Coming in September: *The Architecture Concept Book*, by **James Tait**, **an inspirational and insightful resource for architecture students and professionals, encouraging them to** think outside of what is often a conservative and self-perpetuating profession. Tait traces the connections between concepts such as familiarity, control, and memory and basic architectural components such as the entrance, arch, columns, and services, to social phenomena such as gathering and reveling, before concluding with texts on shelter, relaxing, and working. Even in this digital age, Tait insists that we must always think before we design.
