AIA Allied Arts Festival

As part of its chapter meetings, the Allied Arts Committee of the Detroit Chapter of the American Institute of Architects will conduct an Arts Festival on Saturday, November 20, 1965.

The purpose of the Festival is to bring together Architects, Landscape Architects, Planners, Interior Designers, Artists, Craftsmen, and Gallery Directors to discuss mutual problems and promote the integration of the Arts.

All of the above mentioned participants, their wives, friends and students are urged to attend this Festival which promises to be a stimulating and exciting event.

3:30 P.M.  
The J. L. Hudson Gallery  
Albert Landry, Director  
Seventh Floor

Champagne Reception and Registration  
Exhibition of Sculpture  
by Sorel Etrog, internationally known artist  
Artist will be present.

5:30 P.M.  
Community Arts Building  
Wayne State University

Exhibit and Registration  
"Art in Urban Architecture" Exhibit  
designed and organized by Paul F. Damaz, AIA

6:30 P.M.  
McGregor Memorial  
Wayne State University

Gala Buffet Dinner

8:00 P.M.  
Community Arts Auditorium  
Wayne State University

An Original Dance  
"Woodward"  
choreographed by Harriet Berg and performed by Members of the Wayne State University  
Dance Workshop

8:30 P.M.  
Community Arts Auditorium  
Wayne State University

Guest Speaker  
Mr. Paul F. Damaz, AIA  
Architect, Author and Lecturer  
"Art in Urban Architecture"

Because of the limited dining accommodations, reservations should be made as early as possible. A fee of $8.50 will cover the entire program.

Committee on Allied Arts: John V. Sheoris AIA Chairman, Yoshizo Machida AIA Vice Chairman, Gerome Chirco, Montgomery Ferar AIA, Shirley A. Jannuzzi, David H. Lee AIA, William S. Quinlan AIA, Donald Richards AIA, Clarence Roy ASLA, Victor J. Shrem AIA, David Spalding AIA, Roderick E. Warren AIA.

Please address all inquiries and make checks payable to the "Allied Arts Festival, Detroit Chapter of the AIA", Room 1501, 28 West Adams, Detroit, Michigan 48226. Telephone 965-4100.

Reservation applications should be mailed by November 15, 1965.
Additions and corrections to the Firm Roster will be published in the December issue. Please send any changes to the Bulletin office by November 20.
How much does the Formsprag Company like their new electric heat treat furnace?

They’re buying another one

When we asked Charles Bayless, Heat Treat Superintendent at the Formsprag Co., Warren, Michigan, how he compared his new electric furnace with other furnaces he’s used, he answered, “All I can say is I like it. I’m just not going to have near the problems I had with fuel fired furnaces.”

What does he like better? A lot of things. The electric furnace is a lot cleaner—clean machinery, clean walls, clean ceiling. And it really performs. It idles at low temperatures and comes quickly up to heat. And the quality of their product requires extremely precise heat control—another reason for purchasing an electric furnace. At 1600° it varies only a few degrees front to back. He can take it down stone cold without damage. The low voltage in the elements prevents arcing, resulting in long life.

How about cost? Management is happy. The cost per pound is just about even with other fuels because the efficiency is 90%, and the cost of idling is negligible. Sound interesting? For more information call us. In Detroit we’re at WO 2-2100, Ext. 2861. The swing is to electric heat.
Exhibitions

The Detroit Chapter Allied Arts Festival will feature two exhibitions at the J. L. Hudson Co. Galleries (downtown store) and one in the lobby of the Community Arts Building, Wayne State University.

The Hudson Galleries will present watercolors by Louis G. Redstone, FAIA president of the Chapter and recent sculptures by Sorel Etrog.

Redstone, who is noted for his promotion of collaboration between architects and artists, will show twenty of his abstract watercolors all done within the last year. A painter for many years, Redstone said his current works which deviate greatly from previous ones are the result of a long period of striving for a new expression. He was represented in the same galleries at a one-man show in 1938.

Sorel Etrog, sculptor, was born in Jassy, Roumania where he studied painting from 1949-1950, when he emigrated to Israel. From 1953-1956, he studied at the Institute of Painting and Sculpture in Tel Aviv. He came to the United States on a scholarship to the Brooklyn Museum of Art in 1958 and now lives and works in Toronto, Ontario.

He has exhibited in Tel Aviv, Haifa, Bordeaux, Montreal, The Museum of Modern Art, the Guggenheim and other galleries in New York, Pittsburgh, Los Angeles and Detroit and as part of a traveling exhibition, "Fifteen Canadian Artists." His work is included in many private collections.

The third exhibition, "Art in Urban Architecture," was organized by Paul F. Damaz, AIA, for the AIA-Pan American Convention in Washington in June. It consists of eleven North American and eleven Latin American examples of art for architecture. It is currently being shown in New York at the Architectural League and from Detroit will go to the Smithsonian for circulation throughout the country. Damaz will be the principal speaker of the Festival program.

"Woodward"

An original theater piece choreographed by Harriet Berg, will be performed by members of the Wayne State University Dance Workshop during the Allied Arts Festival.

Program notes for the work read: "Judge Augustus Brevoort Woodward, disciple of Thomas Jefferson, was Detroit's first city-planner. Scholarly, lively, eccentric, Woodward envisioned a modern metropolis of grandeur and beauty in 1805.

Impressions of Judge Woodward and the people of his time are explored in a portrait that combines dance with elements of the modern theater: lights, electronic tape, film projections. Ranging freely in time and space, the dance examines the destiny of Woodward's grand vision."

Mrs. Berg who is Assistant Director, Instructor of Contemporary Dances Classes and Choreographer, Wayne State University Dance Workshop also teaches Creative Dance at Burton School, Huntington Woods and at the Jewish Community Center, was a member of the faculty, Connecticut College, summer, 1965.

Other significant commissions which Mrs. Berg has choreographed include "The Radiant City" for the opening of the A.I.A. Centennial Exhibition at Ford Auditorium in 1957, dances for W.S.U. Theater productions and "The Last Sabbath", dances for a John F. Kennedy memorial service performed at Temple Israel in 1964.

The Common Ground

To be Reactivated

Charles Blessing, FAIA, Director of City Planning for the City of Detroit, has revealed a plan to insure the stability of the once dispossessed artist group called "The Common Ground."

Now a chartered, non-profit organization, "The Common Ground" has acquired a new home for artists to work together as a group. Detroit Racine Foundry has leased a large portion of its old foundry located at 6443 E. Warren to the group for ten years.

Blessing, an executive member of "The Common Ground", expressed high hopes for the group and has set out to raise funds to help maintain the building and its functions through patronage of architectural firms, the citizens of Detroit and citizens throughout the State of Michigan. He believes support by a 'Friends of The Common Ground Society' would make a more lasting artistic group, concerned with making a more meaningful part of our society.

Chairman of the group, sculptor George Rogers, stated, "The artist of the old 'Common Ground' once enjoyed space rent free, now will pay a nominal rental. There is enthusiastic interest and twenty fine artists have already joined the group, will occupy about half the available area."

November, 1965 | 3
As an added service to the architectural profession R.I.P.F. offers you the advice of their Roofing Advisory Council and Specifications committees.

These committees were formed to assist you in solving any roofing, waterproofing or sheet metal problem that may present itself during the early stages of planning.

It will be advantageous to you and your client to seek this advice from those who have made moisture protection their life-long work.

RIPF CONTRACTORS ARE EXPERIENCED, DEPENDABLE AND QUALIFIED.

Stickel Detroit Chapter
V.P./Pres. Designate
Frederick G. Stickel, of Frederick Stickel Associates, Birmingham was elected Vice President and President Designate of the Detroit Chapter, A.I.A. for 1966, at the Chapter's Annual Meeting.

Louis Rossetti, FAIA, who was elected to the same office last year, will succeed to the presidency of the Chapter as of January 1, 1966.

Also elected were Wallace B. Cleland, Secretary; Robert W. Yokom, Treasurer and James B. Morison, Director.

Louis Menk and Louis G. Redstone will also serve as Directors. A one-year vacancy resulting from Yokom's election as Treasurer, will be filled by the Executive Committee.

Reelected for second two-year terms on the boards of the Michigan Architectural Foundation and the Michigan Society of Architects were Jack K. Montieh and Jay S. Pettitt, Jr.

Hastings Appointed to GSA Review Panel
Robert F. Hastings, FAIA, president of Smith, Hinchman and Grylls Associates, architects, engineers and planners, is one of 17 architects appointed to an architectural review panel by the General Services Administration.

Announcement of the appointment was made recently by Lawson B. Knott, Jr., administrator of GSA.

Mr. Hastings is the only Michigan architect represented on the panel which will review actual designs of projects commissioned by GSA, review design standards and practices, and recommend changes if needed; to advise on selection of architects for "nationally significant projects" and to propose criteria for choosing architects and drawing up contracts with them.

The panel will serve for one year.

Cocktails will be served starting at 7:00 with dinner at 8:00. From 9:00 PM until 1:00 AM there will be dancing to the music of Earl Perkins and his orchestra. Admission is $15.00 per couple. Invitations and reservation forms will be mailed about November 15th.

PCA Fetes Arkies
Several former winners of the now-famed "Arkey" awards, presented annually by the Portland Cement Association as a highlight of the Michigan Society of Architects summer meetings at Mackinac Island, were honored recently at a special luncheon at the Engineering Society of Detroit.

Specially designed tie clasps were presented to the former awardees as a more permanent momento of their honors. The fun awards themselves, normally miniature models characterizing some aspect of the winner's life, are left on display in the Grand Hotel.

Several other former winners of the unique "Arkey" prizes received their tie clasps at the 1965 mid-summer conference at the Island.

Those honored at the PCA luncheon included Eberle M. Smith, James Spence, Leo Bauer, Linn Smith, Irving Palmquist, Ralph Hammett, James Morison, Elmer Manson, George Diehl and Fred Wigen.

R. H. Lochow, Michigan District Engineer, for the PCA, presided at the luncheon ceremonies and awards were made by W. C. Krell, supervising structural field engineer for PCA.

MSA staff personnel were special guests at the luncheon.

ACI - CIB Joint Meeting
Slipforms in Concrete Construction and new developments in sculpturing, texturing and coloring of concrete related to slipforms will be the subject of a talk by Maurice Barron, P.E. at the next joint meeting of the local chapters of the American Concrete Institute and the Concrete Improvement Board which will take place on the evening of November the 10th in the Engineering Society of Detroit.

Barron, partner in the nationally known engineering firm of Farkas and Barron in New York, is an eminent engineer, has travelled around the world as consultant in several foreign countries and is the author of various technical books. His firm has engineered projects totaling over three billion dollars.

For reservations write to: John Tucker, Ready Mix Concrete Inc., 6485 Nine Mile Road, Warren, Michigan, or phone 313-761-8800.

Cocktails at 6:15 PM, Dinner at 7:00 PM ($4.50), Meeting at 8:00 PM.

Revisions to By-Laws Approved for Detroit
Revisions to Detroit Chapter By-Laws as proposed by the Board of Directors have been approved by the membership.

One revision will make absentee ballots available following the September membership meeting if requested in writing at least one week prior to the Annual Meeting.

Other revisions clarified the amounts paid in dues to the Chapter by all classes of memberships—Corporate, Professional Associate and Associate.
Linn Smith Awarded Chapter Gold Medal

Linn Smith, FAIA, was awarded the Detroit Chapter's Gold Medal during the recent Annual Meeting of the Chapter. In presenting the medal, President Redstone quoted the accompanying citation:

"In recognition of his distinguished career as an architect and his devoted service to his Chapter, State Society, Region and the Institute, the Detroit Chapter is honored to award to Linn Charles Smith its 1965 Gold Medal."

Born in Flint, Smith was educated in the Mt. Morris, Michigan Consolidated Schools and at The University of Michigan, where he received a B.S. in Architecture in 1942. He became registered in Michigan in 1947 and in Ohio in 1960 and holds a Senior Certificate from NCARB.

Following graduation, he was associated with Lyndon and Smith in Detroit until going on active duty as a Photo Intelligence officer in the Navy. He joined Architect Maynard Lyndon in Los Angeles after the war, then returned to Detroit with Eberle M. Smith Associates, Inc.

In 1954, he formed his own firm of Architect Linn Smith, AIA. The firm became Smith, Tarapata, MacMahon, Inc. in 1956 and has been Linn Smith Associates, Inc. since 1959.

He has served on many Chapter, State and National committees. He was a Director of the Michigan Society of Architects from 1950-56, was President, 1953-54. In 1959, he became a Director of A.I.A., first from the Great Lakes Region, then the Michigan Region when it was formed. He was elevated to Fellowship in the Institute in 1962. Other Institute activities include Chairman, AIA Bylaws and Rules Committee, 1962; Member 1961; Member, AIA Resolutions Committee, 1963; Chairman, AIA Nominating Committee, 1964; Member 1963; Chairman, AIA NCARB Liaison Committee, 1963; Member 1964; Chairman, AIA Juried Fellows, 1965; Member, 1964-66. In addition, he is currently serving as a member of the National Architectural Accrediting Board.

Smith has been a member of the Birmingham City Plan Board since 1959, was Chairman—1964 and was on the Birmingham Building Code Board of Appeals from 1958-63. He is a member of the Birmingham Chamber of Commerce and the Economic Club of Detroit and of the State Council for the Arts.

He is Chairman of the Architecture Scholarship Fund, University of Michigan, has been a juror for its College of Architecture & Design and a visiting juror at the University of Kentucky.

He has also served as a juror for the Reynolds Aluminum Student Award, House and Home Magazine and School Executive Magazine.

In 1947, he was the recipient of the Booth Traveling Fellowship in Architecture from U. of M. Other honors include two top awards, SCHOOL EXECUTIVE Competition for better school design, 1957, 1959; two honorable mentions, PROGRESSIVE ARCHITECTURE Design Awards, 1957, 1958 and several awards and citations from American Association of School Administrators and Michigan Association of School Boards.

Detroit Chapter Cites Baumgarth

Ernest A. Baumgarth, former Home Section Editor of The Detroit News, was made an Honorary Member of the Detroit Chapter, A.I.A., at the Chapter's Annual Meeting on October 21st. In presenting the membership, President Louis G. Redstone, FAIA, read the following citation:

"In recognition of his distinguished career in his chosen profession of journalism and his sympathetic promotion of improvement in architecture, Ernest A. Baumgarth has been elected an Honorary Member of this Chapter."

A native Detroiter, Baumgarth spent one year in the College of Engineering and Architecture at the University of Michigan and received his degree from U. of M.'s Literary College in 1917.

After graduation, he worked on The Cleveland Press, then joined The Detroit News, serving as general reporter, City Hall reporter, rewrite man, Real Estate editor and Home Section editor.

He is a member of the Engineering Society of Detroit, an honorary life member of The Detroit Free Press Club and the Builders Association of Metropolitan Detroit and a founding member of the Amateur Mendicant Society of the Baker Street Irregulars (he once interviewed Sir Arthur Conan Doyle).

Since his retirement from The News, he has served as a consultant on public relations for firms in Ohio and Florida and as editor of The Realty Editor, official publication of Real Estate Editors.

New Registered Architects Announced

The Michigan State Board of Registration for Architects, Professional Engineers & Land Surveyors has announced that the following Michigan residents have successfully passed their written exams and are registered architects, as of October 15, 1965:

Donovan W. Allen, 12357 Margaret
ACSA Commends Kahn Associates

For the second time this year, the International Relations Committee of the Association of Collegiate Schools of Architecture has commended Albert Kahn Associates “For outstanding contribution to architectural education and international good will, through participation in the 1965 ACSA Student Exchange Program.”

Each year the exchange program makes it possible for a number of U.S. architectural students to work abroad and brings a like number of young men and women to work in architectural offices in this country.

The Kahn organization has supported the program since its inception in 1963, and during the past summer had the rewarding experience of exposing a Swedish student, B. Martensson, to the firm’s full responsibility and scope, and its approach to “balanced design” in architecture and engineering.

Martensson had studied at the Royal Institute of Technology in Stockholm where he had just completed his 4th year in architecture and in evaluating his performance for the ACSA, Sol King, president of AKA, stated “we believe he has potential for a brilliant career in architecture,” and in commenting on the exchange program’s value to sponsoring firms said “Our office has benefited greatly by having exchange students among us during the summer months, and AKA hopes to participate again in 1966.”

DAGL Celebrates 10th With Dinner Dance

A gala dinner-dance is being planned by the Detroit Architectural Golf League at the Edgewood Country Club, Saturday, November 20, 1965, according to Bob Domke, president of the league.

This dinner-dance is being held in commemoration of the league’s 10th anniversary and to conclude a successful 1965 golf season. Golf courses played by the league this past season were: Edgewood Country Club, Western Country Club, Grosse Ile Country Club, Farmington Country Club, Meadowbrook Country Club and on October 12, the league played Oakland Hills Country Club with an amazingly large number of die-hard golfers. Officers of the league are: Bob Domke, President, Ray McCalpin, Vice-President, Bill Kimball, Treasurer and Gene Majka, Secretary.

Adam DeMartino, Chairman of the entertainment committee said there will be musical entertainment by Ray McCalpin’s vocal quartet, dancing to a lively band and door prizes galore. Admission price of $25.00 per couple includes cocktail hour, dinner, dancing, after dinner refreshments, door prizes, etc.

For further information call Adam DeMartino at Wo 5-8000, ext. 3394, or Bessie at Wo 1-2745.

Canton, Ohio Cited For Community Architecture

The dramatic change in the central district of Canton, Ohio which transformed a blighted public square into a vital center of activity, won for the city of Canton a “Citation for Excellence in Community Architecture” awarded by The American Institute of Architects.

The citation program was started early this year to recognize cities having planned architectural projects which successfully realize the objective of creating vital environments for their core.

DETROIT CHAPTER A.I.A.
1965 Honor Awards Program

The results of the Detroit Chapter's 1965 Honor Awards Program were announced at the Chapter's Annual Meeting at Dearborn Inn. In making the awards, Chapter President Louis G. Redstone presented engraved plaques to the architects and owners of the buildings cited.

The jury for the program, which met in New York in September, included Dean Olindo Grossi, FAIA, of Pratt Institute; Jan C. Rowan, AIA, Editor of Progressive Architecture and James S. Hornbeck, Senior Editor of Architectural Record.

Of the submissions in general, the jury commented, "The jury expressed disappointment that there was a rather limited number of entries and that the level of quality was not as high as might be expected from the Detroit area. The four entries under final consideration were considered an interesting variety of buildings — in scale, usage, program, etc. — but since none was clearly more outstanding than the others, no First Honor Awards were given."

AWARD OF MERIT

CLUSTER HOUSING FOR WILLITS WEST COMPANY
Birmingham, Michigan
Carl Luckenbach, Architect

Jury Comment: "Well planned; pleasant, appealing arrangement of units; interesting variety of one and two story levels; two units not as well situated as the others."
AWARD OF MERIT

OXFORD HOUSES
DORMITORIES FOR WOMEN
THE UNIVERSITY OF MICHIGAN
Ann Arbor, Michigan
Frederick Stickel Associates
Architects
Clifford Holforty—Structural Engineer
Levin, Pierce & Wolf—Mechanical & Electrical Engineers
Johnson, Johnson & Roy—Landscape Architects

Jury Comment: "Residential feeling overcomes the blockiness of most dormitories: the short length of the wings is good although there is a certain amount of a barracks quality in the uniformity of repetition of units."

AWARD OF MERIT

SHAPERO HALL OF PHARMACY
WAYNE STATE UNIVERSITY
Detroit, Michigan
Paulsen, Gardner & Associates
Architects
Robert M. Darvas—Structural Engineer
Hyde & Bobbio, Inc.—Mechanical Engineer

Jury Comment: "Vigorous form, refined detail — surface treatment skillfully handled; when complex is completed, the overall design concept will be realized."

AWARD OF MERIT

MEDICAL RESEARCH BUILDING
WAYNE STATE UNIVERSITY
Detroit, Michigan
Smith, Hinchman & Grylls Associates, Inc.
Architects & Engineers

Jury Comment: "Exceptionally well organized, orderly, functional plan; pattern of fenestration a bit labored — could have been more effective by giving stronger emphasis at mullions opposite columns."
No single building can qualify for a citation. Each of the AIA's 17 regions is eligible to nominate a city for the citation, which must then be approved by the national Board of Directors.

Canton's Central Plaza is the winning nominee of the AIA's Ohio region, which selected it as a rare example of a central plaza designed for people in the heart of an automobile-filled city. It is the first phase of an ambitious revitalization program for downtown Canton.

A national citation was awarded on October 15 to the citizens of Canton and to the mayor Stanley A. Omich by Charles J. Marr FAIA, director of the AIA's Ohio region, during the regional convention of the Architects Society of Ohio at Atwood Lodge, Delray, Ohio.

Responsible for the planning which turned Canton's main street into an exciting human environment were the architectural firm of Tarapata-MacMahon Associates, Inc., of Bloomfield Hills, Mich., and landscape architects Johnson, Johnson & Roy, Inc., of Ann Arbor, Mich.

In 1964, the project was selected for an Award of Merit in the Institute's annual Honor Awards Program.

Post Office Announces Changes for Stamps

Postmaster General John A. Gronowski recently announced that a new series of 18 stamps, ranging in denomination from 1¢ to $5 will replace the series now in use (which dates back to 1954). Twelve Americans who have never appeared on stamps will be part of the new series. The first will be issued late in 1965, and the remainder will appear within the next three or four years.

The new issues will be known as the "Prominent American Series." The basic stamp of the series, the 5¢ denomination, will continue to carry the portrait of George Washington but will be redesigned.

The late Frank Lloyd Wright will be pictured on the 2¢ stamp of the new series.

MSA Forms Committee On State Capitol

In response to a request made on behalf of the State Legislature by William C. Roege, PE, Staff Engineer for the Legislative Fiscal Agency, for a professional opinion as to the architectural significance of Michigan's Capitol Building in Lansing, a special MSA "task force" committee was organized. This Committee will delve into the building's value as an example of the architecture of its period, as well as its historical significance, and will make recommendations to the Legislature regarding remodeling or restoration of the building. This work is contemplated as the third phase of the Capitol Expansion Program now underway, and is tentatively scheduled for 1968.

The Committee, authorized by MSA President Bruce Smith, was organized by Richard Stuckman, President of the Mid-Michigan Chapter, AIA, and held its first meeting on September 24 in Lansing. Each AIA Chapter in Michigan was invited to send two representatives as members. Four chapters were represented (Detroit, Huron Valley, Western Michigan and Mid-Michigan) and special guests Bill Roege and John P. Baker, AIA, of the State Building Division were present. Committee chairman will be Richard C. Frank, AIA, of Lansing. The four chapters not represented were urged to join with the Committee in its next meeting on October 22, or subsequently on November 19. The Committee would welcome pertinent comment or information, which can be sent to the Chairman at 219 S. Grand Ave., Lansing, or the Committee Secretary, David L. Williams, AIA, at 820 N. Washington Ave., Lansing.

Present at the meeting, in addition to those mentioned, were William E. Knapp, FAIA and Amedeo Leone, FAIA, both of the Detroit Chapter, Gordon Bugbee, AIA, of the Western Michigan Chapter, and Kingsbury Marzolf, AIA, of the Huron Valley Chapter.

The first two phases of the Capitol Expansion Program, for which Smith, Hinchman & Grylls are Planners and Architects, will provide suitable office and parking facilities for the various state agencies, and the third phase will deal with the Capitol itself. The precise scope and form of this third phase has not yet been firmly determined, although many suggestions have come from numerous sources concerning the building's future. These have covered the complete range, from razing and replacing the building, through partial restoration for ceremonial use by the Executive and Legislative branches, to restoration to its original condition, or almost — presumably electric lights would be allowed, and horses would not be quartered in the basement, and its use then as a museum.

Likewise, comment on, and criticism of the building has included some serious questions. Is it a building of real architectural and artistic merit, or a hideous ugly duckling, as the Philadelphia City Hall has been labeled? Is it structurally sound, or is the dome really about to collapse at any moment? Does it not
have value in the living parade of American Architecture as one of the last remaining examples, in the Middle-west, of major public buildings of the Victorian period? (R.I.P. Detroit City Hall!)

Certain things are obvious. The building is inadequate in space for the efficient operation of a large, modern state government, which has simply outgrown it, and it has serious deficiencies in mechanical operation and fire safety. Over the next few months, the MSA Committee will attempt to assess these and many other questions, and many other questions, and will present its report and recommendations to the Legislature.

ANNOUNCEMENTS

Frank E. North has been designated Chairman of the National Allied Arts Committee of the Illuminating Engineering Society by William P. Lowell, Jr., the new President of I.E.S.

One of the functions of the Allied Arts Program is to conduct the annual competition for Universities which have courses in Architecture, Art, Interior Design or Industrial Design. The competition is arranged in close cooperation with the school involved.

Frank E. North

The winning entry from each participating school is sent to the Illuminating Engineering Society National Technical Conference for display and for national revue. The entries are judged again and a cash prize is presented to the student whose entry is designated the Conference winner.

Architectural students in Michigan have competed in this I.E.S. program for the last three years and commitments have been made for continuing participation for the 1965-66 school year.

William E. Stewart, Executive Secretary of the Detroit Chapter, Associated General Contractors of America, has been appointed by Governor Romney to a three year term on the Michigan Construction Safety Commission and received confirmation of the Senate late last week. Stewart will replace Walter L. Couse as one of the two management representatives on the Commission. The Commission, made up of two men representing management, two representing labor, and one representing the insurance industry, administers the Construction Safety Law passed in May 1963.

Stewart started with the Associated General Contractors Association General Contractors Association in 1955 and has served as their Executive Secretary since 1958. Prior to this, he was, for three years, Secretary of the Associated Underground Contractors. He is a graduate of Michigan State University and received an LLB from the Detroit College of Law. He's a member of the State Bar Association, the American Bar Association, the Oakland County Bar Association, and the Detroit Bar Association.

Six department heads have been elected to associate status at Tarapata-MacMahon Associates, Inc., architects, engineers and planners according to Charles H. MacMahon, Jr., president.

Promotions went to Samuel V. Tavernit, chief civil engineer; Stanley E.

Albert H. Fiedler, architectural consultant—medical facilities of Giffels & Rossetti, Inc., architects-engineers, has been appointed by the American Hospital Association as a member of the Committee on Hospital Design and Construction.

The purpose of this A.H.A. Committee is to study special subjects and formulate recommendations to the A.H.A. Council on Research and Planning, providing guidance and assistance to the association on programming of its research activities; and improvement in the planning for and the design and construction of facilities and services of health care institutions.

Fiedler, a registered architect, is a member of the American Institute of Architects, the A.H.A. and is accredited with the National Council of Architectural Registration Boards.

* * *

Minoru Yamasaki & Associates, Inc. has announced the election of Daniel L. Treacy and Aaron Schreier as new members of the board of directors and the appointment of Robert Ortega as an associate member of the firm.

* * *

Edward T. Schreiber, President, Construction Consultants, New Center Building, Detroit was a speaker at the National Paint, Varnish and Lacquer Association Show at Haddon Hall, Atlantic City, N.J. The combined Annual Meeting and paint industry show ran October 25, 26, 27 with the theme "Progress through Cooperation" keynoted by Speaker Walter Kronkite, CBS News Correspondent.

Schreiber is currently serving as a Director of the Detroit Chapter, C.S.I.
Richard A. Brehmer, AIA, has joined I.N.E. Corporation, architects and engineers, it was announced by Wayne Hu, P.E., president of I.N.E. Mr. Brehmer will serve as chief architect.

Brehmer, a graduate of Lawrence Institute of Technology, was formerly associated with Smith, Hinchman & Grylls Associates, Inc., and Enco Associates, Inc.

I.N.E. Corporation became affiliated with National Garages, Inc., in 1964 to serve as architects and engineers in conjunction with National’s world-wide program of parking project planning and coordination and operation of all types of parking facilities.

The Board of Directors of the Michigan Society of Professional Engineers has appointed Wayne A. Lemburg as its Executive Director, it was announced today by MSPE President Ralph K. Seeley, P.E.

Before joining MSPE Lemburg was affiliated with a national trade association for a period of five years as Executive Assistant Manager and Director of Membership Service.

Prior to entering the association field he was a member of the faculty at the University of Illinois, College of Commerce and Business Administration. During that time Lemburg worked with numerous trade and professional associations in developing and conducting management and supervisory training programs. He holds B.S. and M.S. degrees in Business Administration from the University of Illinois.

Begrow & Brown, Architects, of Bloomfield Hills, Charlevoix, Michigan, and 52 King Street, Christiansted, St. Croix, have named Sacha Thébaud, Associate in charge of Caribbean operations. Thébaud, who has been working in the Bloomfield Hills office, takes charge of his new duties immediately and will reside in Christiansted.

Previous to coming with Begrow & Brown, Thébaud had his own practice in architecture and interior design for five years in Port-au-Prince, Haiti, where he designed residences, apartments, schools, hotels, was the consulting architect for U.S.A.I.D. Rural Schools Program, and researched prefabrication and modular construction, economical concrete roofs, and optimum habitat under the tropics. He also was in charge of the department of architecture at Westrade, designing complete prefabrication of steel buildings, residences, factories, breweries, schools, hotels and motels which were shipped to Latin America.

Thébaud was educated at the University of Miami, University of Haiti, and Instituto Brasileiro de Administracao Municipal in Rio de Janeiro.

Harry D. Unwin, staff engineer in charge of special services and an associate in the firm of Albert Kahn Associates, has been appointed to the State Elevator Safety Board by Governor George Romney.

A member of the Kahn organization.

9 tons of G-E Silicone Construction Sealant seal new UN Plaza

G-E Silicone Construction Sealant is an amazing synthetic rubber that cures in air. It's waterproof. It won't crumble, harden or peel. So it's the first really permanent sealing compound.

At the new United Nations Plaza apartment and office building, just across from the famous United Nations Building in New York City, nine tons of Silicone Construction Sealant were used for various sealing applications. Seven tons of Silicone Construction Sealant were used to glaze the windows. Another two tons seal the aluminum curtain walls. G-E Silicone Sealant is also used to caulk air ducts as well as miscellaneous caulk ing throughout the thirty-eight story twin-tower skyscraper.

G-E Silicone Construction Sealant applies quickly and smoothly from a standard caulking gun, forming a tight bond to glass, metal, masonry and other common building materials. No mixing either. And it can be applied easily in any weather... never stiffens in cold or runs because of heat. Cleanup is a cinch. So you save time while you get a good looking, permanent seal that minimizes callbacks.

Available in a wide range of colors, as well as a translucent form, G-E Silicone Construction Sealant blends in well with almost any material.

November, 1965 | 15
Jay S. Pettitt, Jr., Treasurer of the Michigan Society of Architects has announced that payments of $5,125.00 on 1965 Sustaining Memberships in the Society have been received from 119 firms through September 30, 1965.

Authorized by the Society's 1956 Convention, the Sustaining Membership dues are a vital part of the Society's continued efforts to advance the profession in every possible way to the benefit of all offices — regardless of size. Dues are paid by firms, in amounts determined by the number of architectural employees, not by individual members who are employees or who are associated with schools or governmental agencies.

Pettitt commented that the dues received through September are approximately 60% of the amount of the budget for the year which in turn is about one-third of the Society's total budget. He urged that firms which have not paid to date to do so before the end of the year.

The following firms are currently Sustaining Members:

Kahn, Albert Associated Architects & Engineers, Inc.
Kallmes, John J.
Klaetke & Marino
Levey, Norman J.
Lorenz & Paski
Maguolo & Quick
Marr & Marr
Mason, George D., & Company
Morison, James B.

### Objective: To enhance and influence favorable design decisions...

**Method:** Utilize the skills of specialists in architectural art and photography

Now entering our second decade of outstanding service to American Architects.
since 1941 and an associate in the firm since 1947, Unwin has had considerable experience in preparing specifications for elevator installations in commercial buildings, hospitals, universities, office buildings and industrial plants. In addition, he has been responsible for inspecting these elevator installations during construction.

Unwin is a graduate of Cornell University and is registered as a professional engineer in Michigan, Ohio, New York, Pennsylvania, Connecticut and Florida.

The firm of Ralls-Hamill-Becker, Architects has announced the appointment of E. David Reitzel as an associate member of the firm. His primary responsibilities will be in the realm of field supervision and as a project director. Reitzel is a graduate of Lawrence Institute of Technology and is a Professional Associate Member, Detroit Chapter, A.I.A.

The firm recently moved into newly remodeled and expanded office facilities at 15223 Farmington Road, Livonia, Michigan.

Migdal, Layne & Sachs, Inc., Consulting Engineers, have announced the relocation of their offices to larger quarters at 10400 West Nine Mile, Oak Park 48237; phone: 313-548-6333.

Hastings Addresses
Illinois Architects

Outlining major forces at work to force redenition of the architectural profession, Robert F. Hastings, FAIA, served as the keynote speaker before the recent American Institute of Architects Illinois Regional Conference in Chicago.

Hastings, president of Smith, Hinckman and Grylls Associates, Inc., voiced a strong plea to his fellow architects to adopt "comprehensive architectural service."

"Society continues to search for a single responsible agent who could assist them from the inception of a building idea to occupancy of a facility. I firmly believe the architect is presently the most qualified person to serve," said Hastings.

He pointed out that courts are enforcing greater responsibility on the architect, ruling him the responsible party liable for all design decisions, and such other architectural services as cost estimating, building material, equipment performance and construction management.

In addition, Hastings told the AIA Conference that education and the professions were working together to establish curricula which would expand schools of architecture beyond the pure design education concept.

"However, while the AIA and the schools are debating the subject practitioners are planning major changes that make it possible for them to fill the comprehensive role of a single responsible agent" he told the Conference.

Hastings cited the use of computers in performing many of the internal functions such as specifications storage, programming, and construction management problems, as one means of broadening the architect's scope and freeing his time for creative design.

CLASSIFIED

ARCHITECT, ARCHITECTURAL or CIVIL ENGINEER to work in field of fire protection and safety as a civilian employee—Fire Marshal Division, Michigan State Police.

The following benefits will be derived from employment as a Michigan Civil Service classified employee in this position:

(1) Salary: $10,690.56
(2) Longevity pay plan
(3) Vacation and sick leave
(4) State-sponsored Health and Life Insurance (State contribution towards premium payments.)
(5) Retirement (Michigan State Employee Retirement and Social Security Coverage).
(6) An opportunity for future promotion.

Applicants must possess a Bachelor's Degree from an accredited college in architecture, or civil or architectural engineering and should have five (5) years of experience in architectural design and drafting or building construction supervision under the direction of a registered architect.

**ROOF DECK FOR THE LIGHT MINDED**

Zonolite® Insulating Concrete in roof decks weighs up to 50% less than gypsum . . . 1/6 as much as structural concrete. It's applicable with form boards, galvanized centering, or pre-stressed concrete systems. You get incombustible, permanent monolithic decks plus insulating value which saves money on heating, cooling equipment.

Another happy thought. We certify it will be applied as you specify—exactly. Call your Zonolite representative for details.

---

**Our Customers said “Look Pretty Please!”**

So we did with the New Flush Imperial Door

Handsome is as handsome does, and this new-as-this-hour design is flush, smooth—not a seam to be seen. Adaptable to every interior, new IMPERIAL comes with a glass frame section including a snap in glazing bead for easy conversion to any glass treatment. A wide variety of louver treatments are possible. (Means that every IMPERIAL Door in stock can answer many, many requirements.) And, for more savings, IMPERIAL is reversible—no "handing." No trouble to hang square, IMPERIAL will stay square because it's made of heavy gage steel with a complete perimeter channel fully welded—no sag, bind, warp, or split, ever. Rust-inhibited, all surfaces are five-step phosphatized—and IMPERIAL is preprimed so you're not delayed by paint preparation. We prepackage the doors to protect these surfaces, thus you can be sure every one is ready when you need it. Need doors right now? Ask for IMPERIAL, the finest door made today. We'll deliver immediately, out of complete stocks waiting in our network of warehouses.

**MANUFACTURING DIVISION OFFERS THE MOST COMPLETE SELECTION OF STANDARD DOORS FOR RESIDENTIAL, COMMERCIAL, AND PUBLIC BUILDINGS.**

Example: Series 50, 1$⁄₄" Steel Doors and Frames and Series 57, 1$⁄₄" Steel Doors and Frames, available from warehouse stocks in a full choice of leaf design and glass sizes. Inherently fire resistant Series 57 Doors can be supplied in Underwriters' Labeled quality. Both styles are five-step rust-proofed by phosphatizing and are furnished with a high quality baked-on prime coat. A complete catalog will be sent on request.
It's just like getting 4 bottles (fifths) of LAUDER'S 86 PROOF Scotch FREE at the new reduced price

THE FIRST DRASTIC PRICE REDUCTION EVER MADE ON THIS OLD, WORLD-RENOWNED BRAND OF SCOTCH

HERE ARE THE FACTS:

Mich. Liquor Control price was $6.90 per 4/5 qt. or by the case ... $82.80

LAUDER'S PRICE NOW REDUCED TO $5.16 per 4/5 qt. or by the case ... $61.92

SAVINGS $20.88

So ... this $20.88 SAVINGS over the old price per case is like getting 4 bottles of LAUDER'S FREE. This is the same 86 proof ... same high quality ... same Extra Light LAUDER'S with nothing changed but the price. Consider, too, the tradition and prestige of LAUDER'S ... it's been around for 131 years.

Reproduced on the left, authentic Scotch Dollar (Crown), minted between 1603 & 1625. A reminder that "Your Scotch Dollar now buys 25% more with LAUDER'S." By the case ... or by the bottle, LAUDER'S is great for personal use or for Holiday gifts. You can almost buy 3 cases of LAUDER'S for what you formerly paid for 2 cases.

FOR MORE INFORMATION - see your favorite liquor dealer or contact: Gooderham & Worts, 8325 E. Jefferson, Detroit 48214, VA 3-0050.

100% Blended Scotch Whiskies, Imported & Bottled by Gooderham & Worts, Detroit, Mich.
how many Scotches can you name that have been around for 131 years?

start with extra light Lauder's $6.90 for a 4/5 quart

AS ADVERTISED RECENTLY IN THE WALL STREET JOURNAL and THE DETROIT NEWS AT THE ABOVE PRICE
Exposed concrete surfaces add dramatic beauty to Pontiac's newest school system building

This Administration Building for the City of Pontiac school system came from the design boards of Eberle M. Smith Associates, Inc., of Detroit. A. N. Hickson, Inc., of Detroit, was general contractor.

One of the finest additions to Michigan's educational plant is the new Administration Building for the Pontiac public school system. The architect, Eberle M. Smith Associates, Inc., provided a distinctive and attractive structure by leaving the concrete frame exposed, added special interest with a precast concrete grid. The effective design resulted in both charm and economy.

More and more architects are finding that versatile concrete offers unrivaled opportunities for imaginative design to complement its advantages in economy, durability and low maintenance cost.

PORTLAND CEMENT ASSOCIATION 900 Stoddard Building, Lansing, Michigan

An organization to improve and extend the uses of concrete, made possible by the financial support of most competing cement manufacturers in the United States and Canada.
What would you think about a water heater without a tank?

Or an oven without sides?

Or a living room without walls?

We've given them a lot of thought. Super-fast tankless gas water heaters will deliver instant hot water in homes of the future. Another new idea in the pilot model stage is a radiant gas oven that will bake a cake in minutes. And gas research scientists are perfecting radiant heaters that turn your patio into a year 'round living room. All these exciting new developments are part of our pledge that you'll LIVE MODERN... FOR LESS... WITH GAS.

MICHIGAN CONSOLIDATED GAS COMPANY
