PRESIDENT'S MESSAGE
by Robert Greager, AIA
GREETINGS!
It is with real pleasure that I report major progress in several important areas:
1. The MSA Board in April endorsed the following scope of practice definitions of engineering and architecture which eliminates “and incidental to.” This action will reinforce actions taken last year at a joint meeting of the State’s Engineering and Architecture Boards.

Sect. 1) The design of any alterations or new facilities which involves structural, mechanical, heating, ventilation, air conditioning, electrical or other specialized engineering systems requires the design services of a licensed professional engineer.

Sect. 2) The design of any alterations or new facilities which is to be occupied or used by human beings requires the design services of a licensed architect.

Sect. 3) The exception to Sect. 2 would be where occupancy is by less than ten (10) people at any one time who are involved only in maintenance or inspection of equipment, such as in a water storage tank or a dam. In this case an architect would not be required.

Sect. 4) Neither of the above requirements apply to building types which under current state law do not require the services of a licensed design professional.

Performance by the required design professionals shall be evidenced by appropriate seals and signatures on the construction documents for the project.

2. The newly reconstituted COPOL’s major charge is to evaluate the Department of Licensing & Regulation and recommend changes to the Legislature in the Fall. The COPOL Board is attacking their charge with a vengeance, the Department is cooperating fully and there is great promise for improvement. Please send your recommendation for improvement and/or examples of past abusers/frustrations. I will personally present our concerns to COPOL.

3. The language of H.B. #4251 has gained acceptance from the Department of Management and Budget and therefore we are one step closer to legislative approval of legislation to select design professionals by competency.

4. Thanks to Noel Fagerlund’s efforts, a well conceived process to contact MSA members to solicit donations for the Beaubien House remodeling is currently being implemented. Next month’s “Honor Roll” should be very lengthy.

AIA 25 YEAR AWARD
The General Motors Technical Center has been selected to receive the Twenty-Five Year Award. This honor is conferred on a project that has withstood the test of time for at least 25 years. It will be presented at the 1985 AIA National Convention in San Francisco.

Eero Saarinen & Associates designed the sprawling center in 1950-51 with Smith, Hinchman & Grylls to produce a symbol of industrial achievement and corporate architecture.

The Center is still “one of the most strikingly impressive works of innovation in American architecture,” according to the jury. It began its life as the prototype of enlightened corporate architecture, built to advance both technology and art and to inspire and serve its workers,” continued the jury commentary.

Over 30 years later, the center is still an oasis, even though the surrounding landscape has been filled in with “an unending sweep of undistinguished industrial and commercial buildings, suburban subdivisions and fast-food franchise-lined highways.” It stands as a reproaching symbol of what might have been.

W/A PROGRAM
The Women in Architecture Committee, the MSA, and the Detroit Chapter AIA, will present the program, “Self-Presentation for Architects,” on Thursday, May 9 from 6:00 p.m. to 10:00 p.m. at the Beaubien House. Workshops on how to be more effective at meetings and presentations will be given by sales managers from Steelcase Corporation and instructors with the Dale Carnegie Courses. These professionals will show you how to achieve the results you want.

Admission to the seminar is free; refreshments will be served; however, registration is limited to the first seventy people. To make your reservation or ask a question regarding any Women in Architecture program, phone Lois Grant at (313) 354-0300 or AIA 965-4100.

AAA SEeks ARBITRATORS
Due to the growing number and complexity of disputes in the construction area filed with the American Arbitration Association, qualified experts are needed. The use of alternative dispute resolution systems have become increasingly popular as litigation costs have escalated. The AAA is a private, not for profit, organization that has been a major force in the resolution of conflicts for over a half century.

Twice each year, coming up next in mid-summer, the AAA Advisory Committee reviews credentials and prepares a list of qualified experts in the construction field. From this list, arbitration panels are mutually agreed to by the parties in a dispute. Since the Construction Industry Arbitration Rules of AAA govern arbitration procedures under AIA contract documents, architects have a particular interest in assuring the availability and quality of panel members. Contact Janice Holdinski, Tribunal Supervisor, 1000 Ford Building, Detroit, MI 48226, phone 313-964-2525, for an application.

Arbitration Day — 1985 will be observed on May 15th with a program at the Willistead Manor in Windsor. This event will be of special interest to architects and their attorneys. Call AAA for details.

VALUE ENGINEERING
Bring your calculator and an open mind to the May 16th Detroit Chapter sponsored program, “Value Engineering and Front-End Decisions.” Alphonse J. Dell’Isola, P.E., vice president and Washing ton, D.C. office manager for Smith, Hinchman & Grylls, will lead you through a value engineering evaluation and show you some innovative techniques to control cost during the design phase of a project. He pioneered the application of value engineering to the construction industry.

Dell’Isola has supervised over five hundred value engineering cost studies. Fifteen thousand professionals in twenty-one countries have benefited from his research and learned from his workshops. He is a graduate of MIT and the author of several texts.

His presentation, held from 1-5 p.m. at ESD will include life cycle costing, cost monitoring techniques, value management and post-occupancy evaluation. Tickets are $20/person call 965-4100 for reservations.
DIALOGUE '85

Building on two previously successful encounters, Dialogue '85 has been expanded to include representatives of business and industry. On May 21st, MSA, CECM and MSPE will come together at LIT at 5:30 p.m. for their third annual roundtable discussions.

The program is intentionally informal and begins with refreshments. It is set up to allow ample opportunity for fellow building design professionals to meet one another and to talk to decision makers in state government, business and industry.

"Communication, cooperation, interaction and networking may all be overused words but coming together to share ideas and concerns will benefit us all," said Bob Lefebvre, chairman.

The guest list includes people from Chrysler, General Motors, Michigan Bell, U.S. Corps of Engineers, Michigan Departments of Transportation and Energy, Detroit Building and Safety Engineering and the presidents of the three sponsoring organizations. The president and the deans of architecture and engineering at LIT will also be in attendance.

The $7.50 admission includes refreshments. Contact Bob Lefebvre at 313-355-4600 or MSA at 313-965-4100.

HOME TOUR TIME

A major fund raising event for the Detroit Chapter/AIA is coming up June 2nd. After a year's hiatus, the Chapter is again planning a house tour, this time with the Michigan Chapter of ASID. It should be the best tour ever, according to the planning committee chaired by Paul Stachowiak. "June is a perfect time for a house tour. The weather will be balmy, the gardens will be glowing and there are no football games to compete with," he said.

Six homes have been chosen, all in the Birmingham area. Each is unique but they all reflect their owners attention to detail. Two are architect owned and designed and two were designed and decorated by their ASID owners.

The "Phoenix House" was so named because it rose from the foundation of its 1948 predecessor that was consumed by fire. The Brown Street Condominium is an innovative renovation of an one-story single family residence that features the dramatic use of glass to create a green house effect on the elevation.

Tiffany lamps line the lane of one house and another is described as eclectic contemporary Deco with a marble shower and jacuzzi. Most of the furniture in another was designed by international architects or architect owners.

The ticket price of $9 includes bus transportation from Seaholm High School in Birmingham to each of the houses, beginning at noon. Groups of 25 or more receive a 20% discount and the committee is selling blocks of tickets to member firms who plan to give them to their clients. Call 313-965-4103 to arrange a tour or buy a ticket.

OBITUARY

CLEON OOSTERHOUSE, AIA, died on March 20, 1985. He was a member of the Grand Valley Chapter and worked at DeWinter Associates for most of the past twenty-five years. He was project architect for many buildings, including the Gerald R. Ford Museum.

Surviving are his wife, Ina, four children, his parents and brothers and sisters.

Memorial contributions can be made to Neland Avenue Christian Reformed Church Emergency Food Fund, 940 Neland S.E., Grand Rapids, MI 49507.

DC/ASSOCIATES COMMITTEE

The Associates Committee reports a 50% increase in membership along with a 50% increase in participation in the Architectural Exam Registration Seminars. The call goes out again, however, to the current membership to each recruit one new person. This extra effort could double the ranks of the Associates Committee.

Nominations will be accepted for committee offices at the July meeting. Elections will be held in September but it is not too early to be thinking about who should lead the committee next year.

Deposits of $25 per person are still being accepted for the Amtrak Train Excursion to Battle Creek and Marshall on the weekend of October 19th. Contact Dennis Robare at 313-851-8920.

"Mock" design exams will be held at U of M instead of U of D due to the large number of responses. There are a few openings left. Call Bje Nissel at 313-424-0440 if you are interested.

SCHOLARSHIP GOLF OUTING

The Masonry Institute of Michigan announced that its annual golf outing, to raise architectural scholarship funds for students at Lawrence Institute of Technology, will be held on Thursday, June 6, 1985, at Dunham Hills Country Club, Milford, Michigan.

"We urge all of our architect-engineering, general contracting, mason contractor and supplier friends to attend this worthwhile event featuring fun, fellowship and an excellent grilled steak luncheon," said Michael Navetta, Institute chairman.

LIT Architectural School Dean Karl H. Greimel, FAIA, likewise, called upon all former Lawrence Institute of Technology alumni to attend this year's outing.

The Masonry Institute's Board of Trustees recently approved the issuance of four LIT architectural student scholarships, each in the amount of $850.

The outing cost is only $80 for golfers, $50 for non-golfers. It includes an open bar, grilled steak luncheon, door prizes, program souvenirs, golf prizes, and a contribution to the scholarship fund that qualifies for both a Michigan tax credit and a Federal tax deduction.

For reservations, call Donna Crosier at the Masonry Institute of Michigan offices at (313) 478-6455.

WAL HOEDOWN

The Woman's Architectural League will teach you to square dance at a Hoedown they are sponsoring on May 18th at 8 p.m. It is a BYOB party but the $20 cost per couple covers a chicken snack and dessert. Each WAL member who gets a "square" together with three guest couples will receive a bottle of wine.

Contact Eve Gardner at 626-9620 or Mitzi Phillips at 643-5029 before May 11th.

BARRIER FREE

The costs associated with the removal of architectural barriers to handicapped and elderly persons are again tax deductible. Section 190 of the Tax code had expired in 1983 but was reinstated in the Tax Reform Act of 1984, P.L. 93-369. The maximum deduction was increased to $35,000 per year beginning after December 31, 1983 and before January 1, 1986.

Qualified expenses must be specifically attributable to the removal of existing architectural barriers and must meet the standards promulgated by the Secretary of the Treasury.
ROBERT WOLD, FAIA

Grand Rapids' architect, Robert Wold, will be invested into the College of Fellows at the 1985 AIA National Convention in San Francisco on June 10th.

In 1982, Wold received the MSA Gold Medal and the firm that bears his name, Robert Lee Wold & Associates, has won numerous awards for excellence.

He is active in civic and church affairs. He helped to create a scholarship program with the Grand Rapids Builder's Exchange that awards $10,000 annually to deserving students studying for careers in the construction industry.

He was president of MSA in 1966 and now serves on the Michigan Board of Registration for Architects. He chairs the NCARB committee that writes the national architectural examination.

The College of Fellows was created by the AIA to honor those members who made "notable contributions to the profession." Wold has provided leadership and countless hours to the advancement of the profession of architecture. He co-chaired a state committee to draft a document simplifying the description of services, methods of selection and basis for compensation for architectural services. He was a member of a committee to study and update the Grand Rapids Building Code. With the MSPE, he and his committee drafted the first Statute of Limitations for design professionals to become law. He helped to found the Grand Valley Chapter-AIA.

A reception is scheduled for May 23 at the Beaubien House beginning at 4:30 p.m. to allow the profession to say thank you to its Fellows, especially its newest member, Robert Wold.

FELLOWS RECEPTION

The MSA will honor its Fellows at a reception to be held on May 23rd at the Beaubien House from 4:30 to 7:00 p.m. Special guests will be Robert L. Wold of Grand Rapids who was advanced to the College of Fellows by the AIA this year and David Aaron Novick of the Detroit Chapter who was made a Fellow of the Royal Architectural Institute of Canada.

Fellowship is a lifetime honor bestowed for notable contributions to the profession and now Michigan has 64 architects who have been so esteemed. All MSA members are invited to join in this veneration.

FIRM NEWS

On April first, two firms merged. Architectural Consortium added its strong commercial practice to Lansing's largest design firm, MJK Architects. The enlarged practice will continue to be at 520 Cherry Street in Lansing.

Michael J. Dul & Associates, Inc., a landscape architectural firm, has expanded and relocated to 212 Daines Street, Birmingham 48009, phone 313-644-3410.

Three firms have new addresses this month. They are:

- Ronald Mayotte & Associates 2525 Crooks Road #102 Troy, MI 48084
- Straub Associates 1133 East Maple #207 Troy, MI 48033

Giffels/Hoyem Basso of Troy has added several new staff members. They are:

- Daniel F. Christensen, LIT, is Vice President/Architecture and will work in Project Administration. He was a partner in Jason-Christensen Associates.
- Becky L. Lewis, U.O.D, joins the architectural design team. She is an Associate Director on the Detroit Chapter-AIA Board of Directors.
- Lawrence C. Hamilton is a project architect. He has an Associates Degree from Schoolcraft College.

CLASSIFIED

Growing practice in need of registered or graduate architect to assume partnership position in the near future. Must have diverse experience with emphasis on multi-family developments. Send resume and requested starting salary to Cato Architect, 1125 E. Milham Road, Kalamazoo, MI 49002.

ARCHITECTURAL DRAFTER - Position involving both completing sets of drawings and detail designs. Desire 5 years experience with an architectural firm. Please forward resume to McNamee, Porter & Seeley, 3131 S. State Street, Ann Arbor, MI 48104.

SPECIFICATIONS WRITER - Minimum of 5 years experience, must be familiar with AIA Master specifications and Government Guideline specifications, computer word processing experience. Salary commensurate with ability and experience. Contact Judy Crockett at 512-377-0700.

ARCHITECT/JOB CAPTAIN - DeWinter Associates of Grand Rapids is looking for a key individual to fill a position of leadership and responsibility in our medium sized firm. Candidates should have a "nuts and bolts" background and be capable of supervising the production of working drawings. We offer excellent salary, benefits and opportunity. Call Steve Fry for additional information at 616-774-2313, 8 a.m. to 5 p.m.

POSITION WANTED - Bachelor of Fine Arts in Interior Architecture from Wayne State, seeking employment in the architectural/interior design field. Contact Richard Cuscheri, 16728 Fielding, Detroit, MI 48219, 313-537-0279.

GRAPEVINE CLASSIFIED

ALBERT KOCANOWSKI, EVIE ASKEN, EARL FRAIZER, DICK SLOCUM, MARY MARGARET MUNSKI and ALMON DURKEE, AIA Director, all put a lot of time and effort into a four-part construction awareness seminar sponsored by the Kalamazoo County Chamber of Commerce...WAL added over $600 to their scholarship fund via their Meadowbrook fundraiser — good work...EDGAR TAFEL, architect and student of Frank Lloyd Wright, spoke in Detroit and Grand Rapids thanks to Steelcase...MARSHALL FREDERICKS of Royal Oak received the Medal of Honor from the National Sculpture Society...CAM elected Gary Robertson chairman and Robert Duross, James Ross and William Swasey to its board of directors...GUNNAR BIRKERTS & ASSOCIATES received an award from the City of Southfield for their design of the Haley Funeral Home and the American Library Association selected their University of Michigan Law Library for an Award of Excellence...PHILIP MEATH was honored by the Boy Scouts of America at the 9th Annual Luncheon...Have you noticed how much coverage architects have been getting recently in the press?
CALL TO GLORY

The American Institute of Steel construction is accepting entries for its 1985 architectural Awards of Excellence competition. All registered architects practicing in the United States are eligible. Buildings, old and new, must have a steel structural frame to be considered. It is not a requirement that the steel be exposed and part of the architectural expression.

DEADLINE: June 1, 1985
CONTACT: AISC, AAE Competition, 400 North Michigan Ave., Chicago 60611.

The Chain Link Fence Manufacturers Institute has established a Design Award for the innovative use of chain link fence in a construction project.

DEADLINE: June 1, 1985
CONTACT: Beryle Sweet, CLFMI Awards Committee, Page Wilson Corporation, Monessen, PA 15062.

The Arizona Historical Society, with funds from the National Endowment for the Arts, is sponsoring a design competition for a proposed $7.5 million complex for a new history museum. All U.S. registered architects are eligible.

The first prize is $10,000 and it is anticipated that a contract for the project will be negotiated with the winner. Four other prizes will be awarded including $5,000 to the second place winner.

DEADLINE: June 17, 1985

Builder magazine will accept projects completed between June 1, 1983 and June 1, 1985 for their Fifth Annual Builder's Choice Design and Planning Awards. There are twenty-two categories such as custom housing, remodeling and rehabilitation, commercial development and passive solar. Winners will be featured in the October issue of Builder magazine. There is a fee of $125 for each entry.

DEADLINE: June 21, 1985
CONTACT: Phone 202-737-0717 for registration forms.

The 1985 Gold in Architecture Award is given to the architect whose design best expresses the benefits of energy-saving gold coated glass.

Submissions to this international competition should include a site plan, interior and exterior photos and a statement about how gold coated glass helped to achieve the design objective.

DEADLINE: August 31, 1985

ARCHITECT AS CANDIDATE

In the time honored tradition of architect/politician, last observed in Thomas Jefferson, the AIA Government Affairs Committee is sponsoring a campaign school at the national convention on June 9th in San Francisco.

Campaigns and elections have become increasingly important to the architectural profession. Elected officials not only establish building codes and pass statutes of limitations, they also select architects for public projects. More and more architects are getting involved in the electoral process; both as candidates and as volunteers in the campaigns of others sympathetic to the natural and physical environment.

This three hour school will teach architects to be effective campaigners by using precinct organization, the media, direct mail and phone banks.

Contact David Duncan at 202-626-7519.

Thank you!
A single source of information on design solutions and products for making buildings accessible has finally been published. It is called "The System" and was developed by Ronald L. Mace, AIA, a leading specialist in design for disabled people. The cost of the two volume set is $229.95 and can be ordered from the Architect's Bookstore 313-965-4100.

BOOK REPORT

Frank Lloyd Wright is still making headlines even though he has been dead for over twenty-five years. Interest in the man and his architecture is high and the Architect's Bookstore is prepared to fulfill your quest for knowledge and insight about America's 'most famous' architect. There are seven works about Mr. Wright on the shelves.

Two of the books, "Letters to Architects" and "The Master Architect-Conversations With Frank Lloyd Wright," gives readers a chance to form their own impressions of him from his own words. He maintained a lively correspondence with other architects practicing throughout the world and these letters were selected by a Taliesin fellow and published for sale at $9.95. There are letters to and from Mies, Saarinen, Hood and of course Sullivan.

The other conversational style work, "The Master Architect" contains eighteen conversations with Mr. Wright in a time period from 1930-59. Twelve of them are previously unpublished including one from WGBH Boston that was part of a series called "The Creative Process." The old family album style photos are alone worth the price of $29.95.

"Man About Town—Frank Lloyd Wright in New York City" is a good read for psychologists. It is an analysis of Wright's love-hate relationship with the city and how this passion influenced his designs. This provocative essay is well worth its $15.00 cost.

"Drawings & Plans of FLW" is an expensive reproduction of the extremely rare first edition of the 1910 Wasmuth portfolio. It is not the real thing but $7.95 will buy a taste for the quality of this work. Dover Publications also copied Wasmuth's work in "The Early Work of FLW." This volume reproduces the 1911 edition and contains photos as well as drawings. Students of architecture should have them both.

Vacation bound architects should consider two other books from Dover, "The Robie House" and "Fallingwater." You can buy them when you visit the houses, but for under $8.00 each you can be an authority when you get there?

Call or write the Beaubien House and we will ship them right out to you.

TAX DEDUCTIONS

The costs associated with the removal of architectural barriers to handicapped and elderly persons are again tax deductible. Section 190 of the Tax code had expired in 1983 but was reinstated in the Tax Reform Act of 1984, P.L. 93-369. The maximum deduction was increased to $35,000 per year beginning after December 31, 1983 and before January 1, 1986.

Qualified expenses must be specifically attributable to the removal of existing architectural barriers and must meet the standards promulgated by the Secretaty of the Treasury.

The Department of Labor will be publishing a fact sheet in the next issue of the LABORRegister or contact Kathleen Jo Steele, Chief of the Barrier Free Design Division of the Department of Labor at 517-322-1191.

SPECIAL OFFER FOR NEW AIA FIRMS!

New AIA firms (including sole proprietors) may apply for coverage under the "AIA Group Plan for Firms" without health evidence, within 60 days of initially joining the AIA or within 60 days of firm establishment. A new AIA firm is one in which a principal, partner, officer, or owner of the firm becomes an AIA member for the first time (with no previous members in the firm).

The comprehensive package of coverage for the sole proprietor, small, and medium size firms includes Major Medical, Life, Disability and Accidental Death and Dismemberment insurance. In addition, a firm may also choose to have optional Dental/Orthodontia coverage and Short Term Disability coverage if desired. All this coverage is available to new AIA Firms without health evidence!

For the larger size firm with 100 or more employees, custom designed benefit packages and rate proposals are available.

For additional information concerning the AIA Insurance Trustees endorsed group life and health insurance program, contact Sue Esquibel at Association Administrators & Consultants, Inc., the AIA Benefit Insurance Trust Service Organization, 19000 MacArthur Boulevard, Suite 500, Irvine, California 92715. Their toll free telephone number is 1-800-854-0491.

AIA AWARD TO CRANBROOK

Cranbrook Academy of Art, co-founded and designed by Eliel Saarinen in 1932, has been singled out by the AIA for one of its 1985 Institute Honors. This award is given for a "distinguished achievement that enhances or influences the environment and the architectural profession."

The jury, chaired by Robert Geddes, FAIA, called it "the quintessential school of visual arts." The award will be presented at the National Convention in San Francisco, June 9-12.
