KENTUCKY STATE PARKS

Within the last twenty years and particularly the last ten years, the Commonwealth of Kentucky has effected great strides in building a superb state park system. The Department of Parks, in providing comprehensive recreational facilities, has demanded the caliber of design which could be compared by Kentuckians and out-of-state guests to any other park system in the United States. How well Kentucky Architects have passed that test is answered by the thousands of letters received by the Department of Parks since the massive renovation and building program of 1960.

This issue attempts to illustrate the variety of recreational parks which currently delight all who visit them. A special note of thanks is hereby expressed to Tom Nelson, Department of Parks, Keith Ashby, AIA, Department of Finance, Sara Goins, Department of Public Information, James Host, Department of Public Information and Arnold Judd, AIA.

Get this heating/cooling system into any motel...without reservations.

It's General Electric's ZONELINE system and it provides unequalled design freedom for motels, hotels, nursing homes, apartments and office buildings. Choose any of three basic chassis—cooling only, cooling with built-in electric resistance heating, or Zone-line heat pump. Units are mounted through the wall—high or low—wherever you wish, and controlled by integral or wall-mounted thermostats. A simple touch gives positive, room-by-room control of heating or cooling.

A Zoneline system for every need —
208V or 230V application

The performance of Kentucky State Parks has attracted the attention of the nation. Americans, now more vacation minded than ever, are coming to Kentucky in vastly increasing numbers with each passing year. As a result, out-of-state tourists are now supplying a dramatic addition to the gross state revenue enjoyed by all Kentuckians. A key ingredient in Kentucky's success story is the contributions of its architects.

KENTUCKY ARCHITECTS DESIGN A WINNER

by Quentin D. Allen, Editor

Lure Lodge, Lake Cumberland State Park, McCulloch & Bickel, AIA, of Louisville, Kentucky.*

Until the Kentucky State Park system experienced a wholesale renovation and construction program which began in the early 1960's, the Bluegrass suffered from a "Brand X" vacation image. "Beautiful state but no vacation facilities" described Kentucky's vacation facilities. Then, a series of events occurred which created a new image for the Bluegrass State.

A bond issue with $90 million for roads and $10 million for parks was one of the key points. With a new outlay of state money matching federal expenditures for a national system of turnpikes, there was the assurance of Kentucky sharing the country's superhighway system. With the anticipation of an active road building era and the possession a state already bequeathed with natural beauty, Kentuckians began a dynamic focus upon state park recreational complexes as both an index to the livability of Kentucky and also an attraction to out-of-state guests.

From the early 1960's to the present, Kentuckians have rediscovered a beauty and in awe of their own state. From the opinions of out-of-state tourists, Kentuckians have discovered anew the state's immense importance in its central location near the metropolitan areas of the country, its dramatic crossing roads history, its varied and abundant mineral resources and its wondrous range of visual plenty in natural beauty. If the magic inherent to the name of Kentucky was ever tarnished, it is not so today. With wise investment in roads and state parks, Kentuckians have received a dollar-wise and recreation-rich state park system.

The Kentucky State Park system's reputation for excellence has received attention from the nation's magazines and newspapers. Numerous awards have been won by the Kentucky State Park System and its principal outlet of news, the State Department of Public In-

*Firm now dissolved (reorganized into separate practices)
formation and the Division of Travel. While handsome brochures have flooded eager requestees over the nation, the philosophy "selling" Kentucky parks has been the theme "you've got to see Kentucky Parks to believe them".

Kentucky Architects comprise a major ingredient in the state park success story. The very idea of recreation is honored at Kentucky State Parks. The marriage of physical facilities to the offerings of thirteen different sites manages to produce as much recreational return as possible from the environment. The importance of the lodge cannot be overstated. It is the center of activities, which tones and colors the zest and flavor of its other facilities.

Recreation is many things. It is aloneness, silence, romance, card parties, meeting new people, communion with nature, meditation, undisturbed reading, lazy television days, active sports as golf, swimming, hiking, boating, fishing, tennis (among many other offerings), maid service, sun fun, tasty food, and many other alluring facets of Kentucky State Parks.

The above comprises a partial list of why people insist on breaking attendance records at Kentucky State Parks on an annual basis. These great magnetic points have drawn an astounding number of out-of-state tourists. From the zestful nature of guests who visit Kentucky parks, it seems logical to conclude that guests leave our parks satisfied, refreshed and rewarded for the experience of a Kentucky vacation.

Individuality of design has aided the Kentucky park system. Kentucky Architects have approached their design problems from the standpoint of linking each lodge with the distinct characteristics of its respective location. Hence, we find at Kentucky state park lodges that the traditions and history of each area have been respected and observed. The geographic distribution of the 13 major state parks represent all sections of Kentucky. It is expected that two additional major state parks shall soon be

A lodestone of vacation plenty has been struck in Kentucky. The amazing range of recreational return offered by the variety of scenic settings in the shadow of stately mountains, sparkling lakes and verdant forests have intrigued vacation seekers over the nation. The quality of Kentucky's recreational facilities have transformed its natural panoramas of scenic beauty into tangible cash profits for all Kentuckians.

Other states, wishing to initiate a state park system with the style and zest of the Kentucky example, have examined all aspects of the total design package which has been so pleasing to in-state and out-of-state tourists who affirm their approval of Kentucky State Park facilities by their repeat business. While enjoying a superior position in the matter of state parks, Kentucky is not looking backward to relish its past laurels but to plan further improvement.
Where does Architecture end and Decor begin?

It need not happen at all. We collaborate with you for color schemes, fixtures, and furnishings that complete and enhance your interior design. Without obligation, ask for a get-acquainted meeting with the architecture oriented designer assigned to work with you.

Use something to insulate cavity and block walls.
How about jawbreakers?

Whenever the temperature differs on the inside and outside of these walls (that’s all the time), convection occurs in the cavities. The more different the temperature, the bigger the wind in the voids. The wind carries therms from the side where you want them to the side where you don’t. These walls are as good as—or better—than other kinds of walls. But like all walls, they need insulation. Without it the occupants are as miserable as the heating and air conditioning bills.

Zonolite® Masonry Fill Insulation: better than everything
Zonolite Masonry Fill Insulation was developed specifically for these kinds of walls. It doubles their insulation value; a real boon to mankind. Keeps inside wall temperatures comfortable and the heating and air conditioning bills easy to take.
Zonolite pours right into the voids, fills them completely, never settles. It is water repellent; any moisture that gets into the wall drains down through it and out.
Cost: as low as 10¢ per square foot, installed.

Gentlemen:
Somehow using jawbreakers doesn’t sound like a good solution to the problem of insulating masonry walls. Send me Zonolite Masonry Fill Insulation Folder No. MF-83, with complete technical data and specifications.

The beauty of marble, the durability of concrete...

**TERRAZZO brings an old-world touch to a structure of modern elegance**

Textured on the plaza, highly polished for interior floors, traditional terrazzo in a bold new pattern sweeps across the entire ground level of the new administration building of the American College of Surgeons.

The striking design keys the shape and placement of outdoor pools and fountains, provides a pleasing continuity as the building is entered. To achieve the special tones desired, the architects specified both white and grey cement matrices, combined with white, black or grey marble chips, and black obsidian.

The beauty will last. Terrazzo has exceptional life expectancy, easy maintenance. Everywhere architects are recognizing the esthetic as well as the practical advantages of the age-old terrazzo process. Offering an almost unlimited range of colors and patterns, terrazzo enhances the most modern design ideas.

Floor 'em...with Kuramic Seamless

Kurfees KURAMIC Seamless Floor Coating is a proven, durable epoxy base and urethane-finish that looks expensive, but installs and maintains for less than most floorings. Kuramic Seamless goes over practically all subfloorings; is available in a wide choice of colors. Kuramic film builds 35 mils minimum in three coats. Wears like tile. Cleans easily by simply mopping. No waxing. For kitchens, shower rooms, hallways, auditoriums, recreational areas, surgical rooms and most everywhere. Inside or out. Makes exciting dados. For more information, write J. B. Tabler, Kurfees Paint Company, 201 E. Market Street, Louisville.
