Glistening surfaces of white Mo-Sai quartz form the exterior and interior surfaces on this modern banking facility. Double faced Mo-Sai spandrels molded in an imaginative design accent the windows both inside and out. Glazing sets directly into grooves cast in the Mo-Sai spandrels. The same design cast in Mo-Sai and set vertically with intermeshing crossbars forms an airy solar screen on the south landing.

We invite your inquiry... and an opportunity to provide assistance in working out your designs in Mo-Sai.

Adaptability of wall materials to many design and decorative possibilities is an important hidden factor to be considered when selecting wall systems.

Load-bearing 10" and 12" Acme Brick Double-Wall Systems offer noteworthy advantages in both design and decor. Both systems consist of two walls of Acme King Size Brick, with masonry bonders. The 10" Double-Wall has a maximum height allowance of 15' and the 12" of 18' without lateral support. Both systems have exceptional strength and durability. Both completely eliminate finishing and most wall maintenance costs.

The 10" Double-Wall System is well suited to most commercial and architectural designs. The 12" Double-Wall System gives the flexibility of greater height and increased vertical storage space. Its bonders are not exposed, so exterior and interior walls can be complementary or matching brick. The wide range of King Size Brick colors and textures enliven even the most imaginative decorative approaches.

Examine fully how a Double-Wall System can add to the value and beauty of your next building project.
