Planned for comfortable family living... Hall-Mack bathroom accessories are made for a lifetime of practical use. Their gleaming, sparkling beauty... original design and distinctive appearance provide the utmost in convenience and comfort.

When building or remodeling, specify and select Hall-Mack... with the confident knowledge that Hall-Mack is the leader in bathroom accessories. For more than 35 years Hall-Mack has been pioneering new and original ideas, and better ways to make bathroom accessories of outstanding convenience and quality... to fit every building budget. The bath you design, sell or install today — will always have the best... when you choose Hall-Mack!

Sold by leading plumbing, tile and hardware dealers everywhere.
MICRO-CAM HANGER
FOR SLIDING DOORS

THE FIRST AND ONLY LOW COST SLIDING DOOR HANGERS TO PROVIDE THE EASIEST ADJUSTMENT FOR PLUMBING OR LEVELING SLIDING DOORS

Only two screws are needed to attach hanger to door. To plumb door simply loosen screws and turn nylon cam with a screw driver. This automatically raises or lowers doors. When making precise adjustments door cannot slip down out of control.

THE THRIFTEE MICRO-CAM HANGER is available with either single or twin nylon wheels and is packaged with both fascia and non-fascia aluminum track.

TWIN WHEEL HANGERS
Nylon wheels have oiled-for-life bronze bearings. MICRO-CAM is made of sturdy nylon.

SINGLE WHEEL HANGERS
Nylon wheels have oiled-for-life bronze bearings. MICRO-CAM is made of sturdy nylon.

You can almost hear the wheels spin

in the heads of these distinguished building pros. (We tell you who they are on p. 65.) They’re hard at work judging AMERICAN BUILDER’s Best Model Homes contest—boiling 250 entries down to 36 prize and honorable mention winners.

Result of all this boiling down? Now you can see the cream of U.S. model homes with very little time and effort on your own part (see p. 66).

A picture of what happened when Technical Editor Joe Ferche brought back his roundup of plywood components would tell the same story. Stacks of pictures. Reams of notes. Concentrated boiling down and boiling down—until, beginning on p. 86, you can see at a glance what’s going on right now in components.

We call AMERICAN BUILDER a Time-Saver magazine. But we’ve made this a special year-end timesaver issue—in view of the mountain of mail and holidays in the offing. Speaking of which . . .

Merry Christmas!

Arthur J. McGinnis
Publisher
Modern windows, like the modern tractor-trailer unit, are removable. With sash out, builders install the lightened units in half the time—with half the labor—required for ordinary units.

Job site damage and delays are almost entirely eliminated. Painting time is shortened, too, by cutting-in sash separately on easel or bench.

Buyers prefer homes with modern, removable R-O-W Wood Windows—now balanced with the exclusive LIF-T-LOX mechanism which permits instant sash removal.

R-O-W and LIF-T-LOX are the registered trade-marks of the R-O-W Sales Company.

Here's why it pays to
BUILD WITH
KILN-DRIED LUMBER

Kiln-drying or "controlled seasoning" gives lumber increased bending strength, vertical strength, stiffness, and hardness. Because of these increased strength properties, kiln-dried lumber holds nails more securely, adds strength to the framing, and substantially reduces movement in the finished structure. These advantages keep maintenance at a minimum, resulting in greater satisfaction to the owners.

Scientific kiln-drying, as used in Weyerhaeuser quality control methods, firms the "patterning" of wood cells, brings the excess natural moistrures of wood down to optimum levels, thus preparing lumber for best results in its final uses.

You'll find there are actual savings when you build with Weyerhaeuser 4-Square Kiln-dried Lumber. It is easier working, gives you fewer "callbacks," and results in a building you can point to with pride.

Weyerhaeuser | 4-SQUARE
LUMBER AND BUILDING PRODUCTS

Kiln-drying offers outstanding advantages

Dimensional Stability — Scientific seasoning before milling to size promotes a more uniform degree of dimensional stability in lumber. Weyerhaeuser 4-Square Kiln-dried Lumber is thus better able to resist possible dimensional changes.

Finish and Workability — Through kiln-drying, the cells and fibers of wood become more evenly spaced and more compact, which improves the workability of the lumber. Kiln-dried lumber welcomes all types of finishes and serves to prolong their protective life.

Strength and Durability — The kiln-drying process adds the inherent strength in lumber to its natural strength and stabilizes its cellular composition, so that it easily meets structural requirements for both strength and durability.

Ask your Weyerhaeuser 4-Square Lumber Dealer for full information on the choice of species and complete line of kiln-dried lumber he carries... dimension, board, finish lumber, paneling, and specialty lumber products. Or write:

What a difference Pionite living colors make in a kitchen, bathroom, or any surfacing application. Keyed to home fashion trends, these exciting hues will please every style-conscious customer.

With a wide variety of woodgrains, patterns, and solids to choose from, you can color-plan homes that will serve as lifetime advertisements for you.

PIONEER PLASTICS CORPORATION, Sanford, Maine - Los Angeles, Calif.

PIONITE in standard 1/16" and post-forming grade .051 comes in convenient-to-use sizes:

- Width 24" — lengths 96", 120"
- Width 30" — lengths 48", 60", 72", 84", 96", 120"
- Width 36" — lengths 60", 72", 96", 120"
- Width 48" — lengths 96", 120"

GLAMOR-BOARD, a 1/8" plastic surface hardboard, comes in the following sizes: 3' x 8', 4' x 8', 3' x 10', and 42" x 10', or cut to size.

Now in use in more than 9,000,000 homes, quality-controlled Pionite high pressure plastic laminates exceed NEMA standards, withstand cigarette burns, fading, scratching, and stains that would ruin other surfaces. Pionite is easy to handle and fabricate, can be installed more quickly, saving time, labor, and money.

Please send me 8-page full-color brochures. Include chips of woodgrains, decorative patterns, and solid colors.

A knee-wall truss cuts costs on this Cape Cod

A truss saves construction costs, and the story-and-a-half plan saves space costs. Hebb & Narodick Construction Co. of West Seattle, Wash., have combined the two economies by means of the knee-wall truss. (above, right). Result is this attractive Cape Cod cottage. The house offers four bedrooms and two baths, 1,200 sq. ft. of space, and a garage—all for $14,650.

**ALTERNATE BATH PLAN | L**

**SECOND FLOOR | {**

**CROSS SECTION** shows low-cost space made available on the second floor by knee-wall trusses. House is built entirely of standard LuReCo components.

**FLOOR PLAN** is simple and compact. Note excellent grouping of plumbing, made possible by placing utility room on the second floor, backing it up to the bathroom.
make your garages truly modern

**Delco-matically...**

and make more profit from every one!

“Thar’s new gold in them thar deals”... and you’ll sell more homes faster by featuring the most modern built-in convenience on the market: the all-new, all-transistor Delco-matic Garage Door Operator! Three and one-half years of testing—including a nationwide 500-home use-test—thoroughly demonstrated the all-condition efficiency of the Delco-matic to the satisfaction of General Motors’ electronics specialists, the same experts who design and develop transistors for missiles, computers and pocket-portable radios. See for yourself what Delco-matic can do for your profits. Clip the coupon or call your local Delco-matic representative today for full details.

Delco-matic Garage Door Operators are sold and installed by Crawford Door Company and authorized Delco-matic distributors. Warranted and serviced by United Motors Service electronics service dealers.

Seasonal rate stays above 1958 level; FHA new home applications are stable

The seasonally adjusted annual rate of starts (for October) is still above that of last year—1,180,000 compared to 1,125,000. However, an anticipated drop in monthly starts has taken place. There are several factors involved. The steel strike has taken its toll in the multi-family category and also contributed to a cautionary attitude on the part of one-family home builders as steel shortages resulted in job layoffs. Secondly, the tight-money problem continues to be a deterring factor.

There’s a brighter note on the horizon, however. FHA new-home applications—which had dropped off in July and August—stabilized in September and October. Changes in application figures are usually reflected in starts figures within two or three months.

**FHA ACTIVITY**

<table>
<thead>
<tr>
<th></th>
<th></th>
<th></th>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>Applications</td>
<td>24,065</td>
<td>31,625</td>
<td>31,817</td>
<td>+19.1</td>
</tr>
</tbody>
</table>

A MORE THAN SEASONAL DECLINE—to 105,100—was registered by October starts. This put the seasonally adjusted annual rate at 1,180,000. Of the October starts, 102,100 were for private units.

**BUILDING COSTS**

Labor earnings, which had remained at a relatively stable point earlier this year, took an anticipated sharp upswing in August and September. Wholesale prices continue at a near-constant figure.

**CONSTRUCTION ACTIVITY**

Slight decreases in both total new construction and residential construction occurred in September over August. (October figures had not been released as American Builder went to press.)
Homes built on concrete slab need the warmth and resilience of OAK FLOORS

A concrete slab with a composition floor covering is cold, hard, uncomfortable and unhealthy. In residential construction, it can be a barrier to sales, a cause of buyer complaint and dissatisfaction.

You can overcome these objections by installing Strip Oak Flooring nailed to screeds laid in mastic on the slab. Oak's high insulating quality keeps out slab chill. Its natural resilience provides restful comfort underfoot. And the beauty and durability of Oak Floors make them preferred over all other types. The screeds-in-mastic method of installing Oak Floors over slabs is easy, fast and inexpensive. Try it in your slab-on-ground homes for greater sales appeal.

Write for free Installation Manual.
NATIONAL OAK FLOORING MANUFACTURERS' ASSOCIATION
844 Sterick Building • Memphis 3, Tenn.
**Tomorrow's House**

NEW CONCEPT in motel-hotel room design was introduced at the recent National Hotel Exposition, held in New York City. As shown at left, the new-style room is approximately the same size as today's average motel room. However, its wall angles make it appear larger. Also, its odd shape leaves ample free space which can be used to carry air ducts and plumbing, etc.

Honeycomb floor plan offers some new angles on planning motel-hotel rooms

When leaders of the motel-hotel business commissioned designer Tom Lee to plan a new room for the 1960s, he broke with tradition. He reshaped two rectangular rooms into a pentagon plan similar to a honeycomb cell. The result is said to be visually and psychologically more interesting than conventional rooms—an important feature for the hotly competitive motel business.

The variety of wall angles allows greater flexibility of furniture arrangement. But standard materials and furniture can be used in the rooms. Only exception is the radial floor-to-ceiling cabinetry (by the Simmons Co.).

Among the other advantages of this type of room plan—especially when placed over a conventional rectangular foundation—are the terrace-patios which are naturally formed where the narrow ends of the rooms meet. And, the zigzagging corridors eliminate the institutional quality of long halls punctured by identical doorways.

NEW ROOM PLAN forms a zig-zag corridor. This will ease the institutionlike monotony of long, straight hallways.

DECEMBER 1959
Centralized building of P-B Components by the distributor cuts costs for everybody

To the Builder — large or small — this means a saving of about 15% on wall, floor, ceiling, roof and gable components. Yet you are not limited to type or size of house — any plan can be quickly detailed for P-B Components.

You buy your Precision-Built House Components through your retail lumber dealer. The components come direct to the building site. You give the home buyer a top-quality, custom-built house — two to four months sooner than by conventional methods. You maintain a far smaller staff of skilled laborers. You invest no money in expensive equipment. You are fully equipped to compete profitably with every type of prefabricated housing.

Precision-Building of custom-built house components — centralized with the distributor of building materials — is the final development in 24 years of pioneering experience by Homasote Company. Many millions of dollars of homes have now been Precision-Built — from individual homes up to communities of 500 and even 5,000 houses. Centralizing at the distributor’s level is fully supported by all the economies of both materials costs and handling operations, borne out by all our 24 years’ experience.

First, think of all the handling and rehandling costs if materials go to the distributor, then to the dealer, then to you. Next consider the volume discounts the distributor earns — which are not available to the dealer or builder buying in lesser quantities. Now study the chart above and note how rapidly the distributor’s costs come down when he does centralized fabricating for a group of dealers and builders. Suddenly there are lowered costs and/or extra profits for everybody in the picture. You have the economies of mass production combined with the flexibility of individual design.

Your walls and partitions are not of some limited arbitrary length or width, but room-size — with either exterior finish or sheathing applied and with the interior finish applied. They can even be wired for electricity. Floor components are built mainly 8-feet in width and of the length needed; the underflooring is insulated and the factory-finished flooring already in place. Ceiling components have the ceiling material already in place. Roof and gable components have the sheathing already in place.

Precision-Built House Components are completely flexible as they are based on the Bemis four-inch module. This four-inch control is the greatest cost-cutter yet developed. Instead of 192 units to a foot when working with 6”, there are only three units to the foot. With this type of simplification many useful charts and tables can be devised that speed up operations — also mistakes are eliminated because of the control. The four-inch control simplifies shop procedures and eliminates the necessity of stopping every few minutes to measure in the field.

The idea of buying house components is not new. But the centralized fabrication of Homasote Precision-Built House Components is new and sound and a powerful new building and selling tool for every builder — large or small. Spend the time to get the facts. Write or wire Dept. M-5.
Get ALL the facts before you specify any appliance

NEW BUILT-INS SAVE SPACE, CUT INSTALLATION COSTS

Hotpoint

PRODUCT FACTS

TEAR OUT AND SAVE FOR FUTURE REFERENCE

New Oven Fits in 24" Cabinet Width, Has New Lift-Off Door For Easier Cleaning

Hotpoint's new oven saves you money three ways. First, you add deluxe sales appeal to your kitchen at a moderate cost. Second, the oven fits into a 24" cabinet, yet offers capacity comparable to other brands which demand a 27" or larger cabinet — you save on cabinet costs and add extra living space. And Hotpoint's new up-front terminal block means quicker installation.

Surface Section Has Integral Pushbuttons, Fits 30" Cabinet

Now you can offer the pushbutton convenience of Calrod® Recipe Heat units in a standard 30" cabinet. One installation takes care of everything — there's no separate control panel to mount and wire. Can be installed with control panel in front or in rear. Hotpoint's squared mounting frame and quick connections reduce cut-out and installation time.

Available in Sunburst Yellow, Turquoise, Coral Pink, Copper Brown, Satin Metallic Finish, and Classic White.

A Complete Line... one of the reasons why RHEEM-RICHMOND is

The Fastest Growing Name in
Plumbing Fixtures

The completeness of the RHEEM-RICHMOND line means not only the inclusion of every category: from residential through schools, hospitals and prisons, to commercial and industrial installations. It means also an exceptional choice within each category.

Take lavatories for the home as an example... the four shown in this column are but a few of those available, all of top RHEEM-RICHMOND quality, all in seven matched colors plus “whiter-white.” They include spectacular new additions, such as the “Futura” pictured just above.

Or consider closet combinations. Two are shown here. The line includes many, many more for every type of installation.

This category is an especially good illustration of price range. The new RHEEM-RICHMOND closet combination shown just above—the “LaCrosse”—is actually priced in the economy class yet it makes a luxury appearance, with its modern lines and with any of RHEEM-RICHMOND’s perfectly matched colors (or “whiter-white.”)

Take reservoir tanks for instance. Today there are many, many more for every type of installation.

Today, residential tubs are a good guide to advanced styling and completeness of line. The model illustrated just above is a modern square tub, RHEEM-RICHMOND’s “Pompeii.”

Here RHEEM-RICHMOND presents the beautiful “Breslin” in the regular 16” height. The “Breslin” is also available in 14” height. Again there are many, many more in a broad range of colors, sizes and styles.

Laundry and kitchen sinks, too, of course... anything you can name in plumbing fixtures. Make your choice from the truly complete line, and be sure of RHEEM-RICHMOND quality. Write for literature.
Register now for the 16th Annual NAHB Convention and Exposition! It's the smartest investment you can make in new building ideas. An anticipated 35,000 people in the trade will see more than 800 exhibit spaces in the Hilton and Sherman Hotels and the Chicago Coliseum. Plan to come... it's the "world series" of building! January 17-21. Registration fee: $15 for men, $10 for ladies. Hotel reservations will be made for you when you pre-register through your local NAHB association, or write to the address below. Registration fee, business classification information and date of arrival in Chicago must accompany your advance registration and hotel reservation request.

CERAMIC TILE IDEA KITCHEN

created by HERMAN YORK, A.I.A.
the magic of
CERAMIC TILE...

inspired Herman York, A.I.A., to create this charming, workable 1960 Idea Kitchen. He used it with high style as a surfacing for the walls, floor, countertops and drainboards.

Herman York's choice of Ceramic Tile, with its unique styling, practical nature and its lasting value, speaks for his belief in quality materials for quality homes.

Ceramic Tile is the first choice for today's smartest homes. It has built-in, lasting beauty, and fired-in colors which reflect the realistic thought that homes must be decorative, as well as carefree.
Here's why Ceramic Tile will appeal to sales prospects:
IT'S WATERPROOF—water and dampness won't buckle or warp it.
IT'S FIREPROOF—fire, smoke and grease won't harm it.
IT'S DENTPROOF—heavy use, rough wear can't mar it.
IT'S STAINPROOF—highly resistant to household stains.
IT'S SCARPRESSURE—cutting can't scratch it.

These multiple benefits make Ceramic Tile the biggest boon to modern living. Beautiful and rugged, it's suitable for any room; it teams up with any contrasting material.

Homeowners everywhere are presold on Ceramic Tile. It has quick-selling, built-in "buy appeal" for any of your remodeling or new construction projects.

Plans for Herman York's 1960 Idea Kitchen FREE to builders.

(See Back Cover for address.)
Herman York created this lovely tiled family room as an adjoining area to show some of the imaginative possibilities of colorful, durable Ceramic Tile. The modern, clean look of tile produces dramatic results. It's decorative with traditional or modern furnishings, and there's an amazing variety of colors and patterns to choose from. Ceramic Tile is the permanent surfacing that stays alive with use.

**Beauty Underfoot** is effectively illustrated here by Herman York's design for the "mud" room located just off his Idea Kitchen. Easy maintenance makes Ceramic Tile really carefree. There's never any expensive replacement costs—Ceramic Tile keeps new looking for the life of the home.

See your local tile contractor for complete information on new, low-cost installation methods.

PLANS FOR HERMAN YORK'S 1960 CERAMIC TILE IDEAS FREE TO BUILDERS. PLEASE WRITE.
Specify Atlas White... the uniform white portland cement preferred by builders and contractors. The whiteness of this cement will bring out the true tones of colored aggregates and coloring pigments... in terrazzo, precast concrete panels, stucco and masonry mortars. It is non-staining, too... a must in mortar mixes for backing, setting and pointing limestone units... and setting and grouting ceramic tile. Use it for colored or white concrete projects such as screen walls, patios, posts, benches, flagstones, swimming pools, sidewalks. Also available in air-entraining and waterproofed types. Complies with ASTM & Federal Specifications. See your building supply dealer — or write to: Universal Atlas Cement, 100 Park Avenue, New York 17, N. Y.
MORE USABLE SPACE—MORE SALES APPEAL
with both front and backwall "OVERHEAD DOOR"
"Convertible-Garage-Room" sells home buyers with extra living space they want and need

It's new—and it offers the extra living space home buyers want. It's the new "Convertible-Garage-Room"—a garage that converts in seconds to livable space. All it takes is a second "OVERHEAD DOOR" to replace the blank backwall and open the garage to a light, inviting area for living.

Recent surveys, including one by United States Interviewing Corporation, show 70% of home buyers want and need the extra space this room can offer when temporarily converted to a sheltered patio, a hobby center or a play pavilion for the children.

Surveys also reveal 56% will pay $400 and more for this extra space. Yet, you can offer it for virtually no extra cost. Materials and labor saved in the backwall make up most of the cost of the second door. The cost is also covered by increased evaluations. Builders all over the country report evaluations by FHA and other financing agencies as high as 11% over a conventional garage.

Deep overhang and generous deck of 2x4s on edge add strong design element to this Oregon home, provide sheltered all-weather outdoor living area for family. Van Evera Bailey, architect.
For homes with an added dimension for living ... outdoors

**built of WOOD means built to sell**

Extend the usable living area of a house and you increase your profit potential with every square foot of added livability! Decks, lanais and overhead sunscreens of wood go up quickly and economically with stock materials, can be finished to harmonize with the site or basic design. In natural wood, they not only withstand the elements but are actually mellowed in the process.

For a few extra dollars you can give a tract home individuality, lift a custom home a cut above its neighbors ... give any house an **indoor-outdoor** quality that will spark the imagination of prospects and pave the way for a faster, more profitable sale. For more information on better homes of wood, write to:

**NATIONAL LUMBER MANUFACTURERS ASSOCIATION**

*Wood Information Center, 1319 18th St., N.W., Washington 6, D.C.*

*Live, Work, Build Better with wood*

---

*Here simple decking adds architectural distinction at low cost, helps wed structure to site as well as improving family traffic flow. Wood's natural finish is in complete harmony with the surroundings. Robert B. Browne, architect.*

*Living just naturally gravitates to the patio under this lanai of basic framing members. Handsome ventilated board fence assures privacy for this expanded outdoor "room," without eliminating breezes. Donald Nick is the architect.*
For 1960, Kingsberry Homes presents a Revolutionary New Profit Opportunity—to a few Southern Builders who will ACT NOW!

THE KINGSBERRY MARKET

• Here is news—news you never heard before—news you've been waiting for—and it comes to you from the fastest growing Manufactured Home Builder in the South—a company whose new line of homes—the Kingsberry—has doubled and re-doubled its sales in the past two years. Read here what it will do for you.

Within the next few weeks Kingsberry Homes will release the most revolutionary plan ever developed for breaking the building log jam in the South—truly a "market buster." It presents an exceptional opportunity to a few builders who mean business, have land ready to go—and who will aggressively follow a program that has already proved its sales and profit return. Here are some of the highlights—

1 This program is built around you and your development—featuring Kingsberry-paid advertising (in 4-color where obtainable), throughout the early Spring selling season. It will be rolling full steam in March and will be climaxed in May by a sensational new Kingsberry Home of nation-wide importance.

2 With the Kingsberry unique Profit Control Program, you can build more units next year on the same investment with smaller overhead and with a smaller organization. You can confidently look forward to lower costs, reduced bookkeeping and simplified purchasing.

3 Reduced prices! Kingsberry made news in '59 with an average price reduction of 5% while upping quality, in a year of sharply rising prices. For 1960 we are able to offer a further reduction of 2% plus new savings on job site construction of another 3%—while cutting your conventional construction time in half.

KINGSBERRY HOMES
formerly Lumber Fabricators, Inc. of Fort Payne, Alabama
At present Kingsberry can serve builders only in the following states: Kentucky, Tennessee, North and South Carolina, Georgia, Florida, Alabama, Mississippi, Louisiana.

Join the Kingsberry Market Busters—capture more of your market in 1960
Gracious and spacious, too—1200 sq. ft. of unbeatable Kingsberry value at a completed construction cost of about $10,500 for brick ($750 less for frame construction) without land.

Chart at right shows phenomenal increase in sales of Kingsberry Homes in the last 2 years.

BUSTER PROGRAM and what it will do for YOU

4 Kingsberry has the answer to today's financing problems. New product advantages and the Kingsberry program enable you to build more, at more net profit in 1960. This program includes construction financing, special model home financing, even model home furnishings financing.

5 Kingsberry will show you—for 1960—the newest home packages, covering the great range in sizes and prices possible only with Kingsberry's architectural and manufacturing resources.

6 Kingsberry Homes are the most flexible manufactured homes you ever worked with—offering so many easy and economical variations that they have that "custom look." The exclusive designs of Architects Herman York of New York City and Henry Norris of Atlanta—men who know what Southerners want.

7 Kingsberry offers the industry's most generous cash contribution to your local advertising program, enabling you to be the big-name builder in your market.

8 You will have the tested-and-proved Kingsberry "News-Maker" advertising program for your continued local use—and the new Kingsberry "Sales-Maker" merchandising program to help you efficiently turn traffic into sales.

9 You will benefit by national publicity in leading magazines—such as the full-color feature stories that appear this year in "Good Housekeeping" and "Living for Young Homemakers." There's more to come in 1960. Kingsberry Homes are news everywhere!

10 You benefit by Kingsberry's highly automated production, that assures better units—walls, floors, roof, trusses—and unique, "packaged" bathrooms and kitchen assemblies. Also "optionals" in heating and kitchen equipment that save money for your customers. Kingsberry Quality Control, every step of the way, assures construction that is superior to "on-the-site."

And much, much more—for full story, Air Mail coupon TODAY!

THIS IS URGENT. You cannot realize the full profit potential of this program unless you get in on the beginning of our 1960 Market Buster activity.

KINGSBERRY HOMES, Fort Payne, Alabama

Without obligation, please have your representative call with full information about the 1960 KINGSBERRY MARKET BUSTER PROGRAM—and show me how it fits into my present operation. (Please check your interest and fill in number.)

DECEMBER 1959
the most important appliance...in the most important room in the home...a

NATIONAL
food waste
DISPOSER

the little extra for the big difference in the kitchen.

MODEL 744A "Citation"
THE Disposer
for THE Kitchen...
- Patented, one-piece "Cover Control"—seals, drains, operates disposer.
- Exclusive "Power Surge" reversing—release food waste jams with a flip of the switch.
- Factory sealed Power-Pak—motor and shredding elements "all-in-one."
- Split ring construction for quick, easy installation.

MODEL 124A "Budget Beauty"
Continuous feed model
for thrift installations
- Full capacity—full size shredding elements.
- Hi-Torque ½ H.P. motor.
- Sparkling stainless steel cover.
- Sink connections cradled in neoprene "Whisper-Ring."
- Split ring construction for quick, easy installation.
Additional models available in both "Cover Control" and continuous feed types.

In new construction or remodeling—the kitchen is the focal point to a prospective buyer. No kitchen is "modern" without a food waste disposer—handling garbage is as out of date today as "outdoor plumbing". With a National food waste disposer you sell a truly modern kitchen—no garbage problems ever, because there's no garbage—food waste does not accumulate—it disappears right down the drain—flushed out of the sink, ground and disposed of at once, safely, efficiently. No odor—no mess—no handling!
The National "Full Range" Line of Food Waste Disposers lets you include a disposer in every kitchen—from a "budget" remodeling job to a custom built home!

NATIONAL
WATER DISPENSER

INSTANT-HOT Water Dispenser
Mounted on sink ledge or counter top. "Instant-Hot" delivers "tea-kettle hot" water (190°-200°F.) at a touch with pressure-free safety.

INSTANT-HOT puts the INSTANT in INSTANT foods
- Instant coffee, tea, chocolate
- Soups, bouillon
- Jello, puddings
- Head start for cooking (frozen foods, etc.)
- Heating formula, cleaning, preparing foods

AMERICAN BUILDER
Revised estimates for 1960 more optimistic: starts set at 1.26 to 1.28 million

Late year-end estimates of 1960 housing starts have revised upward some of the more pessimistic earlier predictions. U.S. total is now expected to hit 1.26 to 1.28 million. It’s less than a 9% decline from 1959’s near-record 1.39 million.

Sharp differences are reported by builders from different areas. Large operators in Los Angeles and Long Island are pessimistic, while small-volume firms in widely scattered towns and cities feel they will have a big year in spite of the high cost of money. Key to it all: 1960 will be a prosperous year, people will have more money to spend, and they need and want new houses.

Experts say the pressure on mortgage financing will relax slightly early in 1960. That’s the time to line up commitments for the year.

Now: “maintenance-free homes”

A strong new trend has thrust its way into the building market in 1959: the maintenance-free home. You can count on its being even more potent in 1960. Some product examples: enamel-coated bronze and aluminum windows; asbestos and hardboard sidings with permanent plastic finish; Formica kitchen cabinets with mar-proof finish; aluminum roofing and siding with baked-enamel surface; plywood interior panels with tough scratch-proof finish.

There are many more.

“Maintenance-free” is a good sales theme. Equip your next model home with a selection of these new products, then build a campaign on their contribution to lower upkeep costs.

Help for small-town builders

FHA is moving decisively to expand its help to small-town rural builders in 1960. Its Certified Agency Program (CAP) fits towns of 20,000 or less which are often remote from FHA insuring offices. Local lenders, appraisers, and inspectors are appointed to process and speed up loans. New shortcut methods save time, cut red tape.

If you don’t know about CAP, write FHA in Washington for directions on how to take part. It’s an important extension of the mortgage insurance principle to new territory.

Fast pace with a bulldozer

Builders hit a fast pace in 1959, but some special prize goes to one in Irvington, N.J. He was moving so fast he bulldozed the basement, and started pouring the foundations on a split level before he discovered he was on the wrong lot. Result: he leveled everything, rolled it smooth, moved down the street. Then he resumed bulldozing on the right site.

Built-ins get loan OK

Remodeling of kitchens will be helped by FHA’s newest (but long overdue) order permitting built-in kitchen appliances to be eligible for insurance. Appliance must be “permanently attached, integral part of the kitchen.”

Profits in remodeling

Ace in the hole for many builders in 1960 will be repair and remodeling work. New studies show there’s a great overlapping of new and remodeling jobs by the same firms. When money gets too tight on new houses, these men expand the repair and remodeling part of their business. It’s easier to finance, actually pays a higher job profit. Biggest profit items are kitchens, baths, attics, basements, porches, additions, garages.

Prediction for 1960: more than $21 billion will be spent in repair, remodeling upkeep of all kinds. This of course includes commercial and industrial work, which will zoom in 1960.

Make a spot survey of remodeling opportunities in your town. Enlist aid of your local lumber dealer in locating prospects.

Discounts, interest rates up

Builders last month continued to report rising interest rates, stiffer discounts on FHA and VA loans. But there’s a wide variety in local, state, and regional levels. California and Texas builders were hit by discounts up to 10%. Conventional loan interest rates were edging up to 6 1/2%. While volume in some areas will be curtailed by money shortages, consensus of opinion is that pressure would ease before midsummer.

Prices up—but moderately

Builders’ costs will show some increases next year. E. H. Boeckh estimates a 1 1/2% rise. Land and financing outlays will put new pressure on builders for higher sales tag.
The outlook for housing: sharp regional contrasts

Nationwide housing starts for the 12-month period ending next Sept. 30 are expected to parallel 1958 calendar-year activities. Here's the general outlook for the country, and specific data on the West.*

During the 12-month forecast period ending Sept. 30, 1960, it is estimated that private and public nonfarm starts will total 1,328,400. This compares with 1,313,600 in the 1958 calendar year—a one per cent increase, but considerably below the amount for the Oct. 1, 1958 to Sept. 30, 1959 period.

Although the nation-wide totals for the forecast period and the 1958 calendar-year period are similar, sharp regional contrasts are expected.

Regional effects of a tight mortgage credit situation will be accentuated by regional patterns of increased vacancy rates. The combined effect should be a more drastic curtailment of housing starts in the South and West than in the Northern states.

The Northeast and North Central regions were most severely affected during the last recession. (This recession had stifled somewhat the demand for new homes which had been building up.) As the recession waned, the impetus of an expanding economy pushed up home building to meet the reviving demand. This momentum will carry sufficient strength to continue relatively high levels of activities during the forecast period.

The business slowdown affected the South and West to a lesser degree. The fact that these areas are migratory targets of older communities played an important stabilizing role. The continued population influx, though curtailed, lent enough economic strength to keep new-home demand from sliding very much. As the recession ended, home building did increase—but not as much as in the older sections of the country.

Here's how the West shapes up for the forecast period:

The picture for Western states is mixed. The outlook is for declines of up to 14 per cent in some areas and gains as high as 10 per cent in other sections.

The fast growing areas of New Mexico, Arizona and California will continue their upward pattern.

In California, Los Angeles will remain the region's top housing market with a stable rate of 82,000 homes expected in the forecast period. In San Francisco and San Diego, the outlook is for roughly 24,000 homes each. San Jose will account for a significant volume—17,000 new homes, a 6 per cent rise. Sacramento also will be on the plus side—rising from 10,300 to 11,800, a 15 per cent increase.

Arizona is expected to show a statewide increase of 2 per cent. Tucson will see a 10 per cent rise from 4,200 to 4,600 units, while Phoenix will jump 5 per cent—from 16,200 to 17,000.

Although starts in Texas are expected to decrease, that state still will remain an important contributor to the West's new housing. In the Houston area, for example, some 15,800 starts are expected.

*All information and figures in this article were derived from a "12 Months Housing Forecast," compiled by Reinhold P. Wolff, Director, Bureau of Business and Economic Research, U. of Miami.
GET THESE IMPORTANT BOOKS!

THE three books at the left are a "must" for anyone who is interested in good masonry construction. One describes the type of workmanship recommended to secure dry brick walls. The second describes the specifications recommended to secure dry brick walls. The third describes the type of workmanship recommended for good concrete-block walls.

Each of these books has been endorsed by foremost authorities. Each has received a citation of merit from the Producers' Council and the American Institute of Architects. Each is fully illustrated, clearly written. Each contains a wealth of really valuable information.

These books are not advertisements for our product, Brixment. They are published and made available to members of the building trades solely as an industry service. Mail the coupon, today, for your free copies.

NEW TRUSCON TRU-MESH METAL LATH ACCESSORIES. Now made on new equipment. Edges are cleaner, safer. Flat surfaces flatter, straighter. More than 40 items to reinforce, protect, and add value to your home. Send coupon.
values by Truscon

* Low purchase price
* Traditional Truscon quality

To help you sell like '60 in '59, Truscon introduces two important additions to its new Economy Line—(1) Series 500 Aluminum Awning Window, (2) Aluminum Horizontal Sliding Window.

Truscon builder-conscious designers have engineered excess cost out of both types. These window values are produced specifically to meet the economic needs of home building and light construction—not simply adapted to them. The result is quality you can point to, prices you can live with.

Both awning and slider are available now in a wide range of types and sizes. Accessories are available to assure quick, economical installation in all types of construction. Fast delivery from Truscon dealers, supported by complete stocks in Truscon warehouses.

The building boom has upped production of all Truscon products. The Truscon brand gives you all the advantages of mass-production . . . plus rigid quality control.

Low purchase price . . . low installed cost . . . complete selection . . . most popular window types . . . high quality . . . nation-wide warehouse stocks. It all adds up. Try Truscon today.

UNIQUE PROMOTION—Denver builder Jack Hoerner puts up a good house. But his promotion sells a fallout shelter built under each garage. Hoerner stresses plus values of shelter with theme: Live to enjoy your home.

ATTRACTS THIS CROWD—Denverites by the hundreds flock to opening day of model house. They learn that shelter comes with the house at no added cost. Visitors feel shelter can double as protection against tornadoes.

House inside a house protects

- He puts up a good house
- He builds in a safety feature
- He increases his rate of sales

HE'S JACK C. HOERNER, President, Jack Hoerner Construction Co., Lakewood, Colo.
families against atomic fallout

Here's how Jack Hoerner builds a fallout shelter in each of his houses—for $292.

He excavates a 12x14-ft. pit under the garage site 8 ft. deep. This costs him $11.50. He pours a 10x13-ft. footing 8 in. deep and 18 in. wide. Over the footing he builds an 8-in. concrete wall 7 ft. 9 in. high, using 2,800-psi concrete. This costs him $121.

He forms for the 12-in. roof slab with plywood sheets laid over 2x4-in. joists on 14-in. centers. Joists run over 2x4-in. stringers set on 4-ft. centers. They are held aloft by 2x4-in. posts.

Hoerner reinforces for the slab with 3/8-in. rods placed both ways on 10-in. centers. Rods are kept free from decking by 3-in. Hi Chairs. The builder chutes the 2,800-psi concrete directly onto the slab from transit-mix trucks. Slab, together with a water tank and two 2-in. vent pipes imbedded in the concrete wall, bring the total cost to $292.

Says Hoerner: "Sounds inexpensive—and it is. But you can sell its "panic worth" for $1,-000,000."
For handsome paneling... consider LARCH

for homes...commercial buildings...churches...clubs

LARCH furnishes you with a handsome, versatile and durable wood for fine paneling. For any room in the house or for commercial buildings, the delicately figured grain of Larch—with its satiny surface and unusual coloring—makes Larch an admirable choice. Its ability to take—and hold—paints, varnishes and stains puts Larch among the most versatile of softwoods. In addition, the fact that it is carefully dried and does not mar or dent easily adds special customer-pleasing qualities for paneling and interior trim woodwork.

Brute strength is another characteristic of Larch. This, plus its straightness of grain and uniform texture, fit it to heavy construction. You can specify Larch for beams, posts, stringers, joists, rafters, and studs with complete confidence.

morning becomes REFLECTA...

...and so does any other light that strikes the subtle contours of this new Hermosa Tile. A barely discernible indentation divides each tile into four equal triangles. Light and shadow play on Reflecta to form unique, ever-changing geometric patterns. A timeless design that can never grow old. Available in a wide array of colors. Perfect for kitchen, bath, fireplaces, wainscoting. Ideal for residential applications—exceptionally easy to keep clean.
SELECT GAS OR ELECTRIC
the built-ins with the built-in consumer acceptance

You've watched the ladies "shop" your models. They head right for the kitchen. And when they see the magic name "O'KEEFE & MERRITT" on oven, on surface units, on a washer/dryer combination, they know the house is quality built. O'KEEFE & MERRITT is that kind of name. And we're not resting on any laurels. We are continuing to sell the name and quality in Reader's Digest, Sunset Magazine, top national TV shows; and strong local promotions on radio and in newspapers. It will mean faster turnover for you.

BEST SELECTION ALL THE WAY!
From one source of supply you get the widest choice of models: 11 different ovens with the latest features like Power Grillelevator Broiler and Triple Rotisserie; 13 different surface units with Temperature Control, Star Jet Burners, Built-in Griddles, special Tile Top units. A whole rainbow of consumer-proved colors and a wide, wide range of prices to meet every builder demand. You get complete supplier service, the easiest installation and availability always of every oven, every surface unit in the line.

NEVER GO SECOND BEST... ALWAYS GO
NATIONAL HOME WEEK: No doubt about it, every year sees more and more western builders harnessing to National Home Week, utilizing its great power to create prospects and sales. This was clearly evident in a swing through many large cities where builders, through the medium of their local associations, had organized to support a joint Promotion of the Week.

EVIDENT TOO, WAS A DECIDED UPGRADING of the model homes as compared with a year or so ago. More were landscaped; more were furnished; most included built-in ranges and ovens, family rooms, two baths. And breakfast bars, tiled entries, natural wood paneling, custom wallpaper, attractive fixtures were common in all but the lowest-priced models.

BATHROOMS RECEIVE MORE ATTENTION. Compartmented baths, baths with Mr. & Mrs. lavatories, decorative ceramic tile, wide mirrors, were found in many homes. One builder reported that a Roman tub definitely influenced sales; another builder with homes in the $15,000 price class found it possible to include a planter in the bath.

MANY BUILDERS USED PRIZES to encourage inspection of models or to get questionnaires filled in which would qualify prospects. W. C. Garcia & Assoc. of San Jose offered a chance to win a free all-expense trip to Rome or Rio for two, as an inducement to visit their development.

IN THE SAN FERNANDO VALLEY nine custom builders joined forces to create Candle Light Lane—nine beautiful homes in one block ranging from $16,900 to $28,000, all with Arkla gas air-conditioning units. In the San Bernardino area nine other custom builders staged their annual Home Orama using the theme "Tomorrow's trends in Today's Homes."

ONE THING MISSING in most homes was a "hidden-value" display. That's a display of quality items used in the home which the average visitor does not see—such things as copper piping, glass-lined water heaters, insulation, treated lumber, rough-in for air conditioning, etc. All these can be readily displayed in the garage using pieces of copper pipe, lumber, insulation—with appropriate signs. Also, many manufacturers have cardboard displays which they would be glad to furnish to builders. Such displays lend an atmosphere of quality to the whole house and are well worth the little time and expense necessary to develop them. On busy week ends, when there are more prospects going through the model than the salesmen can talk to, such displays give them something to think about.

SMART BUILDERS who have sponsored parades of homes have found that they can get thousands of dollars worth of free promotion. The gas and electric utilities, building material manufacturers, savings and loan associations, title companies, and many others are anxious to promote home ownership and will usually contribute liberally to the program. And of course the local newspapers, radio and television stations are glad to help.
Within Beck's own 'Parade of Homes'

1. He took an award of merit in the Best Model Homes contest

Becwood Terrace at Odessa, Tex., ultimately will contain 1,200 homes, comprising 10 different models. One of these, the West Haven, was given an award of merit in the under-$16,000 category of American Builder's Best Model Homes Contest.

Selling for $14,250 (with land) the house is chock full of the extras which make one home stand out above others in the same price range. A wood-paneled family room, built-in breakfast bar, quarry tile entry and a 200-sq. ft patio are all included.

The West Haven has central heating, is ducted for air-conditioning. Plan is three-bedroom, two-bath design which is most popular all over the country. Builder Beck ran his own "Parade of Homes" in his Odessa subdivision.

2. He won a prefab fireplace for merchandising Hidden Values

"The true value [of a house]," says builder Bill Beck, "is buried deep within..."

Because he believes this, Beck is a strong merchandiser of hidden values. From the moment a prospect enters a Beck-built home, the salesman points out the values it contains. For this program, Beck was a winner in American Builder's Hidden Values Merchandising Contest.

"We invariably invite prospective customers to learn... about the construction... We leave no room for doubt, and the quality which cannot be seen is our best salesman," he stated.
he has a double-barrelled winner
LAMINATE strong 1" x 6" gypsum ribs to gypsum board panels. Ribs are attached on center with Pabco joint cement at a rate of one each 60 seconds. Total laminating time is only 40 minutes on average job.

NAILING STRIPS, 1"x1 1/2", are applied to ceilings, floors and sidewalls. Walls are laid out according to blueprint with chalk line and level. Note how interior framing is eliminated.

PANELS go up fast, erected with staggered joints for strength and nailed along wood strips. No nails in field of panel. Laminate face panels to ribs at joints. 6" ribs, 24" o.c. give twice as much solid wall as wood studs.
No wood studding! No nail popping! Pabcowall is the studless drywall system that: adds 20 sq. ft. more liveable floor space to the average house; has passed the one-hour fire test and separate hose stream test in accordance with ASTM standards; insulates against sound transmission comparable to thicker conventional drywall construction. For free architectural specifications on Pabcowall, please write: Dept. AB, PABCO Building Materials Division, Fibreboard Paper Products Corporation, 475 Brannan Street, San Francisco, California.
UBC APPROVAL GRANTED CEMEX SYSTEM®
FOR LOAD-BEARING WALLS!

Tilt-up wall construction technique for fast wall assembly with only two men.

Double bead of Miracle mastic gives joint that is stronger than the Cemex itself.

Wall sections are set solid and openings are cut out with Skilsaw quickly and easily.

Plaster and stucco bonds perfectly. Only ground and finish coat needed.

Tee-nailing is required only to position panels while super strong mastic sets.

Wiring is easy from either side of wall. Cable is nailed into saw-cut groove.

High insulating Cemex panels sheath roof quickly and acoustical ceiling is "free."

Cemex load-bearing walls eliminate studs, save from 11 to 14% over conventional construction.

Ninety-one (91%) percent of framing lumber can now be eliminated in single story construction by using CEMEX, the versatile cement-bonded, wood fibre building slab that insulates, decorates and has high acoustical properties. Uniform Building Code approval of CEMEX for load-bearing walls means studs, siding and separate insulation are replaced by CEMEX at lower cost. Builders using CEMEX can lead in the housing field, out-distance competition at any price level from $8,000 to $80,000. Be the first in your territory to capitalize on this sensational new development.

Fill out the coupon below for full information.

MATERIALS OR SERVICES BY U.S.G.

Going up! On eight out of 10 jobs you’ll find the U.S.G. brand. Why? Because, as this majority of builders will testify, U.S.G. supplies the materials and the services for better, more profitable building. U.S.G. maintains the facilities to get materials to the job on schedule. And U.S.G. research is continually finding new ways to save labor, speed construction. If you’d like the benefit of U.S.G. know-how on building problems you now face, write:

2322 W. Third St., Los Angeles 54, California, Dept. ABW-96.

UNITED STATES GYPSUM

the greatest name in building
New Twist for Christmas Trees. There's Holiday magic in this "Karosel" revolving Yule tree base. Your lighted tree pirouettes in tune to cheery Christmas carols. It's all new and all steel, formed from USS Cold Rolled Sheets by Kresky Manufacturing Company, Petaluma, California. These, and 1,001 other toys and gifts of steel are strong, light and lasting, to give your family a Merrier Christmas.

New Designs for Dwellings. Exciting new shapes... rich, warm tones and textures plus lasting beauty are yours for modern living in a new home, styled in USS Steel. In a quiet meadow near Salt Lake City—a clean-cut case in point. The frame: slender, light-weight columns and beams of steel; ceiling: hollow-ribbed steel deck; exterior walls: panels of porcelain-enamed steel sheets for all-year weather resistance. Building soon? Ask your architect about the advantages of steel.

New Appeal for Appliances. Fathers know best—when it comes to pleasing Mom! Christmas-treat your lady with a work-lightening modern appliance in steel and give her more leisure time to enjoy with the family. Today's appliances designed in USS steels give lifetime service and satisfaction. (Aside to Dad: it's not too late to lighten her work with a major appliance that proudly wears the Steelmark tag.)
"Pre-wired telephone outlets? They’re a standard feature of every home we build!"

—SAYS PHIL JONES, CUSTOM BUILDER OF INDIANAPOLIS, INDIANA

"You’re not offering the buyer a really modern home unless you provide for his telephone convenience," says builder Phil Jones. "That means giving him built-in, pre-wired telephone outlets in key areas of his home, just as you give him pre-wired electrical outlets."

Phil Jones builds custom homes priced from $21,000 up, and every one has from three to five outlets for telephone service. "I let the buyer tell me where he wants them located," he says. "After all, he’s going to use them.

"Pre-wiring makes good sense. People like the idea—and I use it as a solid, competitive sales advantage."

* * *

Your local Telephone Business Office will gladly help you with telephone planning for your homes. For details on home telephone installations, see Sweet's Light Construction File 81/Be. For commercial installations, Sweet's Architectural File, 32a/Be.

BELL TELEPHONE SYSTEM

At left, Phil Jones and telephone company man Bob Hill discuss outlet locations. Below is one of the builder’s handsome “Johnson Meadows” homes.
Nautilus No-Duct

in a new deluxe model priced for

Eliminates cooking odors, grease and smoke without ducts or vents

Now you can offer all prospective home buyers the comforting assurance of grease-and-odor-free kitchens—thanks to this new no-duct range hood, specially designed and mass produced... and priced low enough for your lowest-cost homes!

There's nothing to take up cabinet or shelf space. And, because there's no expensive duct work or installation... no tinsmith, no carpentry, no holes in the wall... the Nautilus No-Duct Hood costs less than the total cost of conventional units.

Using a special Activated Charcoal Filter—plus a Grease Filter—the Nautilus No-Duct Hood removes cooking odors, fumes, grease and smoke, recirculates pure, fresh air. No stains or smudge, no clean-up jobs!

Quality built, of rugged unitized construction, this new self-contained appliance can be easily installed in your sample kitchen... over any kind of range, on any wall, in any type of home or apartment.

- Quiet-operating fan
- Heavy-duty Activated Charcoal Filter
- Lifetime Aluminum Mesh Grease Filter
- Built-in light... pushbutton control
- Available in 30", 36" and 42" lengths
- Colors: Coppertone and Silvertone

Custom Model also available in a complete range of sizes and finishes
Uses same air purifying principle as Submarine Nautilus. The Nautilus NO-DUCT Hood eliminates odors and air contaminants with an Activated Charcoal Filter—the same scientific principle that enabled the atomic submarine Nautilus to stay under water two months without new supplies of fresh air.

Built to present new ideas in modern home equipment, this 1959 Idea Home has Kohler fixtures and fittings in bathroom, powder room, kitchen and service center.

Included are the new Dynametric bath of balanced design for roomy bathing comfort, the circular Radiant lavatory in counter-tops of ceramic tile, Wellworth closet, the space-saving Mayfield sink, and the Glen Falls laundry tray, built into a counter-top for washday convenience. Bathroom, powder room and kitchen fixtures all have durable Kohler all-brass fittings.

All fixtures were installed by the Zien Plumbing Co. for Rite Realty, representing six Milwaukee builders.
It's new!

Du Pont Polyethylene Film

Plus: a dynamic new merchandising program to help you capitalize on the extra sales appeal of moisture-vapor protection

Here's a new high-quality polyethylene film for permanent moisture-vapor protection in your new homes. With tough, durable Du Pont Polyethylene, you can assure your prospective home buyers years of comfortable living through protection against moisture-vapor transmission.

And now, for the first time, you can capitalize on extra sales appeal of moisture-vapor protection. Authorized Dealers handling Du Pont Polyethylene Film can now provide you with a ready-made program to capitalize on.

- the years of comfort through effective protection against moisture and dampness.
- the "extra quality" built into your homes with a nationally known, brand-name product, Du Pont Polyethylene Film. (See items on right.)

When planning your next building start, make sure you include moisture-vapor protection with Du Pont Polyethylene Film ... make sure you capitalize on the "extra sales appeal" of moisture-vapor protection. If your dealer is temporarily out of stock, write E. I. du Pont de Nemours & Co. (Inc.), Film Dept. Room A-12, Wilmington 98, Delaware.

Check these valuable selling aids ...
... now available for your use!

1. "WELCOME WALK IN" STRIP of heavy-duty Du Pont Polyethylene Film protects floors, rugs in your sample home . . . helps promote extra quality.

2. BASEMENT HANG TAG promotes protection against dampness in the walls and under the floor . . . helps remind prospective buyers of quality features.

3. "HIDDEN PROTECTION" ARROW helps your salesmen point out the "extra-quality" protection behind woodwork and walls . . . in crawl spaces.

4. NEWSPAPER ADVERTISING MATS help you attract new prospects to your homes by promoting the years of comfort provided by moisture-vapor protection.
AL | 01-400 Reversible SLIDING DOOR HARDWARE

Meets today's need for methods that save time; cut installation costs! Shown left, the same OT-400 hangers may be used on either 3/4" or 1 1/8" doors just by reversing their positions. "Andersen Windows help me sell 90 homes a year"

... says Spokane builder Fred Wolff

Spokane's leading builder Fred Wolff says: "I believe the fact that for the past 6 years all of our homes have been sold under conventional 75% and 80% loans speaks strongly for the general public acceptance of nationally-known Andersen Windows."
Among the tall pines of Spokane, Fred Wolff built and sold 90 homes last year, with a total gross volume of $1,700,000. Price range: $16,250 to $19,900. He sold 85 of the homes before they were completed. The remaining five were vacant no longer than two weeks.

"Our realtor," says Mr. Wolff, "reports a definite advantage for his salesmen in being able to point to the many outstanding features of Andersen Windows.

"I feel the use of Andersen Windows," continues Mr. Wolff, "has been a contributing factor in my standing as a leading Spokane builder, both in number of homes built and in dollar volume during these past three years.

"In our area," he says, "we have to recognize the need for storm sash in winter and screens in summer. This is one of the reasons why I feel Andersen Windows are made to order for our Spokane climate.

"I feel the ease and speed with which Andersen screens and storm panels can be installed is of real importance to us, and to the ultimate homeowner. Naturally, being self-storing, adds another advantage."

Whether you are building one house or several hundred, put Andersen Windows on your building team. Take advantage of . . .

*Andersen Versatility*—here's the comprehensive line that gives pleasing variety to your homes without major plan changes. *Andersen Quality*—these are windows manufactured to highest quality standards. *Andersen Economy*—gives you easier installation, frequently a lower cost installed than so-called "cheap" windows, and no callbacks. Extraordinary weathertightness saves fuel dollars for your homeowners.

*Andersen Beauty*—they're wood! Beautifully milled, warm, rich-looking wood that radiates sales appeal. *Andersen Acceptance*—do you know this recent survey fact? . . . Andersen Windows are preferred 9 to 1 by new home buyers. Your prospects!

There's much you'll want to know about Andersen Windows. See your lumber and millwork dealer. Or write Andersen direct.
The little house that

IT WAS A LOVELY LITTLE HOME, just right for a young couple. And a very young, newly-married couple was going through it with Mr. Johnson, the builder. After they had finished the inside tour, Mr. Johnson took them outside to see the landscaping, the patio and the driveway.

"Look, Jim," said the bride, "isn't this a nice patio? We could do a lot of entertaining outside next summer if we bought this place. Do you like it?"

"Yes, Ginny, I like a patio a lot. In fact, that was one of the things I especially liked about the house we saw in Pine Trees yesterday. Remember, the house that was just a little bit more money than we had planned to spend."

"I remember and I was so disappointed," she sighed.

"But," brightening, "I like this place just as well and it's not so expensive."

The builder interrupted with, "Well, I try to give my customers as much home for their money as possible. I don't waste time, work and money on a lot of unimportant extras. I find that I can undersell many other builders."

"Glad to hear it," says Jim. "By the way, this concrete patio is pretty big. What about the danger of cracking from frost heave. Is it reinforced with welded wire fabric to guard against breaking?"

"Well," said Mr. Johnson, "that's a pretty heavy, well-laid piece of concrete. I don't think you need to worry about it breaking."

"But is it reinforced," persisted Jim.

"No it isn't," replied the builder. "I found that I could save a few dollars by not using welded wire fabric for concrete reinforcement. This is one of the ways I told you I saved you money—by eliminating unnecessary extras."

"I don't consider Welded Wire Fabric Reinforcement an unnecessary extra. It'll cost me a lot to replace the concrete later if it breaks. Maybe that builder over in Pine Trees had a good reason for asking a little more for his home. I think we'll go look at that house again. Its concrete was
was almost sold

reinforced with USS American Welded Wire Fabric. Thanks a lot for showing us your home, Mr. Johnson."

Like this young couple, more and more homeowners are asking is it reinforced and are deciding that maybe the little extra welded wire fabric cost is well worth it. The use of USS American Welded Wire Fabric will add 30% to the strength of concrete, and it gives you a strong selling point. Use USS American Welded Wire Fabric in the homes you build. Tell your prospects that it insures the protection and appearance of concrete for only about a penny a day on the mortgage life; and that it will add years of service to drives, walks, patios and basement slabs. Tell them that even after the mortgage is paid, the concrete areas will be in good condition.

USS American Welded Wire Fabric is made of cold drawn, extra strong steel wire, and it's prefabricated for quick, easy installation. American Welded Wire Fabric is available in a wide variety of styles and sizes. For more information, see your building supply dealer, or write American Steel & Wire, Dept. 9357, 614 Superior Avenue, N. W., Cleveland 13, Ohio.

NEW FORD TRUCKS

- Certified gas savings!
- Certified durability!
- Certified reliability!
- Certified lowest prices!

You save from the start... Ford light- and medium-duty trucks are lowest priced of the leading makes. And your savings continue. That's because Ford's economy is certified, backed by intensive tests by America's leading independent automotive experts. Just look what's in Certified Economy... and what's in it for you:

Certified gas savings—to keep running costs low! Tests confirm the gas savings of Ford's 1960 6-cylinder engine... the same engine that beat every competitive six in Economy Showdown U.S.A.

Certified durability—to take the toughest jobs you've got! Tests showed, for example, that Ford's new half-ton frame is 23 percent more rigid... that new two-tonner brakes have 20 percent longer lining life!

Certified reliability—to keep your truck out of the shop and on the go! Such key truck components as wiring assemblies were tested time and time again—
Above: 1960 Ford F-600 Van, F-100 Styleside Pickup and C-800 Tilt Cab bring you the best of the new—
new smoother acting brakes, new huskier axles, new higher payloads, new riding comfort

and medium trucks!

FOR '60 with

Certified Economy

proved to have more than three times the reliability of other assemblies.

The certified results of all the tests are in the
"Certified Economy Book" at your Ford Dealer's.
Be sure to see it soon . . . be sure to see the new
Ford Trucks . . . be sure to see the lowest priced
1960 models . . . and you'll be sure to save!

*Based on latest available manufacturers' suggested retail delivered prices, including Federal excise tax, excluding dealer preparation, conditioning, destination charges.

FORD TRUCKS COST LESS
Less to buy . . . less to run . . . built to last longer, too!
HERE'S HOW LENNOX QUALITY PAYS OFF FOR YOU

Lennox dealers follow up each installation with a meticulous adjustment program to assure accurate, trouble-free operation.

The responsibility of your local Lennox Comfort Craftsman does not end with the sale of your homes. After buyers move in, he returns to test the actual performance of the heating and air conditioning units he has installed. He makes whatever adjustments are necessary, handles whatever servicing is required—to assure 100% trouble-free operation. Buyers are kept happier; you're not bothered by annoying complaints and call-backs.

Lennox quality works for you in other ways, too! For example: Your local Lennox Comfort Craftsman (who's engineer-trained) deals directly with a nearby factory. He's always on the job at the right time with the right equipment. He offers the world's largest line of heating and air conditioning equipment plus the selling power of the Lennox name: most widely known, most widely advertised, most widely preferred of all makes in home heating and air conditioning.

Get facts on the Lennox merchandising program, which includes professionally planned advertising materials, in-home displays, personalized builder brochures and billboards. For sample merchandising aids, write Lennox, Marshalltown, Iowa.

LENNOX World leader in indoor comfort for homes, business, schools

©1959 Lennox Industries Inc., founded 1895; Marshalltown and Des Moines, Ia.; Syracuse, N.Y.; Columbus, O.; Decatur, Ga.; Ft. Worth; Los Angeles; Salt Lake City. In Canada: Toronto, Montreal, Calgary, Vancouver, Winnipeg.
IDEAS FROM BOSTITCH FOR BUILDERS—
TO SPEED YOUR WORK,
CUT YOUR COSTS

Install batt and reflective insulation, vapor barriers and many other materials with the medium-weight Bostitch H2B Stapling Hammer. Fastens securely with every blow. More than twice as fast as hammer and tacks. Pays for itself in just a few jobs.

Most rugged Bostitch Stapling Hammer of them all—H4 Heavy Duty Model. Cuts asphalt shingling time on new roofs by half or more, say builders who wouldn't be without it. Every swing drives a 5/8" galvanized staple into the work, spreads the staple legs for greatest holding power.

Fastest way to install insulation, ceiling tile, metal lath, Cornerite, low-voltage wiring, screening, paneling—Bostitch T5 Tacker. Takes staples of five leg lengths. Just a squeeze triggers the T5's powerful spring and drives the staple into the work. Permits placement of staples with great accuracy—even in tight quarters. Builders find dozens of jobs for the T5—and save time and money on every single one!

For light tacking jobs—where there's room to swing and long reach is an advantage—the HS Stapling Hammer gives you fast fastening action. Light—yet strong enough to drive staples with 3/8", 1/2" or 5/8" leg lengths into soft materials or wood.

Fasten it better and faster with BOSTITCH STAPLERS AND STAPLES

832 BRIGGS DRIVE, EAST GREENWICH, RHODE ISLAND
Equipped with carbide-tipped combination bit and micrometer guide, Porter-Cable Router accurately trims overhang on laminated plastic tops. Same bit trims flush or 25° bevel.

With over 150 available bits and cutters, tremendous variety of edge mouldings are possible. Corner round and standard ½” rabbet cuts for cabinet doors are each made in one pass with Router.

With straight bit (29 sizes to choose from), dadoes or grooves can be made in just one operation. Magic Router Guide attachment (shown above) makes the job easy.
Produce "Custom-Quality" Cabinets and Built-Ins at a pre-cut price—with Porter-Cable ROUTERS...

Use the Porter-Cable Electric Router right-on-the-job to perform a wide variety of time and cost-saving jobs... from rabbeting cupboard doors, edge routing, to fast and accurate cutting and trimming of plastic laminate tops on cabinets, sinks, and vanities.

Porter-Cable offers the largest line of professional routers—there's a model, precision-designed and built to fit every need. And the wide variety of attachments and cutters, makes a Porter-Cable Router the most versatile and useful production tool in any shop, on any job.

"BUILT-INS"

A real selling extra for home builders—dovetailed drawer joints. Quickly and accurately cut with Porter-Cable Router and precision Dovetail Templet.
Now! From 3M... a complete line:

ADHESIVES AND SEALERS
FOR EVERY BUILDING NEED!

EXCEPTIONALLY WATER-RESISTANT ceramic tile adhesives provide fast bond-strength build-up, yet offer ample open time for work at normal pace. 3M tile adhesives trowel like butter, permit grouting on the same day. Test CTA 11 and 12 yourself!

COST-SAVING COVERAGE is easily and quickly achieved with 3M Vinyl and Rubber Tile Adhesive—up to 225 square feet per gallon. Wood block flooring adhesive EC-194 covers about 40 square feet per gallon. They're ideal for above-grade wood, concrete or radiant-heated floors.

QUICK-GRIP Roltite® brand contact cement keeps laminated plastic counter tops from warping or peeling! Highly water resistant; provides exceptional coverage; eliminates need for clamps, presses or other heavy equipment. Available either as solvent or water-based compound.

FLEXIBLE Sealer EC-800 for heating and air conditioning ducts can be stretched twice its length before breaking when dry. Sets up firmly at duct joints; won't flow out under pressure. EC-800 can be applied with either brush, flow gun or putty knife.

Look to 3M as your single source for a wide range of adhesives and sealers for a variety of building applications. Call your 3M Field Engineer, or for free literature, write on your company letterhead to A.C.&S. Division, 3M, Dept. YE-129, St. Paul 6, Minnesota.

Who Can Say What Makes a Best Model House?

"It must be an exciting showcase that turns a prospect into a buyer," says JOSEPH B. MASON, Editor, AMERICAN BUILDER.

"It must be well designed — that's fundamental," says GERALD GEERLINGS, A.L.A.

"It must display extras like built-ins, equipment," says ERNEST B. NORMAN, National Home Week Committee.

"It must demonstrate quality materials, plan, and workmanship," says JIM PEASE, Pease Homes.

"It must be cleverly merchandised," says DAVE FOX Merchandising Committee.

"It must point up the hidden as well as the visible values," says BOB SCHMITT, Research Institute.

These Men Can

THEY'RE YOUR EXPERTS!

And for many long hours in a New York City hotel they sweated through hundreds of Best Model Homes entries. They checked your houses for outstanding exterior design, floor plan, construction methods, materials, equipment and merchandising techniques. Their goal? To select 37 model homes under $16,000, and from $16,000 to $40,000, best expressing the purposes of National Home Week. Result of all this painstaking effort? A big special award, three top award winners, and 15 award-of-merit winners in each of the price categories.

Here are the Best Model Homes they chose
Builder: Bob Scarborough

Place: Haddonfield, N.J.

Price: $15,500 (without land)

The judges say: “This colonial is a terrific value. The buyer gets the roominess of a two-story house; and privacy, without sacrificing the pleasures of indoor outdoor living. He also gets one and a half baths, three bedrooms, a living room and a dining room, kitchen, laundry room, and work shop. An added bonus is a terrace opening from the family room and kitchen at the rear of the house. Other features include a range, oven, disposer, fan, dishwasher. And the whole package comes in a planned community with a swimming club, lakes, medical center and school sites—all just 20 minutes from Philadelphia.”
**Curb Appeal:** The house is one of four models in a planned colonial community on the site of an old farm. Realistic colonial touches abound: shutters that look as though they could close, coach lamps, small-pane windows.

The salt-box roof adds to the Colonial image. Scarborough bucked a split-level trend with the house. It’s one of the first two-story models tried by a development builder in his area. But sales since opening support his judgment.

**Over $16,000**

**Builder:** Clayton Powell

**Place:** Savannah, Ga.

**Price:** $19,900 (with land)

**The judges say:** “This development builder has an outstanding contemporary. Its rangy design includes many custom touches—a built-in vacuum-cleaning system, intercoms, sliding glass doors, a private solarium, and a fireplace.”

**Free Flowing:** “L”-shaped plan separates sleeping areas from living areas. Four glass doors accent indoor-outdoor living: two open a master bedroom suite to a private solarium; two more open the entire living area back of the house to a rambling patio enclosed by a rustic wood fence.
AWARD OF DISTINCTION
over $16,000

Builder: Joseph L. Eichler
Place: Sunnyvale, Calif.
Price: $19,200 (without land)

The judges say: “Glass sells this contemporary. It integrates the house with its natural surroundings, and figures in the economy of design, too. Glass walls envelope an open-sky courtyard on three sides to create a focal point for a strong indoor-outdoor living motif. Post-and-beam construction provides a natural framework. One fine feature is a single-car garage alongside a single-car carport—this idea should interest even the one-car family because of the bonus utility space. Other features that contribute to the total contemporary effect include wide overhangs, gently sloping gables, and plywood siding. Over-all, you have to call this a pleasing house.”
VARIETY: windows flank fireplace on both sides, break flat plane of living-room wall. Rugged post-and-beam construction counterpoints lightness of glass curtain wall.

BREEZY PLAN: wrap-around floor layout focuses attention on open-sky inner courtyard. Plan makes maximum use of space-creating glass without sacrificing privacy. Entertainment areas are zoned off from sleeping and living areas. Master bedroom—actually a suite—features a sliding glass door that leads to a private patio. Central bath-utility core services cluster of three large bedrooms.

WIDE OVERHANGS, obscure glass panels, create a striking entrance effect. Garage doors echo the theme of restraint.
AWARD OF DISTINCTION
under $16,000

Builder: Centennial Construction Company

Place: Dallas, Tex.

Price: $15,550 (without land)

The judges say: “These builders went all out on styling. They obviously anticipated a national shift to colonial. So their designers cleverly put a traditional envelope around a functional floor plan and promoted the house as a colonial. They gave the house the full professional treatment, too, from design consultants to professional advertising men. These extra efforts show up throughout the house.”

SMART INTERIOR: professional interior decorator carries colonial theme indoors. Builder, however, adds modern built-ins and equipment to give buyer an up-to-date house that has a comfortable, lived-in look.
SPACIOUS PLAN: design centers around a big family room that opens through sliding glass doors to a rear patio. Corridor kitchen complements a flexible dining arrangement. Big rear-entry two-car garage includes a spacious utility and storage area. Long corridor services and separates four bedrooms and two large baths.

VARIED DEVELOPMENT: this rangy contemporary is one of four models the builders put up in the development. Full media promotion drew over 20,000 people to North Estates during opening week. Promotion went over so well builders sold a total of 145 homes during the first 120 days in a subdivision designed for 245 houses. The Century Modern (above) sells for $15,450 without land. Centennial sells lots at Town North for $2,700.
FIRST AWARD OF MERIT
over $16,000

Builder: Gerholz Community Homes, Inc.
Place: Flint, Mich.
Price: $22,000 (without land)

The judges say: "Talk about equipment? Just look at what this builder includes for the price of this house. The all-electric kitchen contains a built-in dishwasher, disposer, oven, cooking top, refrigerator, and freezer. The laundry has an automatic washer and dryer. Other selling extras include: intercoms, thermopane windows, prewired telephone and TV outlets, drapery and carpeting, luminous ceiling panels, valance lighting, skylights, and fully landscaped lots. The large (300 to 600 sq. ft.) patio has a built-in barbecue."

SPACIOUS LAYOUT: traditional exterior styling softens the functional floor plan of this contemporary. Family room butts spacious terrace, is naturally separated from the sleeping areas by the kitchen, dining room, and living room. Garage is backed by a spacious utility room and a handy garden-tool storage room. A two-bath utility core services the three bedrooms. Second door in master bedroom opens to the terrace. Fluid traffic plan makes for easy movement in the living area, complements flexible dining plan, doesn't disrupt private zoning of the three-room sleeping area. Concrete walkway juts from driveway, moves parallel to house and elbows around to door.
FIRST AWARD OF MERIT
under $16,000

Builder: Huber Homes, Inc.
Place: Dayton, Ohio
Price: $11,995 (without land)

The judges say: "Smart merchandising sells these low-cost, all-brick houses. Huber's prospects are exposed to both the hidden and visible values of the house through sales and promotional literature put out by national manufacturers. Huber further pounds home sales points through his own booklets, direct-mail advertising, and a monthly publication called Hub. But the builder doesn't sell the house alone. His promotion sells the house as an integral part of an attractive and well-planned community."

COMPACT PLAN: design economies (such as putting the kitchen in front of the house to eliminate a rear entrance) enable the builder to offer his buyers 1,400 sq. ft. of living area. The house, for the money, boasts an unusually spacious living-dining "L." Four big bedrooms surround a two-bath utility core. The garage at the front of the house acts as a street-noise baffle for the sleeping area. Driveway doubles as a walkway; cuts constructions costs; permits builder to add terrace to the back of the house. Sliding glass doors separate the terrace from the living area. Brick-veneer walls rest on concrete grade beams that enclose the slab. Layout proves highly economical.
SPECIAL AWARD: an outstanding

Builder: Franklin Builders
Place: Wilmington, Del.
Price: $11,990

The judges say: “We couldn’t pass these houses by. They represent a sound advance in row housing and seem to us a fine answer to housing geared for open occupancy. They solve many relocation problems facing plan-
CROSS STAIRWAY: stairway treatment eliminates unsightly corridor effect common to old-fashioned railroad-type flats.

SMART LIGHTING: kitchen wall doubles as facade, making possible natural lighting above and below the wall-hung cabinets.

row house

ners of urban redevelopment and slum-clearance projects. Their most striking feature is the imaginative use of space despite limitations of 16- to 18-ft. lots. We can't commend them too highly. Builders can profit by them.

FLEXIBLE DESIGN: town-house effect divides living functions vertically: basement doubles as utility and play area; first floor is a family area; top floor contains sleeping quarters. Flexibility begins in the basement. Possibilities include a bedroom and playroom, two bedrooms, or a bedroom and a garage. Imaginative use of space becomes more apparent on the first floor, where cross stairway eliminates railroad-flat effect. The stairway rises to the top floor to service three spacious bedrooms and a bath. Cross sections illustrate economy of design and construction that makes possible $11,990 to $13,990 price range. Also, off-street parking is provided for the entire development. This adds attractive selling feature to the houses.
AWARD OF MERIT

These builders compete—and succeed—in the industry's toughest market

JUDGES COMPLIMENTED the "well disciplined" look of this $23,400 (with land) model. Long porch, dormers, columns, combine to give home an impressive look. Builder is Cornell Development Corp., Riverton, N.J.

SPACE was the primary consideration in this Florida home. It's fully air conditioned, has a pool, and plenty of space for entertaining. Builder Perry E. Willits of Miami Shores prices it at $22,250, including the pool.

STORY-BOOK STYLING still sells well in California, and Bilmar Homes, Inc., Woodland Hills, is giving their customers what they ask for. This model, at $19,500 without land, also gives lots of space for the money.

MASSIVE ROOF, with novel clerestory strip, gives this $20,900 (with land) a low-slung look. Concrete strips avoid giving a paved look to the patio. Builder is Conejo Valley Development Co., Thousand Oaks, Calif.

CONSERVATIVE STYLING is the strongest selling point for this Savannah colonial. Tuck-away treatment of garage gives a sense of spaciousness. The model is priced at $19,500 without land. Builder is John Ahern.

JUDGES FOUND the $18,325 (w/o land) price tag on this model hard to believe. Living areas focus on cantilevered deck; split-level design makes maximum use of space. Builder is E. B. Vaughters of Seattle, Wash.
WINNERS: over $16,000

TRESTMAN REALTY, of New Orleans, offers this compact model at $16,800 without land. Used brick gives the spacious home a substantial look. Judges were impressed by its easy maintenance features.

SWEEPING ROOFLINE gives sense of space to this California contemporary. Extended roof shelters entry, covers storage wall, frames enclosed patio. Price: $24,300. Builder: Harlan Homes, Broomfield Hts., Calif.

RISING LAND PRICES have promoted a trend back to two-story homes. Judges thought this $20,000 (without land) model a good example of current efforts. Builder is George M. Holstein, Costa Mesa, Calif.

YOU CAN BARELY SEE the house for the trees. But builders Beir-Higgins of Allendale, N.Y., are among those who believe that existing trees are an effective sales tool. The judges agreed. Price is $25,900 (w/o land).

DESIGN has always been the strongpoint of Don Scholz' homes, and his "Mark '59" is considered the bellwether of the prefab industry. This one, at $24,000 without land, takes a prize for Toledo's Valleybrook Homes.

NEAT LINES of this $19,450 (w/o land) model in Palo Alto, Calif., confirm trend away from gingerbread. Spacious floor plan, shake roof, smartly scaled exterior swung the judges. Builder is Brown & Kaufman.

PEOPLE IN FT. WAYNE say, "Nobody builds better homes than the Worthmans." Judges saw the cutaway wall sections in this $22,625 model, were impressed. Masonry veneer is flowerpots set in mortar.

OVERHANGING EAVES give sheltered look to entry of this model. "L"-shaped plan separates sleeping and living areas. Judges felt $20,750 (w/o land) price represented real value. Builder is Walter Liese, San Antonio.
The common denominator in these homes is quality—in design and construction.

POST-AND-BEAM construction cut framing costs in this California model. Builders, Lincoln Lumber Co., Oakland, used variety of materials to create handsome entrance. Home is priced from $11,250 exclusive of land.

SIXTEEN alternate elevations are available for this solid model. Priced at $12,000 without land, it offers a thousand sq. ft. of living area. The garage doubles as a play area. Builder: Bollinger-Martin, Louisville.

TEXTURED ROOF gives this house a massive feeling. Price is $15,100 (without land) in Gardena, Calif. Builder is Leo J. Shanahan and Sons. Judges liked use of garage as a sound baffle for sleeping area.

HERE's an unusual split. High-rise post-and-beam framing let the builders add a carport and improve the scale of the home. The model is priced at $15,700. It's built in Reading, Mass. by Massachusetts Builders.

MANY CONSIDER John Long the Southwest's most savvy builder. This Phoenix, Ariz., model shows you why. It's priced at $12,665, sports a cedar shingle roof (popular in the area), boasts lots of living space.

JUDGES FELT this spacious model ($15,990 without land) was an excellent buy. An unusual feature in this price range is the tile roof. Rutenberg Construction Co.—Clearwater, Fla.'s biggest—is the builder.

JUDGES THOUGHT this $15,400 (without land) model was extremely well built. Imaginative treatment of entry and windows belie moderate cost, give the house a disciplined look. Builder: Tricon Ltd., Sarnia, Ont.
WINNERS: under $16,000

STRIKING COMBINATION of stone, glass, and exposed-beam construction caused judges to cite this entry by Branden Enterprises, Hollywood, Calif. The house sells for $12,995 without land—and is well worth it.

CLEAN-CUT STYLING of this model enthused the judges. Priced at $10,375 without land, it offers a functional plan, plenty of space. Ease of maintenance is another sales feature. Builder is Janis Co., No. Miami.

CONCRETE-BLOCK screen gives luxury touch to this San Antonio model. Home offers 882 sq. ft. of indoor area for $10,350. Patio around two sides of house adds 400 sq. ft. Builder: Ray Ellison Homes, Inc.

THIS HOUSE was efficiently planned, efficiently built, the judges said. It offers substantial living area for $14,850, without land. Builders Braun and Aldrich find it sells well in discriminating north Illinois.

THIS COMPACT MODEL sells for $8,250 with land in Canton, Ohio—less than $10 per sq. ft. of living area. The home has three bedrooms, and an 18’x11’-6” living room. Builder is Arnell Construction Co., Canton, Ohio.

THE JUDGES AGREED that this model represented a good buy at $10,750 (excluding land). Effective use of space is its strongest selling point. Builders are Bruscino Eastgate Gardens, Inc., Bay Village, Ohio.

THIS IMAGINATIVE MODEL ($8,150 without land) has four bedrooms, 1-3/4 baths, two large storage areas. Builders, Lusk Homes, of Tucson, Ariz., believe in providing space, letting owner choose appliances.

TEXTURED BRICK gives a rugged appearance to this Texas ranch ($14,250 with land). Living area is centered around a rear patio; “L” shaped plan separates living and sleeping areas. Beck Const. Co., Odessa, Tex.
A house divided makes a salable floor plan

How important is a good floor plan to a model house? Very, said the judges in AMERICAN BUILDER's 1958 Best Model Homes Contest. To prove it, they awarded a next-to-the-top prize to this well-laid-out ranch.

Key to the flexibility of this plan lies in splitting the sleeping areas. Architects Harris, Rice, and Campbell of Los Angeles moved the master bedroom and its bath to the formal end of the house, put the family room and kitchen across the middle. Result is a living area that can be opened wide for entertaining or closed to separate children and adults, and a sleeping plan that gives complete privacy to the master bedroom.

Grandview Building Co. builds this house in Palos Verdes, Calif., sells it for $18,200, not including land.

FLOOR PLAN is divided into four distinct areas: master bedroom suite (1), formal living room (2), family room and kitchen area (3), children's sleeping area (4). Note the excellent traffic flow pattern.
VIEW OF THE KITCHEN from the back door shows a compact, workable arrangement. Pass-through leads to the family room, louvered doors open to the front entry.

**Brand-name products used in the Blueprint House**

- Lennox warm-air furnace
- Alumi-Bestos heating ducts
- Minneapolis-Honeywell heat controls
- Schlage door hardware
- Mission hot-water heater

(Continued on page 136)
BUILT IN EARLY '50s, Sanderling Beach Cabana (Sarasota, Fla.) exemplifies Rudolph’s pioneering in plywood shapes.

PLYWOOD COMPONENTS... New shapes of things

VAULTS of Hook Beach House span 6'10". They were made by bending ½" plywood over a temporary frame. Two 4'x8' sheets were glued and nailed together, with joints lapping 2'.

GIRDERS 2 FT. THICK span 32 ft. to create a spacious living-family area. Projecting beyond the clerestory windows, the girders rest on porch columns, visible to the rear.
No one doubts that houses will be built more and more of larger parts rather than small pieces.

That's been the trend for years—will be for years to come.

Today, one of the first "larger parts"—the 4'x8' plywood sheet—is being used to make even larger parts, or components.

There's been a chain reaction—beginning with designers like Paul Rudolph...

All photos by Ezra Stoller, Rye, N. Y.

THIN PLYWOOD SHELLS span 10 ft., offer beauty, economy. They're made of 2 layers of 4'x10' sheets of 3/4" plywood.

Paul Rudolph (left, below)—head of Yale's architectural department—is one of America's most inventive designers.

In the photo, he's pointing out to AMERICAN BUILDER's Joe Ferche how he uses clerestory windows to make an advantage out of a disadvantage—the considerable depth of long-span box beams made of plywood.

"People thought we were out of our minds when we started using large stressed-skin panels and roof vaults of plywood," says Rudolph.

Yet today there is growing recognition that bending plywood into vaults—or gluing it over frames—brings out the maximum strength of the material (and gives economy, easy assembly, and simple, clean good looks).

First broad acceptance of plywood components has been in the light commercial field. Only now are components beginning to find their way into houses...
Warner and Don Fleishman—10-house-a-year builders—were quick to see how plywood vaults could contribute to a house. Here, they show editor Ferche how vault clerestories give openness and light to inside kitchen and family room. In this year’s Houston parade, they were given the theme: “Plywood and Plastics”—used plywood shapes in both vaults and box beams. “We’d never have gone to the trouble of site fabrication of the vaults if they were available locally at competitive prices,” says Warner Fleishman. Yet the builders had no choice.

Small custom builder:

“Standardized parts don’t mean

“We find, building in our price range ($30,000 and up), we have to give our buyers something different,” say the Fleishman brothers. “That’s why we go to the trouble of detailing the ends of the projecting box beams with ½” x 5⅜” trim, use grilles for solar screening.”
Lacking ready-made components, they laminated their own ribs (6 plies of 4" fir plywood), fitted them into beveled troughs—over which they bent and nailed 3/8" plywood sheets. Fleishmans admit it was hard to do with the labor they had, but claim effect was worth it.

Much easier were plywood box beams. Two men made beams for the whole house in one day. (Temperature control was minimum in south Texas.) Beams are strong as two 2x12s, with one-third the weight. They support vaulted and flat roof areas.

standardized houses"

Bird's-eye view and plan show how vaults were used functionally over inside family room and kitchen. Exterior-wall finish is Texture 1-11 with contrasting brick. Fleishman brothers look forward to the day when they can buy stock components they want locally. Components will let custom builders like themselves—who build on scattered lots—build with parts, still get the flexibility they need.
"My objective is to build a house in no days, with no people, with no dollars," Clayton Powell tells AMERICAN Builder. And this Savannah builder is coming closer and closer to his goal with plywood components. "In wall components, a thin plywood sheet does the work of double 2x6's or better over window and door openings. Our building operation is now geared to a 14-day schedule. With components, we're dried-in the first day."

100-house builder:

"I build components for myself and 15 other builders, too"

"Components don't limit me in the houses I build. They can be
Powell builds components in his own shop (an old railroad warehouse). Advantages: less skilled labor, ideal arrangement of tools, jigs and materials, easy control of temperature and moisture for gluing.

"We're getting into an erector-set type operation," says Powell. "For instance, we plumb up one wall, then these truss-cleats automatically line up the opposite wall. Saves time, cuts mistakes."

Another reason our shop is efficient is that we stockpile components," says Powell. "That lets us maintain steady production. And, when an order comes in, we can fill it immediately."

If you produce components efficiently, you probably produce more than you need. Powell's components company sells to 15 other builders. Manager is Ernie Prow (right) formerly of National Homes.

Small custom builders can buy Powell's components from catalog pages. They get an edge on their competition; they know what their on-site costs will be. Powell is expanding his line for the '60s. (AMERICAN BUILDER for Feb., 1960 will have details.)

big or small – ranch, colonial, modern, splits…"
Lu-Re-Co components, available to builders through local lumber dealers, now include three types of roof components employing plywood. Left to right, they are truss, cathedral beam, and rigid bent. Beams are prefinished with a hardwood veneer, come divided lengthwise into halves for easier erection. Bents (used in house, right, for framing garage roof) lend themselves to low-cost farm construction as well.

New components fit Lu-Re-Co

Basic Lu-Re-Co component is a 4' bearing-wall panel. Normally, panels come with sheathing. Siding is applied when panels are up. Here a 1/2" plywood skin performs both functions.

Stressed-skin roof panels—also new to Lu-Re-Co—span 8' between cathedral beams. They're insulated. Top skins are 3/8" plywood. Bottoms are 5/16" treated plywood.

SECTIONAL VIEW from living-family area: new ceiling and floor systems complement Lu-Re-Co panels. "MDOP" indicates plywood surface was treated for painting.
Douglas Fir Plywood Association is building this research house (in Champaign, Ill.) in cooperation with Lumber Dealers Research Council and Plywood Fabricators Service. It’s a showcase for box beams, stressed-skin panels, rigid frames, and a panelized floor system.

system like a glove

New “instant floor” system relies on hollow, light beams for support. Beams range in size from 12” to 16”, depending on their span (up to 24’). They are spaced 4’ o.c.

2x4 ends of panels “catch” beam edges and butt 2x4 splines toe-nailed to tops of beams.
To tie panels to beams, overlapping plywood panel is nailed to spline.
In photo at left, a folded-plate roof goes up for a residence. Above, a vaulted roof unit for an apartment house comes out of the gluing jig. The larger the component, the more important that it be built in a shop, under controlled conditions.

Moisture content of truss member is checked out by quality supervisor. It must not exceed 18% of manufacturer's specs for the glue. Prime requisite for membership in new quality control group is ability to manufacture to specifications.

... industry
One dome-like component roofs an entire classroom. Properly built, such components save time and money, last indefinitely. But 25 years’ watch-dogging the plywood industry by the DFPA has underscored the need for quality control in fabrication.

Small-town lumber yard serves as an outlet and assembly point for components for local drive-in bank. Diamond-shaped, stressed-skin panels were fabricated in a shop several miles away. Operations like this probably will become common.

shapes blossoming out all over...

Roving quality engineers pull plugs from random panels at nonvital spots. If panel is substandard, fabricator’s quality label can be withdrawn.

Map shows growth of DFPA’s Plywood Fabricators Service, Inc., into a nationwide network of fabricators, supported by laboratories and engineering services. Pilot program started in March; membership has since doubled. PFS is a nonprofit affiliate of the Douglas Fir Plywood Assoc. It qualifies fabricators who prove they can produce components to rigid specs.

launches program to guard quality
CONTEMPORARY STYLING, with medium knots, is just right for today's ranch homes. It fits naturally into the growing trend toward informal entertaining in family and recreation rooms.

**Styled for Today...**

3 versatile designs

Weyerhaeuser 4-Square **IDAHO WHITE PINE** comes in Contemporary, Traditional and Formal Styling

Add that extra eye appeal that makes homes easier to sell... with smartly styled Idaho White Pine paneling by Weyerhaeuser.

You get a choice of three distinct types of natural wood characteristics in this new packaged pine paneling. Each meets the specific requirement of style decor... from traditional Colonial to clean-cut contemporary. Weyerhaeuser has done the additional selection—after careful lumber grading—to give you a choice by appearance.

This modern version of popular Idaho White Pine comes to your job clean and unmarred because it is packaged. Available in 7' or 8' lengths and in 6", 8" or 10" widths. Each package contains 5 full lengths and another layer of two pieces. One man can easily handle a package. Each piece is kiln-dried and precision finished—it has to be to carry the Weyerhaeuser 4-Square trademark.

Panel your homes the modern way for greater saleability. Ask your Weyerhaeuser 4-Square Lumber Dealer about packaged Idaho White Pine paneling.

Weyerhaeuser Sales Company
First National Bank Building / St. Paul 1, Minnesota

CLEAN, UNMARRED pieces of carefully selected paneling are yours when you buy Idaho White Pine paneling in this modern package.
FORMAL STYLING, generally clear with small scattered natural characteristics, is ideal for either the clean, modern look or for traditional elegance. It can be stained any natural wood finish or given one of the new high color treatments.

in packaged pine paneling

TRADITIONAL STYLING, with small, tight knots, gives a warm, friendly appearance to any type of room. Perfect for Colonial interiors, excellent in many modern decorating schemes.

DUR-O-WAL
Rigid Backbone of Steel For Every Masonry Wall

Three new ways
to partition,
screen, or fence
—either indoors
or out

Decorative partitioning will be a "big item" in 1960 homes. This cutout screening (which is old news to West Coast builders) has crossed the country to reach buyer acceptance everywhere. It can be bought in panels, or made of blocks or tiles. Materials range from concrete block to clay tile, ceramics, wood, aluminum. The idea originated as a sun sneezer and was used outdoors. But now it’s gone fancier, and in lighter materials makes a pleasant, airy, indoor divider.

1 In aluminum—"Karvalum" screens can be ordered in quantity from two standard widths, 3' and 4' and two standard lengths, 8' and 10'. Thickness is ¼". Comes in variety of patterns. Can be anodized in gold, satin, copper, and in colors. See matching photo and details.

2 In ceramics—the "Vista-Flex" screen unit. Designed for interior or exterior use, it comes in six standard colors in high-gloss glazes. Standard 4", 8" sizes; custom shapes from 3" to 12". See photo.

3 In clay tile—"Sol-R-Wal" solar screens. Six basic forms (see drawings, right) can be combined into any number of patterns. Use indoors or out.
ONE INSTRUMENT
FOR ALL YOUR SURVEYING

This rugged, two-in-one instrument can do all your surveying work from start to finish ... run boundary lines, layout foundations, find elevation differences, level up excavations, align foundation piers, determine and set grades, plumb vertical lines, walls, uprights, chimneys and poles, run sewer and drainage lines, landscape ... all kinds of jobs, big and small.

An unusually rugged instrument, the Dietzgen Builders' Transit-Level will give years of accurate trouble-free service. Strongly ribbed, it combines lightness with great strength. The Internal Focusing Telescope is sealed against dust and moisture ... lenses stay clear even around dirty construction jobs. When converting the instrument from a Transit to a Level, a unique locking device eliminates possible errors. And this rugged, accurate all-purpose instrument is exceptionally simple and easy to use ... no special mathematical or technical training is needed. Each Dietzgen Transit Level is furnished with a free, easy to understand, self-teaching instruction manual containing complete operating instructions plus practical problems of many important applications.

For an all-purpose instrument with ease of operation, simplicity, ruggedness and accuracy, the Dietzgen Builders' Transit-Level is unexcelled. Write or call for more information today.

Takes up little space

“Slim Jim” recessed gas heater is four-way air-flow vented unit of 50,000 btu. Warm air outlets are high; return air can be taken in through low front grille or side “knockouts.” Side outlets are set back for various types of installation. Requires 18x18” floor space.

—Holly General.
Circle No. D4 on reply card, p. 102.

“Built-in” plastic drawers

Clear plastic Uni-drawers come in sets designed to organize storage space. Drawers glide smoothly on upright metal supports which are easily screwed into place. Complete grouping can be installed in less than hour. Each drawer is 15½” long, 10” wide, 6” deep. Supports in four heights.—Result Mfg. Co.
Circle No. D5 on reply card, p. 102.

Oven has own exhaust blower

This built-in oven has its own exhaust blower system. Eliminates separate installations for oven and hood. Improves appearance, is more efficient. Filter material is of stranded aluminum, framed with aluminum channels. Easily removed.—Thermador Electrical Mfg. Co.
Circle No. D6 on reply card, p. 102.

“Planned Profit Package” offers you 6 big advantages

GENERAL ELECTRIC PRODUCT SERVICE
Once General Electric appliances are installed, your General Electric distributor or dealer relieves the builder of all product service responsibility. No appliance repair or maintenance worries. This means savings after the sale...more profit for you.

PLUS these 5 big bonuses:

Power of brand preference. Among the homebuyers...Women think General Electric makes the best home appliances. Among appraisers...Lending institutions in all parts of the country use General Electric’s high quality as a basis for granting high appraisals.

Planning and styling help. Special Custom Design Service includes help with layouts, perspectives, color coordination and space planning.

Savings on labor and installation. General Electric “Straight-Line” Appliances provide flexibility—are easily and conveniently installed.

Complete merchandising program. Merchandising tools, widespread advertising and publicity help create model home traffic for you.

Product availability. 100 General Electric distribution points all over the country assure you wide selection and availabilities.

As an authorized builder of “Live Better Electrically” MEDALLION HOME, you get prestige and promotional advantages. Ask your local utility about this program.

NEW PRODUCTS

Steel fallout shelter
Nuclear fallout shelter for family of six costs approximately $1,500. Made of welded steel, designed for installation 3' below ground. Has submarine-type airlock at ground-level for easy access through steel tunnel. Hand-operated filtering apparatus decontaminates air. Ample storage space.—Koven.
Circle No. D7 on reply card, p. 102.

Dome is prefabricated
Low-cost dome is completely prefabricated for quick assembly. Package contains 19 plastic-faced triangular plywood panels. Structure is open-type, erected on steel tubular legs. Requires no internal supports. Makes 23 ft. of unobstructed cover, provides 365 sq. ft. covered area.—Pease Woodwork Co.
Circle No. D8 on reply card, p. 102.

Roof vent lasts lifetime
Prefabricated aluminum ridge ventilator provides continuous vent along entire peak of roof. Improves temperature control. Eliminates ridge shingles, cutting and framing of roof openings. Reversed louvers keep out rain and snow. Rust-proof. Fits any pitch-type roof. In 8', 9', 10', or desired lengths.—HC Products Co.
Circle No. D14 on reply card, p. 102.

Form board is flexible
Permanent form board faced with glass cloth is designed for poured-in-place gypsum and aggregate concrete roof decks. Flexible for easy installation, makes ceilings resistant to damage, fire. Adds insulation and soundproofing. Regular 32x48x1", or special order.—Owens-Corning Fiberglas Corp.
Circle No. D9 on reply card, p. 102.

Collects solar heat
Device for collecting solar heat consists of "tube-in-strip" panels joined together. Small panels are 10"x16" strips of copper containing inflatable copper tubing integrated with the metal. Joined with simple tools, easy to inflate. Ideal for heating swimming pools.—Year-Round Comfort, Inc.
Circle No. D12 on reply card, p. 102.

Transit-level has new base
New model level-transit has aluminum-alloy base enclosed for protection from dirt and moisture. Also, smooth finish for easier cleaning. Retains previous features—12-power telescope, either-hand rack and pinion focusing, built-in sunshade. Price: $55.40.—David White Instrument Co.
Circle No. D13 on reply card, p. 102.

For better door control
Pocket-door installation package contains double roller hangers with self-lubricating bearings and "noisless" nylon rollers. Also includes telescoping header, track and jamb brackets for doors 2' to 3' wide. Metal cutting and drilling are eliminated. Only ordinary tools required.—American Screen Products.
Circle No. D11 on reply card, p. 102.

Provides outlets anywhere
Multi-outlet strip is convenient way of adding more circuits during remodeling without breaking walls. Also solves wiring problem where curtain-wall sections are installed. Consists of metal channel with outlets spaced within raceway. Easily attached to brick, masonry, steel, or wood.—The Wiremold Co.
Circle No. D15 on reply card, p. 102.

Will shape any material
This round, file-type tool will enlarge holes, file, or cut rounded and concave edges. Can be used on wood, aluminum, plastics, plywood, asphalt tile. Individually hardened cutting teeth file smoothly. Cutting edge takes shavings away from work so that they do not clog teeth. Diameter, 3/8".—Stanley Tools.
Circle No. D10 on reply card, p. 102.

AMERICAN BUILDER
In a race against time — to increase profits — no other industrial utility tractor can keep pace with the new Massey-Ferguson Work Bull 204. This 40-h. p. tractor has exclusive Instant Reverse with torque converter. You simply press one foot pedal to go forward — and another to go reverse. Acceleration is built in each pedal. Select one of four different gear ranges to fit your job requirements, and never waste time, power, or momentum in shifting, clutching, or pulling levers. The famous partners in profits — Massey-Ferguson Davis Loader and Backhoe — are designed to perfectly match the Work Bull 204. It's an unbeatable rig. Try it . . . compare it . . . you'll buy it!

**PAY OFF AT BOTH ENDS**
Massey-Ferguson 220 Backhoe handles jobs with ease that others can't tackle. 14,000 lbs. breakout whips the toughest assignments. For flush digging, you can move the entire mast, boom, and seat to the side in only a few minutes. It increases your bidding power . . . reduces manpower.

Why Wait? Set a Date—We'll Demonstrate!
NOW! Miter mishaps gone for good!

Precision Trimming Guaranteed with the amazing new DOSCH Custom Cutter

Coating revives shingles
Worn-out shingles can be restored instead of replaced. New polyurethane "liquid-resin" seals asphalt shingles, straightens curled wood shingles. Can be brushed, sprayed, or rolled on. Finished with layer of sand. Provides new insulation. Coating may also be used on siding.—Delka Research Corp.

Circle No. D16 on reply card, p. 102.

Screed is light, adjustable
Twin-beam vibrating screed for narrow slabs has one beam to strike off the concrete, one to remove air bubbles. Outstanding feature is extreme light weight of screed. Amplitude of vibration can be adjusted and locked in position. In 4' to 12' lengths; 4' weighs 140 lbs.—Stow Mfg. Co.

Circle No. D19 on reply card, p. 102.

Tiles insulate, soundproof
Multicellular plastic wall and ceiling covering offers sound control and insulation. Pliant, cushiony tiles are 1/4" thick, 10x10", 10x20", 20x20". Can be applied directly to plaster, metal, aluminum, glass, wallboard, etc. In 20 solid colors and silk-screened designs.—Curon Div., Curtiss-Wright Corp.

Circle No. D17 on reply card, p. 102.

Faucet will not drip
New non-rotating faucet valve eliminates dripping. Has no seat washer to wear out. Valve is compressed against seat for closure. Utilizes diaphragm principle of water control, has all moving parts outside flow area. Handle is fluted and insulated, easy to grip.—American Standard.

Circle No. D20 on reply card, p. 102.

Cleaner tile installation

Circle No. D18 on reply card, p. 102.

Fascia is permanent
Aluminum fascia is permanent and easier to install than wooden eaves. Also eliminates overhead scraping and repainting. Guaranteed not to peel, crack or warp. Of .025 gauge, in 10' lengths, 6", or 8", or 10" wide. White finish, or colors on custom order. All have mat finish.—Solmica, Inc.

Circle No. D21 on reply card, p. 102.
The SUPER THREE... one basic double-hung window in 3 price ranges

BILT-WELL Super-hold
double-hung unit
with ingenious sash-holding device

BILT-WELL Super-lift
double-hung unit
with flat overhead balance

BILT-WELL Super-therm
double-hung unit
with double insulating glass

Look at all these BILT-WELL features:
1. Unitized sill construction.
2. Patented BILT-WELL jamb liner of 8 mil anodized aluminum.
3. Anodized aluminum weather stripping.
4. New jamb adjuster that eliminates blocking.
5. Top quality Ponderosa pine, water-repellent treated frames.
6. Standardized for all types of construction.

See us at the NAHB Show, Booth No. 558-60, Hotel Sherman, Chicago, January 17-21, 1960.

HAMLIN PRODUCTS, INC.
BOX 2016 - LITTLE ROCK, ARK. - Fr 4-0296

NEW PRODUCTS

Roof deck has box sections

Roof-deck assembly has subpurlin of galvanized-steel box sections welded to each joint or beam. Provides excellent lateral strength. Lightweight sections are easy to handle and install. T-clips slide into slotted top of subpurlin. In 16-, 18-, or 20-gauge steel.—Tectum Corporation.

Circle No. D22 on reply card, p. 102.

Noncrushable mortar pail

Contractor's pail made of one-piece molded rubber is reinforced with fabric. Will not dent, crack, or bulge with mortar, concrete, etc. Will not lose shape. Resists lime, salt water, etc. Hardened cement falls out when pail is turned over. In 12-qt. size with graduated measurements.—Fortex Industries, Inc.

Circle No. D23 on reply card, p. 102.

Concrete panel cuts costs

Lightweight cellular concrete panels, called Calsi-crete, speed home erection. Can be carried and set in place by two men. Come marked and cut to size. Panels form both exterior and interior walls, are fireproof and vermin proof. Have good insulation and acoustical qualities.—CMC Homes, Inc.

Circle No. D24 on reply card, p. 102.

ALIVE TODAY!

Arch Lightbody, like 800,000 other Americans, is cured of cancer. Like 800,000 other Americans he went to his doctor in time—in time for early diagnosis and prompt and successful treatment. He learned that many cancers are curable if detected in time.

You can do two things to defeat cancer: Have an annual health checkup. Be alert to the 7 danger signals that could mean cancer:
1. Unusual bleeding or discharge.
2. A lump or thickening in the breast or elsewhere.
3. A sore that does not heal.
4. Change in bowel or bladder habits.
5. Hoarseness or cough.
6. Indigestion or difficulty in swallowing.
7. Change in a wart or mole.

If your signal lasts longer than two weeks, go to your doctor to learn if it means cancer.

AMERICAN CANCER SOCIETY
"100% closet access, easy to install, won’t warp or stick—three good reasons why we built 400 homes with closet doors of Paniflex Bifold doors of Novopley,”

says Norman Denny, President

“Paniflex Bifold Doors saved us a bundle in materials costs,” says Mr. Denny. “When you add up the savings in sheet rock and lumber that would have gone into framing conventional closets, you get an idea of how Paniflex Bifold Doors helped us keep our selling price under $11,000.”

Because of their patented hardware system, Paniflex Bifold Doors can be installed without framing-in. They give full closet access — floor-to-ceiling and wall-to-wall — and you can install them with ordinary labor in less than 20 minutes. Most important: Weldwood Paniflex Bifold Doors prevent costly call-backs because they won’t stick. The reason is the stock they’re made of — ⅜-inch Novoply®.

Novoply’s unique 3-ply construction makes it the flattest, most stable panel on the market. Its face plies of wood flakes and its core of wood chips are resin-impregnated and bonded under heat and pressure. The Novoply panels in Paniflex Doors are guaranteed against sagging, twisting, warping, shrinking, or swelling.

**WELDWOOD**

**PANIFLEX BIFOLD DOORS OF NOVOPLY**

are available, pre-packaged and ready to install, through Weldwood lumber dealers.
SYMONS Steel Stake

Can Be Reused Indefinitely

Drives easily into hard earth. Can be used for practically any type of stake work. This popular item is available in 12", 18", 24", 30", 36" and 42" sizes.

SYMONS

SYMONS CLAMP & MFG. CO.

Power for outdoor tools

Lighting standard for walk, driveway or patio has convenient electrical outlet in the base. Handy for power tools, lawn equipment, outdoor cooking utensils. Unit with graceful, tapered design, will accommodate variety of standard luminaires. In 18' and 10' heights.

-Millerbernd Mfg. Co.

Circle No. D25 on reply card, p. 102.

Heats any room

Portable heater small enough to carry anywhere has built-in thermostat with 30° to 105°-degree range. Has rugged heating element, quick-heating microtube. Rated at 1,500 watts on 120 volts. Its heavy-gauge sheet-metal case has baked-on enamel finish. Breakproof and moisture resistant.—Edwin L. Wiegand Co.

Circle No. D26 on reply card, p. 102.

More Profit with Ideal System

Sample entries show how to keep this simple record.

More Profit with Ideal System

Designed Especially for CONTRACTORS

You'll see where to cut costs, where your best profit opportunities are, when you keep your business and tax records in this easy “do-it-yourself" book. No bookkeeping experience needed. Especially designed for contractors. Used by thousands in the building trade. From America's largest publisher of simplified bookkeeping systems. Recommended by bankers and accountants. Order from your stationer, $3.50 and up. If he doesn't stock, write for full information to THE IDEAL SYSTEM COMPANY, 2437 West Pico Boulevard, Los Angeles 6, California.

NOW AT MOST STATIONERS

Air filter operates alone

Air filter removes dust and smoke with electrostatic charge. Unit operates with self-exciting type generator which builds up charge of approx. 15,000 to 18,000 volts in filtering fiber. Larger Model 102 has approx. 128 sq. in. filtering surface. Has ultraviolet lamp to purify air.—Coolerator Div., McGraw-Edison Co.

Circle No. D28 on reply card, p. 102.
Let a work-test prove to you what Dominick Caruso, builder, of Merchantville, N. J., has already learned about the nimble OC-46 loader. "I find I am saving at least $2 per hour on only the operating costs. And I know we have cut our excavating time, too," he reports.

Dominick's son, Robert, who digs basements for his father, says the "Spot-Turn" feature is ideally suited for this work. "It permits working in close quarters and excavating in less time. Also, I can maintain a full bucketload at all times, regardless of the bucket position. The features were designed with the operator in mind as well as for economy."

It won't take many hours of work for you to discover the cost-cutting opportunities in the OC-46. Ask your Oliver distributor for a demonstration right on the job. Or write for brand-new catalog loaded with information and job-application pictures and help!

Matched Design! Tractor and loader are built as a complete, balanced unit. Gas or diesel 30 h.p. engine. Wide, 1¾-yard bucket digs to 10' below grade, lifts to 9'5".

"OLIVER OC-46 SAVES $2 AN HOUR IN OPERATING COSTS ALONE"
It looks like a good investment... but what will the weather cost?

These brilliantly lighted windows, bright proof of occupancy, could spell plenty of extra cost for heating or air conditioning.

To avoid it, informed architects specify windows with Schlegel weatherstripping—and smart builders insist on them. Here's how this dense pile weatherstripping helps keep the cost of weather low.

Positive seal. Schlegel woven wool fibre forms a cushiony barrier the prowling winds can't wiggle through. Dust can't sift in or conditioned air seep out. It's Dow-Corning silicone treated, for positive protection against moisture leakage. Because it's wool, it won't swell, bind, or crack.

Permanent protection. Schlegel Woven Pile Weatherstripping lasts. First installations, well over twenty years old, still protect like new. It's designed to last as long as the unit it is used in.

No other material—metal, felt, rubber, or plastic—gives you so many advantages. For a comprehensive list of manufacturers using Schlegel weatherstripping, write for our booklet, "Your Guide to Windows, Doors, Screens."

For protection that's silent, smooth, and sure

Schlegel

WOVEN PILE WEATHERSTRIPPING

Schlegel Manufacturing Company, P. O. Box 197, Rochester 1, N. Y.

In Canada: Oakville, Ontario
"This builder really knows what women want!"

"Talk about a modern kitchen in a model home... here's the newest thing in automatic top burner gas cooking—the FLAME SET* 'burner with a brain.' With this new control you can get the flame size you want—immediately.

"Now you can cook with any size pan, large or small, and not worry about burning or scorching foods. It also means you can use the same temperature settings for aluminum and non-aluminum pans alike. That's something you couldn't do when cooking with the old style 'burner with a brain.'

"This FLAME SET 'burner with a brain' certainly makes a kitchen modern. I like it."

Yes, the FLAME SET "burner with a brain" is an attention-getting sales feature that's remembered by people who are house hunting. It will help you sell your prospects.

Write today for more information. Robertshaw Thermostat Division, Robertshaw-Fulton Controls Company, Youngwood, Pennsylvania.
J. E. Blank, Vice Pres., Tonn & Blank Inc., Michigan City, Ind., says,  

"Nothing turns up job leads like the Yellow Pages"

“We’ve landed many a profitable home remodeling job from a lead that came in through our Yellow Pages advertising. There’s no place else people can look to find a contractor as quickly and conveniently. That’s why the Yellow Pages produces such good results in this area of our business.

“We’ve also found that large-size Yellow Pages ads containing specific information about the business pull best. For instance, our ready-mixed concrete ad tells that we deliver on Saturdays and have finishing equipment for rent. So many do-it-yourselfers call and ask about these things that we know it’s the Yellow Pages that sent them to us!”

Yellow Pages advertising builds business for you by building greater AWARENESS of the products and services you offer. The Yellow Pages man will gladly outline a plan best suited to your business. Call him now at your local Bell telephone business office.

Nothing builds business like AWARENESS — and nothing builds AWARENESS like the Yellow Pages — the buying guide that tells people WHERE to buy.  

**CATALOGS**

**SEWAGE TREATMENT PLANT** for small but growing community discussed in bulletin. Shows “Suburbia” plant furnished and installed on “turnkey” basis. Made to expand several times initial capacity.—Municipal Service Co.

Circle No. D37 on reply card, p. 102.

**TOILET SEAT** with new nylon hinge is featured in folder. Also shown are saddle seat design, lackless polyethylene bar-type bumpers, four-coat flow coated enamel finish. Lists manufacturers producing matching fixtures.—Bemis Mfg. Co.

Circle No. D38 on reply card, p. 102.

**“STREAM-LINER”** Series of fork-lift trucks described in detail in new 24-page booklet. Shows new lowered cowl, “direct view” instrument panel, treadle-type accelerator. In eight different gasoline, diesel, or L.P.-gas powered models.—Tom-motor Corp.

Circle No. D39 on reply card, p. 102.

**SHEET BOARD** called Pronto Panel described in compact folder. Gives advantages of this kiln-dried sheathing for sidewall, roofs, sub-flooring. Tells why installation is 50% faster.—Southwest Lumber Mills.

Circle No. D40 on reply card, p. 102.

**CONCRETE COLOR CARD** shows eight new modern shades of Dust-On Colored Concrete. Illustrates many uses; gives detailed directions for application. Card is 19” x 3 ¼”, pre-punched. Excellent wall chart.—Tamms Industries Co.

Circle No. D41 on reply card, p. 102.

**GRINDING WHEEL** recommendations given in 57-page specifications catalog. Quick reference to more than 1,600 abrasive wheels. For grinding everything from agate to zirconium. Makes buying easier.—The Carborundum Co.

Circle No. D42 on reply card, p. 102.

**DECRO-VIDER** fiber glass panel screens and room dividers illustrated in colorful folder. Shows how shatterproof, movable panels allow light transmission while creating private areas.—Styline Products Co.

Circle No. D43 on reply card, p. 102.

**FLOOR PROTECTION** material is described in folder. Dense, non-porous plastic protects surface of concrete, brick, metal or wood. Resists chemicals, abrasion and impact. Goes on easily, cures fast.—Stonhard Co., Inc.

Circle No. D44 on reply card, p. 102.
"Within a few years any house that is not air-conditioned will be obsolescent," says Federal Housing Administration.

SUN VALLEY* All-Year® Gas Air-Conditioner dramatizes newness, lasting value.
It heats in winter... cools in summer... saves money with low-cost Gas.

Housing authorities recognize the growing trend to air conditioning. Today it's one of the best ways to clinch the sale of a new house, one of the most convincing arguments against competition of older homes on the market.

The Arkla-Servel Sun Valley offers many advantages to the builder as well as to the buyer:

1. Show customer how, from a single compact unit, the Sun Valley heats the whole house in winter, cools it in summer, circulates clean, filtered air at all times.

2. Demonstrate its ease of use. Show prospects how the temperature of the entire house is regulated from a single thermostat.

3. Explain to home buyers that because the Sun Valley works with Gas, there are no worries about fuel deliveries. You can tell them, too, that modern Gas is the clean, economical, most dependable fuel.

4. Show them the five-year warranty, real assurance to the home buyer of long life and low-cost maintenance.

Make sure your new homes stay new. Contact your Gas company or Arkla-Servel dealer now. Units available in models and sizes to fit any home.

ONLY GAS does so much more... for so much less!

DECEMBER 1959
The WALL-HUNG WATER CLOSET

The new CASE Wall-Hung "Quiet Type" Non-Overflow (safety feature) Off-the-Floor Water Closet is the ultimate in cleanliness, comfort and convenience.

Your Operator Takes on New Skill with This Easy-to-Manage JOHN DEERE BACKHOE-LOADER

Experienced operator or beginner, he'll get onto the John Deere Backhoe's two-lever digging control in a hurry. He'll find plenty of smooth hydraulic power and break-out pressure behind those levers, too—and with the low mounting of the boom's rotary cylinder, he'll get the best possible view of his work.

If it's a job of flush digging, your operator can set the rotary cylinder left or right in a matter of minutes, using only a wrench and the unit's hydraulic power.

Backfilling and loading are fast, too, with the “440’s” optional clutch-type manual direction reverser and power steering.

For detailed specifications, and price information see your John Deere Industrial Dealer.

Immediate Ownership through the John Deere Credit Plan
Just a reasonable amount down, and you can paint your name on the side of any John Deere Industrial Unit—put it to work earning the monthly or seasonal payments agreed on. All arrangements are made with the dealer, in strict confidence.

John Deere Industrial Division, Dept. 557, Moline, Illinois
CATALOGS

COMPRESSORS, SPRAY GUNS are listed in 24-page catalog. Easy-to-use directory shows new line of eight compressor series, two new series of paint spray guns.—Campbell-Hausfeld Co.
Circle No. D56 on reply card, p. 102.

ALL-PURPOSE MAINTAINER with Torque Converter. 11-page illustrated catalog describes uses and advantages of this tractor-type machine . . . lists manufacturer's other machines.—Huber-Warco Co.
Circle No. D57 on reply card, p. 102.

HOW TO CUT COSTS by letting one tractor do many jobs . . . discussed in new 16-page booklet. Describes 218-hp Model C tractor, shows extensive line of attachments.—Le Tourneau Westinghouse Co.
Circle No. D58 on reply card, p. 102.

“BRICK PACKAGING for more Net Profit” is subject of 16-page illustrated booklet. Discusses advantages of brick unitizing. Describes successful brick packaging systems. —Signode Steel Strapping Co.
Circle No. D59 on reply card, p. 102.

INSULATE AS YOU DECORATE—“Colorkrome” aluminum paint both insulates and decorates. Comes in many shades, can be applied to sheet metal, stucco, cinderblock, etc. Applied to roofing materials, it helps bond them to roof, seals nail holes.—M. J. Merkin Paint Co.
Circle No. D60 on reply card, p. 102.

DRY MASONRY WITH PAINT. Pre-wetting porous masonry is unnecessary when you use this vinyl paint. Mix with water, apply it directly with brush, roller, or sprayer. Surface conditioner is “built-in” with Polyvinylacetate, cement, additives.—Carbola Chemical Co.
Circle No. D61 on reply card, p. 102.

PREVENTS SHOWER SEEPA GE. Designed to eliminate seepage and rotting. This pre-sloped shower base is water- and vapor-proof. Of expandable polystyrene, it costs less to install than concrete. Can be cut to size, set, and nailed down in minutes.—Aeroplastics Corp.
Circle No. D62 on reply card, p. 102.

STABILIZES WOOD FIBERS. Tree Life lumber preservative has special penetrating toxic water repellent. Stabilizes wood fibers, resists fungi and insects. Recommended for siding, exterior trim, framing, joists and subflooring.—St. Paul & Tacoma Lumber Co.
Circle No. D63 on reply card, p. 102.

REAL WOOD INTERIORS for hotels, motels, restaurants, illustrated in brochure. Shows paneling ranging from high-grade teak and Benge to inexpensive flexible type of wall covering. Also, guide to Weldwood building products.—U.S. Plywood Corp.
Circle No. D64 on reply card, p. 102.

EMBOSSED DESIGNS in architectural porcelain enamel illustrated in folder. Shows how to achieve unlimited design arrangements with these enamel-on-steel panels. Miniature sample kits available.—Davidson Enamel Products, Inc.
Circle No. D65 on reply card, p. 102.

“TECHNICAL TIPS” is title of handy reference book on laminate fabrication. Contains comprehensive drawings, helpful hints, suggestions. Indexed; 16 packed pages.—St. Regis Paper Co.
Circle No. D66 on reply card, p. 102.

NEW, NON-FADING BEAUTY

Modernize homes, brighten and divide offices with Stylux — new panel with improved resin that defies weather erosion. Costs no more, yet costs less to use on big jobs with wider panel width. Decorator colors. Shatterproof. Easily workable. Highest light transmission. Get the whole story, including specifications. Write:

A Clean Hydraulic System Is A MUST!

Only Sherman Power Diggers and Loaders Have the Easy-Check Filter Gauge!

Only the Sherman Digger and Loader have the easy-check filter gauge that guarantees positive hydraulic performance. Yes, now for the first time in the industry, all guesswork is eliminated! For the exclusive Sherman easy-check filter gauge tells you at a glance if your hydraulic filter is giving proper performance!

What does this exclusive Sherman development mean to you, the owner?

- Better filtration means:
  - Longer equipment life!
  - Less downtime!
  - Fast filter cleaning without draining tank!

In short, the exclusive Sherman filter gauge means—You Get More For Your Money When You Buy Sherman!

Write for details on all Sherman features or for filter gauge Bulletin No. 797.

Weyerhaeuser 4-Square
Lumber and Building Products...

DIMENSION: Kiln-dried lumber contributes to sound, durable construction.

PANELINGS: Beautiful western woods available in a choice of patterns.

Today's broad line of Weyerhaeuser 4-Square Lumber and Building Products is helping many builders increase their profits. The Weyerhaeuser 4-Square trademark on lumber is well known to your customers because it has been consistently advertised nationally as a truly economical building material.

As the Weyerhaeuser 4-Square line of quality trademarked lumber products grows, so does the opportunity for related quality selling by builders. The broad line of identically trademarked Weyerhaeuser 4-Square products helps you gain complete owner acceptance. People are quickly attracted to homes built with nationally advertised brand name products.

With lumber trademarked Weyerhaeuser 4-Square, you are assured of lumber that is seasoned, precision-manufactured, accurately graded and carefully handled and shipped. The complete line of Weyerhaeuser 4-Square products in a wide choice of species and grades, includes boards and dimension, panelings, sidings, floorings, mouldings, steppings, plywoods, finish and trim, plus many specialty products such as Nu-Loc lumber and Loc-Wall paneling.

Consult your Weyerhaeuser 4-Square Lumber Dealer on your next project.

DECEMBER 1959
EARTH MOVING: the right equipment is half the job

Earth moving has long been the most thoroughly mechanized phase of building. For the builder or excavating contractor, the question is not whether to buy motorized equipment, but rather what equipment is best suited to the job. On the one hand, there are highly versatile machines that will do a variety of jobs; on the other, specialized machines that do one job at maximum efficiency. Somewhere between these, any operator can find the particular equipment that is best suited to his earth-moving problems.

Here's a preview of what major manufacturers will offer for earth-moving equipment in 1960

FOR THE BUILDER who must make one piece of heavy equipment do many jobs, the Caterpillar No. 933 Series F Traxcavator can dig, load, and bulldoze.

Circle No. D67 on reply card, p. 102.
Tractors and accessories

WORK BULL 1001 is a multipurpose tractor-loader built by Massey-Ferguson. Besides blade, eight other attachments are available.
Circle No. D68 on reply card, p. 102.

MOST VERSATILE machine for the builder is the utility tractor. This is an Allis-Chalmers D-14 model, with backhoe and loader.
Circle No. D69 on reply card, p. 102.

OTTAWA MARAUDER is a four-wheel-drive prime mover with high traction. Both the backhoe and front-end loader are integral parts.
Circle No. D70 on reply card, p. 102.

FINISH GRADING is speeded with this Roseman Tiller Rake. It levels, finishes, grades, rakes, and readies for seed in one operation.
Circle No. D71 on reply card, p. 102.

LOADERS-BACKHOE combination is best for smaller builders. This Shawnee package has 5½-yard loader, 6½-yard backhoe bucket.
Circle No. D72 on reply card, p. 102.

HUBER-WARCO Maintainer is basically a tractor-grader, can also be equipped with loader, front blade, and special attachments.
Circle No. D73 on reply card, p. 102.

Small bulldozers

CASE TERRATRAC 600 is a 62-hp crawler tractor. Besides loader, units can have backhoe, power-angling dozer, and tilt dozer.
Circle No. D74 on reply card, p. 102.

JOHN-DEERE 64 bulldozer combines power-angling and tilting blade, is available with either gasoline or diesel power.
Circle No. D75 on reply card, p. 102.

COUNTER-ROTATING tracks give unusual steering control to the Oliver OC-9 crawler tractor. A loader model also is available.
Circle No. D76 on reply card, p. 102.

DECEMBER 1959

Continued >
EARTH-MOVING EQUIPMENT, continued

Heavy equipment and accessories

NEW LINE of medium- and high-tonnage trucks has been introduced by Dodge. They’re offered with both gasoline and diesel power.

Circle No. D78 on reply card, p. 102.

TRANSIT CRANE-EXCAVATOR is made by Bucyrus-Erie. It carries either hoe or shovel, can be converted to a crane, dragline, or clamshell.

Circle No. D79 on reply card, p. 102.

PRECO BACK RIPPER, shown here on bulldozer blade, is especially useful in breaking up frozen ground in winter excavating.

Circle No. D80 on reply card, p. 102.

ONE MAN can operate this Cleveland trench backfiller. Complete unit includes crawler, boom, and scraper bucket.

Circle No. D81 on reply card, p. 102.

MULTIPURPOSE FLECO rakes are bulldozer attachments designed for land clearing. Rakes for special jobs are also offered.

Circle No. D82 on reply card, p. 102.

DAYBROOK “MAINTAINER” is an inexpensive dump body and hoist package. Capacity: 5 tons. It’s designed for a 1-ton truck.

Circle No. D83 on reply card, p. 102.

Trenchers and tampers

DITCH-WITCH trencher cuts ditches from 4 to 12 in. wide, and to a depth of 3 to 5 ft., depending on the trench width.

Circle No. D84 on reply card, p. 102.

ARPS TRENCH-DEVIL is a small trencher that digs as deep as 54 in. and as wide as 8 in. It’s self transporting on short runs.

Circle No. D85 on reply card, p. 102.

MASTER VIBRATOR Co. offers this one-man vibratory compactor, model C-12. It has a 3,500-lb. blow, delivers 2,500 blows a minute.

Circle No. D86 on reply card, p. 102.
When your work season begins next spring, be all set to start making money with new International rigs like these—the T-340 crawler and the 340 Utility.

Get set for '60... your IH dealer will pay you cash to deal now!

It will pay you to be an Early Trader! For a limited time only, your IH dealer will pay you good, hard cash to deal NOW. By dealing now you:

1. Earn interest at the rate of 6% on your trade-in, payable immediately in cash.

2. Earn interest at the rate of 6% on your cash payments—either down payment or full cash settlement—payable immediately in cash.

3. Get more for your trade-in because your IH dealer wants used equipment now, while he still has plenty of time to recondition it.

4. Protect yourself against possible price increases between now and specified dates next spring.

5. Obtain financing on time sales to meet your personal situation.

6. Assure yourself that you will get delivery of the IH industrial wheel or utility crawler tractor and equipment you need, when you need it.

You have the jobs... Your IH dealer has the power and equipment to match...
Smooth, 6-cylinder power, combined with 4,840 pounds of built-in brawn, give you high-capacity trenching, loading, and backfilling with the 61-hp International 460 Utility.

No other tractor does so much, at such low cost, on so many types of jobs as the International Cub" Lo-Boy. Here it is with 60-inch International Danco rotary mower.

From mowing to snow removal is all in the year's work for the 13.4 hp International Cub Lo-Boy. The Lo-Boy is shown below, with 54-inch IH front-mounted blade.

The husky 45 hp International 340 has the built-in strength and stamina for heavy-duty landscaping, trenching, and materials handling. It leads its power class in fuel economy, too.

Unusual earthmoving versatility is provided by the International Danuser Terra-Scoop with hydraulically-controlled scarifying, loading, dumping, and spreading action.

It's materials handling unlimited with a heavy-duty front end loader equipped with fork lift attachment. It easily interchanges with crane boom or materials bucket.

Mow an 8-foot strip, on slopes as steep as 2 to 1, at 5 mph or faster! You can do it with an International Danco center-mounted mower on the rugged IH F-460 tractor.
The 45 hp International Drott T-340 Four-in-One combines a ¾-yd bucket, a scraper, a clamshell, and a dozer all in one machine. Handles jobs no single-purpose rigs can do.

For low-cost operation, the 38.5 hp International 240 Utility, shown with International Wagner loader and International No. 23 side-mounted cutter bar mower, is tops.

Up to ½ cu yd bites speed trenching with the big, 72 hp International 560 tractor, shows here with International Pippin heavy-duty backhoe and loader with ¾ cu yd bucket.

On wheels or tracks the most complete line of utility power and equipment is at your IH Dealer

Cash in hand can be yours on the exact size of utility power you want, when you go to your IH Dealer for an Early Trader’s Bonus deal! With seven sizes of wheel tractors, rated from 13.4 to 95 hp, and the 45-hp T-340 crawler, your IH dealer is headquarters for job-matched power. You don’t have to pay for a bigger tractor than you need, nor slow down your jobs with an under-powered rig! For each model, there’s a broad line of bonus-earning, matched equipment. Each unit-engineered machine gives top capacity, performance, and dependability with its matching International® tractor.

You’ve everything to gain, nothing to lose by having your IH dealer figure your deal today... the sooner you deal, the bigger your bonus!

The earlier you trade the more you save...
Deal now...save 3 ways...
on all your 1960 utility tractor
and equipment needs

1. Big cash savings now
Buy now. Collect an Early Trader's cash Bonus. Trade in used machines and collect interest at the rate of 6% for a specified period of time on the value of the trade-in and any cash payments you make. This offer good for a limited time only. The sooner you trade, the more you save.

2. The right size power at the right price!
Only International offers such a diversified range of utility power and equipment to meet your job needs. Power from 13.4* to 95 hp*, with unit-engineered equipment, insures long, dependable, full-capacity operation.

*Maximum flywheel hp at standard sea level conditions.

3. Backed by the industry's quickest available service
Only International offers you such readily available help for your parts and service needs. No matter where your job is located, one of a nationwide network of 5,000 dealers is nearby. He has well-equipped service facilities, a substantial supply of parts, and factory-trained mechanics. His parts department in turn, is backed by the industry's most extensive network of factory parts depots.

Big Early Trader's Bonus cash savings are available NOW on all the International tractors illustrated above. You also get a bonus on International Pippin and International Wagner backhoes and loaders; International Drott T-340 4-in-1; International Danuser blades, scoops, and scraper-scarifiers; and International Danco heavy-duty, center-mounted mowers. There's an IH Dealer near you—see him now for full Early Trader's Bonus Plan details!

International Harvester reserves the right to withdraw its Early Trader's Bonus at any time, and will assume no obligation for orders executed under the plan after that date.
New Metal-Back Tape...
For better gypsum wallboard joints

Here's one of the biggest improvements in the history of gypsum wallboard construction. Gold Bond's new Metal-Back Tape holds ridging and beading problems to a minimum, and helps eliminate costly complaints and repair calls. It makes a firm, flat joint, covering up open seams, damaged edges, etc.

Your Gold Bond® Representative has the full details on this important new product. Ask him—or write Dept. AB-129 for free samples and literature.

"Why chase them all? I know when I'm on the right track."

DODGE REPORTS put you on the trail of the profitable contracts

Thousands of contractors are discovering that Dodge Reports can be the key to more profitable bidding. Tired of relying on gossip... and waiting for invitations to bid... they're using Dodge Reports to help them locate and size up building projects. With Dodge's dependable information, they don't miss good opportunities — and they know in advance which projects are right for them.

You, too, will turn up better bidding opportunities in your area — through Dodge Reports. You'll know what's coming up and when. You'll concentrate on the jobs you know will be profitable to you. You'll learn about the general contractors bidding on projects... who's bidding on the sub trades... and which ones get the contracts.

You get a separate Dodge Report on each individual project. The Reports are mailed to you daily. You get Dodge Reports only on buildings of the types in which you're interested — in the area where you want to do business. They tell who's going to build... what's going to be built... whom to see... when bids are wanted... and other important facts.

Let us show you how Dodge Reports can help you develop more — and better — bidding opportunities, and improve your profit picture, if you do business anywhere in the 37 Eastern states.

COMBINATION SAWS can now be filed automatically
with the New Model 200 FOLEY Automatic SAW FILER

This is the FIRST and ONLY machine which will file the so-called "combination" (rip and crosscut) circular saws; also crosscut circular saws, band saws, all types of hand saws.

The new model 200 Foley Saw Filer files the first tooth in each segment of a combination saw, clear around the saw; then the second tooth in each segment, and so on, until the saw is finished. The exclusive Foley principle of jointing the saw as it is filed, keeps all teeth uniform in size, shape and spacing; keeps circular saws perfectly round, usually doubles saw life.

CONTRACTORS—CARPENTERS—CUSTOM FILERS—Here is the ideal machine for contractors to keep all their power and hand saws in top-notch cutting condition and greatly prolong their life. For the carpenter who wants to make from $3 to $6 an hour in spare time—and for the full-time custom saw filer—the new model 200 Foley Saw Filer turns out perfectly sharpened saws that build repeat business and quickly pay for the Filer. Time payments if desired. Send coupon today—no salesman will call.

Foley MFG. CO., 1224-9 Foley Bldg., Minneapolis 18, Minn.

Cement-coated wood fiber has been a widely used roof-deck material for many years. Light, strong, and economical, it has excellent insulation and acoustical properties. And it can be made into boards of almost any size or shape.

Now this roof-deck material is stepping into a new role. An Arizona manufacturer, the Cemex Corp., has found that the properties that make its product good decking material also make it a highly promising wall-panel material.

In the material's first trial in this role, Cemex boards were used as curtain-wall panels in a dozen post-and-beam houses. Builder reported appreciable savings in labor, and the material has proven absolutely stable under the hot desert sun.

More recently, and with approval of the West Coast International Conference of Building Officials' code, the Cemex panels are being used as load-bearing walls. The code's only additional requirement is that reinforced stucco be put on the exterior to produce a monolithic structure.

Two factors contribute to the cost-cutting qualities of the Cemex panels. As full-height wall panels, they offer all the economies of component construction. And they can be finished off with a single coat of plaster or stucco on either side. Four-inch material is used for exterior walls; three-inch is sufficient for interior partitions.

Cemex built the structure on the left of this page especially for AMERICAN Builder. Steps in its construction are shown on the opposite page. They make up a system which is so simple that—when added to the material's high fire resistance, moisture resistance, and dimensional stability—it should make builders in all parts of the country sit up and take notice.
FOR THE MONTH OF DECEMBER

FIRST STEP is to build corner of two panels. Adhesive is used on edges, pieces are clamped until adhesive has set.

WOOD DOWELS are inserted at corners for extra strength. Rest of panels along side will need no clamping or doweling.

PANELS are toe-nailed to sole plate. All vertical joints between panels are tongue and groove, so no side motion is possible.

OPENINGS are cut into walls after they are up. Carbide-tipped blades are used, as cement coating will rapidly dull a regular blade.

TROWEL COAT of plaster is all that's needed for inside finish. Panels are highly stable, virtually eliminate plaster cracks.

SINGLE COAT of reinforced stucco completes exterior finish. Stucco is required for extra strength wherever walls are load bearing.

BEGINNING of installation of outlet boxes. Hole is cut through the panel with keyhole saw to exact dimensions of the box.

GROOVE FOR CABLE is cut with claw end of hammer. A V-groove can also be cut, using two passes with a power hand saw.

BOX AND CABLE are clamped in with clinched nail. As picture above shows, stucco coat will conceal the box from the outside.
Time is like money; the less we have of it to spare, the further we make it go.

Josh Billings

Where can a reader make his time go further than in a Simmons-Boardman time-saver magazine?

He sees the heart of the story on the "glance level"—photos, diagrams, charts, display type.

He breezes through big pictures and short words.

He reads a copy mix high in ideas, low in words.

He spots at a glance the pieces and parts that speak to his problems and opportunities.

When readers can make their time go further, the advantage to advertisers is plain: readers have more time and inclination to pursue ideas in advertising.

Simmons-Boardman, 30 Church St., New York 7.
BEFORE AND AFTER CONSTRUCTION...

the clam-action 4-in-1
does “hand work” wholesale!

Eliminate most costly hand work from site development, excavating, cleanup, and landscaping. Simply switch machine actions of the International Drott 4-in-1 to do former hand labor jobs, wholesale. You’ll also handle operations, materials, and conditions that frustrate old-style, single-action rigs!

For example, on cleanup the 4-in-1 clamshell action replaces “hands,” right and left, on trash pick-up and disposal. For fine grading and landscaping, you switch to “carry-type scraper” action to shave off high spots; clamshell action to spot-place topsoil; and bulldozer action for spreading, or grading with inch-close accuracy, under positive “radius control”.

The 4-in-1’s tremendous triple-power, pry-over-shoe breakout action doubles for dynamite to pop out stumps, trees, and imbedded boulders. Then with clamshell action, you can pick up and load bulky objects without hand “chaining.”

Find out first hand what it means in profit-earning capacity to switch machine actions instead of machines...to substitute machine hustle for human muscle on residential earthmoving. Choose the 4-in-1 you need from five sizes. ¾-yard to 3-yard capacity. Then ask your International Drott distributor for a demonstration!

International Harvester Company, Chicago I, Illinois
Drott Manufacturing Corp., Milwaukee 15, Wisconsin

Square off side walls by cutting downward with 4-in-1 clamshell. Reduce hand labor by squaring the corners for footings; back-dragging the loose material toward the center of the hole; then picking it up with clamshell action.

Take advantage of “boardinghouse reach” by using the 4-in-1’s open clam as a “go easy” dozer—for backfilling while protecting “green” foundations. Use this same clam position to “back-drag” materials or slope banks!

--- THOROSEAL ---

Builders everywhere are finding that handsome, guaranteed-dry basements make homes easier to sell. And this can be your least expensive sales feature. Using our new long-handled broad brush, one man can coat the inside walls of the average new basement in less than one hour. A single coat will do except in extreme moisture conditions. Ask for a job sign, because we advertise nationally to prospective home owners. Thoroseal is available in white, pearl gray and a variety of attractive pastel colors. There is a dealer in every locality to insure prompt supply. Write for our new 20-page specification guide.

Please send me your free new specification guide.

How to do it better

Versatile fork lift positions wall forms, then returns to pour the concrete

This York fork-lift truck earns its keep two ways for Haas and Haynie, San Francisco builders. The truck first sets gang forms up to 20 ft. high for a concrete wall going around a food processing plant in Salinas, Calif. It returns later, fitted with a bottom dump bucket, to pour concrete into the forms.

Lightweight horizontal shores support men bull-floating extra-wide concrete slabs

Just fit pedestals to the ends of two Acrow horizontal shores. Result: a pair of adjustable, lightweight scaffolds that will let your crew speedily bull-float and trowel extra-wide concrete slabs—such as driveways, aprons, basement floors, slabs going in and around small commercial buildings.

HOW TO DO IT BETTER

(Continued from page 138)

Want a portable scaffold?
Build it yourself

Notch two flat bars on 10-in. centers to fasten the brackets. Scaffolds will rest on bracket floor assemblies welded to the hang bars. Stock is 1/2-in.-wide flat steel that can be cut easily.

G. D. Lynch, Asheville, N. C.

Jointer will remove rough edges from sawed Formica

Run edges over a jointer set at a light cut. A guide plank clamped to the jointer fence will prevent long strips of the Formica from buckling and twisting.

John Krill, North Lima, Ohio.

Here's a way to tighten a drill chuck without a key

Can't find the chuck key? Stick a punch in the chuck hole and wedge a screwdriver into the collar's teeth. Working the punch against the screwdriver-lever will close the chuck.

Hugh Lineback, Stillwater, Okla.
Simple pylon dresses up a small building

Are you one of the many home builders planning to break into next year's booming light commercial market? If you are, you might put this easy-to-build, inexpensive pylon to work in front of your motel, store, or small building. It's a design by New York architect Charles E. Tilton. It advertises each of a chain of highway stores being constructed by the G. R. Kinney Corp.
THE MONTH Ahead

ANSWERS TO 221

One of the most difficult programs for the builder to understand has been rehabilitation and relocation housing, better known as Section 221. This is particularly unfortunate, since the potential of 221 is enormous. It covers price ranges from $9,000 to $35,000, and carries FHA-insured loans up to 100 per cent.

Happily, a booklet has been written on 221, and in plain English. It covers all aspects of the program, points out possible pitfalls, and tells how a 221 program is set up and run. The book is available from the publishers, the Metropolitan Association of General Improvement Contractors, 1522 Connecticut Ave. N.W., Washington 6, D.C. Price is $1.00 a copy.

SMALL HOMES COUNCIL

The 15th annual Short Course in Residential Construction, presented by the University of Illinois Small Homes Council—Research Council, will be held on the University's campus January 14 and 15. There is no better source of ideas and information on the latest in building. The course immediately precedes the NAHB Convention, which opens January 17.

For more information, write to the Council at Mumford House, Urbana, Illinois.

FROM ALL OF US . . .

. . . on AMERICAN BUILDER, a very merry Christmas, and a happy prosperous New Year.

IN THE NEXT ISSUE: AMERICAN BUILDER's NAHB Convention coverage: over 450 of the products you'll build with in 1960 ... profile of a Chicago builder who found that old-fashioned markets are ripe for new ideas ... blueprint of the under-$16,000 winner of AMERICAN BUILDER's Best Model Home contest.

New light on an old question

If you read the earth-moving buying guide in this month's Land Planning department, you may be interested in still another item on excavation equipment. It concerns that perennially thorny question, when is a builder big enough to buy his own heavy earth-moving equipment. And it will give you something to chew on this winter as you plan your spring budget.

The Caterpillar Tractor Co., which doesn't care who buys their machines (as long as someone does), talked with three firms: a 20-house-a-year builder who subs all his excavating, a 100-house-a-year builder who owns his own machines (two loader bulldozers), and an excavating subcontractor. When, these firms were asked, will it pay a builder to buy his own machines?

The vote was unanimous

Despite the different viewpoints involved, the answers were remarkably similar. The magic number seems to be 50. The big builder said that at half his present production, which would be 50 houses a year, owning his own machines would still be profitable. He thought that if the machines operated 50 per cent of the time, they were earning their keep. And he said he was presently saving 50 per cent of his earth-moving costs by doing the work himself.

The 20-house builder felt his rate was too low to justify the purchase of heavy equipment. He was better off subbing out his dirt work. But he estimated that if he reached the vicinity of 50 houses a year, he would be better off owning than subbing.

The clincher, if one is needed, comes from the excavating subcontractor himself. Naturally, he said, he prefers to see builders sub out their work. But he concedes that at the 50-house a year level a builder would probably have enough work to justify buying his own machinery.

What does this mean to you?

This is not a final answer, of course. Every builder's problems are different. But if you're a 50-house builder, it does mean you should take another look at the problem of owning your own machines. It might mean substantial savings.
Here's something that will really help you sell homes—a brand new kind of inlaid linoleum that combines the finest of linoleum with the best of vinyl—for increased beauty and ease of maintenance. Now you can offer prospects all the advantages of a custom installed, seamless flooring plus sharper colors, new stain resistance and new sheen. And locked-in-to-stay-in metallics for today's smart decorator look. It's Ultima Linoleum—a truly eye-catching, different floor.
