DRAMA in architecture beautifully serves drama in the performing arts: for the new Fine Arts Center at the University of Oklahoma, Tulsa architect A. Blaine Imel selected a slender steel Fenmark grid system to carry the grayed glass of the foyer; and cellular steel longspan "D" panels for the floor and roof. A contemporary classic utilizing all the advantages of the latest structural systems by FENESTRA. A representative will call at your request. Fenestra Incorporated, Lima, Ohio 45802.
BIG CAPACITY
IN SMALL SPACE

AEROFIN Smooth-Fin Heating and Cooling Coils

High ratio of surface area to face area
High air velocities without excessive friction or turbulence

GREAT LAKES FABRICATORS and ERECTORS ASSOCIATION
809 New Center Building
Detroit 2, Michigan
(313) 875-4222
ONE of a series of advertisements showing how top Michigan architects effectively use versatile concrete

Precast concrete panels
create a distinctive wall pattern
for the new Lansing Library

building a better Michigan
with CONCRETE

The excitement and beauty modern concrete gives to civic structures is dramatically demonstrated in Lansing's attractive new Public Library.

Distinctive and imaginative precast concrete panels are combined with concrete frame and floors in outstanding architectural design. The panels reproduce in concrete the colophons of eight U. S. book publishers. Pierced panels, backed by grey plastic, provide unique window interest. Long-span concrete joists allow great flexibility in interior layouts. Lansing's proud new cultural center came from the drawing boards of Kenneth C. Black Associates.

PORTLAND CEMENT ASSOCIATION 900 Stoddard Building, Lansing, Michigan 48933

An organization to improve and extend the uses of concrete, made possible by the financial support of most competing cement manufacturers in the United States and Canada.
THE MONTHLY BULLETIN IS PUBLISHED FOR THE MICHIGAN SOCIETY OF ARCHITECTS TO ADVANCE THE PROFESSION OF ARCHITECTURE IN THE STATE OF MICHIGAN.

WHY THE CITY OF MT. CLEMENS REQUIRES PREQUALIFIED CONTRACTORS

by EDWIN E. WHEDON, City Manager

"Because of the heavy demands on all street construction dollars, it is doubly important that city officials avoid the problems caused by inefficient and inexperienced contractors.

"As former City Engineer of Mount Clemens I have learned that contractor prequalification prevents the waste of tax dollars caused by lack of proper equipment, lack of manpower, lack of safety measures and lack of general know-how, causing failure to meet completion schedules and inept handling of traffic.

"We require a current Michigan State Highway Department prequalification rating of all bidders. We know then that we will be working with top quality contractors who have the experience, manpower, equipment, and financial backing to build our city streets to the same high standard as that found in our state highway system."

If you’ve been thinking the only advantage to Gas heating (and air conditioning) is its economy...

read the small print.

And think about these important points: Convenience. (With Gas you forget about keeping space-taking tanks filled. Because your supply of Gas never runs out.) Installation. (Surprisingly simple.) Maintenance. (Surprisingly low.) Cleanliness. (Gas heat constantly circulates air, freshening and filtering it.) Adaptation to air conditioning. (The same ducts that carry Gas heat in winter can carry Gas coolness in summer. And our new low rates for air conditioning customers make this point especially worthwhile.) Uniform temperatures. (Gas heat is even, floor-to-ceiling heat. No too-hot or too-cold spots.)

Need we say more? Contact one of our heating and air conditioning engineers. He’ll furnish all the details on the Gas heating and air conditioning system that fits your building plans. And he’ll be happy to meet with you. Call him today. He’s a most informative fellow.

HEAT AND COOL WITH THE SAME FUEL—GAS

Get a Full Measure of Quality

With Total Product Treatment

We don't check each piece of gravel with a micrometer but we do strive for precision in producing concrete aggregate. Our goal is uniform high quality that fully measures up to the most exacting requirements. To help achieve it, we make sure that all our concrete aggregates have had the benefit of treatment by Heavy Media Separation. We call this policy, Total Product Treatment. It's your assurance that when you specify or purchase our natural, rounded concrete aggregates, you get a Full Measure of Quality.

American Aggregates Corporation
12500 Greenfield Ave. - Detroit, Michigan 48227
This home, and many others like it, received its electric power from the atom. It could be happening in your home... NOW!

Since 1962, Consumers Power Company's nuclear plant near Charlevoix has been supplying the power to light the lights, heat the rooms, and cook the food in thousands of Michigan homes. These homes are no different than before; yet the world is far brighter as a result. For the atom has proven itself as the answer to man's growing need for abundant electric power.

Besides providing power, this unique plant is continually exploring new ways to get greater fuel efficiency through nuclear energy. It's a $26 million investment in Michigan's future by Consumers Power... where "CP" stands for continuing progress.

Consumers Power Company

GENERAL OFFICES: Jackson, Michigan
Rosen to Address DC-CSI Meeting

Harold J. Rosen, Chief of the Specifications Department of the New York office of Skidmore, Owings and Merrill, will be the guest speaker at the joint DC-CSI dinner meeting, January 20, at the Pick-Fort Shelby Hotel, Detroit.

A registered P.E. in New York and a Fellow of the Construction Specifications Institute, Mr. Rosen has been engaged in writing architectural specifications and in material research since 1941. He is currently a contributing editor and author of a monthly column “Specifications Institute” for Progressive Architecture.

“The Materials Explosion and its Implications” will be the topic of Mr. Rosen’s talk.

“This seemingly innocuous title contains many ramifications,” says Rosen. “First, it concerns the Architect and Specification Writer who must have an augmented curriculum at the college level to better understand materials. Secondly, the manufacturer’s representative must have a technical background and must be far better equipped to provide information on his product. Literature describing manufacturers products will require considerable improvement. A system for information retrieval for the host of products available will become a necessity. An agency, either public or private, may be needed as a materials evaluation service center. Still to be determined is responsibility for selection of a material, manufacture of a material, and installation of a material when a failure occurs.”

The Meeting will begin at 6:00 P.M. with cocktails, a buffet dinner at 7:00 P.M. and the program will begin about 8:00 P.M. Members and their wives of Detroit Chapter, AIA and the CSI, students and the interested public are invited to attend. The program portion of the evening will be open to those who do not wish to come for dinner.

Goals Conference for Ann Arbor

The Huron Valley Chapter in cooperation with other Ann Arbor organizations will participate in a Conference on Ann Arbor Goals to be held at the Michigan Union Tuesday, January 25, 1966. The keynote speaker will be Mr. Grady Clay, editor of Landscape Architecture magazine, Real Estate Editor of the Louisville Courier-Journal, and founder of the Citizens Metropolitan Planning Council of Louisville, Kentucky.

The conference will be spearheaded by Steering Committee chairman Joseph T. A. Lee, AIA. The conference will be from 8:00 A.M. to 10:00 P.M. with three general sessions, three symposia and small discussion sessions. A $1.50 registration fee will be charged for the entire conference or any part.

An important part of the conference is the display “Planning in the Ann Arbor Area” sponsored by the American Association of University Women and the League of Women Voters, which will be held in the Rackham Galleries, Ann Arbor, January 20-26.

For additional information or programs contact The University of Michigan Extension Service, Conference Department, 412 Maynard, Ann Arbor.

Design Award Jury Named

A jury of five architects has been named to review nominations for the 1966 10th annual R. S. Reynolds Memorial Award, according to the American Institute of Architects which administers the award.

The jury includes Walter A. Netsch Jr., of Chicago; James Gowan, of London, England; Romaldo Giurgola of Philadelphia; Edward A. Killingsworth, of Long Beach, Calif.; and Harwell Hamilton Harris, of North Carolina.

The Reynolds award is conferred for distinguished architectural design with significant use of aluminum. The jury will meet to review nominations on March 9.

Yokom Appointed SH&G Associate

The appointment of Robert W. Yokom, AIA, as an Associate in Smith, Hinchman and Grylls Associates, Inc., Detroit architectural, engineering and planning firm has been announced by Robert F. Hastings, the firm’s president.

Mr. Yokom, who is currently serving as project director for the Michigan State Capitol Development, joined Smith, Hinchman and Grylls in 1964. Previously he had been in independent practice and for a long period had been associated with George D. Mason and Company, serving as vice president from 1959 through 1961.

A native Detroiter, Mr. Yokom attended the College of Architecture of the University of Michigan. A registered architect, he is a member of both the American Institute of Architects and the Michigan Society of Architects. He is a director and is Treasurer-elect of the Detroit Chapter, AIA.
Sirrine Recipient of CIB Achievement Award

C. A. Sirrine, AIA, executive secretary of the Concrete Products Association of Michigan, was named by the Concrete Improvement Board of Detroit as the recipient of its Eighth Annual Achievement Award. The presentation occurred during the annual CIB Awards Dinner, held Thursday evening, December 2, at the University Club in Detroit.

Mr. Sirrine was honored for his outstanding contributions toward the improvement of concrete practices and standards, particularly in the design, specification and usage of quality concrete masonry.

He is a graduate of the University of Michigan College of Architecture and was employed by the Michigan State Highway Department during the early phases of experimental concrete highways. He also served several architectural firms in Detroit before assuming his present position in 1949.

Forum on Community Ugliness

The Student Chapter, AIA at Lawrence Tech will conduct a Forum on Community Ugliness on Saturday, January 29, 1966 at 7:30 P.M. in the Auditorium on Campus. The forum is in conjunction with the War on Community Ugliness sponsored nationally by the AIA.

The war is directed toward all communities in the United States with the purpose of making the public aware of environmental blight which exists in some form in all communities. The panel will discuss the conditions of our urban environment and the reasons for the conditions of present ugliness. They will further discuss what their own profession must do to effectively improve it.

The panel will be composed of Architect, William Kessler, AIA; Planner, Gerald Crane, AIA; Politician-Councilman William Brickley of Detroit; Business Representative, Craig Smith of Sullivan-Smith realty company; and Sociologist Dr. Robert Smock, Ph.D., he is technical director of TALUS (Transportation and Land Use Study). The moderator will be Carl Sedarburg of WJIB-TV, Detroit.

Tickets are available at $1.00 per person. Contact: Student Chapter, Lawrence Institute of Technology, 21000 W. 10 Mile Road, Southfield, Mich. 48076.

Architects-Engineers Commission Acts.

The Architects-Engineers Liaison Commission approved jointly-developed documents on professional collaboration and arbitration. The A/E Commission represents the American Institute of Architects, Consulting Engineers Council and the National Society of Professional Engineers.

Representatives of the American Society of Landscape Architects, American Society of Civil Engineers and the American Institute of Planners participated in editing the collaboration documents originally drafted by the A/E Liaison Commission. The Task Force which edited the statement was appointed by the Interprofessional Commission for Environmental Design, consisting of representatives from the AIA, ASLA, ASCE, CEC and NSPE. As approved, the statement covers the re-

27611 SCHOOLCRAFT/LIVONIA, MICHIGAN—48150

The statement on "Professional Collaboration in Environmental Design," which will be presented to the governing boards of each organization for official approval, is intended to provide principles for collaboration and cooperation of the design professions. Among the principles stated in the document: It is impractical to delineate the various design functions and areas of practice precisely, as they may overlap to a degree; collaboration and teamwork throughout the planning and design cycle is supported wholeheartedly by the environmental design professionals in the interests of their clients; close collaboration among the design professionals should begin at the very earliest stages of research, analysis and design and at that the responsibilities of the collaborating professionals should be clarified and established. Ordinarily, the client's interests are best served by a single contract with a prime professional who is responsible for direction of the work and for providing through collaboration the specialized services that may be needed.

The Construction Industry Arbitration Committee, composed of representatives of Associated General Contractors of America, Council of Mechanical Specialty Contracting Industries, AIA, CEC and NSPE, filed its final report with the Commission, recommending a plan for Construction Industry Arbitration, to be administered by the American Arbitration Association. The plan, which is subject to approval by the parent societies of the Commission, calls for adoption and maintenance of Construction Industry Arbitration Rules, review and maintenance of Panels of Construction Industry Arbitrators, consideration of applications of additional construction industry associations for representation on the Committee, and dissemination of information throughout the construction industry regarding arbitration.

The report suggests that the industry associations become contributing members of AAA, and that they establish and maintain local Advisory Councils to the regional offices of AAA. A revised arbitration clause would be recommended for use in construction industry contract forms. Under the proposed arbitration rules the AAA would establish a National Panel of Construction Arbitrators.

The next meeting of the Commission will be held February 14, 1966, at NSPE Headquarters, Washington, D.C., at which time a new chairman will be elected to succeed George S. Rawlins, PE, the current chairman.
Paul B. Brown, AIA, vice president, Harley, Ellington, Cowin & Stirton, Inc. addressed the members of the Transit Mixed Concrete Institute of Metropolitan Detroit at their recent annual meeting.

Speaking as president of the Forum for Metropolitan Goals, Brown was asked to cover three basic points:

1. What the Forum is trying to do.
2. Progress to date.
3. Plans for the future.

Excerpts from his talk are quoted below.

"One of the most striking phenomena of our times is the rapid growth—largely within our own lifetime—of our urbanized areas. Most of the advantages, as well as the liabilities, of today's living are features of this increasingly urban way of life. The growing concentration of people in a few large metropolitan areas is, of course, not a chance development, but the result of economic forces, of the increasing specialization of functions brought about by modern technology, of the greater opportunities for variety and choice in work, and in social and cultural activities, afforded by the large city.

This specialization of occupations and of interests, together with the vast physical extent and the variety of living patterns of our metropolitan region, has dissolved people's sense of living a common life and sharing common concerns—important attributes of our earlier communities. The New England town-hall meetings brought people together to discuss and seek solutions to their common problems; there is no counterpart to these meetings, in our urban communities today. Without effective local means of finding solutions to community problems, the only solutions—and they can only be partial ones—will be imposed by State and Federal decree. A principal reason, it seems evident, for our inability to resolve many of the shortcomings of our urban environment is a lack of community identification on the part of the citizens of the various parts of the metropolitan area."

"The first approach to better urban living, whether in the city or the suburbs, is a broadening of objectives and understanding. We need to have a picture of the community and metropolitan area we would really like to build. This has to be expressed one way or another if we expect ever to realize a more satisfactory urban life. We need to establish goals that are desirable and bold, yet attainable. This will require the universal support of every element in the community-business groups, political forces, civic groups, minority groups—all elements of the population. Citizens in every part of our metropolitan area need a greater sense of the stake that all of us have in a better community for people of all incomes and races, a community that transcends artificial boundaries that separate central city and suburbs."

"It goes without saying that little progress can be made in resolving the physical, social, economic and cultural shortcomings of our area until the people of our six-county region realize the true extent to which this metropolitan area is, in fact, one community—a community with an area of about 4,000 square miles, a population of four million people, and containing over 200 governmental units, a community with such an interdependence among its municipalities that few of the problems of anyone are independent of area-wide situations. We are all aware of the kinds of problems that are of metropolitan-wide scope, and whose solution requires cooperative action."

"The specific objectives of our organization are as follows:

1. To stimulate the joint interest of citizens and public officials in long-range goals, in terms of the needs and desires of the people, to guide the development of the six-county metropolitan area."
2. To inform the public on the need for goals and on the possibilities of more satisfactory living in our metropolitan area.

3. To encourage public discussion and debate on metropolitan goals for our area.

4. To sound out public opinion on specific questions related to metropolitan goals.

5. To formulate with the participations of citizens and public officials, specific goals for our area which will recognize the inherent values of metropolitan life."

"Since its first metropolitan conference at Cobo Hall in May, 1963, I believe that the Forum has gained considerable community interest in the formulation of goals for our region. Three additional area-wide conferences have been held; the most recent, in May of this year, had as its theme 'Goals for Transportation and Regional Development', and related closely to the 3 yr., 3 1/2 million dollar comprehensive transportation and land-use study for our six-county area, now under way."

"Our program so far has only served to arouse some degree of interest; only this fall are we embarking on the most vital part of a program which must involve people from all sections of our region. The Greater Detroit Board of Commerce, together with the 32 local Chambers throughout the metropolitan area, have joined with the Forum to organize a program of local community Forums — similar to the community goals conference held in Livonia last March — that will encourage citizens to come together in their own communities to discuss local problems and goals, and in doing so to realize that many local problems reach beyond local boundaries, and that effective goals for their local community must dovetail with realistic goals for the development of the broader metropolitan community."

"The Forum program of wide public involvement in the formulation of metropolitan goals is a unique and pioneering effort. It has prompted Paul Ylvisaker, Director of the Public Affairs Program of the Ford Foundation, to remark that it indicates 'noble ideals above those anywhere else in metropolitan areas of the United States; truly, there is something plus going on in Detroit.'"

"The pulling together of our citizens' ideas and dreams and goals — and eventually seeing that these are translated into plans — is the program of the Forum."

**PC-AIA Appoint Liaison Committee**

The American Institute of Architects and the Producers' Council, Inc., signed a new agreement of affiliation which clarifies their current common objectives and updates affiliation agreement originally signed in 1923.

In a joint statement Morris Ketchem, Jr., FAIA, and Charles S. Stock, presidents of the AIA and PC respectively, explained that because both groups work in the interest of the client, each is concerned with the goals and achievements of the other, each seeks to protect the client, the AIA by fostering and preserving the highest degree of professionalism in architecture, the Producers' Council by guarding the quality and integrity of building products.

The presidents noted a need for increasing collaboration as matters of mutual concern have multiplied through a growing complexity in modern building and environmental design problems. The relationship established between the two organizations has been extremely valuable to the profession of architecture, to the producers of construction materials and products, and to those for whom buildings are constructed, they said.

Collaboration between the two organizations will be handled through a new Liaison Commission of six members, three from each group. Named to day to serve on the Commission in addition to the presidents were R. Lloyd Snedaker, FAIA, of...

(Continued on Page 30)
Salt Lake City, chairman of the AIA committee on building materials and systems, and William H. Scheick, FAIA, executive director of the AIA, and, for Producers' Council, A. M. Young, a past president and chairman of the PC-Architects liaison committee and John L. Haynes, PC managing director.

Officials emphasized that the new national Liaison Commission in no way affects individual chapter level, the components of AIA and PC will continue to carry on effective liaison work through a variety of committee activities adapted to local requirements, they said.

In the new national agreement of affiliation, the Institute and Council plan to cooperate in several activities designed to advance knowledge, raise informational standards and secure economies to the construction industry and the public.

The Liaison Commission, whose members are appointed for one-year terms, will decide which matters call for collaboration.

Areas in which the two organizations will collaborate include advancement of knowledge about the most effective use and assembly of materials used in construction; dissemination of up-to-date knowledge of materials and methods gained through research and field experience; improvement of standards of advertising and information on materials and methods useful to the architectural profession and the building industry.

They will work together to assist in education of students of architecture, engineering and related construction arts, as well as representatives of building materials and manufacturers. They will try to secure economies to the entire construction industry and the public through improved building materials and systems coordination, collaboration between local chapters of the Institute and Producers' Council.

A.I.A. Cites Five Cities for Community Architecture

San Antonio, Philadelphia, Louisville, Salt Lake City and Oklahoma City have joined the list of communities awarded a "Citation for Excellence in Community Architecture" by the American Institute of Architects.

The citation program was started early this year to recognize cities having planned architectural projects which successfully realize the objective of creating vital environments for their core, with Detroit receiving the first such award. No single building can qualify for a citation. Each of the AIA's 17 regions is eligible to nominate a city for the citation, which must then be approved by the national Board of Directors.

Paseo del Rio, San Antonio, Texas, received a citation as the winning nominee of the AIA's Texas Region from Morris Ketchum Jr., FAIA, A.I.A. president during the annual convention of the Texas Society of Architects at Austin.

Oklahoma City's downtown plan was presented a citation by Angus McCallum, director of the Central States Region, at its convention in Des Moines, Iowa. The Central States Region comprises Iowa, Kansas, Missouri, Nebraska and Oklahoma.

Society Hill in Philadelphia, Pa., was the winning nominee of the Institute's Pennsylvania Region, honored as a convincing reconciliation of old and new. The citation was presented to the citizens of Philadelphia and their mayor James H. J. Tate by Willard S. Hahn of Allentown, director of AIA's Pennsylvania region, during the annual convention of the Pennsylvania Society of Architects at Hershey, Pa.

Village West, an ingeniously designed new low-rental development in Louisville, Ky., won a citation for the AIA's East Central Region, which includes the states of Indiana and Kentucky. The citation was presented at a meeting of the West Kentucky Chapter in Louisville today by Walter Scholer Jr. of Lafayette, Ind., regional director.

Downtown Salt Lake City's Second Century Plan was the winning nominee of the Western Mountain Region, AIA, presented by regional director James M. Hunter FAIA of Boulder, Colo., during the regional conference at Scottsdale, Ariz. The Western Mountain Region comprises Arizona, New Mexico, Nevada, Wyoming, Colorado and Utah.
Roof Systems Manual
Sponsored by AIA

To meet a current need for a source of reliable information on roof systems, The AIA has arranged to sponsor development and publication of a comprehensive design manual for roof systems.

Leonard G. Haeger, AIA, has been engaged as author-editor of the work which has been tentatively entitled a "Comprehensive Design Manual for Bituminous Built-Up Roof Systems." This book is to bring together all available data on component parts of these systems and on the various factors affecting their performance.

The project is being backed financially by 23 organizations which belong to the building community. More than $50,000 has been pledged in order to assemble the information without delay into a single reference volume for the use of all segments of the construction industry.

The Institute has undertaken this project because such a manual will not only help the architect to design the best roof for each situation, but will directly benefit the producer of roofing systems products by preventing the inadvertent misuse of those products.

The objective of the project, as conceived by the AIA's Committee on Building Materials and Systems, are to identify the chemical, physical and environmental factors affecting roof systems; to gather and analyze the available technical data relating to these factors and to each of the components of roof systems; and to publish this information in an organized, clearly written and illustrated manual to be used by architects, builders, producers, applicators and maintenance engineers.

Publication is scheduled for early 1968.

MSA Elects New Officers

At the December meeting, held in Detroit on December 8, the Michigan Society of Architects Board of Directors elected officers for 1966.

President is Robert L. Wold, of Wold and Bowers, Inc., Grand Rapids. Vice President, Jay S. Pettitt, Jr., of the office of Albert Kahn, Associated Architects and Engineers, Secretary, Chase Black, of Haughey Black & Williams, of Battle Creek, Jack Monteith, of Swanson Associates, Bloomfield Hills, Treasurer.

Board members for this term of office will be, Paul B. Brown, Detroit, F. Huston Colvin, Ann Arbor, Gordon Cornell, Traverse City, Jackson B. Hallett, of Midland, Walter M. Laitala, Ann Arbor, Philip J. Meathe, MSA Regional Director, Louis Menk, Detroit, Bruce H. Smith, Immediate Past President, Royal Oak, Robert S. Swanson, Bloomfield Hills, James E. Tomblinson, Flint.

ANNOUNCEMENTS

Richard Prince, AIA, Architect, Kalamazoo, Michigan announces that his office has been relocated to 3623 Douglas Avenue.

The firm of Spence and Smith, Architects, Saginaw, is pleased to announce an expansion of its staff and office facilities and also a reorganization of its principals.

Richard A. Forsythe has been appointed to the position of Associate in charge of production James A. Spence, Jr. will be responsible for engineering and field supervision. A. Calvin Smith will handle the architectural design phase of the firm's projects. James A. Spence, Sr. will remain as senior partner and direct client relations.

Franklin H. Smith has recently joined the staff as specification writer and is now registered as a Michigan architect. This gives the firm five registered architects and a total staff of fourteen persons.

Roofing or Sheet Metal Problem Affecting Your Completion Date?

Our highly competent staff of engineers can eliminate delays that cost you time and money.

To do this, we suggest that our engineers be present during the planning stages of your next project. We know that you and your client will benefit by our many years experience in this specialized field.

You need skilled tradesmen on mechanical assignments, naturally.

But you need management to call the plays, too. That’s why the Mechanical Contractor pays owners, architects-engineers a profit. He brings a unique, specialized combination of management skills to every assignment—installation and materials know how, coordinating and supervisory skills, total responsibility.

You can’t buy greater knowledge—or a bigger bargain in the construction field.

January, 1966 | 35
Report From
The President

As I look back over the past year, it is worthwhile and necessary to make a realistic appraisal of the accomplishments of the Detroit Chapter officers, and of the work still incomplete.

Our main efforts were concentrated in several areas:
1. To create an understanding and a positive image of the architect in the eyes of the general public.
2. To create a closer contact among the allied professions.
3. To improve office practice in every branch of its activities.
4. To collaborate with City agencies and construction industries whenever such assistance is requested.

To accomplish the above mentioned goals, many of the Chapter Committees spent much time and effort—all this at a time when the workload in every office is very heavy.

The Civic Design Committee, with Sig Blum and Harold Binder as Chairman and Co-chairman, concentrated their efforts toward the creation of a Detroit Municipal Fine Arts Commission which would have a voice and legal status in approving major public, civic and even some private building projects. It would be patterned after the Commission established in Seattle, Washington.

The Office Practice Committee, with Bradley Storrer and

---

12 APRILS

. . . That is what you can offer your customers when you work with SISCO! Twelve months of controlled rain, . . . . any time they want it.

SISCO also offers a complete design service backed by over 40 years of experience. Such quality materials as Buckner rotary pop-up sprinklers and automatic controls are recommended and stocked by SISCO and its distributors. Choose materials by SISCO and be an irrigation expert by proxy!!
Karl Greimel as Chairman and Co-chairman, had a very fruitful year. The main project, which was conducted jointly with the Michigan Society of Architects, was a work shop seminar, sharing experiences with various offices from many parts of the country. The workshop, featuring many prominent speakers, was held in Ann Arbor with large attendance from all State Chapters.

The other project of the Committee, which is still in the process of completion, is a survey of the architectural profession in the State of Michigan. This survey is headed by Gerald Supina, an architectural student of the University of Detroit, who is doing this as part of a thesis under the Committee’s supervision.

As part of the “War on Community Ugliness,” the Education Committee, with Earl Pellerin and Harold Binder as Chairman and Co-chairman, is well underway to start an architectural competition among high school students in the Detroit area. Part of the program will consist of a redevelopment project for their own neighborhood, thereby making them more conscious and understanding of the problems involved. It also should give great stimulus to interested students who intend to make architecture their profession. This program is co-sponsored by the Detroit Edison Company with Frank North leading the way.

The Chapter Affairs Committee, with Suren Pilafian and Bernard Colton as Chairman and Co-chairman was most active. The Committee was responsible for the recommendation on the absentee balloting and for other revisions of by-laws which will be presented for your approval.

The Public Relations Committee, with Gerald Diehl and Robert Alpern as Chairman and Co-chairman, is preparing an ambitious program of radio talks on all aspects of architecture. The idea is to stress the significance of the Profession in general, rather than to feature individual firms.

Charles Blessing and Paul Brown, the Chairman and Co-chairman of the Metropolitan Research Committee, concentrated their efforts on supporting and implementing the master study of the metropolitan physical environment. The committee will also cooperate with Irving Rubin, new Executive Director of the Comprehensive Transportation and Land Use Plan.

The Preservation of Historic Buildings gains new significance in the light of the national drive against Community Ugliness. The National Office will designate the Chairman of this Committee as the Preservation Officer, and as such, will be the person through whom the National Committee will work in organizing programs designed to provide some of the tools with which to wage our “War on Ugliness.”

Last year John Morgan the Chairman of the Committee performed an extraordinary service in gathering material on the Scripps House for possible use for the Detroit Chapter. We hope that members of the incoming committee will take their task seriously, and contact local authorities in advance to find out which of the important buildings are slated for demolition.

We have had several joint meetings with other professional groups, the January meeting was conducted jointly with the American Institute of Steel Construction and the Society of Professional Engineers. The February meeting was a joint affair with the Industrial Designers. Other meetings were of pertinent interest to the architects and many of the meetings had excellent attendance. However, in the year ahead, it is our hope that more members, especially the younger set, and our newly elected members, will attend and participate actively in the activities of the Chapter. We need the help of everyone to raise the standards and work for the betterment of our profession.

ANNOUNCEMENT

As members of the Michigan Roofing Contractors Association, Inc. we are pleased to comply with the M.R.C.A. recommendation that all its contractor-members thru-out Michigan shall begin to issue TWO year personal guarantees on any roofing or sheet metal jobs which they may do subsequent to January 1, 1966.

Can you tell the difference between Inserat Grotesque and Venus Extra Bold Extended?*

Probably not—these are two contemporary typefaces used today in promotional literature. Just as architecture is a fast developing and changing profession, the graphics arts industry is equally dynamic with new innovations being developed every week. As you pride yourself on being aware of the many developments in your field, we at the Ann Arbor Press and Hutcheson Associates take the same pride in being on top of the latest techniques and materials of production and printing. We are experienced and capable of taking your initial concepts for a brochure and developing it through design, production and printing with a contemporary flare that you can use with pride. Why not call Gary Grout or Ed Hutcheson today and ask to see some of our recent samples we have done for your contemporaries.

*Ann Arbor Press is set in Venus Extra Bold Extended Hutcheson Associates is set in Inserat Grotesque

Eleventh Annual
Homes for Better Living

The Eleventh Annual Homes for Better Living Awards competition has been announced by Richard W. O'Neil, Editor of House and Home Magazine.

Entries may be submitted by the owner, architect or builder. Houses and apartments must be designed by a registered architect and built and completed since January 1, 1963 in any of the 50 states or U.S. possessions. Entries shall have the approval of all parties named above. There shall be no restrictions on publications of the building or additional photography.

Awards will be made on the basis of outstanding contributions to better living through residential design, site planning and construction. Award winners will be displayed at the 19th Annual Convention of the AIA in Denver, Colo., June 26-30, 1966.

Awards will be made in three categories:
(1) Custom Houses designed specifically for an individual owner, divided into three classes according to size:
   a) Under 1,600 sq. ft. of living space
   b) 1,600 to 2,800 sq. ft. of living space
   c) Over 2,800 sq. ft. of living space
(2) Merchant-Built Houses designed for merchant-builder production and sold speculatively, divided into three classes, according to sales price, including land:
   d) under $25,000
   e) $25,000 to $40,000
   f) over $40,000
(3) Garden Apartments and townhouses built for rent or sale. Apartments shall not be over three stories in height from grade, must comprise four or more living units and may be single buildings or one of a group. Unit sale price or monthly rental shall be indicated.
   g) Single apartment buildings
   h) Multi-building apartment groups
   i) Townhouses (single or in blocks)

Outstanding architects, housing industry leaders and the editors of American House & Home will judge the entries. Judging will take place at the Octagon on April 26 and 27, 1966.

Pertinent information on each entry shall be submitted on the registration blank attached to this announcement (or a facsimile), together with a payment of $10 for each home or apartment entered. Any number may be entered.

Entry blanks and additional information may be obtained from James P. Gallagher, Senior Editor, House & Home Magazine, 350 West 42nd Street, New York, New York.
Task Force For "War"

A high-level task force of prominent architects has been appointed to oversee the massive and continuing "War on Community Ugliness". The American Institute of Architects is conducting through its 161 chapters across the nation.

The board of directors of the Institute, during its annual winter meeting, assigned the role of leadership in the growing campaign to a task force composed of Willis N. Mills, FAIA, of Stamford, Conn., chairman; and George Rockrise, FAIA, of San Francisco, Calif.; Kenneth W. Brooks, AIA, of Spokane, Wash., and Richard W. Snibbe, AIA, New York, N.Y., as members.

The task force will take over on Jan. 1, the duties which were carried for the past year by Robert L. Durham, FAIA, of Seattle, Wash., who has been the "General" in the war since its start.

Durham asked to be relieved of his duties because of the pressure of other Institute responsibilities. He is a vice president and chairman of the AIA Council on Commissions, a new name given to the former Committee on Committees during this week’s board meeting.

Changes also were made in the personnel of the Institute's commissions, which administer the activities of more than 50 active committees. The changes will be effective February 1, 1966.

Willis N. Mills, FAIA, was named new chairman of the Commission on Architectural Design, to replace Durham, and Philip J. Meathe, AIA, Grosse Point Park, Mich., was added to the commission. Charles Blessing, FAIA, of Detroit, Mich., a current member of the commission, will retain his post.

Daniel C. Cowling Jr., AIA, of Little Rock, Ark., was named new chairman of the Commission on the Professional Society, succeeding Robert H. Levison, AIA, of Clearwater, Fla., who will remain a commission member. Bernard B. Rothschild, AIA, of Atlanta, Ga., was appointed third member of the commission.

The AIA Commission on Education and Research will be headed up by Walter Scholer, Jr., AIA, of Lafayette, Ind., replacing James M. Hunter, FAIA, of Boulder, Colo., who remains on the commission along with Donald Q. Faragher, FAIA, Rochester, N.Y.

David N. Yerkes, FAIA, of Washington, D.C., was named to the Commission on Public Affairs, which is headed by Llyellyn W. Pitts, FAIA, of Beaumont, Texas. Third member is G. Day Woodard, FAIA, of Los Angeles, Calif.
Trade Centers to House Wholesale Furniture Mart

A new role for Detroit as an important center of the wholesale furniture market was predicted today by Harold A. Robinson, associated for 26 years with the Robinson Furniture Company.

Robinson disclosed that he has established a new firm to serve retailers, interior decorators, designers and architects. He has leased an entire floor of the Detroit Trade Center for a complete home furnishings display center featuring furniture, floor coverings, fabrics and accessories. He emphasized that the new business has no connection with the Robinson Furniture Company.

Robinson said he is convinced that Detroit is on the threshold of becoming a major market center for home furnishings, comparable to New York, Chicago, Atlanta, Dallas, San Francisco and similar merchandising centers.

Robinson said his new showroom will equal in size the largest single decorators' furnishings showroom in the Chicago Merchandise Mart. It will open early next year when the first building of the Detroit Trade Center is completed. He expects several furniture, fabric and carpeting firms to open in the building at the same time.

The Detroit Trade Center, a $10 million complex of offices and display rooms, is being built at Sixth and Howard alongside the John Lodge Freeway. It will consist of two high-rise towers linked by a glass and concrete service tower and will provide 450,000 square feet of space for the apparel, soft goods, giftware and automotive industries in addition to home furnishings. Smith, Hinchman & Grylls Associates, Inc., are the architects for the Center.

New Books

"Construction Scheduling and Control" by George E. Deatherage. 309 pages plus index; 126 illustrations; 7½ x 9¼; McGraw-Hill; $15.00. Publication date: October, 1965.

Award Program Announced

For Library Buildings

The third joint "Library Buildings Award Program" to encourage excellence in the architectural design and planning of libraries has been announced by the three sponsoring national organizations. The American Institute of Architects, the American Library Association and the National Book Committee.

Any library in the United States completed after January 1, 1961, and designed by a registered architect practicing professionally in the United States is eligible.

Application for entry, including a fee of $20, must be made by January 31, 1966, and deadline for receipt of submissions in brochure form is March 1, 1966.

A jury appointed by the AIA will include three architects and one representative of each of the American Library Association and the National Book Committee. Three librarians, each to represent a class of libraries, will also be named, each librarian serving only when his classification or category is being judged.

Entries will not be judged in competition with other entries, but on the basis of the solution of the problem presented to the architect and its worthiness for an award. The jury will select one or more First Honor Awards for Distinguished Accomplishments in Architecture, and Awards of Merit in Architecture for as many entries as the jury deems serving.

**Allied Arts Festival 1965**

As part of its long-range efforts to encourage integration of the Arts in Architecture, the Allied Arts Committee of the Detroit Chapter of the American Institute of Architects held the Fifth Annual Festival on Saturday, November 20, in Detroit.

The purpose of the Festival was to bring together Architects, Landscape Architects, Planners, Interior Designers, Artists, craftsmen and Gallery Directors to discuss mutual problems and promote the integration of the Arts.

John Sheoris, the Chairman of the 1965 Festival and his committee organized an ambitious afternoon and evening program. Committee members were Yoshizo Machida, Vice Chairman; Gerome Chirco, Montgomery Ferar, Shirley A. Jannuzzi, David H. Lee, William S. Quinlan, Donald Richards, Clarence Roy, Victor J. Shrem, David Spalding and Roderick E. Warren.

An exhibit of recent watercolors by Louis Redstone, Detroit Chapter President, and an exhibition of sculpture by Sorel Etrog began the Festival at the Gallery of the J. L. Hudson Company. The exhibits were arranged by the Director of the Hudson Gallery, Albert Landry.

Following the reception at Hudson's, the group moved to the Campus of Wayne State University and an Exhibit of “Art in Urban Architecture” designed and organized by Paul F. Damaz, AIA. After dinner, in the McGregor Memorial, an original dance “Woodward” was performed by the WSU Dance Workshop under the direction of Harriet Berg. The program concluded with guest speaker, Paul Damaz, and his talk on “Art in Urban Architecture.”
CALENDAR

1966

January 20 DC, AIA-CSI Joint Meeting, Crystal Ballroom, Pick-Fort Shelby Hotel, Detroit. Harold Rosen, speaker.

24-27 Critical Path Method Workshop, University of Wisconsin, Madison.

If each of these lines or shapes were to represent walls or buildings there is one material which could be used to transform them into reality. This material is brick. Bricks' flexibility make it ideal for use in straight walls, curved wall, serpentine walls, or any combination an imaginative architect might design. This flexibility can even be expanded by creating textures or patterns that are indented, protruded, or perforated. These attributes combined with an almost infinite variety of colors leave no doubt that brick is THE IMAGINATIVE MATERIAL.

You use electricity for light

Now let the same light provide your heat

An electric light bulb produces 9% light and 91% heat from the electric energy it receives. A fluorescent lamp produces 15% light and 85% heat. That heat can be used to heat a building. Provocative idea? A money saver, too!

It starts with the familiar principle that heat rises. Then the lighting fixtures and ventilating system can be designed to catch this heat and circulate it. All you need is lighting that's good enough to provide proper light for reading, working or selling. This could provide all the heat you need when the lights are on—no supplementary heating required.

The system helps you save on air conditioning, too. Heat is drawn off in warm weather, measurably lessening the load on air conditioning equipment.

To find out more, call us. A heating specialist will consult with you at your convenience. No obligation, of course. In Detroit we're at WO 2-2100, extension 3131. Elsewhere, call your Edison office.
versatile is the word for SLAG aggregate

Blast furnace SLAG, (as defined by A.S.T.M.) is the “non-metallic product consisting essentially of silicates and aluminosilicates of lime and other bases, which is developed simultaneously with iron in a blast furnace.”

Simply stated: Blast furnace SLAG is the result of the iron-refining process. Its useful characteristics have been known for centuries. In recent years, this “by product” has moved into the front rank of construction materials. SLAG offers versatility in all construction uses. Technical information supplied.
