SPRING '75
Published by the Minnesota Society of Architects AIA
Crushed stone base is a better buy than sand and gravel. Or bituminous base. You can see why.

Sand and gravel is cheap, but you need about 1½ times more to do the same job. Even then, its quality may be inconsistent and it's unstable in bad weather.

With bituminous base, you need less, but it costs more. And it takes valuable petroleum that could be used elsewhere.

Choosing a flexible pavement base depends on many variables. Like supporting soil, projected weight and frequency of loads, grade of the area and job site location. Naturally, crushed stone won't be best every time.

But crushed stone is inexpensive, and it almost always outperforms both the other bases. Added to that, it's in abundant supply in Minnesota. If you want more than our word for it, see the telltale chart, opposite. Or ask for our list of satisfied customers.

Some members of the Minnesota Limestone Producers Association sell sand and gravel. But we sell more 100% crushed stone. It's a better buy.

*Based on lab tests and field performance.*
Four Facts:

1. Roll coated, 20-year warranted roofing & fascia metal.
2. Introduced in Minnesota 3 years ago, by Vincent Brass & Aluminum Company.
3. Over 2 million square feet have been specified and installed on buildings in this state.

4. THANK YOU!

Our thanks to architects and contractors in Minnesota for recognizing ColorKlad. We appreciate this support and trust our product is reciprocating this support through its many attractive and cost saving features. Roll-coated in any of eight beautiful colors. Easily worked by standard sheet metal techniques. Specify one sheet or thousands at a highly competitive cost. Color retention warranted, upon request, for twenty years.

Need we say more than just, THANKS!

Architecture Minnesota is the new bi-monthly magazine published by the Minnesota Society of Architects. It replaces the Northwest Architect which has been discontinued.

As the official publication of the Minnesota Society of Architects, it will provide news and comments of interest to all in the construction industry. It will project high professional standards of design and construction and feature stories about environmental issues as well as about new construction techniques and materials.

For a year's subscription to Architecture Minnesota, send $7.50 to Architecture Minnesota 7101 York Avenue So., Minneapolis 55435. For advertising rates and information about circulation, contact Al Duerr, Architecture Minnesota's Advertising Sales Manager, at the above address or by calling 612-835-6855.
9-YEAR-OLD SWIMMERS...42-YEAR-OLD POOL!

This pool at the College of St. Catherine in St. Paul's built in 1929. The beautiful and functional design of Ceramic Tile is the reason this 42-year-old pool is still in use. And it looks almost new — because color-fast Ceramic Tile won’t fade — even through four decades of 110,000 gallons of recirculating water. Ceramic Tile features easy maintenance — cleans with a damp mop or cloth. Resists stains and scratches. Used in many areas from lavatories and shower rooms to school corridors and classrooms. Ceramic Tile — the choice of architects, engineers and builders for thousands of years.

OLD AS HISTORY — MODERN AS TOMORROW

New diving and Olympic pools at Fairview Junior High School in Roseville, Minnesota, features Ceramic Tile Construction for easy maintenance and long life.

MINNESOTA CERAMIC TILE INDUSTRY
MINNESOTA ORCHESTRA HALL
ARCHITECT — Hamel Green and Abrahamson, Inc.
CONTRACTOR: Naugle-Leck, Inc.

Molin Concrete Products Co. is proud to have had a part in the construction of new Minnesota Orchestra Hall.

Approximately 68,000 sq. ft. of Hi-Stress Flexicore plank was used in this beautiful and functional building. The ceilings in the lobby were painted and left as an exposed ceiling.

Much of the Flexicore erection was done during the cold winter months without costly jobsite delays, which are often encountered by other methods of construction.

Call on our qualified, experienced staff for assistance when planning your next project.

SINCE 1897
NOW IS THE
TIME TO BUILD

We believe it is time to take positive action to revitalize our economic system: not only to heal and to rebuild our economy, but also to rebuild the human environments of our towns and cities.

Special emphasis should be placed on reviving and strengthening the nation's housing industry to provide homes for families with low and moderate income.

The Minnesota Society of Architects recently completed a review of 485 projects listed and bid on the Minneapolis and St. Paul Builders Exchange in the three months from January 1 to March 30. This review has lead us to the conclusion that now is the time to build. Several current conditions in the construction industry in Minnesota lead us to this conclusion:

1. In the last six-month reporting period in Minneapolis and St. Paul, the average overall price of steel increased only 2.65%, masonry products 2.4% and woodframe products 2.8%.

2. Keen competitiveness in bidding on construction projects exists as it never has in the last three or four years. In reviewing these 485 projects, the number of bidders per project is up significantly. Also it is apparent that many construction bids have been substantially below design cost estimates. In short, from an owner's standpoint, now is the time to build.

3. The F.W. Dodge Current Index Building Construction Costs showed an actual 5.5% increase in construction costs for Minneapolis/St. Paul from September 1, 1974 to March 1, 1975, a substantially lower figure than the 9% projection for the six-month period. In Fargo, building construction costs increased a modest 1.2% and Duluth 4.7% during the same six-month period.

4. Contributing to the encouraging cost picture is an ample and in some cases, over-supply of many materials which were difficult to obtain one year ago. These materials include asphalt, structural and plate steel as well as cement.

5. We realize that long term interest rates are not immediately linked to short term interest rates. However, there are many encouraging signs. From September until the current day, the prime interest rate has nationally declined from 12% to the 7% announced a few weeks ago by the National City Bank of New York. Hopefully, the long term interest rates will decline slightly.

As architects, one of our concerns is that clients receive the most value for their dollar. We can convincingly communicate that now is the opportune time to plan to build.

6. JOINT STATEMENT BY AFL-CIO AND THE AMERICAN INSTITUTE OF ARCHITECTS –

Sometimes, out of economic adversity, groups that have not worked as closely together as they should, do begin to work together. Such is the case with the Building and Construction Trades and the American Institute of Architects. In February, an historic joint statement was issued by the AFL-CIO and the AIA. I would like to briefly quote:

"While no segment of our economy has suffered more fall during the current economic crisis, we are confident that
the construction industry can and must lead the nation out of the recession and at the same time bring lasting public improvements to communities in every part of the country. We urge that among the actions taken that a special emphasis should be placed on reviving and strengthening the nation's housing industry to provide the needed decent homes for families of low and moderate income."

A broad new national effort should be initiated to improve the living environments of local communities. Federal monetary policies should be revised where appropriate to increase the availability of mortgage funds to the construction industry. Tax incentives should be immediately provided to owners to existing and new buildings to design and redesign their structures to make them more energy efficient.

Similar incentives should be provided for the renovation and remodeling of existing unused or underused buildings to enable their adaption for new and additional purposes, thus conserving energy and resources.

We view the prompt implementation of these programs as a vital first step, not only for the immediate economic relief of the industry and the nation, but also as a lasting contribution to improving the quality of our national life.

Due to the fact that South Dakota's economy is dominated by agribusiness, the general recession has not been felt as severely to date as in those states that have large, industrialized cities. Our 1974 State Legislature passed the largest appropriation in history for building construction of state-supported institutions. However, most of these projects are off the drawing boards and in construction-contract or early-building stage. With the economy in an uncertain condition, the 1975 Legislature was not as generous with appropriations as in 1974.

High interest rates, rising costs of construction and materials, and the Federal Government's elimination of the rent supplement program for the poor and elderly have all combined to discourage private and commercial developers in further building programs.

At the present time, a general feeling of uncertainty about the future is pre-
Ion Baltzer

valent among South Dakota’s architectural firms. A random survey indicates that the work load projected for 1975 is less than in 1974.

As for comments on the economy as regards the profession in our area:

First reactions: (1) I’m not fully informed to speak for the profession in an area such as the state or even the city in which I live and fortunately (2) I’m too busy to do it justice.

In regards to (2) above — that “I’m too busy” has come across in some different ways in my role as President of the North Dakota Chapter of AIA. North and South Dakota AIA Chapters are also merged in a group called Dakota States Architects and the “I’m too busy” has rung clear there too.

I’m not saying that people have not responded to assignments and tasks for AIA because they have. At functions where we get together and it would be possible to gather some data on “how everyone’s doing” many familiar faces (sources) were missing.

Edward Adams

There are of course people in every organization who “don’t have the time” but there aren’t always those who fall into the “I’m too busy” category. Sometimes offices or groups want you to believe they are busy when they aren’t and vice versa.

To this observer, with quite limited input, it would appear however that most established firms in our area are active and some are very active. Some have a backlog and are scheduled into 1975-76.

The concerns about the validity of estimates, the bidding market, delivery of required items, the hope for a margin, etc. continue as always.

Spring bid openings thus far have indicated good interest and response on all levels. Most jobs are awarded and a number of bids fall below the estimates.

The profession, unlike some cities in our area which have erected signs commenting on a recession, is aware of and I think prepared. The “I’m busy” is, however, a refreshing indication of stability in response to the doomsday disciples.

RESTORATIVE FACILITY
MINNESOTA VETERANS HOME LOCATION
S. C. SMILEY & ASSOCIATES: ARCHITECTS
The Minnesota Society of Architects represents architectural and design professionals employed by more than 200 firms and organizations throughout Minnesota. These organizations account for the design, planning and construction of hundreds of millions of dollars of new and rehabilitated facilities built to meet human needs while strengthening the economic and social fabric of the State of Minnesota.

Briefly stated, the Minnesota Society of Architects regards its major purposes or places top priority in five areas:
1) Legislative - Governmental Affairs
2) Education - Professional Development
3) Public Communication - Public Affairs
4) Professional Practice
5) Professional Society Affairs

Legislative - Governmental Affairs

To accomplish its many important programs, the society has over 30 committees with several hundred participating members. Examples of some of the high priority activities are legislative-governmental affairs in which over 50 architects participate in committees and sub-committees evaluating and reviewing legislative proposals. Many architects are also involved in committees conducting discussions and negotiations with governmental bodies. The Minnesota Society of Architects has been extensively involved with the formulation of building code amendments. It is also deeply involved with the public hearings being held on energy conservation regulations. Maintaining a regular and smooth relationship with governmental agencies throughout Minnesota constitutes one of its priority activities.

Education - Professional Development

The Society conducts extensive education and professional development programs for its members including a Young Practitioners series in which 110 individuals participated in a six-weeks course. It publishes regular bulletins and communications to its membership.

In addition monthly meetings are held of all of the chapters. It is extensively involved with encouraging information sharing among firms and of developing a close working relationship with other organizations within the construction industry.

Public Communication - Public Affairs

The Society publishes Architecture Minnesota, the official publication and the successor to Northwest Architect. We are extensively involved with public communication — public relations programs, including a Speakers Bureau and a regular newsletter to 300 members of the Minnesota news media. Currently we are publishing a bi-centennial architectural guide and initiating a major architectural exhibition with the University of Minnesota Art Gallery which will open in Dayton's Auditorium on February 16, 1976. Our Historic Resources Committee has been extremely active and provides technical assistance to many Minnesota communities. Numerous other public affairs programs are continually underway.

Professional Practice - Professional Society Affairs

Increasing the professional practice competencies of Minnesota firms has been another major effort of the MSA. There are innumerable committees studying and developing materials on special issues, such as Professional Liability Insurance and periodic professional practice reports. A Professional Practice Library is organized in the MSA office and is available to other organizations outside the architectural profession. Each year, the Minnesota Society of Architects sponsors the nation's largest architectural convention of which over 146 exhibitors and 2,500 attendees participate. In 1975 it is scheduled for October 22-24. Minnesota has also been extremely active in National AIA affairs.

The technical library is a lot like a law library. A cross section of data has to be both available and complete.

Acknowledging the demand for an overall technical data facility in Minnesota, MMI is building, and is continuing to build the number one source of data for all types of masonry construction.

The mechanics are simple. All you have to do is either pick up the phone or stop by for a visit. Office hours are 8 to 5 on week days. Complete conference room and film projection facilities are at your disposal.

If you have a question call MMI. If the answer isn't at our fingertips, we'll get it for you.

MSA MEMBERSHIP INFORMATION

The following may be of particular interest for prospective members as well as our present members. We welcome your interest, and urge you to read this information carefully. If you desire any further information please write or call:

Mrs. Mindy Leventhal
Executive Secretary
Minnesota Society of Architects
Suite 100, Northwestern National Bank Building
St. Paul, Minnesota 55101
612/227-0761

The Minnesota Society of Architects, the professional organization for the Architects, is one of the 164 representing all 50 states which are components of The American Institute of Architects. The Minnesota Society consists of approximately 600 members and has three Chapters, the Minneapolis Chapter, St. Paul Chapter and the Northeastern Minnesota Chapter. Southern Minnesota Architects are presently in the process of developing a Southern Minnesota organization but until this is finalized, they are members of either the St. Paul or Minneapolis Chapters. Through the Society’s committee activities and programs, architects seek to enhance the competency of the profession, to advance the standards of architectural education and practice, and to make the profession of ever increasing service to society.

There is a strong working relationship within the Society as can be evidenced by the success of our members’ participation in committee activities. At the present time, the Minnesota Society of Architects has approximately 30 working committees, most of which are involved with relevant issues of concern to architects and the society. Membership in the Minnesota Society of Architects at the Corporate, Professional Associate and Associate levels encourages your participation in these activities.

Corporate Membership

A Corporate member of the American Institute of Architects is the highest level of membership outside of Fellowship. To be eligible for Corporate membership the following are required: must be a United States legal resident, must declare willingness to abide by AIA’s Standards of Ethical Practice, must have an honorable standing in community and must be able to give names of five persons as references, three of whom shall be AIA members, must be licensed to practice architecture in one of the states.

Rights and privileges granted a Corporate member: may use the initials “AIA” or phrase, “Member of the American Institute of Architects,” as a suffix to name; shall be sent the AIA Journal, Memo and other regular mailing; shall be included on the AIA’s and chapter’s rolls; may serve on national and/or chapter committees; may hold national or chapter office; may speak, make motions and vote on matters at chapter meetings involving the affairs of the AIA and chapter; may serve as a delegate to the AIA’s annual meeting; receives discount on AIA documents.

Application blanks for Corporate membership can be obtained from the MSA office. When your application is completed an admission fee of $10.00 made payable to the AIA should accompany your application and be sent to the Secretary of the chapter for which you are making application.

As members of the AIA, Corporate members are subject to dues payment to the National AIA as well as the chapter and the MSA. Regular AIA dues for the first year are $30, $45 the second year, $60 the third year, $75 the fourth year, $96 the fifth and subsequent year. During the second year of membership Corporate members are also subject to AIA Supplemental Dues, which are 3.27% of FICA tax paid the previous year multiplied by member’s percentage of participation in his firm.

Chapter dues are $40 annually, with the exception of outstate members who pay between $15 and $25 annually, according to chapter for which member
CONSUMERISM AT HIGH TIDE

In times of economic dislocation, consumerism reaches high tide. Buyers are understandably concerned about values. They're more insistent than ever that dollars be used efficiently. And that insistence and concern applies to both private and public spending.

Consumerism certainly and properly extends to an industry as visible as construction. Which fact underscores the importance of letting separate bids for the Mechanical, Electrical and General Construction portions.

Separate bids result in better cost efficiency. So much so that more and more cities and states require separate bids and let separate contracts in all publicly financed building. The value received is unmistakable.

When happier economic days are here again, consumerism may ebb but it won't ever disappear. For that reason, architects and engineers will continue the valuable practice of letting prime construction component bids separately.

TWIN CITIES PIPING INDUSTRY ASSOCIATION
NATIONAL ASSOCIATION OF • PLUMBING • HEATING • COOLING CONTRACTORS
PIPING INDUSTRY DEVELOPMENT COUNCIL OF MINNEAPOLIS AND ST. PAUL
Professional Associate Membership

Professional Associate is the second category of membership in the Minnesota Society of Architects. This membership is primarily designed for licensed architects who cannot undertake the costs of National Membership. These members belong to the Minnesota Society of Architects and their respective chapter only and are not members of the American Institute of Architects. To qualify for Professional Associate membership one must be a United States legal resident, must declare willingness to abide by AIA’s Standards of Professional Practice, must have an honorable standing in community and must be able to give the names of two AIA members as sponsors, must reside or work in the jurisdiction of the chapter in which application is made, and must be licensed to practice architecture in one of the states.

Rights and privileges granted a Professional Associate member are the following: may serve as a member of any chapter committee as well as participate fully in state and chapter affairs.

Applications for Professional Associate membership are also available from the MSA office and should be filed, with a $5 admission fee, with the Secretary of the chapter for which application is being made. Chapter dues vary according to the chapter in which membership is made, Minneapolis Chapter $30 annually, $40 annual for the St. Paul Chapter, the fee is $15 annually for outstate members of both chapters, plus payment at the door for each dinner.

Dues for the Minnesota Society of Architects are $35 annually for both chapters, this cost includes subscription to Architecture Minnesota, all mailings, publications, etc.

Associate Membership

Associate membership is designed for members of the profession who are not licensed to practice architecture. Associate members, like Professional Associate members, are not members of the AIA. Eligibility and qualifications for Associate membership are: must be a United States legal resident, must declare willingness to abide by the Bylaws and rules of the chapter, must have an honorable standing in community and must be able to give the names of two chapter members as sponsors, must reside or work in the jurisdiction of the chapter in which application is made, must be a draftsman or technical employee in an architect’s office or, if engaged in other aspects of the profession, must be a graduate of a recognized school of architecture, and cannot be a licensed architect.

Rights and privileges granted an Associate member are similar to those granted a Professional Associate member.

Annual dues for the Minneapolis Chapter are $27.50, $35 for the St. Paul Chapter and $10 annually for outstate members of both chapters, plus payment at the door for each dinner. Minnesota Society of Architects dues are $20 annually, which also includes subscription to Architecture Minnesota, all mailings, publications, etc.

Applications for Associate membership are obtainable from the Minnesota Society of Architects’ office and should be filed with the Secretary of the chapter for which application is being made. A $5 admission fee is also required.

The above are the most common types of membership. Other classifications are as follows:
1. Student Associate
2. Fellowship
3. Membership Emeritus
4. AIA Associate Membership
5. Honorary Membership
6. Professional Affiliateship

Please contact the MSA Office for further details about these memberships.

QUESTIONS MOST FREQUENTLY ASKED

In which Membership Category should I apply?

If you are a registered architect and are practicing for yourself, or as a partner in a firm, you should apply for Corporate membership in the Institute.

If you are a registered architect who is employed by an architectural firm, or are engaged in architectural research, education, journalism or administration, you should apply as a Professional Associate or a Corporate.

If you are not legally registered as an architect, but are a graduate of a recognized architectural school, or a draftsman or technical employee of a firm, you should apply for Associate Membership.

Must I be a Professional Associate before becoming a Corporate Member?

No, you may join immediately as a Corporate if you qualify for that category.

How long may I remain a Professional Associate?

The Professional Associate category is considered to be an interim classification between Associate and Corporate membership. You remain a Professional Associate as long as you are a registered architect. If you remain a Professional Associate for not longer than 3 years at which time he must become a Corporate, unless given special waiver of this requirement by his respective chapter.

How much will it cost me to join the Minnesota Society of Architects?

The answer to this depends on the membership category; however, compared to the benefits received, it is always a nominal fee. For a complete schedule of dues refer to the dues structure printed previously.

May I use the initial “AIA?”

Only if you are a Corporate Member of the Institute. As a Professional Associate, you may use the term “Professional Associate of the Minnesota Society of Architects, AIA.” As an Associate member, you may use the term, “Associate of the Minnesota Society of Architects, AIA.” Neither one of these terms may be abbreviated in any way, nor may the first part appear in smaller letters than the rest of the term.

Does my Chapter Membership include a subscription to the “AIA” Journal?

All Corporate members automatically receive a subscription as part of their annual dues to The Institute. Professional Associate and Associate members may subscribe to the Journal by sending the $5 subscription fee direct to the magazine. All members do, however, receive regular copies of Architecture Minnesota published by the Minnesota Society of Architects.
The following are group insurance programs made available to the members of the Minnesota Society of Architects. These programs have been developed through the insurance committee and approved by the Board of Directors of the MSA and undergo periodic evaluation. Please contact directly: Gary Minder

Insurance Benefits for Members, spouses, and employees of Members. Through the Minnesota Society of Architects

**Life Insurance Plan** underwritten by the Washington National Insurance Company:

- All Members and full-time employees of Members can apply, through age 69.
- Term Insurance Coverage at low rates may be continued for life.
- Conversion to a permanent plan at any time after your term insurance is in force for 5 years without evidence of insurability.
- Waiver of future premiums if you become totally and permanently disabled for 180 consecutive days prior to age 60.
- Can apply for $10,000 Basic Life Insurance or for up to double the basic amount.
- Full range of settlement options available.
- New Members under age 35 eligible for Basic Life insurance without evidence of insurability within 60 days of membership date.

**Long Term Disability Plan** underwritten by Washington National Insurance Co.

- Scheduled benefits available in $121 increments ranging from $242 to $1,210 per month.
- A monthly income accrues commencing with the first day after accident disability and the eighth day after sickness disability (or first day in hospital, whichever is first).
- Benefits payable as result of accident for life; as result of sickness for 5 years. House confinement not required.
- Premiums are waived after 180 days of disability.

Partial disability benefit and non-disabling injury benefit provided in the plan. Pays $5,000 in event of accidental death or dismemberment.

**Major Medical Insurance** underwritten by Washington National Insurance Company:

- Pays 80% of eligible expenses in excess of the deductible.
- Maximum benefit per illness or injury of $25,000 prior to age 70, $12,500 age 70 or over.
- Choice of deductibles: $100, $250, $500, $1,000
- Provides benefits for expenses incurred in or out of the hospital.
- Benefit for any single claim extends for 3 years.
- New members under 35 may enroll in $500 Deductible plan without evidence of insurability within 60 days from membership date.
- Unmarried children can remain in plan to age 23 if enrolled as full-time students.
- After 1 child is insured under plan, all newborn children covered without additional premium and without evidence of insurability.

**Hospital Income Plan** underwritten by Washington National Insurance Company.

- Designed to supplement other hospital medical expense plans by paying Member cash for each day of hospital confinement of Member or covered dependent.
- Helps fill the "Protection Gap" — The very best disability income and hospital — medical plans cannot fully compensate for the financial loss of an extended hospital stay.
- Pays $750 of monthly hospital income for insured members and employees, $600 for covered spouses and $450 for each covered child.
- Pays monthly benefits for 15 months of hospital confinement per illness or injury.
- Monthly income benefits are tax-free. Coverage provided for pre-existing conditions for hospital confinement commencing at least 12 months after the effective date of the coverage.
- Members, dependent spouses, and employees, under age 64, may enroll.

DeVac thermo-barrier windows stop heat loss... cold.

With energy supplies decreasing and prices increasing, your school or administration building requires DeVac Thermo-Barrier aluminum replacement windows. DeVAC provides a full 2-inch insulating air space between glass panes. Heat transfer is less than half of ordinary single-glazed windows. Transmission of sound is also drastically cut. DeVAC measures, manufactures and installs. No tear-out of existing frames.

SPANCRETE ANNOUNCES

Tomax is a machine manufactured masonry wall panel utilizing standard concrete masonry units and mortar. It offers maximum design flexibility in conventional wall construction, and is suitable for low, medium and high-rise buildings.

Preconstructed at the plant, Tomax is delivered to the jobsite ready to assemble. No complicated drawings are necessary for installation because Tomax wall panels connect in accordance with standard masonry codes. Tomax offers other advantages, also. It's safe.

The fire rating is under standard masonry codes. It's economical. Up to eight or nine preconstructed Tomax wall panels can be installed per hour, reducing rising job-site labor costs.

Tomax is manufactured in sizes up to 12 feet by 24 feet, using standard size blocks in 6 inch, 8 inch and 10 inch by 12 inch widths.

For more information on the Tomax preconstructed wall panel, its uses and potential, call or write us. We'll be happy to give you the facts.

SPANCREE MIDWEST COMPANY
P.O. Box AA

A REMINDER...

... Work currently under construction may require temporary heating this winter.

Temp-Heat offers the following services...

* Examining temporary heating specifications and advising how they can be most economically met
* Estimating heating costs and helping you establish a winter heating schedule
* Providing assistance in locating and expediting gas service
* Providing the most economical size heater for a job when and where it is needed
* Providing routine inspection and 24 hr./day service assistance

We help make our customers more competitive.

Cronco-Lite Thermal Barrier Window Walls are an innovation in design and construction. There is no metal to metal contact between the interior and exterior, virtually eliminating frost and condensation with temperatures as low as -30°F.

The CTS Thermal Barrier Window Wall is unique in low rise window wall construction. It is comprised of aluminum face and gutter members internally joined and locked, but insulated from one another, by Cronco-Lite’s exclusive T-Blocks. The versatility of CTS allows face and gutter members to be interchanged, making it possible to create a large variety of architectural effects in glazing for either new building or remodeling. All sections will create a flush glaze effect even with insulated glass.
Coming in Architecture Minnesota

Every issue of the new ARCHITECTURE MINNESOTA will contain the following regular features:

Work in Progress: short items on projects presently in the planning or design stages.

Pro/Con: a topical issue discussed by two experts holding opposing views, e.g., domed stadium, mass transit.

Questions and Answers: typical questions about architecture and construction answered by professionals.

Architecture at a Glance: capsule news items about people, events, and buildings.

Profile: an in-depth profile story on an architect or personality of interest.

Column: Dan Sheridan, Executive Director of Minnesota Society of Architects

Editorial: opinion on current issues.

MAJOR FEATURES

May-June, 1975:

Architecture and Sculpture: 8 to 10 pages on art and architecture in the Twin Cities, from KTCA's film Gemini Variations I. Fountains in the urban environment.

Supergraphics, in and out of buildings.

Sculpture in the city.

Now is the time to build.

Profile on Ralph Rapson.

Complete testing services in:

soil mechanics, foundation engineering; construction materials; NDT and metallurgical analysis; chemical analysis.

ENGINEERING

FIELD INVESTIGATIONS

LABORATORY TESTS

Additional offices in:

Rochester Bismarck

Mankato Fargo

La Crosse Grand Forks

Eau Claire Minot

Waterloo Sioux Falls

Services also available through: Lakehead Testing Laboratory, Duluth
The Pioneer, in metal fabrication

PIONEER BUILDING, ST. PAUL. Prestige office structure, built in 1889. Problem: how best to enclose 16-story spiral staircase to meet current fire code, yet retain structure's highly unique openness and not destroy the past. Solution: low profile metal fabricated frame, using sizeable panels of fire resistant wire glass. Photo above clearly shows attainment of objectives.

TOLTZ, KING, DUVALL, ANDERSON & ASSOCIATES INC. ARCHITECTS/ENGINEERS. LOVERING ASSOCIATES, INC., CONTRACTORS. Metal fabrication and installation by Minnesota Fence & Iron Works, Inc.

here is a popular misconception: "Hardwood floors are hard to keep up." Not true. Interior Wood Products would like to change that myth with some information.

varnish is no longer the only way to finish a floor. Many modern floors are now finished with a penetrating seal. The finish is in the wood itself and since it is not hard, it will not scratch. This eliminates the costly refinishing task of stripping, sanding and varnishing. Whether applied at factory or on site, the hardwood floor finish of today is easily restored by a simple pour and mop application.

daily care is just as easy. As a simple rule of thumb: When it's time to vacuum a carpet, vacuum the hardwood. When it's time to shampoo a carpet, it's time to wax the hardwood floor. Now that's not difficult and it is more economic in time and material.

hardwood floors have a new appeal with a familiar warmth. Hardwood floors are becoming more popular so we invite you and your clients to visit our new showroom.

We'd like to show you species and finishes, designs and patterns from over 100 floors displayed for your use and reference.

Interior Wood Products will be glad to provide samples of wood, photographic reference on attractive installations, and detail on installation technique, budget and cost estimates. Come. Let us review what we are doing for others and what we can do for you.
Interest in plaster as a plastic formable material for contemporary design has, of late, assumed great proportions. Very few other architectural materials combine properties useful to the same extent as plaster; a medium practically unlimited in its versatility of design and color. Call Clint Fladland for further information about some of the newer materials, textures and techniques that offer new horizons of design, form and space. Job follow up and technical assistance, too.
