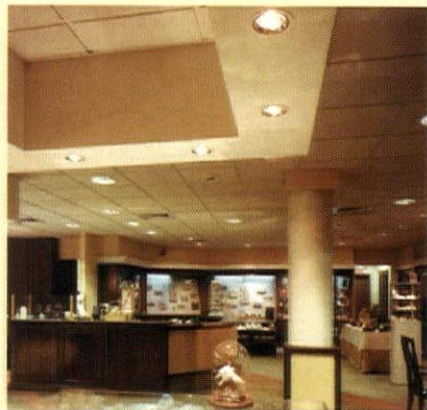

Our Philosophy—Wila is known for its leading position in developing innovative products and aims to contribute to constant improvement in the lighting of industrial and commercial interiors by means of ongoing product development. Wila's commitment to the evolution of lighting systems is reflected by continuous efforts to further improve its range of innovative luminaires. Guided first and foremost by the visual needs of those who use our lighting systems, we insist upon extremely high safety standards, while ensuring the ultimate in convenient installation and visual comfort.

Compact Fluorescent. The high lumen packages and excellent luminous efficiency makes this light source particularly suitable for offices and passageways in administration buildings as well as hotels and restaurants. Wila downlights are mostly equipped with compact fluorescent lamps based on the amalgam and mercury technique.

Low Voltage. Bright light and good focused light—directing properties provide ambience—for meeting rooms, entrance areas, foyers, sales rooms, hotels and restaurants. Using low-voltage lamps, the visible diameter of the luminaire can be reduced even further while increasing the luminaire output. Additionally, low-voltage lamps generate brilliant light for fresh colors and attractive effects.

High Intensity Discharge. With its bright light and high lumen package, this lamp can be used almost anywhere. In relation to volume, these lamps emit the most light and have all the benefits of point light sources. The halogen provides high luminous efficiency with excellent color rendition.

Functional and Decorative Design. With its concepts of adaptable LiteOptics and Louvers, Wila gives architects and planners the freedom to suit Wila downlights to the individual room situation by adapting the corresponding LiteOptics.

Lighting Services Inc

Lighting Services Inc (LSI) is the leading specialty manufacturer of track, accent, display and fiber-optic lighting systems. Since 1958, LSI has been dedicated to designing, engineering and manufacturing lighting fixtures of the highest quality. Our reputation for creativity and innovative design, coupled with specification-grade products and intelligent personalized service, has made us the manufacturer of choice amongst the most discriminating specifiers of lighting.

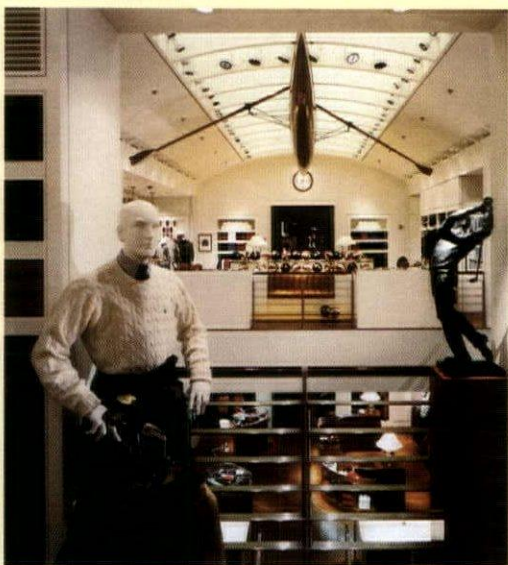

Log onto Lighting Services Inc's new website: **www.LightingServicesInc.com** to access Quick-Time virtual reality viewing of the latest products as well as information on all LSI products, downloads, designers, representatives, installations and industry resources.

The following environments have been enhanced by Lighting Services Inc products:

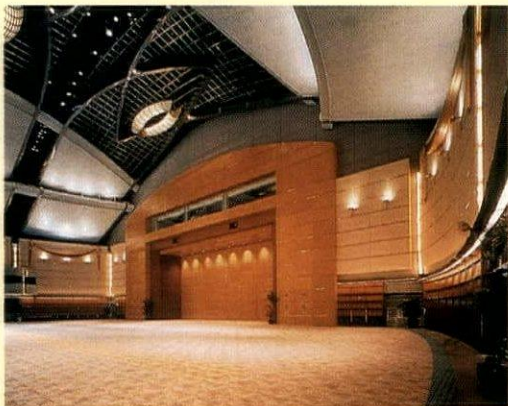

- Casinos
- Corporate Facilities
- Display Windows
- Entertainment Venues
- Health Facilities
- Hotels/Hospitality Spaces
- Houses of Worship
- Mass Transit Facilities
- Museums/Galleries/Visitor Centers
- Office Buildings
- Public Spaces

company profile

B-K Lighting

B-K Lighting, Inc. is a leading manufacturer of precision-crafted architectural and landscape lighting fixtures and accessories. The company's fixture selection is among the broadest in the industry and is most often the product of choice in high visibility installations. In recent years, B-K Lighting products have been featured in such prominent venues as The Seattle Opera House, Four Seasons Hotels, Disney World and Wild Animal Kingdom in Orlando, San Francisco's Embarcadero and Bellagio in Las Vegas, not to mention scores of residential lighting for some of the world's most well known figures and celebrities.

Machined or cast from solid sources such as low copper content aluminum, brass or stainless steel, the components of B-K Lighting products work together as a system to seal out dirt and moisture. All of its products are hermetically sealed, ensuring years of reliable operation unequalled in the lighting industry.

In 2001, B-K Lighting introduced the Precision², a stunning new series of in-grade lighting products. Innovative design combines both rugged construction and architectural elegance. The diminutive fixture size is among the smallest in the industry, and utilizes a wide variety of lamp sources, including low-voltage, halogen, fluorescent and HID lamps. Below one of four highly machined faceplate choices, an exclusive Hydro-Lock component eliminates water intrusion into the optical compartment, the number one cause of component failure in an in-grade product. In addition to the modular construction of all internal components, a unique Opti-Lock device ensures lamp orientation, even after years of operation and maintenance.

Convenience features of the Precision² Series also include:

- Modular components for fast installation and service
- Four different faceplates to fit virtually any application
- Captive stainless-steel hardware
- All faceplates are drive-over rated

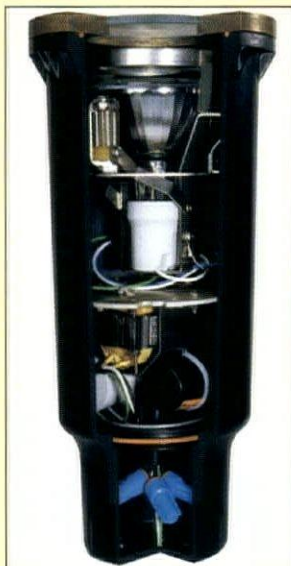

For more information about Precision² In-Grade and other B-K Lighting products, visit us online at www.bklighting.com or call (559) 438-5800.

Architectural Area Lighting

Architectural Area Lighting (AAL), a leading manufacturer of specification-grade outdoor lighting for over 35 years, designs lighting products to complement the interior, exterior and landscape design of a site.

AAL is continually expanding its architectural lighting product offering for the educational, residential, commercial and industrial markets. Categories include:

- Period-style fixtures
- Contemporary-style fixtures
- Floodlights
- Steplights
- Wall sconces
- Bollards
- Poles & arms

Headquartered in La Mirada, CA, Architectural Area Lighting manufactures both AAL products and Moldcast brand exterior lighting fixtures in its 90,000-sq.-ft. facility. AAL fixtures are all rated for outdoor use but are approved and used for numerous interior applications as well.

Aesthetic design and optical system performance are integral to AAL's commitment to provide customers with the highest standards of design and functionality. Many product series are scaled in multiple sizes and employ different materials to expand the specifier's choice in complementing architectural details and to provide creative lighting solutions throughout a site. AAL allows you to specify your lamp choice with fixtures designed to accommodate lamps ranging from compact fluorescent to the high-rendering T6 ceramic metal halide lamp.

company profile

Se'lux U.S.

Since 1983, Se'lux U.S. has made its home in the Hudson Valley Region of New York State. Here we manufacture and distribute interior and exterior lighting fixtures for projects throughout North America. Like many of the Semperlux AG subsidiaries, Se'lux U.S. is an independent profit center with local management accountable for all U.S. operations. This management approach allows us the independence to focus on the unique demands of our specific markets with a competitive entrepreneurial spirit. While we work closely with our international colleagues, products are selected, engineered and manufactured to meet the demands of North American lighting and building requirements. Our market philosophy enables architectural designers to select from a catalog of standards as well as work with our team of local engineers and lighting application professionals to establish their own unique design solution. Se'lux is the place to find original designs, manufactured from quality materials, produced at a competitive price.

Light creates identity

Every fixture in our system is a carefully considered synthesis of form and function that puts human and architectural requirements first without sacrificing the demands of technology.

- PSINet National Headquarters (top) selected **Ritorno** to illuminate the landscaped areas and pathways leading to the entrances of the facility. Illumination criteria dictated the use of high-performance metal halide lamps, yet the fixture had to be capable of delivering uniform, controlled brightness so as not to be visually disturbing for the occupants and security cameras. The glare-free indirect lighting solution of the Se'lux Ritorno provided the perfect blend of design and performance engineering.

- **Saturn 2** offered the design team of Lenox Square Mall (center) in Atlanta the stylish architectural statement, subtle photometrics and custom finish to match existing utilities. Once the designers and mall management reviewed the mock-up, they were convinced Saturn 2 would be as easy to maintain as it was good-looking.

- **M100** offered Berlin's Holocaust Museum (bottom) limitless opportunities to apply this versatile system. The compact architectural scale for recessed, semi-recessed, surface or suspended applications was developed with a dedicated systems approach for total design freedom and specification flexibility.

Please be sure to visit our website at www.selux.com/usa for complete product and project information.

company profile

Bartco Lighting

Through the years, Bartco Lighting, Inc., a manufacturer of high-quality fluorescent and incandescent lighting fixtures for architectural and display applications, has become a symbol for quality, customer service and dependability. Bartco's fixtures, used for retail, commercial, institutional and residential installations, have established a loyal following among lighting designers, retail store planners and architects due to their reliability and innovative style. Customers have come to know Bartco's dependable service and quality products as the rule, rather than the exception.

Focusing on various types of lighting needs, Bartco's fixtures have become a functional asset to hundreds of different lighting situations, in everything from showcase fixtures to hotels.

Bartco Lighting specializes in a variety of low-profile, linear fixtures with an emphasis on T5 miniature fluorescent, offering architectural and showcase fixtures with the smallest profiles available. Bartco's large variety of lighting fixtures contains the most extensive product line of T5 fixtures, both remote and integral ballast models, in the lighting industry.

Additionally, Bartco Lighting provides custom-designed products and systems to meet the customer's evolving needs. Some of these include fixtures for high-output fluorescent, HID, fiber-optic and LED sources. Bartco has also developed original design concepts, including the Slide by Side Adjustable Stagger Fixture and Lightfair 2000 Blue Ribbon winners, the Diamond Light and the Adjusta Lock Track Fixture.

Bartco Lighting's experienced staff welcomes the opportunity to assist customers with their lighting projects—everyone at Bartco understands the importance of quick lead times and exceptional customer service.

Bartco Lighting's fixtures have become key elements in lighting that makes a difference, a statement and an impact.

Customer-driven, customer-oriented Bartco Lighting—leading the way and lighting it.

Ushio America, Inc.

Ushio is an international manufacturer of specialty HID and halogen light sources for a variety of general illumination applications, including landscape, architectural and fiber-optic designs. Ushio offers a complete line of quartz halogen and discharge lamps for exterior, interior and display lighting including: standard and specialty MR11 and MR16 reflector lamps; compact single- and double-ended metal halide; UV-protected and long-life MR16 lamps and explosion-proof metal halide.

Ushio's series of **Ultraline** MR16 reflector lamps are rated at 10,000 hours of useful lamp life, which is twice the lamp life of any other MR16 on the market today. Our Ultraline series is available in 35W and 50W versions with wide, medium and spot beam spreads. This series contributes to Ushio's largest variety of specialty reflector lamps in the market today. For this reason, Ushio is the preferred choice for light sources among progressive lighting designers.

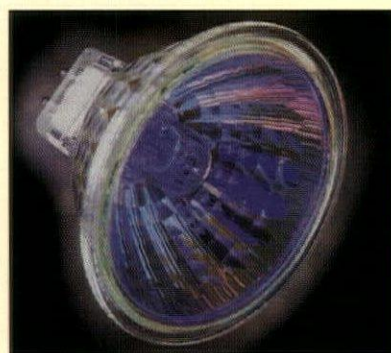

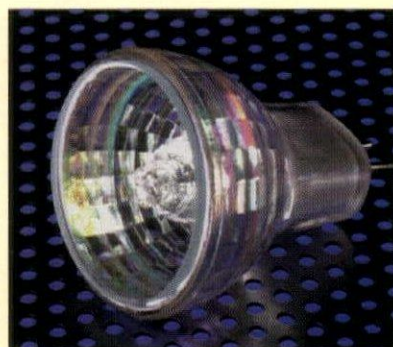

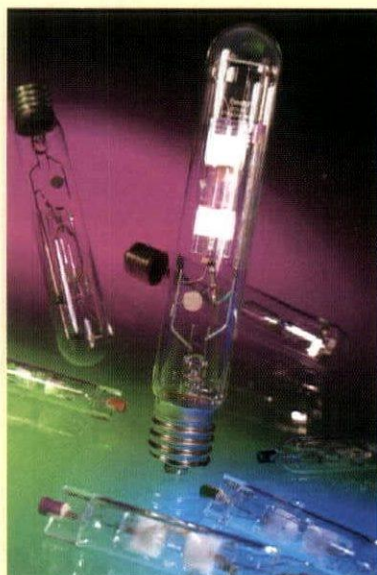

The special quartz burner on the Ultraline lamps eliminates 90 percent of the UV emissions that tend to fade and discolor sensitive objects. Another unique attribute of the Ultraline series is the titanium oxide coating on the lamp reflector. While the dichroic reflector coatings of generic MR16s tend to degrade with lamp life, leading to color shift and light loss problems, the titanium oxide coating on the Ultraline eliminates this problem and provides consistent color throughout the life of the lamp.

Ushio's new UHI **Colorlight** series of colored compact metal halide lamps produces saturated colors of green, blue, magenta and orange without the use of colored lenses or gels. Ushio's Colorlight series is available in double-ended, recessed single-contact-based 150W versions. Lighting applications include amusement parks, open-air theatres, museums, galleries, stage effects, building accents and garden lighting.

Ushio's **Whitestar** is the newest 4200K high-color-temperature lamp added to our series of specialty MR16 lamps. Balanced for light in the visible spectrum range between 480nm and 630nm, the Whitestar lamp also reduces emissions in the UV range. The Whitestar provides a better alternative to other "full-spectrum" MR16s. The Whitestar is available in a 12V 50W version with a 12-, 24- or 36-degree beam spread. The Whitestar features a luminous intensity of 1200cd and a useful lifetime of 4,000 hours. Applications include highlighting jewelry, illuminating artwork and color matching.

Ushio's **MR8** lamp is only 1 in. in diameter, allowing for an even smaller fixture design than competitive MR11 and MR16 lamps. Applications include decorative lighting, accent lighting, display lighting and low-voltage lighting. The MR8s are available in 20W and 35W in narrow and wide beam spreads.

For more information regarding Ushio general lighting products, please contact our Customer Service department at (800) 838-7446.

company profile

NoUVIR Research

NoUVIR Research has developed a unique patented fiber-optic technology with awesome performance along with a totally new and different way of doing business in lighting. Here is NoUVIR Research (and what lighting ought to be).

Light should be clean and bright, not loud.

We don't do:

- Bright pink sushi bars
- Purple dining pods
- Outside stuff visible from space

We do:

- Pure-white, stone-cold (zero infrared)
- Artifact safe (zero ultraviolet)
- Practical, fiber-optic end lighting

Lights should illuminate, not fixate.

We don't try to:

- Make bold statements
- Compete with what we light
- Become art

We do:

- Focus attention
- Bring out beauty
- Protect art and artifacts

Lighting should be a tool, not a problem.

We don't:

- Waste energy
- Scatter uncontrolled light
- Limit your creativity

We do give:

- Perfect aim
- Adjustable focus (5 to 50 degrees)
- Total control over intensity (no color change)

Lighting manufacturers should serve their customers, not make their customers serve them.

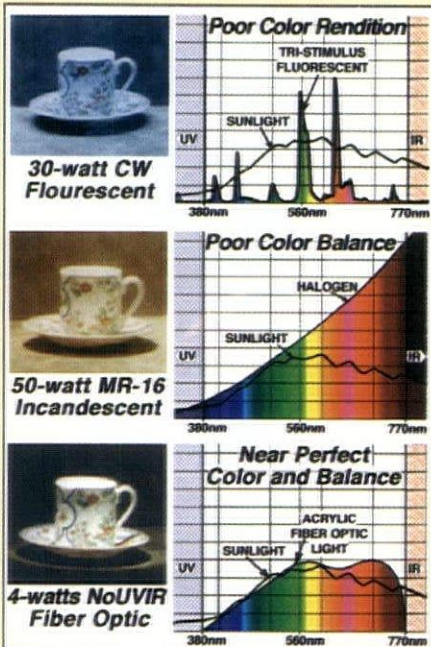

We don't:

- Change prices
- Overrun bids
- Force package deals

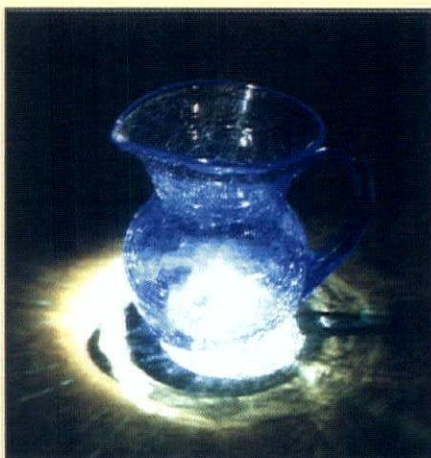

We do:

- Treat every customer alike
- Focus on your design needs
- Give lots of free help & fantastic service

*Check the photometry and read the warranty.
Nobody even comes close! No UV, No IR... NoUVIR.*

You can see the difference!

Aromat Corp.

Aromat introduces its new Slim Lite metal halide electronic ballasts. These streamlined ballasts allow manufacturers to build smaller, more aesthetically pleasing fixtures. Slim Lite ballasts come with all the features and benefits of Aromat's "standard" ballasts. Slim Lite ballasts are available for 39W and

70W applications. For more information, call Aromat at (888) 4AROMAT.

Circle No. 50

Boyd Lighting

Palos Verdes Pendant by Barbara Barry

Nested rings of hand-rolled, formed aluminum embrace the slender drum shade to create a classic balance of symmetry and form. Available in Cinnamon Bronze or Satin Aluminum finishes, with incandescent or fluorescent lamping. Also available as a ceiling fixture. For more information, visit www.boydlighting.com.

Circle No. 53

Artistic Licence

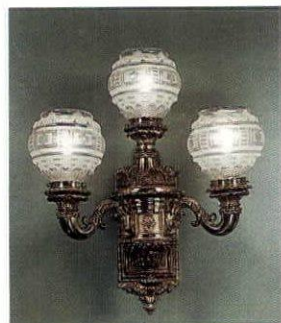

Down-Link the Ethernet Solution! Artistic Licence offers a range of products aimed at transmitting DMX512 over Ethernet. The PLASA Award-winning product Down-Link A fits a "three-gang" panel compatible with all standard U.S. conduit and surface-mount boxes. Down-Link A converts the Art-Net Ethernet standard into two universes of DMX512. See www.ArtisticLicence.com for details.

Circle No. 51

Crenshaw Lighting

Specialists in handmade custom lighting for new and historic buildings. Please feel free to call us at (540) 745-3900 and discuss how we can help you with your project. For general information, you can also visit our website at www.crenshawlighting.com.

Replication of historic sconce for Pennsylvania State Capitol

Circle No. 54

BJB Electric LP

BJB Electric LP introduces the G8.5 ceramic lampholder for the new miniaturized range of HID lamps as offered by Philips, GE and Osram Sylvania. Our G8.5 HID lampholder provides a secure, stable fit to the lamp, has pushwire lead terminations and is screw-mounted. Ceramic provides superior high-temperature durability; lead wires are permanent once inserted. (Trade names are the copyright of the respective companies.)

Circle No. 52

Derek Marshall Lighting

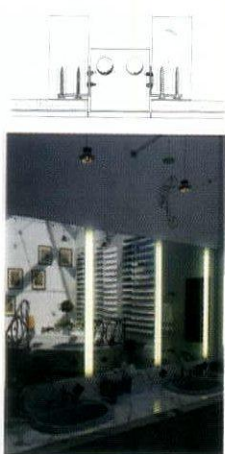

Dramatic and textural, the "Sensu" wall sconce combines aesthetic appeal with functionality. This unique sculptural sconce in the shape of a decorative fan is made from a high-tech ceramic. The "Sensu" can be finished in a variety of faux metal finishes. Shown in Antique Gold. Also available in a colorful palette of American art glass. Measures 16 in. wide and 12 in. high with a 4-in. extension. UL-approved, ADA-compliant. For a free catalog, phone (800) 497-3891. Visit us on the web at www.derekmarshall.com.

Circle No. 55

Dreamscape Lighting Mfg. Inc.

For the newest in vanity lighting, Dreamscape's Reflections, a recessed vanity fixture that is placed between sections of mirror. When the diffuser is installed, it becomes flat with the mirror. This dimmable fixture incorporates the newest in T5 fluorescent technology, a light source with high lumen output and excellent color rendition. Visit our website at www.dreamscapelighting.com or fax (310) 202-8536 to request literature.

Circle No. 56

Electronic Theatre Controls

The ETC Irideon AR500 Exterior Luminaire

Engineered for safety and durability in all climatic conditions, UL-listed for wet use, the high-output Irideon AR500 Exterior Luminaire by ETC takes outdoor floodlighting to new levels. The AR500's patented internal, dichroic color-changing mechanism produces smooth transitions from hue to hue. A set of five lenses offers the creative flexibility of a wide range of beam spreads—from 9 to 62 degrees.

Circle No. 59

Electrix

The new Aspekt by Electrix. Formed, brushed aluminum housing accommodates 13 dimmable 26W compact fluorescent or 100W incandescent lamps. The Aspekt is just one of the designs from a broad range of more than 30 new models being introduced. European-inspired designs created around the guiding principles of clean lines, timeless styling and construction integrity, the new products in this series can be designed into virtually any architectural project. For more information, contact Electrix, Inc. at 45 Spring Street, New Haven, CT 06519; phone (203) 776-5577, fax (203) 624-7545 or visit www.electrix.com.

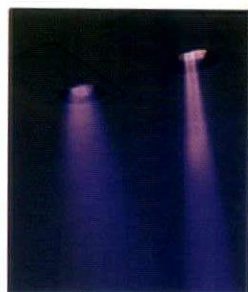

Circle No. 57

Electronic Theatre Controls

The ETC Irideon AR6 Interior Recessed Luminaire

The Irideon AR6 Interior Luminaire by ETC is the first—and only—fully automated recessed lighting luminaire anywhere. Born in response to a demand in architecture for more creative lighting effects, the AR6 brings dynamic color and pattern changing capability to interior design. And the beauty of the AR6 luminaire is that it blends unobtrusively into any setting, allowing the light—not the fixture—to become the real element of beauty.

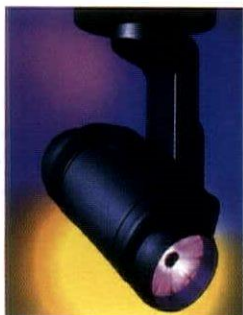

Circle No. 60

Electronic Theatre Controls

Irideon AR50 Interior Wash Luminaire by ETC

The Irideon AR50 Interior Wash Luminaire by ETC represents the next generation of specialized indoor floodlighting. The luminaire features a patented, computer-controlled, dichroic color-changing assembly, automated pan and tilt, and an optional diffuser or douser mechanism. The AR50 uses an innovative radial color-changer that has permanent dichroic filters to produce smooth color cross-fades throughout the entire color spectrum.

Circle No. 58

Electronic Theatre Controls

ETC Unison Dimming

ETC's Unison ER Series Control Racks provide Unison architectural control to distributed Unison, Sensor or other DMX512 dimming systems. As a stand-alone or in multi-processor network systems, the ER Series Rack offers elegant, low-profile surface mounting, integrated backlit control electronics and architectural lighting control flexibility.

Circle No. 61

Elite Bohemia/ BarDel International, LLC

We offer a full range of formal lighting for both residential and commercial needs with a price to fit every taste, decor and budget. Our traditional-style crystal lighting is produced in the Czech Republic using centuries-old techniques along with the world's finest trimmings from Swarovski. In addition, we offer custom sizes, designs and colors. For more information on our products, phone (877) 422-7335 or visit www.bardelintl.com.

Circle No. 62

Icon International

Icon's unique "Signature" series features the Aquarius family of suspended and wall-mounted indirect T5/HO luminaires. With a minimum 6-x-2-in. "soft-vee" profile, Aquarius luminaires come with two suspension points for sections of up to 24 ft. long. Source awareness is provided by Aquarius's distinctive double-Delta openings with a perforated metal and acrylic overlay. Four different end-cap options are available.

Circle No. 65

ExceLine

Taking a classic vaportight-style fixture and adapting it to suit today's modern style decor, ExceLine's Kaleidoshade Series offers both sleek styling with superior functional lighting. Traditional shades, contemporary looks and classical styles, this family of fixtures fits most any application. Various designer finishes are available for these pendant-mounted fixtures, as well as a variety of colored globes. All of these options make these fixtures easily suited to most decorative schemes. ExceLine's Kaleidoshade Series can be installed and mounted easily for both new and retrofit applications. For more information, phone (800) 334-2212.

Circle No. 63

LCD Lighting

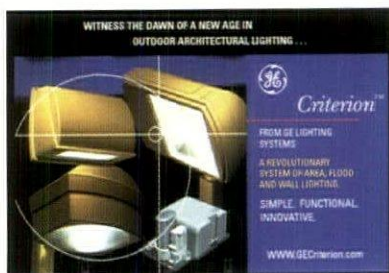

LCD Lighting, Inc. is a world-leading, ISO 9001-registered manufacturer of specialty fluorescent lamps. We offer T1 through T12 lamps in any length or shape, from straight to U, L and circular. LCDL can engineer lamps to perform under any range of environmental, electrical and dimming requirements. Our precision phosphor blending can meet virtually any chromatic requirement. Standard or custom connectors, wiring harnesses and other accessories are also available. For complete information, visit www.LCDL.com, phone (203) 795-1520, fax (203) 795-2874 or email ahudson@LCDL.com. LCD Lighting, Inc., 37 Robinson Blvd., Orange, CT 06477

Circle No. 66

GE Lighting Systems

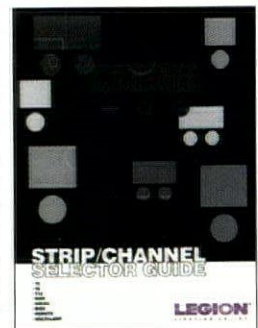

The Criterion Series is a total outdoor lighting solution offering the convenience and savings of interchangeable components, excellent optics and photometrics, as well as complete architectural styling for area, flood and wall lighting. Visit www.gecriterion.com.

Circle No. 64

Legion Lighting

Eve invented the Strip...Legion has been perfecting it since 1946 with one of the largest offerings available in one-, two-, three- and four-lamp combinations, staggered and straight in T5, T8, T12 and biax lamps. All units are fabricated from 20-gauge cold-rolled steel with welded ends and post-painted with a powder-coat finish. Mini and micro strips offer the specifier low-voltage design, using state-of-the-art ballasts that eliminate the need and cost associated with remote-mounted ballasts. Reflectors (solid and perforated) and wire guards are also available.

Circle No. 67

LexaLite International

LexaLite's latest light control innovation is unveiled—the new 22-in.-diameter Interface Reflexor. Ideal for retail applications, Interface Reflexor produces a soft, glowing appearance, hides fingerprints and blends with light ceilings. And it provides performance—with an efficiency of 92 percent and an S/MC of 1.9 to 1.

Circle No. 68

Lightech, Inc.

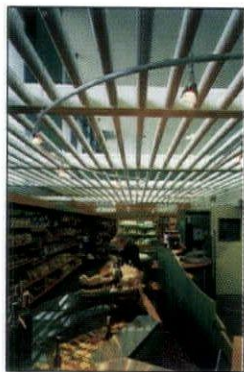

The latest LED technology in a handsome package. Your custom message in bright, sharp red or green LEDs with silk-screened faceplate. High-quality, 18-gauge aluminum enamel finish or stainless steel with natural satin finish. Super-slim housing measures just 1 1/2 in. deep. To find out more, call (949) 248-3125 or visit www.lightech.com and email your request.

Circle No. 71

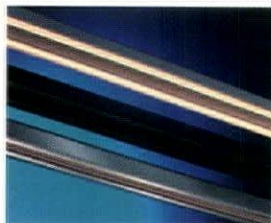

Light Waves Concept

Light Waves Concept has been in business since 1979, when they started as Thunder and Light. At that time, they were instrumental in introducing low-voltage, twin-cable lighting to the States. Since their reincarnation as Light Waves in 1996, they have continued to stay on top of their game, offering a great variety of low-voltage track and cable lighting options.

Circle No. 69

Nordic Aluminium

Nordic Aluminium is a manufacturer of specification-grade, one-circuit, two-circuit/two-neutral and three-circuit lighting track systems. The open architecture tracks accept fixtures from a wide number of high-quality manufacturers. Track is available in white, black and anodized aluminum finishes.

Custom colors and curved track are also available. Globally approved and UL-listed. To contact Nordic Aluminium, phone (770) 457-8795 or email jari.turkia@nordicaluminium.com.

Circle No. 72

Lightech Electronics North America, Inc.

Lightech offers a complete line of electronic transformers ranging from 60W to 300W with either AC or DC output featuring Lightech's patented technology. Lightech transformers are typically smaller, less expensive, higher temperature-rated and more reliable than competitive units. For more information, samples or a quotation, please visit our website at www.lightechinc.com or call us at (888) Lightech (544-4832).

Circle No. 70

NoUVIR Research

NoUVIR fiber-optic lighting made Henry the 8th look so good, people thought he was Henry the 2nd!

No UV, No IR...
NoUVIR!

- Stone-cold, pure-white light
- Perfect color balance
- Awesome control
- No scatter
- Adjustable beams (5° to 50°)
- Solid photometry

For information, call (302) 628-9933 or see www.nouvir.com

Circle No. 73

Osram Sylvania

Sylvania Xtreme system is the ultimate T8 choice for maximum energy efficiency and longest lamp life regardless of switching cycles. It provides a 19-percent reduction in power consumption and comparable light output and twice the lamp life of standard instant-start T8 systems. For more information, phone (800) LIGHTBULB or visit www.sylvania.com.

Circle No. 74

Phoenix Products Co.

The CSI64/1000 is a compact outdoor architectural high-lighting luminaire utilizing the CSI PAR64 1000W metal halide lamp. This lamp features a 6-degree beam spread and provides 1,350,000 CBCP. A side-mounted electronic ignitor eliminates heat problems. The CSI64/1000 is perfect for architectural applications where long-throw intensity and color dichroics are desired in a compact enclosure. UL Marine-listed for outstanding durability in harsh outdoor environments.

Circle No. 77

Pathway The Lighting Source

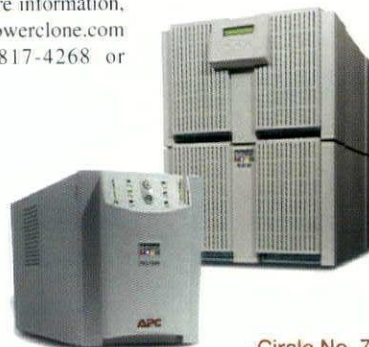

Pathway the Lighting Source offers a complete line of architectural and commercial lighting fixtures that include recessed downlights, wall washers, adjustable accent, surface cylinders, and emergency lighting. Custom fixtures are also available such as this compact fluorescent cylinder in a brushed and anodized finish.

Circle No. 75

RedGate Technologies

Low-maintenance, user-friendly solution for commercial and industrial applications. Meets UL924. Ensures safety for all types of *switched* (using our patented ECI) or *unswitched* lamps and fixtures, including HID, exits, troffers, downlights, sportslights, highbays and lowbays...at *full light output*. For more information, please visit www.powerclone.com or phone (800) 817-4268 or (405) 372-9902.

Circle No. 78

Pennsylvania Globe Gaslight Co.

The new Victoriana Collection is one of 18 full-cutoff luminaires that allow the designer to achieve various light distributions within the project. From walkway to parking area...the fully adjustable PennTrol Reflector System (patent pending) provides the designer with the choice of IES Type II, Type III, or Type IV. Catalog available.

Circle No. 76

Schott-Fostec, LLC

Schott Fiber Optic Lighting—The affordable Easy-Fit Star Kit from Schott offers lighting installers the opportunity to create a dramatic "starry" atmosphere without having to specify and cost a custom system. The kit comes with everything needed to install the system quickly and easily. Great for bathrooms, nurseries, restaurants, nightclubs and much more.

Circle No. 79

Solara Lighting

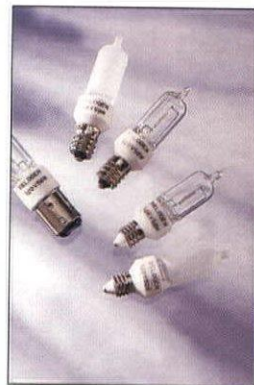

Combining beautiful, old-world designs with today's technology, Solara lanterns are handcrafted by fine artisans and blacksmiths who faithfully perpetuate the old-world tradition of authenticity and quality. Our Dallas, TX-based assembly plant then incorporates the latest operational features for safety, reliability and ease of use. Lanterns are available for wall, post, pier and pendant mounting in electric and natural or propane gas models. Gas versions available with options for automatic or manual lighting. Our day/night self-ignited electronic system includes a photocell that allows for automatic on/off of the gas.

Circle No. 80

THHC Lighting

The lighting industry has been enjoying the benefits of low-voltage xelogen lamps for several years now, but those looking for line-voltage solutions still had to deal with the various shortcomings of halogen lamps. The wait is now over as THHC Lighting is happy to launch the newest line of the xelogen family: the 120V xelogen series.

Circle No. 83

Specialty Lighting Industries, Inc.

Our performance picture light, #303, is a pendant version of a family of linear wall grazers custom fabricated to length. This remarkable product is capable of lighting a 12-ft.-high mural evenly from top to bottom and side-to-side, with only a 4-in. projection. Also popular for illuminating library shelves. All finishes.

Circle No. 81

Tridonic

Tridonic digital addressable fluorescent 1-to-100-percent dimming ballasts, available for T5 and T8 lamps, simplify design and increase control flexibility. Easily reconfigure lighting groups, set lighting scenes and obtain lamp and fixture operating status using built in ballast features. For details on this and other Tridonic products contact us at (866) 874-3664

Circle No. 84

Sunnex

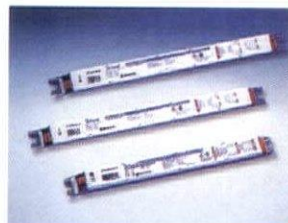

The SoHo Collection by Sunnex comes in a choice of different-size lamp heads, wattage, and a variety of colors. The small lamp base takes up very little desktop space, leaving more room for work documents and other accessories. This model is available in a table or floor lamp. Other options include gooseneck or an articulated arm, dimmer switch and 20W or 35W of illumination. Custom colors are also available. Contact Sunnex, Inc. at 3 Huron Drive, Natick, MA 01760; phone (800) 445-7869, www.sunnexonline.com.

Circle No. 82

Universal Lighting Technologies

Universal Lighting Technologies' Triad T5 and T5/HO linear fluorescent ballasts are designed for one- and two-lamp operation with models available for lamps ranging from 14W to 54W. Features include a small cross-sectional area and low-profile height of 1 in.; universal input voltage (108-305V) to reduce inventory requirements; end-of-lamp-life shutdown circuit with auto reset when replacing lamps; less than 10-percent THD; program rapid-start technology; and plug-in lead connectors to facilitate installation.
