SECTION 1. Ball State University Board of Trustees is hereby empowered to erect, construct, equip, furnish, operate, and control, as a division of Ball State University, a college of architecture and planning to be known as the “Ball State College of Architecture and Planning . . .”
There are three vital reasons why imaginative architectural design takes shape when Belden Brick is used: Belden provides MORE distinctive colors. MORE exclusive textures. MORE adaptable sizes. Over 200 variations of brick to free the imagination of the creative architect, from sand mold colonial brick through earthy browns to mechanically perfect pearl grays.

Your nearest Belden Dealer will gladly show you the facts in the form of samples and our new 4 color brochure, or write us at P. O. Box 910, Canton, Ohio 44701.

CENTERFOLD: BALL STATE UNIVERSITY COLLEGE OF ARCHITECTURE AND PLANNING PANORAMA

5 BALL STATE DEDICATES NEW ArchitectURAL EDUCATION FACILITY

The Cover:

The succinct 42-word statement reproduced on this issue’s cover represented, in 1965, the culmination of hours of preparation on the part of hundreds of dedicated persons—architects, educators, legislators and the public—who sought to have established in Indiana a state-supported architectural education program.

To paraphrase a famous writer’s profound statement, however, what has passed is but a prelude to the present and the future. Elsewhere in this issue you will find a dramatic panorama of all that has transpired since the Ball State University College of Architecture and Planning enabling legislation was passed. We devote this entire issue as a salute to the College on the occasion of the dedication of its award-winning building December 2, 1972, and use this medium to express, once again, sincere appreciation to all who had any part in the creation of this fine educational program. We express particular thanks to Dean Charles Sappenfield and his faculty and students whose creativity and dedication are evident in the poster which is contained herein. We urge its display.

OFFICERS

Arthur L. Burns, AIA, President
James O. Johnson, AIA, Vice President
George L. Wiley, AIA, Secretary
Keith L. Reinert, AIA, Treasurer

BOARD OF DIRECTORS

THE INDIANA ARCHITECT is the sole property of the Indiana Society of Architects, a state association of The American Institute of Architects, and is edited and published every other month in Indianapolis, Indiana (editorial-advertising office address 300 East Fall Creek Parkway, N. Drive, Indianapolis, Indiana 46205; phone 925-4484). Current average circulation per issue, 3,200, including all resident registered Indiana architects, school officials, churches and hospitals, libraries, public, public officials, and members of the construction industry. Detailed information available on request.

ia/oct-nov 72/3
We're working toward the day when clean-burning natural gas will be plentiful.

But while we're working, you could be saving. For example, in some industrial direct-heating applications, modern gas-fired infrared equipment has saved gas dramatically.

Other ways include: Improved insulation, recycling exhaust systems, submerged combustion, continuous-fire kilns, modular boilers, industrial preheating, and oxygen-enriched gas-fired systems.

If you are building or modernizing, why not give us a call? Our engineers can show you many ways to go easy on the gas.

Ball State Dedicates New Architectural Education Facility

Saturday, 2 December 1972, will become and remain a memorable day in the Ball State University College of Architecture and Planning's (CAP) march of progress since it will mark the formal dedication of its new educational facility. Particularly noteworthy is the fact that CAP's new home is the only university building in Indiana (at least in recent memory) whose architect was chosen by a state-wide competition. As reported in our previous Awards Issue, Melvin Birkey and Associates, South Bend, was the winning designer and also received a Merit Award in the Society's recent excellence in Architecture awards program.

The schedule of events for Dedication Day includes, in addition to the Dedicatory Convocation at 11:00 a.m., the following:

- The premiere of MUNCIE—MICROCOSM OF AMERICA, a multimedia performance on thirty projection devices with quadrophonic sound. The National Endowment for the Arts granted funds for this effort of a city to take a positive look at itself;
- POLYARK LONDON LAB, a multimedia presentation by sixteen students on their work last spring in England;
- INDIANA, LANDSCAPE OF MAN and INDIANA COUNTY COURTHOUSES OF THE NINETEENTH CENTURY, exhibitions accomplished with grants from the Indiana State Arts Commission;
- LET'S HAVE INSIDE-OUT SCHOOLS!, a design feasibility study sponsored by Educational Facilities Laboratories;
- WHITE RIVER STUDY, a student research proposal sponsored by the America the Beautiful Foundation;
- Tours, student exhibitions, and the opportunity to look and meet and talk all day long.

With understandable pride, Dean Soppenfield urges all I.S.A. members to attend the entire day's festivities. Of particular interest will be the presentation of "Muncie — Microcosm of America."

The originator/director of "MUNCIE" is John Kurtich—Architect, Cinematographer, Urban Designer. Mr. Kurtich is on the faculty of the School of the Art Institute of Chicago, Department of Environmental Design. He has also been part of the Samothrace expedition sponsored by the American School of Classical Studies, Athens.

Assisting John Kurtich with the show are eight students from the College: David M. Black, John I. Byers, Sherman R. Bynum, James D. Campbell, James M. Dierdorf, Mark A. Peters, John F. Reynolds, and Richard W. Wismer.

"MUNCIE" is a pilot project which will demonstrate how a typical American community could see itself with fresh eyes. The combined-media techniques will present a varied, multi-leveled portrait of an American town—past, present, and future. The presentation will serve as a model which other cities could use to look at their own attributes and amenities. The historical/geographical picture of Muncie intends to reinforce positive aspects of the environment which normally remain hidden or forgotten.

The Indiana Society of Architects is pleased to have assisted in whatever ways were possible the establishment of the college at Ball State University and pledges its unswerving support toward its continued development and enrichment.
There's more to this than meets the eye.

Most problems combine some obvious elements with some almost "hidden" elements. Both must be considered in providing the best solution to your client's problems.

Sometimes even the most creative mind gets entangled in the web of the obvious. That's when our Architect and Engineer Liaison representative can be of assistance. He'll be happy to provide you some stimulating electric ideas to open up new perspectives on your client's problems.

Maybe there's more to your problem than meets the eye. We'd like to help. Call us today. Phone Architects and Engineers Liaison, 635-6868, Ext. 2-264.
The complexity of modern-day air handling systems, the needed skills of fabrication and techniques of installation plus a tremendous increase in the overall capacity of even an average system, have resulted in a corresponding increase in the responsibilities of the Air Handling Contractors. Only through a separate, detailed air handling specification can these new responsibilities be defined. As a consequence, there has been an ever increasing acceptance, by architects and engineers, of separate specifications and separate bids for air handling systems.

The above is a reproduction of the second edition of the Air Handling Specification, which is now available to architects and engineers throughout Indiana. The first edition received a top CSI award and the second edition updates all information as an aid to specification writers. A major improvement: the second edition now conforms to the CSI format for construction specifications and is appropriately arranged for complete coverage of work that should be contracted by the sheet metal-air handling contractor under CSI Division 15, (entitled Mechanical) subdivision Air Distribution.
