2,700 Light-Weight Concrete Masonry Units

Cured in Eight Hours

This might be your view if you were standing at the extreme end of one of our six tremendous (86 feet long and 10 feet in diameter) autoclaves.

Within this giant steel kiln, "HORN-CLAVING" pre-shrinks Light-Weight Concrete Masonry through curing with high-pressure high-temperature steam for a predetermined cycle. Electronic controls ensure a uniform cure resulting in predictable coefficients of strength and moisture content.

All Units produced are now being "HORN-CLALED"—each of the six kilns produces 2,700 8x8x16 equivalent units in every eight-hour cycle. Our total capacity within a 24-hour cycle is 32,400 of these units.

Ensure the advantages of this high-quality Light-Weight Concrete Masonry for your projects—specify "HORN-CLALED". Price and delivery information on request.

Reliable Manufacturers of Light-Weight Block since 1923

CINDER BLOCK INC.

9143 HUBBELL AVENUE, DETROIT 28, MICHIGAN

VERmont 8-3200
Here is something new and exciting in Architecture that should set into motion a chain reaction which will make Detroit's skyline as famous as its production line.
ROBBINS HARDWOOD FLOORING IS NOW WOODLIFE TREATED BY DRI-VAC PROCESS

Yes, that's right. Now you can specify "vaccinated" hardwood flooring that retains its original beauty and stability for decades. Robbins hardwood flooring is now available with new moisture protection by Woodlife, the original water repellent wood preservative containing PENTAchlorophenol. For the deep penetration that assures maximum protection, Woodlife is vacuum-impregnated into the wood cells by the Dri-Vac protection process. Woodlife protects against water absorption — the principal cause of swelling, shrinking, checking, grain raising — and guards against fungi and termite attack. With Dri-Vac applied Woodlife treatment, Hard Maple tested over 80% stabilization in a recent standard N.W.M.A. laboratory test. Robbins is the only flooring so treated ... and so stable.

WOODLIFE Treated

Untreated

These Hard Maple flooring panels were exposed to weather for five years. They were identical when exposed, except panel on left was treated with Woodlife.

WHITCOMB-BAUER FLOORING, INC.
Office and Warehouse • 10301 Lyndon at Griggs • Detroit 38, Michigan • Webster 3-4320 Distributors and Installers of Ironbound* Continuous Strip* Hard Maple Flooring, PermaCushion Floor Systems, end grain flooring, and all types of nailed floors.

Letters

Bulletin:

Your letter of June 19, 1956 to Mr. Jacob P. Sumeracki, Secretary of the Wayne County Board of Auditors, concerning the Board's invitation to architects to bid on services for remodeling the Wayne County Morgue has been referred to me. As you will recall, I telephoned you Wednesday, June 20, 1956, concerning the matter contained in the aforementioned communication, and this letter will merely confirm our conversation.

It is the feeling of the Board of Auditors that in advertising for bids for services they are complying with the spirit and letter of the law. In answer to your question as to whether the architect selected complied with all the requirements stated in our general specifications, please be advised that Victor J. Basso, the architect selected, incidentally is a member of your Institute of Architects, did not comply with the specifications but did comply strictly in conformance to A.I.A. regulations. Mr. Basso submitted a letter to the Wayne County Auditors in which he stated he felt that "it would be improper to set a cost limitation on the work from which a fixed fee professional services could be based." As to your question of whether there was more than one bid, the only bid received was the bid of Mr. Victor J. Basso.

Please be assured that the Auditors feel your interest in our method of operation is a good, healthy, democratic interest, and any suggestions which you may have for bettering the operation will be well received.—RICHARD T. KELLY, Executive Secretary.

KITCHENAID
The World’s Most-Wanted AUTOMATIC DISHWASHER

There’s A KitchenAid Model To Fit Any Kitchen

The nicest kitchen in the world is nicer still when a KitchenAid Automatic Dishwasher is installed. It’s the only one whose basic principles have been pioneered, tested and proved unsurpassingly superior in the world’s biggest, busiest kitchens. Small wonder, then, that busy housewives want a KitchenAid in their kitchens, too. There are 3 models to choose from, all in sparkling white, gleaming copper or satiny stainless steel, with other colors available.

We are now recruiting for a Construction Analyst in our Loan Guaranty Program which administers the law relating to veterans for the purchase or construction of homes or acquisition of other properties.

The qualifications required are:

A degree in Civil Engineering or Architecture or other comparable professional field, plus not less than eight years experience in a supervisory or executive level in the field of building construction or inspection for a private or governmental activity involved in large scale construction work, including municipal, county, state, or Federal agency or authority, or

Candidates not possessing such academic qualifications may qualify for the position if they have a total experience of not less than fifteen years of such supervisory or executive experience.

Should your organization know of persons who have the necessary qualifications and who may be interested in employment as a Construction Analyst, $6590 per annum, with this agency, we will greatly appreciate your telling us at your earliest convenience, or referring any such candidates to us.

We are also interested in interviewing Construction Analysts who can qualify for higher positions in the Detroit area or other parts of the United States or in the Central Office of the Veterans Administration, Washington, D. C.

It is our continuing desire to conduct the Loan Guaranty Program with the objective of providing efficient service to the building and lending industries and the veteran whom we serve. Your efforts in assisting us to obtain the services of qualified applicants will indeed be appreciated.

LLOYD H. JAMESON, Manager, Veterans Administration, Regional Office, 310 E. Jefferson Ave., Detroit 31, Mich.

Why Do We Need School Architects?

Because there are no standardized approved plans, each new school requires the services of an architect. Fees range up to 10% for small buildings.

New plans and an architect for every school are a luxury we can't afford. And in some cases, judging by examples of poor school design we've seen, an architect cannot even be rated as a luxury. Too often, he's a quack selling amateurish work that the school district will be stuck with for 50 years.

Millions could be saved if our State Department of Public Instruction would commission the best architects to design two or three dozen types of schools. From these plans, individual districts could choose the school best suited to their needs.

The architect's fee would be eliminated. School boards would be getting plans of proven efficiency. Contractors would grow familiar with these standardized plans and could bid much closer, we're told.

In a shorter period of time, these plans could be refined and costs compared. School boards could study the records and know what their building and maintenance costs of these standard schools would be.

Nothing need be compulsory. School boards—if they could sell their voters on the idea—would still be free to hire an architect and build a different school if they chose. But, within a few years, we think the wiser boards everywhere would take advantage of these tested and proven designs available at no cost.

It's a simple step that could be taken by the State Dept. of Public Instruction at comparatively little cost. It would step on the toes of no one except the architects. Right now, with classrooms overcrowded and educational standards slipping, we think the kids rate a little more concern than the architects.

The purpose of the W.A.L.D. is to advance the architectural profession, to create a greater public interest in the profession, and to promote friendship and unity within the group. Through the cooperation of your magazine, our purpose has been accomplished.

Wishing you continued success for a very fine publication, I remain

—Mrs. James B. Morison, President.

KARTSEN'S CAFETERIA

Long-time Users of Gas for Cooking

Kartsen's, on Woodward just south of Grand Circus Park, is a familiar landmark. But when the doors first opened to the public in 1915, the location was known as “North Woodward”!

Kartsen's management policy is "no frozen meats, no frozen fish." Their all-fresh food menus are made available in the main floor cafeteria, and in the second-floor "Cascade" Room, with table service.

Kartsen's kitchens are all-Gas equipped, to assure finest cooking. Their management agrees that natural Gas is best for natural cooking—and Gas is so fast!
That’s right,” said the boy.

“Well,” said the father, heavily, “when you leave the office this evening, lock the door and throw away the keys, because we are out of business.”

No doubt, there is considerable difference between an attorney and a patent attorney. I am something of an inventor myself. I invented a device to enable one to see through a brick wall. It is called a window. This led to windowless buildings, or at least to a controversy as to whether they should be all glass or windowless. As the late Albert Kahn once related, when women employees learned that claustrophobia meant fear of confinement, they all voted against it.

Criticism of an architect’s work is not practiced as freely as in the case of art or literature. There seems to be more fear of law suits. One critic wrote that a certain architect was the worst in the world. Upon being sued by the architect, the critic wrote of the architect’s next project that he was not up to his usual standard.

At any rate, the accusation is made by some that modern architecture is such that if an architect can’t design it’s no handicap.

There have been doubts expressed about equality under the law, especially with regard to architecture and the allied arts. No one cares if a banker writes a bad check is sent to jail. Most unheard-of thing I’ve ever heard of!

Oh, well, they say old bankers never die, they just lose interest. This applies also to architects to some extent. One states that he keeps young by associating with the men in the drafting room, by learning their slang and weaknesses, and mimicking them once in a while.

Specifications are contract documents and a great deal of legality rides on them at times. “No changes likely to cause the building to collapse shall be made without the permission of the architect.”

Or the architect who had a painter do a mural for one of his buildings—after prevailing upon the artist to write a brief specification covering the installation, the artist came up with this:

“The artist shall deliver the painting to the building and the owner shall hang himself.”

Any resemblance to stuff you’ve heard before is purely coincidental.

FRANK LLOYD WRIGHT, world-famed architect, has just become registered in Michigan, it is announced by the Michigan State Board of Registration for Architects, Professional Engineers and Land Surveyors.

When Mr. Wright recently submitted to the Detroit Department of Buildings and Safety Engineering a plan for the residence of Mr. and Mrs. Henry Turkel to be built at Seven Mile Road and Strathcona Drive in Detroit, it was necessary for the plans to bear the seal of an architect registered in Michigan, so the Board approved Mr. Wright’s application on March 9.

This brings to mind a story that is characteristic of Mr. Wright. When the 86-year-old master was testifying in a court case, he was asked whom he considered the greatest architect of all time, he replied, “I am.”

Judged later if he did not consider his testimony a bit immodest, he replied, “Well, I was under oath, wasn’t I?”
Don't use insulation that is not uniform in thickness and density. It's as inefficient as a rusted out screen.

USE STANDARD COTTON BLANKET INSULATION

Just as flies pour into a house through a hole in the screen, so heat pours out through weak spots in insulation. There are NO WEAK SPOTS in Standard Cotton Blanket Insulation.

Special machines manufacture a continuous blanket of uniform thickness and density by forming layer upon layer of cotton... nature's finest insulating material. Only cotton insulation is manufactured in this manner. This blanket is adhered to an asphalt vapor barrier of either standard Kraft or aluminum to form the best available insulation.

Compare these features — LIGHT WEIGHT • FIRE, MOISTURE and VERMIN RESISTANT • APPLIES RAPIDLY • SAFE TO HANDLE • NON-MATTING • WON'T SAG CEILINGS • WON'T SETTLE • DEADENS SOUND.

Tests by the government and in actual usage prove cotton insulation, per inch of thickness, to be the most efficient of 10 different types of insulating material. So specify Standard Cotton Insulation... it's the BEST.

California

WILLIAM STEPHEN ALLEN, has been elected 1956-57 president of the Northern California Chapter, A.I.A. Other officers elected were: William Corlett, vice president; Worley Wong, secretary; Donald Smith, treasurer; Corwin Booth, director. The chapter is celebrating its 75th anniversary.

PAUL R. WILLIAMS, A.I.A., Los Angeles architect, has been awarded an honorary degree of Doctor of Fine Arts at Tuskegee Institute in Alabama.

He was cited at the institutes 75th anniversary commencement exercises for “the unwavering excellence of his work and the sustained surge of those creative ideas which have distinctly identified his contributions to architectural design.”

Williams, a graduate of the University of California, designed the Beverly-Wilshire Hotel, the Sunset Plaza Apartments in Hollywood and the Music Corp. of America Bldg. in Beverly Hills.

Washington, D.C.

ARTHUR BROWN, IR., F.A.I.A., nationally known San Francisco architect, has been named to a three-man advisory commission for the multi-million dollar remodeling of the United States Capitol.

Florida

LOYD FRANK VANN, A.I.A., announced the reorganization of his offices for the general practice of architecture and engineering. The new firm will be known as Loyd Frank Vann Associates, Architects. Associate members of the firm are William A. Fapy, III and A. Albert Mandel. The firm is located at 1674 Coral Way, Miami.

Georgia

“A HALF CENTURY OF ARCHITECTURAL EDUCATION EXHIBITION” was held recently at the School of Architecture of the Georgia Institute of Technology. The program was made possible by a grant from the Georgia Tech Foundation, Inc., featuring work done by alumni of the school.

Seventy-one buildings designed by former students and associated alumni made up the display. They cover a wide range of architectural projects—residential, commercial, industrial, religious, educational, recreational, health facilities and public buildings.

The most historically significant work is the Techwood Housing Project in Atlanta. Designed by the late Flippen D. Burge and Preston S. Stevens, the buildings, completed in 1937, were the first federally financed slum clearance project in the United States. Mr. Stevens is now a partner of Stevens & Wilkson.

The exhibit will be circulated nationally by the Smithsonian Institute in Washington, D.C.

Louisiana

EDWARD B. SILVERSTEIN was elected president of the New Orleans Chapter, A.I.A. Also elected were Emil L. Mathes, vice president; Albert J. Wolf, Jr., secretary and M. Wayne Stoffle, treasurer. Elected to the executive committee were John E. Dinwiddie and Carl Olschner, the retiring president.

Michigan

WILLIAM S. KINNE, Jr., A.I.A. has been appointed to the executive staff of the Knavneer Company, of Niles, Michigan, as Director of Architectural-Planning, it is announced by Lawrence J. Plym, president of the company.

Kinne, professor of architecture at the University of Illinois, Urbana, is president of the Central Illinois Chapter of The American Institute of Architects.

“Professor Kinne will have broad responsibilities in Knavneer’s programming of the future,” president Plym states, “and coordination of design and construction for office research, engineering and manufacturing facilities of the company will come under his jurisdiction. He will assist in developing closer professional relations with the architectural and engineering professions to determine what they need in the way of assistance from our research department and what the building industry needs in the way of product development.”

Professor Kinne, a native of Madison, Wis., was educated at the Universities of Wisconsin and Illinois. He was a student apprentice in the office of Madison Architects-Engineers during his college years there, and after graduation he became a designer on the Wisconsin State Architect’s staff.

Later he worked as architect and building engineer for the New York Central Railroad, and in 1945 he became chief architect for Leuwh, Foster & Company, Chicago engineers. In 1949, he left the firm to become professor of architecture at the U. of I., but he still maintained a practice as consulting architect and engineer.

Besides the A.I.A., his other affiliations include the Building Research Institute of the National Academy of Sciences, and the National Housing Research Council.

July '56 Monthly Bulletin
Saarinen Honored

EERO SAARINEN, F.A.I.A., of Bloomfield Hills, Mich., was the subject of TIME magazine's cover story for its July 2 issue.

Besides covering the noted architect's personal career and his upbringing by his distinguished father Eliel Saarinen, the article treats of U.S. architecture in general, devotes a two-thirds-page box to "The 20th Century Form Givers," Wright, Le Corbusier, Gropius, Mies van der Rohe, Breuer, Neutra, Harrison, Bunshaft, Philip Johnson, Yamasaki, Pei, Paul Rudolph, Buckminster Fuller and Eduardo Catalano, and it adds:

"Sure sign of the healthy state of U.S. architecture is the large number of promising younger talents. And of the whole U.S. cast of modern architects, none has better proportioned combination of imagination, versatility and good sense than Eero Saarinen, 45, son of late great Finnish-born Architect Eliel Saarinen."

The eight-page feature is a fine statement of U.S. architecture today beautifully illustrated, four pages of which are in full color.

Roger Allen, F.A.I.A.

Central Michigan College awarded an honorary doctor of law degree to Roger Allen, F.A.I.A., nationally known Grand Rapids architect, lecturer and writer, at its recent commencement.

Other distinguished citizens who received honorary degrees from the College were Leland I. Doan, of Midland, Michigan, President of Dow Chemical Company; Mrs. Fred L. Keeler, of Grand Rapids, President of the Michigan Congress of Parents and Teachers; John K. Weiss, of New York, Assistant Vice President of the Fund for the Advancement of Education; John Leightly, Head of the Geography Department of the University of California, and Frank Monley of Flint, Director of the Mott Foundation.

Allen's firm, Roger Allen & Associates, Architects, has served Central Michigan College as its architect since 1940, during its period of greatest expansion.

He served as President of the Western Michigan Chapter, The American Institute of Architects and the Michigan Society of Architects, was made a Fellow of the Institute in 1940, and he received the Gold Medal of the Society in 1954. The Medal, the Society's highest honor, is awarded annually to an architect who has notably contributed to the advancement of the profession of architecture in design, science of construction, or by educational service, service to the Society, or public service.

In expressing his appreciation of the honor, Roger says the citation accompanying the degree was so flattering he had difficulty in believing it referred to him, and he adds:

"My wife believes it though, but Margaret will believe anything complimentary to me. In fact, the only reason she doesn't insist on electing me President of the United States is because I am not eligible— I never played golf in my life. Furthermore, I never had ileitis. In fact, it is all I can do to spell it. (Ruth E. Johnson, my secretary—the one with red hair—can't spell it at all, and when I spell it for her she just sits there and argues.)"
SLIDING Glass Doors

There are three choices with MILLER sliding glass doors. 1—Aluminum or steel. 2—Wide price range. 3—Single, dual or interchangeable glazing.

Specify Miller sliding glass doors. 100% weatherproof! Cost less per sq. ft. of wall space.

Call or write us today for illustrative literature.

Interchangeable glazing permits use of 3/4 or 1" glass at same frame cost.

Architects in the News

Minnesota

THORSHOV & CERNY, INC., Minneapolis architectural firm have announced the appointment as associates of the following five men to their firm. Frederick J. Bentz, Kenneth R. Whitehead, Foster W. Dunwiddie, Willard L. Thorsen and William J. Miller.

Mr. Bentz, is chief draftsman in charge of the architectural working staff. Mr. Whitehead is the firm's project manager. Mr. Dunwiddie will manage the firm's state office building project. Mr. Thorsen manages various large scale shopping centers and other retail developments. Mr. Miller is now supervising work for the new Richfield junior high school.

New Jersey

J. GRIFFITH PHILLIPS was elected president of the Monmouth Ocean Chapter of the New Jersey Society of Architects.

Bernard Kelkney, was named vice president; David Marner, secretary-treasurer; Frederick Bohlmeyer and Louis J. Farmer, trustees.

New York

ROBERT W. CUTLER, has been elected president of the New York Chapter, A.I.A. Mr. Cutler is a partner in the firm of Skidmore, Owings & Merrill.

Also elected were Harold C. Bernhard, vice president; L. Bancel La Forge, secretary, and Aaron Nathan Kiff, treasurer.

FULBRIGHT AWARDS IN ARCHITECTURE are available to young American architects to have a chance to study abroad during 1957-58 under the U. S. Government educational exchange program.

Candidates in the field of architecture may enter the general competition for Fulbright awards which opened May 1. Closing date is November 1st. Requests for application forms must be postmarked by October 25th.

Application blanks and a brochure describing the Fulbright program are available at the Institute of International Education, 1 East 67th St., New York City, and at the Institute's regional offices in Chicago, Denver, Houston, San Francisco and Washington.

Fulbright awards are offered in the following countries: Australia, Austria, Belgium, Luxembourg, Burma, Chile, Denmark, Finland, France, Germany, Greece, India, Italy, Japan, the Netherlands, New Zealand, Norway, the Philippines and the United Kingdom.

Ohio

BURT V. STEVENS, Akron architect, has been elected president of the Eastern Ohio Chapter, A.I.A. Others elected were: Joseph Tuchman, vice president; Donald L. Bostwick, secretary; Ralph G. Dix, treasurer. P. Arthur D'Orazio, Richard N. Zuber, Trefon Saqadonczy and James F. Knapp were named directors.

L. MORGAN YOST, F.A.I.A., an architect who received his technical training in Ohio State University's Dept. of Architecture and who was subsequently instrumental in establishing the present school of Architecture and Landscape Architecture, was honored by the university at the annual conference for engineers.

Mr. Yost was named a "Distinguished Alumnus" by the faculty of the College of Engineering, and was given a certificate of award recognizing his "record of outstanding contributions to the ad-

vancement of engineering and related fields of activity."

He is a partner in the firm of Yost and Taylor of Chicago, III. Active in the affairs of the A.I.A. Mr. Yost has been president of the Chicago Chapter.

Died

ARTHUR I. MEIGS, F.A.I.A., 65, in his home city of Radnor, Pa., on June 10th. From 1906, until his retirement in 1940, Mr. Meigs was a partner in the firm of Mellor & Meigs. He designed a number of fine homes in the Philadelphia area, and also such buildings as Goodheart Hall at Bryn Mawr College, the Science Laboratory Bldg., at Haverford College, the Charter Club at Princeton Univ., and the bird house in the Philadelphia Zoological Garden. Mr. Meigs received a medal from the Philadelphia Chapter, A.I.A. and the gold medal of the New York Architectural League in 1925.

Sound construction and functional design qualify Andersen WINDOWALLS for better homes.

You can put these famous PARKER BOOKS
To Work in 10 DAYS . . .

Second Edition

Simplified Design of STRUCTURAL STEEL
By HARRY PARKER, University of Pennsylvania.
New edition contains tables of properties of structural shapes. Discussions and illustrative examples modified in accordance with current specifications and unit stresses. Many new safe load tables added. Up-to-date data on all aspects of structural steel design. 1955. 244 pages. $5.75.

Second Edition

Simplified Design of ROOF TRUSSES
By HARRY PARKER. Second edition contains a special section on timber connectors. Also, new tables, charts, and formulas are given for the design of struts and ties that are to be connected with toothed or split rings. As before, the book is written for those who have had no preliminary training in the design of roof trusses. 1953. 205 pages. $4.75.

Simplified SITE ENGINEERING
for Architects and Builders
By HARRY PARKER; and JOHN W. MacGUIRE, University of Pennsylvania. Deals with such problems as computation of volumes of cut and fill as indicated by contour line, staking out buildings and driveways, dimensioning of buildings and sites when angles are other than right angles. Use of logarithms are emphasized and log tables are included. 1954. 250 pages. $5.50.

July '56 Monthly Bulletin
TIME TO REQUEST ROOM RESERVATIONS at the Grand Hotel on Mackinac Island for the MSA 1956 Midsummer Conference. Make reservations direct with the Hotel. Better do it now, or you may be disappointed. For some years, the demand for rooms has exceeded the supply.

Conference Chairman, Paul A. Hazelton, A.I.A., of Traverse City, will uncork some good stuff—in the way of programs, that is.

On arrival at the Island Thursday, August 2, don’t loiter, but go directly to the Grand Hotel, where you will find rooms reserved for you—if you have taken the precaution of requesting reservations early enough.

That evening at 5:30 a cocktail party will await you, with Kimble Glass Company and Fenestra, Inc. as hosts. After dinner in the Main Dining Room, dance until the wee hours in the Terrace Room.

Remember, all meals are included in the Hotel bill but the Hotel permits us to have certain group meetings at which your meal tickets will admit you. In the case of these group meetings—dinner Friday evening, buffet luncheon Saturday noon and the banquet Saturday evening—gratuity for waiters will be added to the guests’ hotel bill, so you need not be so generous as to leave a tip in addition. Otherwise, the tipping of your waiter will be your own responsibility.

The Society’s Board of Directors will meet at breakfast in the Pontiac Room Friday morning, August 3. This will be followed by a business session at 9:00 o’clock, at which Society President Manson will preside. This will sort of drift into a more important and less irksome affair when the well-known raconteur, Clair William Ditchy, F.A. one A, will discourse with pitchers on what he calls the German Reconstruction—Post-War furnished by that inimitable Besser Male Chorale. Gard Martin will present his Association’s Award to the “Cement Man of the Year,” or words to that effect. All previous “Men of the Year” will kindly bring the trophies awarded to them, as follows: Roger Allen, 1947; Gus Langius, 1948; Alden Dow, 1949; Tal Hughes, 1950; Leo Bower, 1951; Clair Ditchy, 1952; Linn Smith, 1953; Jim Spence, 1954, and Elmer Manson, 1955. Gardner is not going to recall them. He just wants to give the recipients a chance to brag about them.

Saturday morning will be given over to the improvement of the minds of members and guests, when our distinguished Honorary Member, Mr. Wilfred F. Clapp et al from the State’s Department of Public Instruction, will conduct a seminar on “Education as a Basis for Design.”

The Hotel will again this year provide the group with a buffet luncheon in the Terrace Room—Saturday at 12:30 P.M. Only those who have partaken of such choice menus can imagine their delight.

After further relaxation Saturday afternoon, there will be a cocktail party at 5:30 sponsored by the Producers’ Council, Michigan Chapter. The Annual Banquet of the Conference Saturday evening will conclude the events. Professor Ralph W. Hammett, A.I.A., of the University of Michigan, College of Architecture and Design, will be toastmaster, and the speaker will be Mr. Thomas H. Creighton, A.I.A., editor of Progressive Architecture. His subject will be “Ten Years in the Editor’s Chair.”

In attendance will be three officers of the Institute from the Great Lakes District—John N. Richards, F.A.I.A., of Toledo, Ohio, First Vice President; Raymond S. Kastendieck, A.I.A., of Gary, Indiana, Treasurer, and Bergman S. Letzler, A.I.A., of Louisville, Kentucky, Great Lakes Regional Director. Many, many other notables and their wives will also attend.

ASPHALT PAVING IS PREFERRED

It's ECONOMICAL. Convenience of application permits construction of minimum cost.

It's ATTRACTIVE. Its dark, uniform surface enhances any surrounding.

It's DURABLE. Resists the action of alternate freeze and thaw.

It's QUIET. Smooth, joint-free surface absorbs traffic noises.

For Quality Work Use Only The Contract Method
Through Experienced, Pre-Qualified Contractors

Saginaw Valley Chapter

Saginaw Valley Chapter, A.I.A. had its annual pilgrimage to the home of Alden and Vada Dow in Midland, the City of flowers and romance, on June 5.

After dinner, the group moved to the auditorium of the Grace A. Dow Memorial Library for a business meeting and program.

The following committees were appointed:

- PROFESSIONAL ETHICS — Frederick E. Wigen, Chairman; Vincent T. Boyle, S. A. Nurm, William G. Wescot.
- MSA BULLETIN — Robert S. Gazall, Chairman; R. K. Berry, Robert W. Hammerschmidt, Thomas J. Sedgewick, Daniel W. Tochach.

Five new associate members were introduced:

The Chapter voted to financially assist the Flint members of the SV Chapter in their recent architectural exhibit at the Flint Builders' Show.

DETROIT CHAPTER

DINNER MEETINGS, 1956-57

(Tentative Schedule)

- No meetings in June, July or August.
- All meetings at the Rackham Building in Detroit unless otherwise noted.
- Thursday, September 13, 1956 — at Knoll Associates, Birmingham (Allied Arts meeting).
- Wednesday, October 17 — with Michigan Society of Architects Board (Annual Meeting & Election).
- Tuesday, November 13.
- Thursday, December 13.
- Wednesday, January 16, 1957.
- Friday, February 22 — Centennial Birthday Party, Statler.
- Thursday, March 14.
- Wednesday, April 17.
- Tuesday, May 14 — Jointly with Students.

Programs are held at 4:00 P.M. on the same days.

Reception at 6:00 P.M., dinner at 6:30, Program at 8:00 P.M.

Programs, speakers, subjects not given will be announced later.

MSA BOARD MEETINGS, 1956

Thursday, July 19 — At President Man­son’s home in Lansing.
- Friday, August 3 — At President Mas­ton’s home in Lansing.
- Tuesday, September 11 — With Saginaw Valley Chapter, in Bay City.
- Wednesday, October 17 — With De­troit Chapter.
- Thursday, November 15 — At President Mar­ton’s home in Lansing.
- Tuesday, December 11 — Harmonie Club, Detroit.

WESTERN MICHIGAN CHAPTER

DINNER MEETINGS, 1956

Exact dates to be announced later, as are some of the subjects.

September — Lansing, SUBJECT: “Fu­ture for Small Practice,” a panel dis­cussion.
- October — Grand Rapids, Annual Meeting and Election, Honor Awards program.
- November — Battle Creek, Ladies’ Night.
- December — Lansing.

DETROIT 1, MICHIGAN
TEMPLE 1-6760
MICHIGAN'S GOVERNOR G. MENNEN WILLIAMS has appointed a Committee to study the State's present Housing Code and make recommendations for changes.

John Ryan, building commissioner, of Ann Arbor, is chairman of the Committee. Victor C. Adler, A.I.A., of Detroit, is chairman of the architects division, and working with him are Prof. George B. Brigham, A.I.A., of Ann Arbor, and Ernest J. Dellar, A.I.A., of Detroit.

L. M. Dunn, of Port Huron, president of the Michigan Society of Professional Engineers, heads the engineers' division.

Other members of the Committee are Prof. Myles Boylan of East Lansing; Emery Calwell, East Lansing; L. L. Dawkins, Oak Park; Andrew Dempster, Detroit; Lawrence Guboy, Detroit; John Humke, Ann Arbor; Hon. Thomas Kavanagh, Attorney General, Lansing; Adrian N. Longius, F.A.I.A., Lansing; Elmer J. Manson, A.I.A., Lansing; Franklin C. McKim, Alpena; Anthony O'Chocki, Warren; Arnold C. Renner, East Lansing; Willard F. Shephard, Lansing; Frank S. Simpson, Detroit; A. R. Saunders, Detroit; Fred Sturm, Mt. Clemens; Glen Tom, Detroit; Meredith Vind, Kalamazoo; Prof. Louis Wollagner, East Lansing, and Fred L. Yokey, Huntington Woods.

In appointing personnel to serve on the Committee, Governor William said:

"Tremendous advances in the building industry created by public demand, the great development of new types of construction materials and modern architectural design point up the great need for a modern housing code. There has been widespread interest among township, county and city governmental units in a housing code which would require types of construction that would protectbuyers."

Elmer J. Manson, A.I.A., of Lansing, president of the Michigan Society of Architects, says: "The Housing Code is important to our profession, the building industry, and, what is of greatest importance, the public of Michigan. We should make every effort to supply information to the Governor's Commission so that the revisions to the Code will be in the best interest of all concerned."

Victor C. Adler, speaking for the architects' sub-committee, says: "Because I believe that it is important that the architects' subcommittee receive suggestions from all architects who are interested in this study of the present Housing Code, particularly those whose experience with it has indicated need for changes to permit advanced construction techniques or improved planning and design, your subcommittee would welcome suggestions for its guidance."

FRANK MONTANA, A.I.A., Head of the Department of Architecture at the University of Notre Dame, announces that the University will sponsor a three-day seminar on "Parish Planning," for Architects and priests, on the campus of the University at Notre Dame, Ind., July 13-15, 1956.

Keynote address will be delivered by the Rev. Ernst Griesebraber, of Karlshuh-Knielingen, Baden, Germany, on "What are the Most Important Spiritual Activities of the Parish and how should they be Coordinated?"

On Saturday morning, July 14, Thomas H. Locraft, F.A.I.A., of Washington, D.C., Head of the Department of Architecture at Catholic University of America, will discuss the design for housing the most important activities of the parish and the proper coordination of such structures in the parish plant.

Saturday afternoon, Prof. Robert A. Leader, of the Art Department, University of Notre Dame, will discuss the kind of decoration appropriate for such structures, and Muralist Jean Charlot will indicate how this purpose can be achieved in Fresco. Charlot, distinguished painter, lecturer and teacher, is now at the University of Hawaii, in Honolulu. Other speakers will cover the various fine arts and their relation to parish work.

Saturday evening, the Rev. Ermin Vitry, O.S.B., will point out the important function of Georgian Chant and the building provisions that will be required to translate into action the spiritual activities of the parish.

Montana was a partner in the Detroit architectural firm of Pialafian & Montana until mid-1950, when he became head of Notre Dame's Architectural Department. While here his firm was engaged on various structures for Wayne University.

EARNEST BOYCE, Chairman, Department of Civil Engineering, University of Michigan, is the new President of The Engineering Society of Detroit.

Boyce was elected President by the new Board of Directors at its organization meeting. He and other newly elected officers assume office July 1 for the fiscal year 1956-57.

Professor Boyce has long been active in ESD. A member of the Civic Affairs Committee since 1947, he was also its chairman. He served as ESD Director from 1952-55 being reappointed last March to fill a vacancy.

Other newly elected officers of ESD are:

1st Vice President—Kenneth R. Herman, President Vickers Corporation and Vice President Sperry Rand.

2nd Vice President—William H. Graves, recently retired Vice President Engineering, Studebaker-Packard.

Secretary—Fred J. Walls, in charge of Detroit Technical Section, Research and Development Division International Nickel Company.

Treasurer—Clayde L. Palmer, Assistant City Engineer, City of Detroit.

Assistant Treasurer—George A. Porter, Vice President in charge of Engineering, Construction and Operations, Detroit Edison Company.

Other members of the Board of Directors are:

George H. Mishis, President Albert Krantz, Associated Architects and Engineers.

Frederick Buer, Customer Relations Manager, Ford Division, Ford Motor Company.

William Sturton, newly appointed Vice President, University of Michigan.

MAURICE B. KIMMINS, A.I.A., now conducting the practice of architecture in Pontiac, left by the late William G. Zimmermann, A.I.A., will move to West Palm Beach, Fla., July 1, to enter practice with George J. Votaw, A.I.A.

The Pontiac office will be in charge of William G. Frankenfield, who has been with the office for the past year. He had also been with Zimmermann previously for three years. He studied at Michigan State College, and is a graduate of Rensselaer Polytechnic Institute, class of 1950.

WALTER S. PALMER, an associate member of the Detroit Chapter, American Institute of Architects, has become associated with Giffels & Vallet, Inc., L. Roselli, Associated Engineers and Architects.

Palmer, who formerly was employed in Detroit architects' offices, has recently been with Louis C. Kingscott & Associates, of Kalamazoo.

WANTED — Architectural draftsman and specification writers who would like to join a stimulating office with a variety of good work and live in a wonderful community—ALDEN B. DOW, ARCHITECT, Midland, Michigan.

July '56 Monthly Bulletin
"PLANNING TOGETHER FOR BETTER SCHOOL BUILDINGS" is the subject of a one-day conference for architects and educators scheduled by the College of Architecture and Design, University of Michigan, for Thursday, November 1, it is announced by Wells I. Bennett, F.A.I.A., dean of the College and chairman of the conference committee.

The Conference to be held at the Michigan Union in Ann Arbor, is being jointly sponsored by the Michigan Society of Architects, the College and the University's School of Education.

Eberle M. Smith, A.I.A., of Detroit, a member of the national School Committee of The American Institute of Architects, announces that the Committee will be meeting in Ann Arbor at the time of the conference and among members of the Committee who will participate in the Conference are architects William W. Caudill, F.A.I.A., of Bryan Texas and John Lyon Reid, F.A.I.A., of San Francisco.

Others on the program will be Archbold Shaw, superintendent of schools in Scarsdale, N. Y. and Dr. Arthur Rice, of the publication, National Schools.

Architects school administrators, school board members and school consultants are invited to attend.

ALFRED H. BERR, JR., of Cleveland, Ohio, has become a non-resident member of the Michigan Society of Architects, it is announced by Eberle M. Smith, A.I.A., of Detroit, Society vice president.

Berr, a graduate of Western Reserve University, is registered as an architect in Ohio, Michigan, Pennsylvania, New York, and by the National Council of Architectural Registration Boards. He is now a member of the Cleveland firm of The Osborn Company, Associated Architects and Engineers.

He received the Design Award of the Cleveland Chamber of Commerce in 1948 for his office building, for the U. S. Steel Supply Co., and in 1954 for his design for the Union Carbide and Carbon Co.

DETOIT CHAPTER OF THE AMERICAN INSTITUTE OF ARCHITECTS, on invitation of The Detroit Institute of Arts, took part in a television program June 11, from 7:30 to 8:00 P.M. on WTVS, Detroit's educational channel 56.

As one of a series of programs entitled "The Living Record," presented weekly by the Institute of Arts, the architects' telecast was moderated by the DIA's William A. McGonagle and participated in by Suren Pilafian, president of Detroit Chapter, A.I.A.; Clair W. Ditchy, past president of the Institute's national body; Talmage C. Hughes, executive secretary of Detroit Chapter and the Michigan Society of Architects; Paul B. Brown, partner in the Detroit firm of Harley Ellington & Day, Inc., Architects and Engineers, and Karl O. Van Leuven, of Victor Gruen, Associated Architects and Engineers, Inc.

Ditchy spoke about the organization of the A.I.A. nationally, while Hughes discussed State and local bodies.

Brown, Pilafian and Van Leuven used photographs, drawings and models in discussing projects being done by their firms.

SMITH, HINCHMAN & GRYLLS, INC., ARCHITECTS AND ENGINEERS state in their current monthly building cost report that there are a number of indications that prices of building material and labor will rise in the near future.

The report points to an increase in freight rates of about six per cent and the new minimum labor law which has just gone into effect. The latter will first affect the southern part of the country, the report states, but will soon spread to the rest of the country.

Regarding shortages of building supplies, the report states that the backlog of steel orders is increasing faster than tonnage is being produced, and it advises continuous efforts to plan as far ahead as possible.

Long-range planning is the only way that such shortages can be alleviated, the report concludes.

MANSON & CARVER, of Lansing, were architects for the new club building of the American Legion's Voileur 946 of the National 40/8 Society, in Lansing. It is a standard prefabricated trussless steel building, a product of the Wonder Building Corporation of America, of Chicago. The Construction contract was for $65,000, of which approximately $7,400 was for the Wonder Building shell, including erection and concrete floor slab.

THE CHARLES W. ATWOOD RESEARCH FELLOWSHIPS IN ARCHITECTURE for 1956-57 have just been announced by the University of Michigan, College of Architecture and Design, through Wells I. Bennett, F.A.I.A., dean of the College.

Two Fellowships of $3,500 each have been provided by Charles W. Atwood, A.I.A., of Wayne, Michigan, president and owner of the Unistrut Corporation.

They are available to those qualified for admission as graduate students in the Department of Architecture at the College, and to those with master's degrees in architecture or equivalents.

Applications will be received by the dean up to August 15, 1956.

Study and a report on a research project will be required of each candidate, and the Fellows will be appointed before September 1, 1956. Reports will be considered for publication by the Charles W. Atwood Research and Publications Foundation.

C. ALLEN HARLAN, president of Harlan Electric Company, again has been named chairman of the Detroit Torch Fund drive, commerce, trade and professions unit.

Last year Harlan's unit, which includes architects and the building industry, raised more than a half million dollars for the fund.

Gerald G. Diehl, A.I.A., chairman of the architects' division, raised more than $40,000, to exceed the division's quota.

July '56 Monthly Bulletin
WALTER J. CONNORS, of 14558 Wisconsin Ave., Detroit has been elected an associate member of the Detroit Chapter, American Institute of Architects, it is announced by Arthur O. A. Schmidt, Chapter treasurer.

Connors, a native of Detroit, received his B. A. in architecture from the University of Detroit in 1952. He was employed by the architectural firm of Skidmore, Owings & Merrill on work in the South Pacific area, and then in Detroit offices.

At present he is with the firm of Yamazaki, Leinweber & Associates, Architects, of Royal Oak.

CARL W. DECKER AND LEO J. MCGOUGH, both registered professional engineers, announce the opening of their office under the firm name of Decker & McGough, Inc., at 5361 E. Outer Drive, Detroit 34, Mich.

Decker formerly was executive vice president of Wolverine Contractors, and McGough was owner's representative for the Western Electric Company, Michigan Bell Telephone Company and others.

The new firm will serve as consulting engineers on structural work for architects and other engineers, as well as for their other clients.

LOUIS C. KINGSCOTT & ASSOCIATES, INC., Architects and Engineers, of Kalamazoo, Mich., recently opened its own new office building for its branch in Davenport, Iowa.

The new building, of modern design, is located at 321 West Kimberly Road, in Davenport, and it will house the expanding activities of the firm's western division, which has been in existence for some years.

CLAIR W. DITCHY, F.A.I.A., distinguished Detroit architect, has been awarded the honorary degree of doctor of engineering by Lawrence Institute of Technology.

Ditchy, who delivered the commencement address at LIT, is a past president of the local, state and national bodies of The American Institute of Architects. He was the recipient of the Michigan Society of Architects' 1955 Gold Medal for his service to the profession.

LESTER E. WHITEMAN, an associate member of the Detroit Chapter, American Institute of Architects, is now director of the firm of Associated Evangelical Architects, of Greenville, Ill.

The firm, whose operations extend over a wide area of the United States and Latin America, specializes in religious and institutional buildings.

Whiteman formerly was with the Argonaut Realty Company, a division of General Motors Corporation in Detroit.

T. L. OSBERGER COMPANY
10326 Woodward Ave. • TALBOT 8-2600 • DETROIT 2, MICH.
MINORU YAMASAKI, A.I.A., of Hellmuth, Yamasaki & Leinweber, Architects, of St. Louis and Detroit, has just returned from The American Institute of Architects' convention at Los Angeles, Calif., where he received the First Honor Award for his design of the St. Louis Airport.

The design was featured in the May issue of Architectural Forum, which stated:

"St. Louis has now given the age of air travel its first appropriate terminal in its dramatic, modern Lambert Field passenger building.

"Not since a bold young man named Lindbergh started out from this field 30 years ago has a city added a more significant chapter to aviation history."

The magazine's ten-page study, plus a full-color cover picture gives the first comprehensive architectural and construction report on this "Grand Central of the Air," and it quotes Yamasaki as saying:

"The site of the building gave the designer two good breaks. One was the hillside, which made it possible to get the service levels underneath and still enter the main room at ground level. The other was the fact that the existing control tower down field was to be preserved; we did not have to work this ungainly shape into the roof."

St. Columba Cathedral

Construction of the new St. Columba Cathedral, Diocese of Youngstown, Ohio, will begin in September, it is announced by Diehl & Diehl, of Detroit, architects for the structure.

Gerald G. Diehl, A.I.A., junior member of the firm that is nationally known for its church buildings, states that the Most Reverend Emmett Michael Walsh, Bishop of the Diocese, has approved awarding the $1,750,000 contract for the Cathedral to the Youngstown firm of Charles Shutrump & Sons.

The Cathedral will be built on the site of the old structure which was destroyed by fire two years ago.

Bishop Walsh believes the architects, in designing this Cathedral have created a stately, monumental structure with true grace and a deeply religious feeling, without reverting to a reproduction of a traditional type which is not a true expression of our modern progress, and he adds:

"This, we think, has been achieved by the use of strong vertical lines, the simple majesty of fine materials and the striking composition of the high nave and soaring campanile."

THE KAWNEER COMPANY

July ‘56 Monthly Bulletin
S. Eugene Hubbard has been appointed Manager of Prefabrication Research for Kawneer Company, Niles, Michigan, according to an announcement by Jack M. Roehm, Kawneer Director of Research and Development. In this capacity Hubbard will be responsible for investigating field requirements for quality buildings utilizing prefabricated components.

A native of Georgia, Hubbard received his B.F.A. degree from the University of Georgia in 1942 and did supplementary work at the University of Chicago and Chicago Technical Institute. He comes to Niles from Chicago where he was Manager of Research for the architectural firm of Howard T. Fisher and Associates.

**MINNESOTA MINING AND MANUFACTURING CO., Dept. L6-123, St. Paul, Minn., has available a new four-page manual describing uses for “Scotch” brand pressure sensitive tapes in the construction industry.**

The manual traces for quick reading how tapes are applied in sealing operations, used as masking material to save cleanup time and provide answers to special construction problems.

Thirteen specific examples of tape uses, illustrated with on-the-scene photographs, show how tapes can be employed to seal joints in concrete forms and curbs used in void construction and also to splice concrete curbing blanketed sections.

Other uses shown include applying masking aprons and coverings with “Scotch” brand masking tape, protecting stainless steel in curtain wall construction with a tape mask and laying plastic tape on floors for marking traffic lanes in final stages of warehouse and industrial construction.

The manual is obtainable free on request from the 3M company or its salesmen.

**WALTER W. SANDROCK, who recently was assigned to the Weldwood Movable Partition Department of the New York office of U. S. Plywood Corp., but retaining his office also in Detroit, was elected President of the Producers’ Council, Inc., Michigan Chapter, at the dinner meeting held in the Hotel Fort Shelby Sky Room on June 11, 1956. Others elected to office were: Charles W. Trambauer of American Air Filter Co., vice president; G. Frederick Muller of Pittsburgh Plate Glass Co., treasurer; Henry C. Hall of ALCOA, secretary.**

Outgoing treasurer Don Ollesheimer reported a $6,000.00 balance in the Chapter’s kitty.

The organization voted to sponsor a cocktail party prior to the annual banquet of the Michigan Society of Architect’s Conference to be held at the Grand Hotel, in August.

**OWEN-CORNING FIBERGLAS CORPORATION has announced the appointment of Certain-teed Products Corporation as a national distributor of Fiberglas acoustical form board.**

A multi-purpose product, Fiberglas acoustical form board serves as a permanent form for poured-in-place gypsum roof decks, as thermal insulation for roof decks and as an incombustible acoustical ceiling for commercial, industrial and institutional buildings.

Certain-teed, also a national distributor of Fiberglas residential building insulation and roof deck insulation, is a leading manufacturer of asphalt roofing shingles and sidings, gypsum lath and plaster, gypsum sheathing and wallboard, and gypsum roof decks. The company whose main offices are in Ardmore, Pennsylvania, has nearly 300 salesmen and offices in 18 major cities.

G. Donald Kennedy, President of the Portland Cement Association has announced the appointment of Leo H. Corning to the newly created position of Director of Promotion Planning and Engineering Services, with headquarters in the Association’s General Office at 33 West Grand Avenue, Chicago, Illinois. He will report directly to Vice President for Promotion James D. Piper.

Corning joined the staff of the Association’s Structural and Railways Bureau in 1929 and served as manager of the Bureau from 1949 until his appointment to Director of Promotion in 1952.

Prior to joining the Association, Corning was employed in various engineering capacities in Ohio and Florida. Following World War I, in which he served as an officer-instructor in the Coast Artillery Corps of the U. S. Army, he was affiliated with M. A. Hanna Co. of Cleveland. Later he was engineer of design of the Cleveland Water Department and structural engineer with the Foundation Co. on contracts for engineers of Chicago.

Corning was graduated in civil engineering with Bachelor of Science and Civil Engineering degrees from Case Institute of Technology in Cleveland. He is a registered architect in Florida and a registered professional engineer in Florida and Illinois. Memberships in technical organizations include the American Society of Civil Engineers, American Concrete Institute, Reinforced Concrete Research Council sponsored by the Engineering Foundation, American Society for Engineering Education, International Association for Bridge and Structural Engineering, and Sigma Xi.

Southeastern Michigan, as an ideal area for a new plant site, has many unique merits. We want to discuss three of these essential factors now.

**WATER SUPPLY** . . . A recent report to the President’s Materials Policy Commission stated . . . "by 1975 water supply might be the most important factor affecting industrial plant location."

Fortunately, Southeastern Michigan has a virtually unlimited supply of fresh water. The waters of the three upper Great Lakes flow along Southeastern Michigan’s shoreline.

**MANPOWER** . . . A peculiar virtue of Southeastern Michigan is that its people have the noteworthy ability to get things done—right. This area was the cradle of modern mass production—and the even more amazing combination of materials and transportation which made mass production possible.

**CANADIAN MARKET** . . . Canada’s richest, most heavily populated and industrial province—Ontario—is literally our next door neighbor. Two railroad tunnels, a vehicular tunnel, two bridges and numerous ship lines tie together Southeastern Michigan and Ontario—in fact, all of Canada—for a rewarding export market.

---

For specific and objective information on industrial plant sites in this area, call or write:

IN co-operation with General Motors' engineers, Eero Saarinen & Associates, architects, and Smith, Hinchman & Grylls, Inc., architect-engineers, Thermotank, Inc., helped design a new high-velocity, double-duct air conditioning system for seven of the buildings in the magnificent General Motors Technical Center. Using techniques developed through 30 years' experience in moving air at high speeds through tight spaces, Thermotank engineers provided a streamlined duct design with noiseless Thermo-Reg mixing boxes and high-velocity ejection ceiling diffusers, which incorporate sprinkler heads and are integrated with the ceiling acoustical treatment. Thermotank invites inquiries about further details of this advanced system of high-velocity, year-round air conditioning.

At the left is the main entrance to the Styling Administration Building and in the background is the domed Styling Auditorium, two of the seven buildings air conditioned by Thermotank, Inc.
