See the Sheffield Open Web Steel Joist exhibit at your convention in Kansas City. All Sheffield Joists meet the widely accepted specifications of the Steel Joist Institute.

Sheffield Joists are a product of Armco Steel Corporation, Steel Division, 7000 Roberts Street, Kansas City, Missouri 64125.
Who says factories have to be UGLY?

We say they DON'T! And we prove it every chance we get. According to personnel directors, "Employees enjoy working in pleasing, efficient surroundings... they work better, stay on the job longer, and, we get the "cream" of the labor market as a result!"

Extravagant? Not at all! Beauty can be engineered into plant layouts most economically. In production areas, offices, salesrooms...appearance is important to workers, executives and visitors alike.

In the above view of ELECTRO DYNAMICS CORP. (Earl D. Clark, Jr., Architect—Collins Construction Co., General Contractors), the partitions are of Masonite ROYALCOTE Honeytone Cherry, one of many woodgrains and colors available. Aluminum and glass perform their function beautifully.

Visit our modern, new plant, see our design and production facilities... and how we have utilized modern, new materials to create pleasant and productive working surroundings.

The keynote and program of the 1964 Central States Conference asks a pointed question of every architect in the five state area....."What are your opportunities, your potential and your obligations in helping to guide the development of your community?"

Where each of us.....student, recent graduate, or seasoned practitioner can fit into the picture.....how we can more directly profit ourselves, our profession, and our neighbors as well, by understanding more clearly how each structure we design can better fit into the pattern of our community.....these are to be the themes explored by our Conference program.

Year by year the American Institute of Architects has grown.....in membership.....in service to that membership.....and in the regard of the public whom we all serve. No small part of this growth and service and regard have been the accomplishment of the architects of this Region.....the 1964 Conference promises to continue the pattern. Activities of interest to the wives.....social events.....and every aspect of the program have been planned to make this Conference effective, productive.....and fun!

Hugh Stubbins, your newly elected vice-president.....the Kansas City Chapter.....and your Director, all urge you to come.....and look forward to enjoying these few days with you!

PAX-Panel® announces true 3-dimensional panels after years of development, we now bring you panels which are formed and fabricated by the PAX-Panel® Division, Frank Paxton Lumber Co., of U.S. Rubber Royalite® overlayed with Dupont Tedlar®. This exciting development allows you to create your own design in 3-dimensional, real 3-dimensional, up to six-inches in depth.

Combine this freedom of design with economy, hair-cell finish, color durability of Tedlar®, light-weight (less than 2# per sq. ft. for an insulated panel), freedom from rust or corrosion, any desired U-factor, a wide variety of interior face materials, and you can see the horizons that open up to you.

6311 St. John Ave., Kansas City, Mo., HU 3-7000

Add space with Dwyer Kitchens

By combining full kitchen facilities into single, compact units, Dwyer Kitchens actually add space to floor plans, make them more attractive and livable. And recess models, like the Series 69 shown, "hide-away" behind closures when not in use. There are kitchens designed for apartments, motels, hotels and other rental properties, for the executive office and employee lounge, schools, churches and institutions. Specific applications include "senior citizen" and college married student housing.

To receive a complete ARCHITECTS DATA FILE and additional information on Dwyer Kitchens, contact the Dwyer representative nearest you, or write DWYER PRODUCTS CORPORATION, Michigan City, Indiana.
NEW WOOD HANDRAILS with an aluminum core substructure are furnished as a complete unit by Blumcraft. The solid walnut wood, with a natural hand-rubbed oil finish, is bonded to the aluminum at Blumcraft's factory. This new railing concept combining wood and metal is trademarked RAILWOOD®

BUILDEX, INC., BOX 15, OTTAWA, KANSAS
WASHINGTON, Oct. 17 - Nominations are now being received for the ninth annual R. S. Reynolds Memorial Award, the largest in architecture, The American Institute of Architects announced today.

The international Award, consisting of an honorarium of $25,000 and an original sculpture in aluminum, is conferred each year on an architect for design of a significant work of architecture in which aluminum has been an important contributing factor.

Nominations will be accepted by the AIA, which administers the Award, through December 31, 1964. The nominations will be reviewed by a jury of distinguished architects appointed by the AIA.

Brochures inviting nominations for the 1965 Award are being mailed to all AIA members and to architectural societies in foreign countries. An architect may be nominated by anyone, including himself or his firm, using a form included in the AIA brochure or by writing The Reynolds Award, The American Institute of Architects, 1735 New York Avenue, N. W., Washington, D. C., 20006. Preference is given to structures completed during the past three years.

The 1964 Award was given to Skidmore, Owings & Merrill, for design of the U. S. Air Force Academy Chapel, Colorado Springs, Colo. Walter A. Netsch, Jr., was partner in charge of design of the Chapel. Previous Awards have gone to architects in Germany, France, the United States, Switzerland, Australia, Belgium and Spain.

The R. S. Reynolds Memorial Award was established by Reynolds Metals Company in honor of its late founder.

M.A.R.A. ANNOUNCES STUDENT AWARD INCREASE

The Missouri Association of Registered Architects annual award to an architectural student was recently increased from a $200.00 to a $300.00 award, President Edward J. Thias has announced. This award was given to students enrolled in the School of Architecture at Washington University in 1961, 1962 and 1963. The award must be used for the recipient’s tuition and it is granted to an outstanding student of architecture in Missouri.
ADDITIONAL DATA ON LEGAL SEMINAR AT UNIVERSITY OF NEBRASKA

Omaha, Nebraska – The Nebraska Architects Association, a Chapter of the A.I.A., and the College of Engineering and Architecture, University of Nebraska, are jointly planning a one day seminar on November 23, 1964 entitled “LEGAL ASPECTS OF THE CONTRACT DOCUMENTS”. Last month, SKYLINES carried an announcement of this event and the latest information received conveys the following additional items:

The Seminar, which will be held in Lincoln, Nebraska at the Center for Continuing Education, University of Nebraska, will be open to all architects, designers, draftsmen, professional engineers, contractors and all other interested parties in the area. Registration fee will be $10.00, including lunch. Registration may be secured in advance by writing:

Mr. C. W. Bowmaster,
Program Coordinator,
University of Nebraska
Center for Continuing Education
Lincoln, Nebraska 68503

Guest speakers and topics of discussion will be:

“Legal Aspects of Working Drawings and Shop Drawings”
Mr. William W. Eshbach, A.I.A.
Eshljack, Pullinger, Stevens & Bruder
Vice President, American Institute of Architects
Philadelphia, Pennsylvania

“Legal Aspects of Method and Materials Specifications”
Mr. Frank Couch
Smith, Hinchman & Grylls
Detroit, Michigan

“Legal Aspects of the General Conditions”
Mr. John Clark, Attorney
Deckert, Price & Rhoades
Philadelphia, Pennsylvania

“Possibilities for Protection”
Mr. Victor O. Schinnerer, Insurance Counselor
Victor O. Schinnerer & Co., Inc.
Washington, D.C.

"We found out the hard way . . . over a period of years . . . that if certain prints absolutely HAVE TO BE GOOD, we have to send them to Western Blue."

That statement, faithfully quoted, didn't replace the profit motive, but it sure helped. It was made by a prominent member of the A.I.A. who likes our supervisors because they are perfectionists, and it paraphrases similar compliments we get daily, couched in slightly different language.

Cerami-Kote "505"

GIVES A TILE-LIKE FINISH AT
A FRACTION OF THE COST OF TILE

Suggested Uses:
CONCRETE AND MASONRY. METAL. WOOD.

Cerami-Kote 505 has a high solids content which provides 3 to 4 mils per coat coverage; yet, once applied, Cerami-Kote 505 air dries tack-free in 2 to 5 hours, about the same as ordinary enamel. Cerami-Kote 505 has good flow and leveling characteristics so brush strokes blend beautifully.

Cerami-Kote 505 is much easier to use than other two-component coatings. An easy-to-mix 1 to 1 component ratio works best for most applications.

Most two-component systems have a "pot life" of 1 to 6 hours, so small batches must be mixed several times a day. Because Cerami-Kote 505 has a pot life of 16 to 48 hours, you can mix a full day's supply in advance.

No complicated metering equipment is required for spraying. Once mixed, Cerami-Kote 505 can be sprayed like ordinary paint... with ordinary equipment. Spraying with high-solids Cerami-Kote 505 produces a high build with few passes. Cleaning up equipment is simple, too.

(WRITE FOR INFORMATION)

GREAT WESTERN PAINT MFG. CORP'N
1207 West 11th Kansas City 1, Mo. Baltimore 1-1322
A three-level parking facility with approximately 25,500 square feet per level and a completion deadline in 90 of the usually worst weather days of the year — this was the unenviable position of contractors Peter Kiewit Sons & Company in January 1964. Fortunately the parking facility was designed to be built with Wilson Prestressed Concrete, and the job was completed the first week in April 1964. It was as easy as that. Provisions also were made to add two new levels as needed in the future. Along with fast, easy erection in all types of weather, Wilson Prestressed Concrete is economical ($500 less per car area than a similar structure next door) and provides a sturdy maintenance-free structure with low insurance rates. It may pay you to specify Wilson Prestressed Concrete for your next building.
