This issue of Skylines is devoted entirely to the 1958 Central States Regional Conference which is to be held in Kansas City on October 30 thru November 1. It is being sent not only to the regular list of subscribers, but to all Chapter members throughout the Region—some 1500 copies. We sincerely hope that your inspection of the interesting program outlined on these pages will convince you that you should attend.

We also wish to thank the advertisers who have made this wide circulation possible.

SKYLINES is the monthly publication of the Kansas City Chapter of the American Institute of Architects, and mailed without charge.

Kansas City 28, Mo.
Good design, finest materials, best performance in use! That's Stallpack, the complete marble enclosure shown above. Now, high-quality hardware is chrome-plated non-ferrous metal, makes the entire Stallpack unit rustproof forever! As shown by this handsome installation at the Truman Library, the gleaming stiles and partitions of pearl grey Carthage Marble harmonize gracefully with surrounding colors, no matter what they may be. New installation methods and equipment cut setting time in half, bringing labor costs down considerably. Well-made hardware, solid-core birch door, sound Class A Carthage Marble combine to offer the finest value on the market. For details about Stallpack, write Carthage Marble Corporation, Carthage, Missouri.
ONE CARRIER—and ONLY ONE CARRIER—is used for all types or makes of closet bowls whether blow-out or syphon jet or women’s urinals. The carrier is independent of the closet fitting thereby enabling the carrier to be placed at any distance from the bowl without reinforcement. Moreover, the entire assembly can be installed in less pipe chase width than other types, thus turning waste space into usable, rentable area.

Now, with UNITRON Chair Carriers and Closet Fittings you will not only save installation time but meet all wall hung fixture requirements with a minimum number of basic units.

No More Fuss* . . . or Muss* with GREASE SERIES JH

GREASE INTERCEPTORS have automatic* grease draw-off

The only interceptor that provides automatic discharge of intercepted grease at “the turn of a valve”—without removing cover . . . without touching the grease.

JOSAM “JH” Interceptor revolutionizes grease interception. It not only intercepts over 95% of the grease in waste water, but now, for the first time, it encourages grease removal because it is accomplished so easily and quickly, thereby keeping the interceptor always operating at top efficiency.

Call or write for literature

THE JOSAM LINE INCLUDES
UNITRON Carriers and Closet Fittings • Floor, Roof and Shower Drains • Backwater Sewer Valves • Interceptors for Grease, Oil, Lint and Plaster • Shock Absorbers for Supply Lines • Swimming Pool Fittings • Cleanouts and Access Cover

"Best by Test"

The National Bureau of Standards reports a figure of 0.08% shrinkage over a 100 day period for expanded shale masonry units. Of the large number of lightweight aggregates tested, rotary kiln expanded shale products showed the lowest amount of shrinkage.

Buildex, expanded shale products in comparison with other lightweight aggregate products, have MINIMUM SHRINKAGE.

BUILDEX, INC.
Phone 240
OTTAWA, KANSAS
The race to outer space has served to underscore the need for a faster pace in the pursuit of technological knowledge of all kinds. The word "space" itself has taken on a new reality and a new dimension.

While recognizing the effect of the Rocket Age, the 1958 Central States Regional Conference also intends to evaluate the many problems remaining still unsolved on this planet—of the relationship of man to architecture—of architecture's place in the community—and of the function, the business and the fun of the practice of architecture.
CONFERENCE PROGRAM

1958 CENTRAL STATES REGIONAL CONFERENCE

KANSAS CITY

THURSDAY • OCTOBER 30

8:00-12:00 Noon

REGISTRATION
Grand Ballroom Lobby on the Mezzanine

Busses will be waiting to return you to the Hotel, or you may wish to join many of the individual tours in Chapter members’ cars taking you to the points of interest you may wish to see in Kansas City.
conference hotel

All events (except the Ladies Events, the Thursday night Theater Party, the Friday Community Development Seminar, and all Saturday Events) will take place in the Hotel Muehlebach.

registration

There will be no pre-registration. The only pre-conference reservation which is important to observe is the Hotel Room Reservation which must be sent directly to the Hotel Muehlebach.

All Conference Registration will be handled at the Registration Desk in the Grand Ballroom Lobby on the Hotel Mezzanine. The Desk opens 8:00 a.m. Thursday, October 30 and will remain open throughout the Conference.

Registration fees are as follows:

- Corporate Members: $10.00
- Associate Members: 5.00
- Jr.-Associate Members: 2.00
- Producers' Council: 4.00
- Ladies: 1.00
- Students: 1.00

The Registration Fee covers all transportation and admission to all events for which no price is indicated in the program.
badges
For identification and for admission to Conference meetings, everyone is requested to wear the Conference Badge.

tickets
Tickets for all events for which a price is indicated in the printed program may be procured at the Registration Desk. Event prices shown are per person.

exhibits
The Commercial Exhibitors are listed in this program. Architectural exhibits will also be displayed in the Grand Ballroom area.

On Friday, the Community Development Exhibit will be shown in the Little Theater of the Municipal Auditorium.

ladies information
A Ladies Program will be available at the Registration Desk outlining all Ladies Events. Ladies of the Host Chapter will be serving coffee throughout the Conference at the Coffee Corner on the Mezzanine and will be available to answer any questions.

Coffee will be served in the Coffee Corner on the Hotel Mezzanine—courtesy the Kansas City Chapter of the PRODUCERS' COUNCIL.

coffee breaks
When you are looking for a place to sit down with a few friends or to find a quiet corner for a few minutes, look for the Host Chapter Hospitality Lounge located in #2 Dining Room off the Mezzanine.

So that your leisure moments will be made more comfortable, the furnishings for the Coffee Corner, the Hospitality Lounge and the Registration Desk have been graciously supplied by the HERMAN MILLER COMPANY of Zeeland, Michigan, through their Kansas City Representative, Mr. L. L. Bratchie of 8321 Reinhardt Drive. The new line of George Nelson chairs are being used for the first time in the Midwest at this Conference.
Perhaps best known for Retail Store Planning, this well known New York architect has a varied practice and wide interests. After receiving his B.A. degree at the University of Pennsylvania, Daniel Schwartzman studied at the Ecole National Superieure de Beaux Arts, Paris, France. He holds membership in the following organizations: American Institute of Architects—Vice Chairman, Office Practice Committee; Architectural League of New York—Former President and Member of Executive Committee; New York State Association of Architects; National Institute for Architectural Education; American Arbitration Association and the American Institute of Management.

Daniel Schwartzman has received the following awards: First Place—House Beautiful Competition; Merit Award—New York State Association of Architects; Architectural Award—Baltimore Association of Commerce; Commendation—Peale Museum of Baltimore.
BILL CRICK

Well known to Kansas City Architects as the owner of Crick's Camera Shop and keen expert on photographic materials and methods, Bill Crick describes his background in this way: "My interest in photography goes back some forty years to childhood. After spending 12 years in the heating and ventilating business, I decided to get into some business I enjoyed. After trying seven jobs in the next two years, I ended up behind a camera counter and said, 'this is it'."
This modest statement in Mr. Shulman's own words explains all too briefly his rise to the position of one of America's leading men in his field. "I was raised on a farm in Connecticut; came to California in 1920; went to the University for six years, didn't major in a thing and finally, by accident, in 1936, took some snapshots of a house by Architect Richard Neutra, and found myself in the business of architectural photography. There is no use in wasting more print on my biography, except perhaps to say I couldn't imagine myself doing any other kind of work, even if I had planned my entire life for it."
HENRY S. CHURCHILL, FAIA

Born in Chicago, Henry S. Churchill is a graduate of Cornell University where he received his BA and MA degrees.

In addition to his own practice, he has acted in a consultant capacity for both the U.S. Housing Authority and for the Division of Housing of the State of New York.

Besides lecturing for Columbia, M.I.T. and Harvard, he has a number of technical studies on housing and planning to his credit. He is the author of “The City is the People,” as well as many articles in the leading architectural journals.

He recently returned from Moscow where as a member of the American Delegation at the Fifth Congress of the International Union of Architects, he had occasion to verbally duel with Nikita Khrushchev on the merits of skyscrapers. (He won the match.)
WILLIAM STANLEY PARKER
FAIA

William Stanley Parker is a graduate of the Department of Architecture of Harvard, 1899. He has been consultant to the A.I.A. on Contract Procedure since 1930. A member of the Boston City Planning Board for 23 years, he also served on the Massachusetts State Planning Board for 3 years. From 1916 to 1923, he was Secretary of the American Institute of Architects.
CHARLES EAMES

One of the outstanding participants of the Central States Conference in Kansas City in 1952, Charles Eames has graciously consented to climax the Conference this year at the end of the Saturday events.

Characteristic of his inimitable approach to each problem, his reply to a request for biographical information ran this way:

“Born 1907—St. Louis, Mo.

Has practiced:

Architecture
Stage Design
Exhibition Design
Graphic Design
Product Design
Photography
Writing, producing, directing of motion pictures.

Has worked in education on faculties and as visiting lecturer.”
Since November 1957, Dr. Walter R. Dornberger has been technical assistant to the president of Bell Aircraft Corporation.

Dornberger joined Bell as a missile design consultant in May 1950, after serving for three years in a similar post with the U. S. Air Force at Wright-Patterson Air Force Base, Dayton, Ohio.

He was born at Giessen, Germany, and attended a number of engineering and technical schools. Berlin Technical Institute awarded him three degrees—a B.A., an M.A., and an engineering Doctorate.

In 1930, when he held the rank of captain and branch chief in the Germany Board of Ordnance, he was given charge of the development of rockets as modern weapons. His first experimental station was established at Kummersdorf near Berlin in 1931. Pioneering work was begun there in the development of liquid fuel rockets. From 1932 to 1945 he was, at the same time, division chief for rocket development, German Board of Ordnance and commanding officer of the German rocket development center at Peenemunde, where the V-1, the V-2, and the supersonic anti-aircraft weapons were developed. In 1944 he was appointed special commissioner of the German Reich for all V-weapons and anti-aircraft guided missiles. Dornberger held the rank of major general when he became a prisoner of war in 1945.

He is the author of the book "V-2" which has been published by Viking Press, New York, and in several countries abroad. He is an associate fellow of the Institute of Aeronautical Science, a member of the Buffalo Aero Club, and an honorary member of several Rocket and Astronautical Societies.
DR. WALTER R. DORNBERGER
DR. W. D. BRYANT

Dr. William D. Bryant, executive Director of Community Studies, Incorporated, became head of this Kansas City social research organization when it was founded in 1949.

He was formerly the principal planner for the City of Kansas City, Missouri; and industrial economist for the Kansas City Federal Reserve Bank. He was also director of the Department of Research for this city. He has served as associate economist and research director for the New York State Division of Housing. In the U. S. Department of Commerce, he was regional business consultant.

Dr. Bryant received his B.S. and M.S. from Northwestern University and his Ph.D. at New York University.

L. P. COOKINGHAM

L. P. Cookingham has been City Manager of Kansas City, Missouri, for the past 18 years. He has been engaged in municipal administration for 38 years, 31 of which have been as City Manager of four American cities. Prior to his assignment in Kansas City, he was City Manager of three cities in Michigan. He is a native of Chicago and a World War I veteran. His professional training is in Civil Engineering.

Mr. Cookingham is Past President of the International City Managers' Association and the American Society of Planning Officials. He is a member of the Advisory Council to the Traffic Bureau, Yale University, and Chairman of the Committee on Training for City Management of the International City Managers' Association. He is also a member of the Committee on Urban Research, Highway Research Board; and a member of the Board of Directors of ACTION. He was the first person selected by the LaGuardia Memorial Association of New York to receive the annual award for outstanding achievement in municipal affairs.

AN ASS having put on a Lion's skin, roamed about, frightening all the animals he met with; and, seeing a Fox, he tried to alarm him also. But Reynard, having heard his voice, said, "Well, to be sure! and I should have been frightened too, if I had not heard you bray."

Many multi-colors masquerade under the cloak of being "as good as" Zolatone. But their qualities are soon exposed. AVOID THE UNKNOWN—USE ZOLATONE.

EXCLUSIVE ZOLATONE AGENT FOR THIS REGION
