On the Forefront of Innovation - Start to Finishes

Fabcon is constantly developing new products and finishes that meet the current needs of the commercial building industry. Our precast panels are as aesthetically appealing as they are functional and cost-effective.

Fabcon's new spandrel panels are a case in point. Using their unique manufacturing process, Fabcon can now deliver spandrel panels that give you the design look you're after, along with the quality, fast construction and cost-savings you've come to expect with Fabcon’s vertical panels.

Whatever the design or specifications, Fabcon will work with you to ensure each project's success, start to finish.

Call Fabcon today or visit our website at:
www.fabcon-usa.com
We first hired INNER FLORA for a client. Then we hired them for OURSELVES.

Scott A. Hatfield, AIA, IIDA

“We’ve utilized Steve Codner and Inner Flora’s interior foliage vision for nearly 30 years. The fact we asked them to participate as design consultants for Savage-Ver Ploeg & Associates, Inc., speaks for itself.”
Scott A. Hatfield, AIA, IIDA

“Inner Flora played an integral part in the design process and their ongoing maintenance assures our design vision.”
Glenn D. Vondra, AIA, IIDA

“It was a natural outgrowth of our company history to have Inner Flora on our team. Their professionalism and attention to detail dovetails with our own corporate philosophy. Inner Flora kicks.”
Kent R. Zarley, ASLA

Inner Flora works to make interior foliage an integral part of your overall design – with plants thoughtfully specified to complement the aesthetics, environment, space definition, sound attenuation and traffic flow of your design.

More than a “plant supplier,” you’ll find Inner Flora respects, understands and appreciates architectural design. For nearly 30 years, Savage-Ver Ploeg & Associates, Inc., has trusted our vision with clients including Hy-Vee, Pella Corporation and the Regency West Office Complex. We’d like to share and support your vision, too.

For your next project, call Inner Flora at 515-274-5907.
ARCHITECTURAL WALL SYSTEMS

ARCHITECTURAL WALL SYSTEMS, Co. WAS CONTRACTED TO FURNISH AND INSTALL THE EXTERIOR ENVELOPE WHICH IS A DRAINED AND BACK-VENTILATED RAIN SCREEN UTILIZING BOTH ALUMINUM PANELS AND 3" THICK INDIANA LIMESTONE. THE CONTRACT INCLUDED POLYAMIDE THERMALLY BROKEN CUSTOM-DESIGNED WINDOWS, CURTAIN WALL, SUNSCREENS, LOUVERS, AND EXTERIOR DOORS.

Ninety-seven new intern apprentices joined the masonry four-year programs over the last two years at the Iowa Brick Layers Union, Kirkwood Community College, and Ellsworth Community College.
Endicott Clay Products Co. is the only place in the world where you will find authentic Ironspot colors like the exquisite examples shown here.

Personifying the artistic expression so eloquently conveyed by this magnificent structure is Endicott’s unwavering commitment to color, texture, dimensional stability and unparalleled craftsmanship.

For samples, literature and the name of the distributor in your area, contact Endicott Clay Products Co. today.
It's a major step.

The new Clad Ultimate Double Hung. Clean, traditional lines. An all-wood interior. No unsightly vinyl jamb liners. Over 100 design changes in all. Including our exclusive, integrated sash tracking and locking system for easier opening, closing and cleaning. Visit our showroom to see the new Marvin Clad Ultimate Double Hung. It's clearly superior to anything on the market today.

t seems we are living in halcyon times. As professionals, we enjoy a robust economy teamed with near zero inflation. The result is an architectural profession that, generally, is experiencing healthy growth. It is during these prosperous times, however, that we should reflect upon our core strengths, as well as the challenges and threats that may lie ahead.

For decades, architects have faced increasing competition from material suppliers, vendors, contractors, even accounting and consulting firms, who claim the ability to provide a client with a “building.” In this increasingly diverse environment, what unique service do architects provide? Simple, architects provide design! That is the single most valuable skill we as professionals possess. By design, I don’t mean the ability to make something pretty. Design is the process that combines the aesthetic, spatial, functional, economic and regulatory concerns presented by any project into a unified, successful solution. It is truly a unique skill learned through a unique educational and internship process.

As professionals, we should steadfastly hold to this core strength. We need to understand and define its value, and communicate this value in terms that clients understand. Economic terms! I in no way mean to trivialize the various service roles that architects play. Indeed, architecture is a service profession. I simply believe that it is our ability to “design” that makes us unique in the marketplace.

Two thousand years ago, the Roman architect Vitruvius stated that architecture is composed of firmness, commodity and delight. Alone, any one of these components is inadequate. Only architects successfully provide all three. As we move into the next millennia, let’s not forget the wise observation made two millennia ago and embrace “design” as the key to our professional future.

Sincerely,

PAUL D. MANKINS

Service to the public and profession

AIA Iowa

AIA Iowa Mission Statement
Improve the built environment through service to members, the profession and the public.
I. Build Public Awareness of the Value of Design
   a. Provide educational opportunities, concepts and materials to the public
   b. Promote and chronicle Iowa architects and architecture
   c. Recognize public contribution to architecture
   d. Celebrate and protect Iowa’s architectural heritage
II. Promote Learning of the Art and Science of Architecture
   a. Provide opportunities for learning
   b. Encourage the pursuit of new knowledge
   c. Promote high quality architectural education
III. Promote a Better Climate in which to Practice
   a. Provide information about selection of design professionals
   b. Interact in legislative and regulatory processes
   c. Encourage dialogue between members of the construction industry
   d. Provide access to information
   e. Assist members to identify future opportunities and threats and help them plan for change
IV. Encourage Diversity within the Profession, and Build an Appreciation of that Diversity
   a. Recognize and encourage diversity of professional pursuits
   b. Foster greater demographic and cultural diversity within the profession
V. Service to the Public

In 1904, eight architects in Des Moines elected to form a subgroup of The American Institute of Architects. Today, more than 600 AIA Iowa members compose five sections: Central Iowa, Cedar Rapids-Iowa City, Eastern Iowa, Northwest Iowa and Southwest Iowa. Individual membership consists of: Member (registered architect); Associate Member (does not hold a license to practice, but holds a professional degree in architecture or is employed by an architect in a technical capacity); Professional Affiliate Member (affiliated design professional); or Allied Member (allied to the architectural field). AIA Iowa currently lists more than 90 architectural Firm Members.

Work of the Chapter
Communications — AIA Iowa serves as a link between chapter members, national and regional AIA and other related industry organizations.
- Allied Member program
Information — The chapter provides information about architecture, hiring and working with architects, design and the chapter and its activities to members and the public.
- AIA Iowa Publications
  - Iowa Architect, a quarterly review of Midwestern design that includes an annual Directory
  - Addenda, a regular membership newsletter
  - QBS: A Guide for Selecting an Architect or Engineer For Public Owners
  - Partnering: A Concept for Success
  - Good Design is Good Business
- Clearinghouse — other publications about architecture.
- AIA Iowa Bookstore — located in the chapter office in Des Moines.
  - 250 titles ready for purchase and orders for other architectural texts in print
- AIA Construction Documents
- Uniform Code Books
- National Booklets — how to use the services of an architect
- A Beginner’s Guide to Architectural Services
- You and Your Architect
- Home Delivery
- AIA Iowa Web site — information about AIA Iowa can be found at www.aiaiowa.org

Programs and Activities — AIA Iowa sponsors programs and activities throughout the year for architects’ education and public awareness about design, and to recognize contribution to the profession.
- 1999 AIA Iowa Convention
- “Architecture Month” — October 1999
- Central Iowa Architects Sandjam
- Cedar Rapids-Iowa City-Architects Golf Outing
- Allied Member Indoor Golf Event
- Professional Development Seminars
- Design and Excellence in Craft Awards
- Medal of Honor
Outreach — The chapter sponsors programs to build awareness of design issues and recognizes the public’s contribution toward design excellence.
- AIA/LEGO Brick Activities
- CANstruction — a design/build competition to create structures made of canned items
- Box City — a children’s activity to teach site planning, design, scale and construction
- Traveling photographic displays
- Speakers’ Bureau
- Honorary Member Award
- Educator Award
- Community Design Workshops
- Disaster Mitigation Presentation
- Educational scholarship — presented to an architecture student at Iowa State University

Legislative Activity — AIA Iowa works to promote state laws that enhance the business environment for members and protect the health, safety and welfare of the public.
- Lobby state and federal representatives on issues affecting the built environment and the practice of architecture
- 1998 — monitored 979 new bills, more than 2,000 amendments and 416 new study bills
- Alliance for Tort Reform
- Rebuild Iowa Coalition
- Grassroots — AIA’s national leadership and government affairs workshop
- Workbook — QBS: A Guide for Selecting an Architect or Engineer for Public Owners

Administration — The chapter office handles routine administrative tasks for the chapter and the programs it promotes.
- membership rosters
- processing applications
- accounting for the organization’s funds
- processing registrations

All told, AIA Iowa is an invaluable resource for the architects and the public it serves. It represents the power of a unified profession established to deal with the issues and concerns facing every practicing architect.

1999 AIA Iowa Committees

1999 AIA Iowa Annual Convention
Co-Chair: Todd Garner, AIA Phone: 515/288-9536
Co-Chair: Jason Alread, AIA Phone: 515/288-9536
To organize the annual convention that features architectural products, nationally recognized speakers and a variety of workshops.

Awards and Recognitions
Co-Chair: Jeffrey Morgan, AIA Phone: 515/244-7167
Co-Chair: Alan Pickett Phone: 515/432-4910
To recognize those whose talent and/or service are exemplary in the field of architecture or a related field.

AIA Bookstore
Chair: Brian Lindgren, AIA Phone: 515/244-7167
To maintain an educational and intellectual literary resource for members and the public.

Construction Industry
Chair: Robert Carlson, AIA Phone: 319/338-9311
To increase communication between designers and the construction community.

Environment
Chair: Kane Tewes Phone: 515/327-0007
To further the understanding of environmental issues that affect architectural practice.

Government Affairs
Co-Chair: William Dikis, FAIA Phone: 515/288-3141
Co-Chair: Lon Sinclair, AIA Phone: 515/267-9160
To communicate legislative concerns and lobby on behalf of the profession for public health, safety and welfare.

Intern Development Program (IDP)
Chair: Sarah Camp Overton, AIA Phone: 515/276-8097
To guide architectural interns through their apprenticeship and monitor the training process.

Iowa Architect Magazine
Editor: Stephen Knowles, AIA Phone: 515/288-9536
To showcase Iowa and Midwest architecture and serve as a guide for design, the arts, literature and innovative products and technology.

Membership
Chair: Thomas Gardner, AIA Phone: 319/933-4712
To increase and maintain the membership of The American Institute of Architects, Iowa Chapter (AIA Iowa).

Professional Development
Co-Chair: Jerry Purdy, AIA Phone: 515/225-3469
Co-Chair: Terry Allers, AIA Phone: 515/573-2377
To provide continuing education and discussion on important issues concerning the profession.

Public Relations
Chair: John Nash, AIA Phone: 515/244-7167
To improve the public’s awareness of the value of design through special events, literature, displays and the Internet.

1999 Spring Meeting
Chair: Kevin Nordmeyer, AIA Phone: 515/288-3141
To organize the Spring Meeting.

Young Architects
Chair: Alan Pickett Phone: 515/432-4910
To provide interns and young architects guidance, information and a communications network.

The Iowa Chapter of The American Institute of Architects (AIA Iowa) has a proud tradition of activity and continues to receive 100 percent performance ratings from national AIA for service to its members.
Through a review of newly constructed and historically significant projects, the magazine promotes the value of design excellence in all areas of the public and private environment.

**Iowa Architect**

*Iowa Architect*, a national award-winning magazine, is intended to educate its readers about the importance of architecture and related architectural issues. Through a review of newly constructed and historically significant projects, the magazine promotes the value of design excellence in all areas of the public and private environment. It is also a resource for noteworthy events and achievements in the arts, literature and product design.

*Iowa Architect* is published four times a year and is supported by a combination of advertising revenue, subscription fees and AIA Iowa chapter contributions. One issue, this Directory, is produced during the first quarter of each year. The magazine's editorial policy, content, graphic design and production is directed by a volunteer editorial board comprised of statewide members of AIA Iowa.

The editorial staff determines projects and events to be covered, solicits contributions by free-lance writers and assembles photographic and graphic support materials. Each issue is focused around a central idea or topic such as historic preservation, waterfront development, residential design, educational facilities, urban design, etc.

The magazine's current readership of 12,000 is concentrated in an eight-state area including Iowa, Missouri, Nebraska, Kansas, Oklahoma, Wisconsin, Minnesota and Illinois. By subscription, the magazine is currently mailed to approximately 35 states.

In support of its educational goals, *Iowa Architect* is distributed free of charge to school and university libraries in the state of Iowa. The magazine also provides free subscriptions to private and public officials at the local and state levels who routinely make decisions regarding the built environment in Iowa.

While the main focus is on Iowa architecture and design issues important to Iowa, the magazine has consistently worked to broaden the scope of its interests and coverage. This has included the development of a yearly review of Midwestern architecture, and features that explore and review performances, art exhibitions, product design and interior and graphic design.

For information regarding the publication of *Iowa Architect*, topics for forthcoming issues, its editorial policy and advertising rates, please write to Stephen Knowles, AIA, editor, in care of AIA Iowa.

---

**Iowa Architectural Foundation**

The Iowa Architectural Foundation (IAF) invites Iowa's citizens, communities and business leaders to invest in a vision that recognizes the role of architecture and community design in enhancing the quality of life in our state. Architecture is the most public of all the arts. It touches all of us every day. It helps determine the quality of our lives and defines where we live, work, play, worship, heal and learn — but architecture needs better public understanding. Architects, public officials, businesses and individuals must unite in a partnership of excellence that encourages the creation of quality environments that serve public needs, strengthen communities, solve problems and enrich our lives.

It is this vision for which the Iowa Architectural Foundation strives. It is dedicated to fostering an appreciation of design excellence while working for the preservation of our cultural heritage. The IAF supports programs, projects and publications that share this vision. It solicits, receives and expends gifts, grants and legacies for education and the preservation of architecture and its allied arts and sciences. It also provides guidance to those groups, individuals and companies who endeavor to improve their communities.

The Iowa Architectural Foundation, founded in 1989, is a volunteer, nonprofit organization that has a 501 (c)(3) designation. The board of trustees is composed of architects, educators and business leaders statewide. The IAF receives direct financial support and participation from other foundations, businesses and individuals who believe in the importance of building an understanding of this most public art.

Since its inception, the Iowa Architectural Foundation has undertaken numerous initiatives to increase the public awareness of architecture, contributing directly and through leveraged grants more than $140,000 in project funding. The IAF is the parent organization of the Architecture in the Schools (AIS) program. The IAF has provided more than $93,000 in funding since it inception for the program, in collaboration with the AIA Iowa AIA College of Fellows, the American Architectural Foundation, the Iowa Humanities Board, Norwest Bank, Curries Company, the Katherine Vincent Deardorf Foundation and the Pella Rolseren Foundation. For more information about AIS, contact Stephen Stimmel, AIA, chair, at 515/244-7167.
The Iowa Architectural Foundation's support has helped AIS to:

- develop a third grade social studies curriculum in the Des Moines Schools, and print a workbook for every Des Moines student through the year 2000.
- develop a second grade social studies curriculum in the West Des Moines Schools.
- sponsor staff development workshops for teachers across the state.
- enable publication of Iowa by Design, a newsletter for teachers that contains articles about AIS programs, resources and information about architecture.
- sponsor an annual career seminar for high school students and a children’s/teachers’ jury in connection with the AIA Iowa annual convention.
- provide funding for articles about AIS in Iowa Architect.
- enable video production of the former slide program, “Buildings Speak: The Language of Architecture.”
- produce a slide and video program, “Global Influences on Iowa’s Architecture.”

In addition, the IAFA has sponsored the following events and activities:

- the Iowa Community Design Assistance Team (ICDAT) program, in association with the Department of Architecture at Iowa State University. ICDAT has successfully completed urban planning workshops in Ankeny, Jefferson, Spirit Lake and Waterloo, and helped these communities find innovative solutions to better future development.
- a conference series, “The Planning of Iowa, Our Towns and Cities.” Community leaders, planners, architects and interested citizens are invited to actively discuss the contribution quality design makes to Iowa’s communities. The program serves as a catalyst for thoughtful planning and design at the local level.
- the Iowa Public Television series, “Pyramid,” “Castle,” “Roman City” and “Cathedral,” hosted by author and illustrator David Macauley. Each program examined a different building form.
- a five-part series, “Skyscraper,” also on Iowa Public Television. The program provided a firsthand glimpse of the art and science of designing and building a skyscraper, using the 47-story Worldwide Plaza in New York as a model.
- a series of History for Lunch walking tours of Iowa communities.
- an Iowa Committee on the Environment section in Iowa Architect, cosponsored with the Sheet Metal Contractors of Iowa and MidAmerican Energy. The special section showcased projects that attempt to lessen their impact on the natural environment.
- “The Places of Iowa,” a series featuring the architecture and landscape of Iowa’s communities.
- a videotape project about Bauhaus student, Bengt Von Rosen.
- an ongoing public lecture series, featuring prominent architects and planners.

Inquiries regarding the work of the Iowa Architectural Foundation and opportunities for involvement may be directed to AIA Iowa, at 515/244-7502, or to the following trustees:

- Terry Allers, AIA
- William Anderson, FAIA
- Jeffrey Anderzson, AIA
- Michael Broshar, AIA
- Robert Findlay, FAIA

**Service to the public and profession**

During the past nine years, educators throughout the United States have discovered the invaluable resource provided by the AIS program.

A teacher workshop at the Sioux City Art Museum.

The idea of combining the "arts" with the "basics" is a win-win situation. Educators have come to depend on AIS resources for their classrooms. The architects find that leading students on walking tours or lecturing to educators during teacher workshops is very satisfying. AIS is a unique partnership between architects and educators. It provides students with a greater appreciation of their surroundings, an awareness of design, and an understanding that comes from developing creative thinking skills.

Funding for AIS has been provided by corporate support from Pella Rolseth Foundation and by grants from the Katherine Vincent Deadford Foundation, the Iowa Humanities Board, a state-associate of the National Endowment for the Humanities, the Iowa Architectural Foundation, and the American Architectural Foundation, AIA Iowa continues to provide administrative support.

**Curriculum**
The AIS program has developed two successful projects that incorporate architecture with the social studies curriculum. All second graders in West Des Moines Community Schools study the architectural heritage of their neighborhoods. The Des Moines Public Schools District has incorporated an architectural heritage curriculum for third graders studying Des Moines history.

**Teacher Workshops**

During 1999, workshops are being planned in Sioux City, Dubuque, Cedar Rapids, Des Moines and Fort Dodge. Architects and historians lead many activities and tours focusing on the architecture, architectural heritage and history of the community.

**Annual Projects**

This year, a career seminar on architecture and other design-related careers was offered in Iowa City for the first time. A similar seminar has been in Des Moines for the past 10 years as an opportunity for high school students to learn about the realities of design-related careers.

**Resources**

Several audiovisual resources and lesson plan ideas are available for loan through AIA Iowa by calling 515/244-7502.

**Long Range Plans**

This year, a five-year plan is being implemented to expand AIS's outreach with additional teacher workshops, larger circulation of the newsletter, Iowa By Design, updating existing classroom resources, and evaluating the entire program.

For more information about AIS, contact Barbara Schmidt, educational consultant, at 515/277-7075.
What Justifies Architecture?

Why, in the face of all that confronts modern existence: poverty, hunger, violence, intolerance and injustice, should architecture merit even passing interest?

How can architecture, particularly an architecture whose ambitions aspire to something beyond the mere accommodation of utilitarian necessity, command the attention of a culture still grappling to fulfill the most basic social and economic needs of its citizenry?

What, in such a context, could possibly justify architecture? For the steeled-eyed pragmatist, for the narrowly-minded determinist, for the quickly judgmental and the steadfastly rational, the answer to such questions is quite simple. Nothing. Absolutely nothing.

By this view, architecture is only a form of exorbitant extravagance; an indulgence lavished upon works that might otherwise expediently accommodate their intended use without unwarranted embellishment, without unnecessary elaboration, without apology. It is a view of architecture as an inert, unaffected and discrete discipline, deliberately remote and consciously removed from the necessary and real issues of commonplace, everyday human existence.

It is a viewpoint of ultimate and perfectly prudent practicality. Nevertheless, it is also a viewpoint just as steadfastly wrong in its fundamental assumption of the relationship between the true needs of individuals (and the society these individuals embody) and their fulfillment.

Look up from this text for a moment and examine the environment that surrounds you. Are you comfortable in this setting? Are you too cold or too hot? Is the lighting adequate to your needs or do you find yourself straining to read the words upon this page? After a day in this place, will your muscles ache, strained to the limits of exhaustion? Or will you leave this space relaxed, unburdened and at peace with yourself?

Do you truly like this place that has been made for you? Or your family? Is it a place that invites casual conversation, debate or introspection? Is it a setting in which you would feel comfortable displaying a cherished memento, or exchanging some discrete confidence with a colleague or loved one?

Are you uplifted by this place? Or do you dread returning to it each day, knowing its confines satisfy only the barest and most pragmatic necessities of your daily routine? Does this place offer you a windowed view to a pleasantly compelling landscape? Or does it constrict your vision, narrowly binding your view (and your imagination) to only those interests deemed pragmatically necessary?

Move outward from this place to the world at large and examine it from a comparable perspective. Are these places — your home, your neighborhood, your community, your city — places in which you take pride? Where in this community do you feel comfortable? Or secure? Where in this world do you feel inspired, or awed, or even more simply, contented by that which surrounds you?

These are not abstract considerations. These are the tangible, affecting attributes of an environment intimately joined to the business of everyday existence. These are the places in which we have chosen to live out our lives. These are the homes in which we amicably dwell; the offices and factories within which we productively work; the schools in which we prudently educate our children; and the sacred places where we might hope to humbly demonstrate our devotion to some higher spirit. These are not inconsequential places. These spaces are the vessel that shelters the substance of our lives.

The pragmatist would so easily — too easily — dismiss undue consideration of such places. Bound by the constrictively narrow, dangerously short-sighted credo of mere economic utility, the practically-minded adjudges this world by only its potential for hastily acquired profit, by only its propensity to yield an unambiguous ledger sheet of the immediately quantifiable, the shrewdly marketable.

And though architecture must always remain accountable to such real world, pragmatically devised constraints, must it do so at the exclusion of all else?

Ask yourself this: In what do you truly believe? What values of this life do you hold to be absolutely true and above reproach? What of this existence do you truly cherish? And, more important, how might you most assuredly demonstrate the conviction of your beliefs?

You might speak of these convictions in a public forum. You might employ powerfully charged, rhetorically persuasive words of strength and resolution. But would these words endure the passage of a single day? Once spoken, could they not be recanted, twisted or turned to some other interest or ambition?

You might write it all down, commit these ideals to some seemingly lasting text, inscribed upon paper or parchment, or perhaps even hardened stone. But would such graphic pronouncements survive even a month of untainted existence? Could they not be misconstrued? Or turned to some other purpose?

A thoughtful linguist would argue against the assumed perseverance of the written word, and in favor of the fragility of such encoded testimonies. Our
words do not (and cannot possibly) endure the passage of time. Today, text of even 100 years strikes us as archaic and quaint. One from 1,000 years past is, by present standards, virtually incomprehensible except among a select handful of idiosyncratic and insulated academic interpreters.

What then could possibly endure as a suitable testament in which to invest the faith of our convictions as individuals? As a society? As a culture?

Consider this.

We do not question the convictions of the builders of the Gothic cathedral. Their faith in the glory of their God is, in those soaring, ethereally transcendent sanctuaries, abundantly evident. We do not question the ancient Greeks' faith in the virtues of democracy. The conviction of their belief in the sanctity of the individual conspicuously dwells within their egalitarian constructions of Athen's fourth century B.C. agora. We do not misunderstand the ancient Egyptians' conviction in the reality of the afterlife. The pyramids of Giza stand as incontrovertible evidence of their unquestioned belief in the immortality of the soul.

A society's convictions are made most manifest and legitimate, not so much by its words and deeds, but by those resources it commits to the preservation of its values.

Such convictions are made, not only of noble words and heroic acts, but of brick and mortar, concrete and stone.

And so, ask yourself this question again: In what do you truly believe? Do you believe in social justice? Yet, can you sustain such a belief without working to concertedly make a world in which such justice is manifestly evident? Must you not build a world in which both the advantaged and the disadvantaged are equitably sheltered within environments that, by their soundness and thoughtfulness, celebrate human dignity and self-esteem?

Do you believe in the preservation of the environment? Should you not then demand the creation of a world that respects and renews and preserves the natural order of ecological systems?

Do you believe in the education of children? Do you believe in passing the legacy of your values on to them without ambiguity or reservation? Must you not then build lasting institutions of learning that support the interests of children, that inspire their imaginations and nurture their yearning for knowledge?

Do you believe in democracy? Surely, such a belief cannot long endure without making concrete the Constitution's promise of the freedom of assembly. Or the right to privacy. Neither can life, liberty or happiness be reasonably pursued without first building a world that demonstrably sustains the realization of such ideals.

Thomas Jefferson believed in democracy. He was, fortuitously, a statesman and an architect and, therefore, possessed particular appreciation for both the instruments of governance and the necessity of architecture. He wrote the Declaration of Independence. He also built the magnificent, classically-inspired capitol of the state of Virginia. The first act entrusted the preservation of democracy to a profoundly moving, persuasively argued construction of words. The second committed those same ideals to an equally persuasive construction of form and space. Jefferson understood the value — indeed, the absolute necessity — of both means of expression.

There was a time, earlier in this century, when some — idealists, utopians, social engineers, political theorists and more than a few well-intended architects — believed architecture could carry the burden of representing society's values by itself alone. They believed architecture could make people more moral, society more just and culture more equitable.

In retrospect, such expectations, however nobly motivated, were plainly unrealistic.

But, should the evident shortcomings of utopian idealism and the recognition of architecture's reasonable limits commend only the diametrically opposed argument that thoughtful, responsible investments of our culture's resources in its built environment represent no enduring value?

Jefferson would not embrace such a polarized point of view. Nor would any other thinking, concerned citizen. Architecture does not — and must not — stand apart from this world, either as the sole agency of social redemption or as an extraneous indulgence of only the privileged few.

Rather, architecture is inseparable from the world. It is an enduring foundation to which our beliefs might be anchored. It is the armor that defends and protects our system of values, and the vessel that contains all we cherish and hold dear about this life. Architecture is inescapably bound to the very business of everyday existence. And that realization is justification enough.

Roger Spears, AIA, lives in North Carolina.
Selecting an Architect

You may select an architect for the same reasons you select any other responsible professional: commitment, experience, and expertise. By hiring an architect to design a public or private project, you will realize the unique contribution an architect makes to the creation of a work of architecture.

An architect should provide and coordinate a wide range of services. Architects have a broad knowledge of design and construction, and can work with you on a variety of projects, from remodeling your house to building an office tower. An architect will also work through your ideas from beginning to end, analyzing costs and completion time.

Architects may practice their craft in several ways. An architectural firm may be composed of a single practitioner, a partnership or a corporation. Firms also come in a variety of sizes, but size may not be as important as the firm’s capabilities. Some firms have interior designers, engineers and other consultants on staff; others rely on collaborations with independent firms.

When you select an architect, you should consider not only the individual elements of a firm’s composition, but their collective impact on an architect’s ability to perform the work required. By finding an architect that understands your goals, you will enhance your project and the design process. It is important that you select an architect with whom you feel both compatible and comfortable, and with whom you are able to communicate. You should also understand the role the architect plays in your design team, and the skills and responsibilities they have in the design process.

The first step to take when selecting an architect is to decide your goals and vision for the project. Ask yourself what functions will be fulfilled with the new project. Make a list of the ideas you have, your budget, the project’s planned location and your time frame. Ask for recommendations from friends, relatives and colleagues who have worked with an architect, and have had successful and rewarding experiences.

Next, compile a list of possible firms for your project (AIA Iowa publishes this Directory each year as a guide to architectural firms across the state). Use it to begin narrowing the field to a select few firms that meet your requirements. After you have compiled a short list, call each architect and schedule an appointment for an interview.

During the interview, an architectural firm should describe to you their philosophy of design, the firm’s method of work and, where applicable, areas of specialization. Ask for a list of former clients and recent projects, and discuss the architect’s fee. You should also discuss your goals and ideas with the architect. Ask specific questions, such as:

- How are your abilities best suited to the needs of my project?
- What methods do you use to monitor costs and schedule?
- What approach will you take in resolving my particular problems?
- Which members of your firm will handle this job?

Finally, and perhaps most simply, you should merely look around. A thoughtful, well-conceived building is always an architect’s best form of reference.

The architect has the education, training, experience and vision to take you through design and construction from beginning to end. Good design adds to the beauty and life span of your building, but it will also work to enhance your community and enrich your life.

Qualifications Based Selection

When a building project is initiated by an agency representing the public, the selection of a qualified design professional becomes of paramount importance. The architect’s work in the public realm has an overwhelming impact on the ultimate success of the undertaking. Critical issues of feasibility, fiscal accountability, design, functional efficiency and imagery all hinge upon the prudent, professional judgment of the selected architectural designer.

Accordingly, the means of selecting reliable, professionally competent design professionals for service in the public interest is of considerable importance. The quality of the services provided by the architect is the single most important factor in determining the overall construction and life cycle costs of a building. Qualifications Based Selection (QBS) is an objective, flexible procedure for obtaining architectural, engineering, land surveying and other related professional design services for public projects. The QBS process is helpful to frequent users of design services, as well as one-time users with little or no past practical experience working with design professionals. It provides owners with a selection process that is straightforward and easy to implement, is objective and fair, can be well documented, and is open to public scrutiny.

Professional design services represent only a small percentage of the construction budget of any building, and an even smaller proportion of its life cycle cost. Accordingly, it is in the best interest of the taxpayer to ensure only the most qualified individuals and firms are selected for the design of public facilities.
How Qualifications Based Selection Works

Every construction project is unique, yet the owner often may not fully grasp the complexities of the project, nor recognize the variety of design services required to transform the generalized concept into reality. A knowledgeable and thoroughly qualified design professional can expertly shepherd an owner through the intricacies of schematic and developmental design.

In the construction process, the architect serves as the owner's agent, representing the owner's interests in day-to-day dealing with governmental agencies, contractors, suppliers, equipment manufacturers and others providing regulatory reviews or services. It is crucial that the owner and architect share a professional relationship characterized by trust, respect and effective communication.

QBS is the most widely endorsed method for selecting professional design consultants. In 1972, the U.S. Congress required all agencies of the federal government to use QBS for selecting design professionals. The law requires architects and engineers to be selected on the basis of qualifications, subject to fair and reasonable compensation. Nearly 40 states now mandate the use of a similar procedure.

The QBS process usually involves the following steps:

1. The owner prepares a description of the project to be built or problem to be solved, referred to as a preliminary "scope of services."
2. The owner invites design professionals to submit statements of qualifications for the project at hand.
3. Statements of qualifications are evaluated and several individuals or firms are selected, or "short-listed" in the standard nomenclature, for further consideration.
4. The individuals or firms are then interviewed and ranked according to an evaluative scoring system.
5. On the basis of these evaluations, the top-ranked professional or firm is notified of their selection for the project and opens discussions with the owner leading to agreement on a final scope of services culminating in a contract between the two parties.

A detailed manual, QBS: A Guide for Selecting an Architect or Engineer for Public Owners, describing procedures applicable to agencies wishing to implement a QBS process, is available through the AIA Iowa office in Des Moines.

The Architect

Architecture is a rich tapestry of aims, interests and ideals. For most architects, theirs is a profession of examination, analysis and evaluation, described by most as the process of design. Through this process, an architect creates a successful building that strikes a balance between client interests, the community at large and the demands of nature.

In an age of specialization, the architect is required by training and temperament to be a generalist. Because the art of building is not a singular action, an architect must be able to perceive the whole picture, and create a building that is technological, artistic, functional and human.

Each client has a problem to be solved. Each building, while unique in its final creation, has common characteristics: to satisfy a need, to adhere to a schedule and budget, and to fit within the parameters of a site. Any project, regardless of its size and scope, has a significant physical and economic impact on its environment and the surrounding community.

When designing a building, an architect must not only consider the client's interests, but the interests of the public at large. A building that satisfies its client's needs and is suited to its context serves the best interests of both its owner and its neighbors.

Each building must also respond to fundamental characteristics of nature. Not only must gravity and topography be accommodated, but the architect must be aware of the consequences of time. A building is not momentary in its existence, but is experienced well into the future.

The process of design typically begins with a statement of program, which is a written description of the client's needs, goals and aspirations for a project. It may be a simple list defining space requirements or it may quantify specific ambitions, but it must ensure a "fit" on the intended site. The program is the basis upon which the value of an architect's performance is judged.

From the program and site overview, the architect prepares a preliminary proposal in the stage typically described as schematic design. These sketches suggest various options and opportunities inherent in the program and site, and are created through a free-flowing exchange of concepts and ideas that clarify the project's fundamental objectives. Only after a preferred strategy is selected does development continue.

Next, the schematic proposal is further examined at the design development stage. Construction materials and methods are selected, planning layouts are refined, and increasingly reliable construction cost estimates are projected. In design development, the architect collaborates with consultants, including
engineers, landscape architects and graphic designers who contribute their expertise.

Throughout this phase, the architect continually reassesses the initial project objectives, ensuring the proposal conforms to the initial program requirements and preserves the client’s interests. The architect must also assess the building within the context of the surrounding community.

Only after both architect and client agree that the design fulfills the program objectives are construction documents prepared. Detailed drawings allow a contractor to establish fixed building costs and begin construction. In effect, the completed documents are a legal contract compelling the finished building to be constructed in accordance with the client’s programmatic, economic and aesthetic intentions. As construction proceeds, the architect becomes an advisor, continuing to evaluate the design’s evolution and compliance with intentions through site visits and client consultations.

Most architects consider the design process complete only after the client moves in and becomes accustomed to the surroundings. In this post-evaluative phase, the architect reevaluates whether the project is a balanced work that met the client’s needs.

Through the process of design and collaboration with an architect, a client will enjoy a successful, satisfying building that fulfills a specific goal while enhancing its community.

**Good Design is Good Business**

*Much of the business of architecture is about providing services to business. Architects are hired by businesses to assist in the visualization and realization of transformation and success. Architecture affects the success of businesses in countless ways. The following information is excerpted from Good Design is Good Business, a publication that illustrates the relationship between good design and good business. It reports recent research findings and showcases the work of some AIA Iowa firms. It provides interesting and valuable information for discussion and decision-making between AIA Iowa architects and their clients. For a copy of Good Design is Good Business, please call the AIA Iowa office."

We take it for granted that the design of our own homes affects how we and our families function, and yet often underestimate the effects our surroundings have on us at work. Why? In part, decisions about the nature of the workplace are viewed by many organizational leaders as technical decisions, best left to experts like architects, engineers and facility managers; as financial decisions, in which cost is the primary concern; or as political decisions, definitely within the purview of organizational leaders but made as much on the basis of power and influence as on information about how the decisions are likely to affect organizational performance.

**Interior:** The workplace is not simply one’s desk, office or work station in an office building. It is also the cafeteria, the conference and break rooms, the project room, corridors and water fountains, the fitness center. It is all the places in which one works. Office layout, furniture, noise, air temperature and quality, floor area and lighting are all variables that affect job satisfaction and satisfaction with the office environment. However, only two have a measurable impact on job performance: enclosure and layout.

**Exterior:** Decisions about the form, location and nature of a company headquarters will communicate to insiders and to the external world how the organization views its social system: what it is trying to do, managerial values and style, desired distance toward the surrounding community, orientation toward stability and change, and so on. If the goal is to have the corporate image reflect the values that guide how the organization really functions (or would like to), then the thrust of the questions asked when starting a building project should be on what you want to be as an organization, not on what you want to look like.

The qualities and characteristics of the environment of work have significant influence on organizational performance and economic success. The work of an organization is affected by environmental characteristics, such as degree of enclosure, layout, lighting, acoustics and air quality. Thoughtful design of the workplace can increase employee satisfaction and performance, and support organizational image and identity. Therefore, it is imperative that business leaders and architects increase their understanding of the relationship between the design of the workplace and the successful operation of organizations. Good design is good business.

"We shape our buildings, and afterwards our buildings shape us."

Firm Description
Accord Architecture specializes in the design of medical, office, retail and industrial projects throughout northern Iowa. With a strong focus on teamwork, Accord frequently teams with Henkel Construction Company to provide design-build or design-construction management services to maximize a project's potential, while minimizing cost overruns and construction time. Further, Accord provides design services to publicly owned entities, such as Floyd County Memorial Hospital.

Firm Description
Established in 1926, Architects Wells Woodburn O'Neil specializes in college/university projects, governmental, long-term health care, religious, medical, housing, industrial, environmental, energy conservation and commercial projects. With steady growth over the past decade, the firm has experienced a strong track record of repeat business, construction cost control and on-time delivery of services. While constantly working on strong listening skills, good communication techniques, understanding of expectations and specialized project research, the team operates as a collaborative studio.

Firm Description  
Practicing in the Midwest and several eastern European and Asian countries. The Design Partnership provides design services for clientele ranging from educational, institutional and ecclesiastical to military, medical and public. With an emphasis on environmental design, facilities are planned to be energy efficient with durable materials, yet within budgets that owners can afford. Enjoying considerable repeat business, the firm meets clients' expectations and schedules with special attention to cost control, many times via construction management joint ventures.

Firm Description
Neumann Monson has designed exciting, efficient and functional buildings for more than 20 years. We listen to our clients and translate their needs into innovative solutions that are long-lasting and cost effective. We are committed to excellence in architecture and meeting the client's long-term needs. We have a strong record of adherence to both time and budget parameters and we specialize in:

• educational facilities
• libraries
• institutional and governmental facilities
• religious facilities
• historic restoration
• commercial facilities
• industrial facilities

Product/Service Provided
Commercial millwork, casework, store fixtures and moldings.

Issue No. 99:229 Iowa Architect 57
The work of the architect

Architecture at Iowa State University

The department of architecture at Iowa State University is a comprehensive center for teaching, research and public service. Together with the departments of landscape architecture, art and design, and city and regional planning (all in the College of Design), it forms a unique and innovative interdisciplinary environment.

Two professional degrees, the bachelor of architecture and the master of architecture, are offered as well as a post professional graduate degree in advanced studies in architectural theory. The five-year undergraduate program positions architectural design within a broad-based field of general studies. The graduate program is research-based and allows the student to explore special areas of interest in addition to a core curriculum in architectural design.

Student work is supported by an array of research in architectural theory, computer technology, health facilities and materials technology. A full range of teaching and research facilities are available to students. A photographic darkroom and a lighting studio are located in the college. Other facilities include a satellite library, audio-visual collection and the college exhibition gallery.

The university offers financial assistance in the form of grants, scholarships, loans and part-time employment. Scholarship recipients are selected on the basis of academic merit or other demonstrated talent. The department also awards a number of scholarships based on academic achievement. Graduate students are eligible for either teaching or research assistantships. Positions are awarded on the basis of merit and departmental needs.

Undergraduate Program

The undergraduate curriculum combines an intense professional course of study with a broad experience in general education. Through the design studio, students explore the elements of experience and intention, the subject matter of building design, and the effects of a diverse and pluralistic cultural field.

The undergraduate curriculum is composed of a pre-professional program (two semesters) followed by a professional program (four years). At the end of the pre-professional year, applicants are reviewed for admission into one of the 48 openings in the professional program.

The professional curriculum moves progressively and sequentially through the elements of the field of architecture: design and technology; history, theory and criticism; human behavior; and design communication. Each element draws on other levels of the student’s learning experiences.

Annual exhibition of student work.

From the beginning, the student is involved in the construction, representation and simulation of architecture. Extensive use is made of the design studio, wood shop, various computer laboratories and the architecture technology laboratory. A series of courses in architectural history and theory provide a broad, substantial basis for the student’s work. Courses in design methods and human behavior clarify the various ways in which buildings are produced and used.

The curriculum concludes with a semester-long diploma project, in which each student explores the design possibilities of a particular area of interest.

Graduate Program

The graduate program combines a professional education with focused research and scholarship. The design studio is still the organizing element, but in addition, the graduate studio is a place of experimentation and exploration. Students investigate the relationship between theory and practice, the applicability of new technologies and the changing reciprocities of architecture and culture. The student also completes a thesis dedicated to a specific area of inquiry that demonstrates both professional competence and a deep understanding of the discipline of architecture.

The graduate program offers opportunities for both professional and post-professional study. In each of its three options, the program emphasizes the relationship between professional education and architectural research.

The three and one-half year option is designed for individuals with an undergraduate degree in a subject other than architecture. Students explore a full range of architectural subjects through seminars, an intensive sequence of design studios and a thesis. The two-year option is for individuals with a pre-professional undergraduate major in architecture. Following the completion of the requisite professional courses, the student is expected to develop an individualized course of study leading to the thesis. The one-year option is a post-professional course of study designed for individuals with an accredited professional degree in architecture. It provides an oppor-
Intern architects participating in the IDP are required to keep accurate records of their involvement in the program. For the intern to get the most out of the IDP program, it is strongly suggested that they start a file early in their work experience. This documentation of experience must be both certified by the intern architect’s employer and acknowledged by the professional advisor. The record can then be permanently registered by establishing an IDP Council Record through the NCARB.

For more information about the IDP in Iowa, contact Sarah Camp Overton, AIA, chair, at 515/276-8097 or AIA Iowa at 515/244-7502.

Iowa Architectural Examining Board
The Iowa Architectural Examining Board’s goal is to assure the public that those who practice architecture, as defined in the Architectural Practice Act (see below), and/or who call themselves architects actually have received the professional education, gained the practical experience, passed the required examination and continue their education and licensure in such a way that justifies the title of “architect.” The board, part of the Professional Licensing and Regulation Division of the state of Iowa, regulates architects and the day-to-day practice of architecture in Iowa. It is comprised of five licensed architects, active for “not less than five years,” and two members representing the general public who are not required to have any formal training in architecture. The members are appointed by the Governor for three-year terms and confirmed by the Iowa Senate.

Individuals who wish to become registered as an “architect” must pass all portions of the architectural registration examination, which is part of a national registration system for architects. Knowledge of site planning, structure, environmental systems, construction methods, details and design competence is tested.

The architectural registration examination is now administered by computer on a year-round basis, six days a week, through a network of test centers located throughout the United States. Individual candidates are able to schedule any or all sections of the examination through the testing service at their convenience, and sit for the examination at any location. Flexibility of scheduling allows candidates to take the examination when they feel adequately prepared.

The board is instructed to consider that an applicant be of “good moral character,” trustworthy, honest
and adherent to professional standards of conduct, but is prohibited from excluding an individual on the basis of age, citizenship, sex, race, religion, marital status or national origin. The board may review an architect's activities when warranted by complaint or inaction of the architect, and may revoke or suspend the license of any architect found guilty of misconduct. The board also requires that any organization doing business as an architectural firm is actively controlled by registered architects, and authorizes a corporation, partnership or sole proprietorship to practice architecture as a business entity.

### Professional Ethics

By mutual consent, members of The American Institute of Architects conform to a Code of Ethics and Professional Conduct. The Code of Ethics provides members with reasonable guidelines for fulfilling their obligations to the public, to clients and users, to the building industry, to the profession and to their professional colleagues. The code is based on five fundamental canons, each of which represents broad principles of conduct, and covers a wide range of pertinent issues confronting the practitioners. The five canons are the first tier of three statements in the code. Of the remaining two statements, Ethical Standards defines more specific goals to which members of the AIA should aspire in the areas of professional performance. The third component consists of Rules of Conduct, violations of which may become grounds for disciplinary action by the AIA.

**CANON I**

**General Obligations**

Members should maintain and advance their knowledge of the art and science of architecture, respect the body of architectural accomplishment and contribute to its growth. Learned and uncompromised professional judgment should take precedence over any other motive in the pursuit of the art and science of architecture.

**CANON II**

**Obligations to the Public**

Members should embrace the spirit and letter of the law governing their professional affairs and should thoughtfully consider the social and environmental impact of their professional activities.

**CANON III**

**Obligations to the Client**

Members should serve their clients competently and in a professional manner, and should exercise unprejudiced and unbiased judgment when performing all professional services.

**CANON IV**

**Obligations to the Profession**

Members should uphold the integrity and dignity of the profession.

**CANON V**

**Obligations to Colleagues**

Members should respect the rights and acknowledge the professional aspirations and contributions of their colleagues.

### Additional Information

For further information regarding the work of the Iowa Architectural Examining Board, call 515/281-4126. A copy of the practice act may be obtained from the Iowa State Board of Architectural Examiners. A copy of The American Institute of Architect's Code of Ethics and Professional Conduct may be obtained from the AIA Iowa office in Des Moines.

### Architectural Practice Act

The licensing of architects in Iowa is intended to protect the health, safety and welfare of the public. It is the state of Iowa that authorizes persons to assume the title "architect," and it is the state that defines and regulates the architectural profession by the Architectural Practice Act, Chapter 544A of the Iowa Code. The act concisely defines qualifications, obligations and responsibilities as practicing professionals. The act also constitutes a standard of professional conduct that establishes expectations of an architect working in the public interest, and empowers the state to recognize certain individuals as qualified in the design of certain buildings.

### Skills and Responsibilities

While certain types of construction are exempt from the required participation of an architect, the design of most buildings for human occupancy is restricted to architects. The practice act defines and clarifies the responsibilities of the practicing architect. Following are several key interpretations.

"Professional architectural services" means consultation, investigation, evaluation, programming, planning, preliminary design and feasibility studies, designs, drawings, specifications, administration of construction contracts, observation of construction site progress or other services and instrument of services related to architecture.

"Direct supervision and responsible charge" means that the architect has the exercising, directing, guiding and restraining power over the design of the building or structure and the preparation of the documents, and exercises professional judgment in all matters
embodied in the documents. Reviewing the work prepared by another person does not constitute "direct supervision and responsible charge" unless the reviewer actually exercises supervision and control and is in responsible charge of the work.

“Observation of construction site progress” means intermittent visitation to the construction site by an architect or the architect’s employees for the purpose of general familiarity with the progress and quality of the construction and the general conformance of the construction documents and general compliance with the applicable building codes. Such observation does not imply exhaustive or continuous on-site inspections to check the quality or quantity of construction work.

Technical submissions prepared by the architect or under an architect’s direct supervision and responsible charge, shall be stamped with the impression of the architect’s seal. A public official charged with the enforcement of the building code shall not accept or approve any technical submissions involving the practice of architecture unless the technical submissions have been stamped with the architect’s seal.

Continuing Education
Iowa is one of only a few states that currently requires architects to complete a course of continuing education in order to remain licensed; many other states are in the process of passing enabling legislation. As a requisite for membership, The American Institute of Architects also mandated continuing education, effective in 1997. The Architectural Examining Board reviews the education programs submitted for renewal by each architect on a biannual basis. The board does not pre-approve courses, but provides guidelines.

Americans with Disabilities Act (ADA)
More than 43 million Americans with mental and/or physical impairments that substantially limit their daily activities are protected by the Americans with Disabilities Act (ADA). As decreed by the ADA of 1990, all buildings that serve as "places of public accommodation" or "commercial facilities" must be accessible and usable by persons with disabilities.

The ADA is divided into five sections called titles. Each title summarizes a different aspect of disability rights.

For owners or managers of a business, it is important to determine the responsibilities and obligations presented by the ADA, both to employees and the general public. Compliance with the ADA need not represent extraordinary expense for new construction, and accessibility features normally add up to less than one percent of the construction cost. An architect can assist in preparing building or renovation proposals that both satisfy the requirements of the ADA and represent sound economic planning. Besides being conversant with the law’s requirements, an architect can also advise small businesses how to take advantage of tax benefits for the removal of architectural barriers in existing construction.

The ADA Project provides information, materials and technical assistance about employment, communications and architectural issues pertaining to the ADA. The ADA Project that serves Iowa, Kansas, Missouri and Nebraska can be reached by phone at 800/949-4232 or by e-mail at adaah@showme.missouri.edu. Additional information about the ADA may be obtained from the ACCESS Board for ADA Documents and Questions at 800/872-2253. At the state level, contact the Iowa Commission on Persons with Disabilities at 515/281-5969. Or, view the ADA homepage on the Internet at www.usdoj.gov/crt/ada/adahom1.htm.

State Historical Society of Iowa — Historic Preservation Assistance
According to Donovan Rypkema, author of The Economics of Historic Preservation, historic preservation is "the careful management of a community's historic resources; avoidance of wasted resources by careful planning and use; the thrifty use of those resources. To use or manage those historic resources with thrift or prudence; to avoid their waste or needless expenditure; to reduce expenses through the use of those historic resources."

Within one state agency — the State Historical Society of Iowa — the community programs bureau administers several programs that relate to historic preservation activities. Several of the staff also serve the State Historic Preservation Officer (SHPO) in a partnership between the state and the U.S. Department of the Interior. Below is a summary.

Educational materials are available for loan from the State Historical Society of Iowa’s resource center that can assist teachers, historical societies and other interested individuals and groups in understanding more about the history of Iowa, and many historic preservation topics. These materials include audio tapes and slide presentations, videos, books, hands-on classroom materials, lesson plans, etc. To learn what materials are available, call the resource center staff at 515/281-6800.

In addition to being a resource to educators and communities for information about Iowa’s rich history, the community programs bureau staff plays an impor-
The work of the architect

Within one state agency — the State Historical Society of Iowa — the community programs bureau administers several programs that relate to historic preservation activities.

Matching grants are available to local governments that have SHPO-certified local historic preservation programs in place. Examples of qualifying Certified Local Government (CLG) grant activities include assisting with the cost of developing plans for rehabilitation or restoration of a historic building that is important to the community; producing public education materials; or surveying, evaluating and/or nominating buildings or an archaeological site to the National Register of Historic Places. The bureau's local governments coordinator, Kerry McGrath, helps communities develop their local historic preservation programs and coordinates the CLG grant process. She may be reached at 515/281-6826.

Other grants are available through the bureau. The REAP Historical Resource Development Program Grant (HRDP Grant) provides matching funds for various historic preservation activities (as well as for museum and documentary collection projects). Examples of activities include surveys, evaluations and nominations to the National Register of Historic Places, and the acquisition or rehabilitation of buildings listed on the National Register of Historic Places. To find out if your group or project is eligible for an HRDP grant, contact the Historical Resource Development Program coordinator, Lavon Wickett, at 515/242-6194. The Historic Site Preservation Grant Program, part of the infrastructure funds, is administered by the staff at 515/281-6412.

Some owners of historic buildings may qualify for additional financial incentives through the agency. One example is federal investment tax credits for approved, "substantial" rehabilitations of income-producing historic buildings. While the tax credits cannot be given for the cost of purchasing a qualifying building, the applicants' federal income taxes are reduced by an amount equal to 20 percent of the cost of "qualified rehabilitation expenditures." Typical qualifying expenditures would be construction costs of a new roof, wiring, plumbing, etc. The staff serves as the liaison between the federal review process and the applicants. Temporary property tax exemptions from increases in taxable valuation due to "substantial" rehabilitation (as allowed through each county government) is a second example of an incentive program for historic preservation projects.

These incentive programs are available to projects that are consistent with the character of the historic building and follow the recommendations of the Secretary of the Interior's "Standards for Rehabilitation and Guidelines for Rehabilitating Historic Buildings." Visit www2.cr.nps.gov/e-rehab for an online course about the rehabilitation standards. The staff supplies applicants with technical information regarding the standards, including window repair and weatherization techniques; storefront repair or replacement; guidance on accessibility strategies for historic structures; and guidelines for brick/stone cleaning and repair. To learn more about financial incentives for the rehabilitation of historic buildings, contact the preservation architect, Judith Ann McClure, AIA, at 515/281-8637.

Only historic properties are eligible for historic preservation programs at the State Historical Society. In this context, a historic property is one that is listed on or has been evaluated by SHPO staff as eligible for or listed on the National Register of Historic Places. Any non-federally owned property or group of properties may be nominated to the national register through the State Historical Society. If accepted by the U.S. Department of the Interior, it becomes listed on the national register. For information about the National Register of Historic Places, contact the national register coordinator, Beth Foster, at 515/281-4137.

**Firm Description**
- Story Construction Co. is a general contractor/construction manager with offices in Ames and Davenport, Iowa.

**Story Construction Co. continued**

The year 1999 marks Story’s 65th year as a general contractor. Completed projects range in size from under $100,000 to more than $10 million. Current projects include a $29.7 million water treatment plant and a $22.8 million hospital addition. Story’s markets include industrial plants, research laboratories, auto and water treatment facilities, office buildings and hospital/medical facilities. Story has complete design/build capabilities with a licensed architect and licensed engineers on staff. As the single source of responsibility on design/build projects, we can control costs and schedule from start to finish.

Firm Description
Charles Saul Engineering has the resources and ability to provide complete analysis, design, documentation and construction administration services for the structural aspects of a multitude of buildings and other structure types. We are committed to providing services that are responsive to our clients' schedules and budgets as well as practical and aesthetic needs. Project sizes vary from partial design services on small projects to full structural design, documentation and construction administration for buildings with budgets in excess of $50 million. The principals of the firm are registered as professional engineers in 24 states.

Firm Description
The M.E. Group, Inc. (MEG) is a mechanical, electrical and plumbing (MEP) consulting design engineering firm. Services provided include HVAC, plumbing and control systems, indoor and outdoor lighting design, fire protection and security surveillance systems, chilled water systems, central plant design, power distribution and audio/video/data wiring. The firm has provided services from studies to turnkey projects with construction costs ranging from under $10,000 to more than $65 million. MEG is also a Minority Business Enterprise (MBE) firm. In this competitive environment, our firm has retained stability through principal involvement in design of the projects. The five principals have

M.E. Group, Inc. continued

worked together for an average of 22 years. At the core of our team's efforts are design professionals providing quality design services for our clients.

Firm Description
At Foresite, we simplify complexity. Our goal is to help organizations
assess needs, manage change and anticipate future opportunities so their
people, processes and facilities can work
better, together. We analyze problems,
evaluate needs and articulate goals.
Then, together with our clients, we
develop efficient, creative, effective,
long-term solutions. The objective in
every case is to create a vision—an easily
communicated plan—that can be
implemented in an efficient, orderly
fashion. We enable our clients to do
what they do, better.

Client/Manufacturer Contact: Gene Schults

Based on the content provided, it seems to be a product directory listing for companies and products related to building materials and services. The text includes contact information, product descriptions, and service details for various companies and divisions. The format is somewhat informal, with direct addresses and phone numbers provided, along with web links where available. The directory appears to cover a range of products and services, from concrete and metal fabrication to thermal and moisture protection systems, doors and windows, and architectural arts. The emphasis is on providing detailed company descriptions and contact information, likely intended for use by architects and builders. The document is intended for Iowa Arclithic, as indicated by the footer.

THE WORLD WE BUILD FOR OURSELVES —

Celebrate
FROM OUR OFFICES AND HOMES TO OUR ROADS
Building in
AND CITIES AS A WHOLE — IS THE SUBJECT OF
America
THE NATIONAL BUILDING MUSEUM.

Celebrating the men and women who have built the United States, shining light on the art and craft of construction, and revealing the how and why of good design, the National Building Museum is the only institution in the country dedicated to American achievements in architecture, design, engineering, construction, and urban planning.

Created by an act of Congress and located in the historic Pension Building in Washington, D.C., the Museum presents exhibitions which invite visitors to think about the built world around them; collects artifacts of design and construction; publishes books and an award-winning publication, Blueprints; and offers a wide range of programs for students, families, and adults.

Visit the National Building Museum when you're in the nation's capital, or become a member and support America's advocate for improving the quality of the built environment. The benefits of membership are numerous — the greatest of which is participation.

PLEASE SEND ME FURTHER INFORMATION ON THE NATIONAL BUILDING MUSEUM.

☐ Membership
☐ Programs and exhibitions
☐ Group tours
☐ Hosting private events in the Great Hall

Admission to the National Building Museum is free — so the Museum, as a private, nonprofit institution, relies on the support of corporations, foundations, and individuals. Contributions at these membership levels are tax deductible except for $4.

YES, I WANT TO JOIN THE NATIONAL BUILDING MUSEUM!

☐ $55 Family/Dual $______ Membership contribution
☐ $35 Individual Member $______ Additional donation
☐ $25 Senior/Student $______ Total amount enclosed

☐ My check payable to the National Building Museum is enclosed.
☐ Charge my: ☐ Visa ☐ MasterCard
