It is my sincerest wish that the year just closed has been a good one for the members and friends of the Missouri Association of Registered Architects. We look back at 1960 for reminders of pleasant relationships affecting our profession.

Several accomplishments were achieved during the past twelve months. They are listed in brief form elsewhere in these pages along with accomplishments of this Association since its beginning, March 23, 1951, ten years ago.

Our profession has come a long way in Missouri since that time. We expect architecture in Missouri to improve continually from now on. This Association must be instrumental in such progress.

As we enter 1961 we extend to all architects registered in Missouri, our advertisers and our friends, best wishes for success, satisfaction and happiness during the next twelve months.

Very sincerely,

John M. Hewitt
President
ARCHITECTS' DAY

April 29, 1961

Muehlebach Hotel

Kansas City, Missouri
EDITOR’S NOTES

For some time this magazine has been under the capable and thoughtful direction of John Sweeney. John has served as Editor officially and unofficially for more than three years.

When you consider the number of issues involved - four per year and on a deadline - you can appreciate the burdensome nature of the task. However, the improvement in substance and appearance of the magazine is ample evidence of the enthusiasm, of the effort and of the high concern and service rendered to the architects of Missouri. We wish to thank John for a job well done.

Concerning thanks to the retiring editor, this time of the year should be a time for considering the service rendered by practicing architects in the behalf of the architectural profession itself. I restrict this to architects without suggesting that there are not countless others who, it can be sincerely said, contribute to the profession of architecture.

Service to the profession can be for many and varied reasons. Some because they are dedicated, some because of a high sense of responsibility, some for self-aggrandizement, some for possible immediate or even future gain. No matter what the reason, the evidences of leadership and service should be recognized by the fellow practicing architect.

This recognition, I believe, could be simply a compliment on a job well done, or a letter of the same character. Who knows how many additional hours of work and meetings you may induce the recipient to undertake just because he feels that at least one person is aware of the work, and appreciates the efforts.

Congratulations and appreciation, though to someone not practicing architecture, is in order, we believe, to the new incoming Chief Executive, Governor John Dalton. We wish this, however, not only to the Governor, but to all the dedicated public servants of the State. May the

JANUARY, 1961
next years be successful and fruitful. The cooperation and assistance of the membership through its Board of Directors and officers is available without reservation.

LEGISLATION AND THE ARCHITECT

On August 20, 1960, the Directors of MARA approved a motion to introduce a Bill revising the qualifications for examination and registration of Architects. It reads as follows:

QUALIFICATIONS FOR REGISTRATION. After September 1, 1968, no person shall be eligible for registration as an architect except by examination. In addition, he shall furnish evidence that he is a citizen of the United States, is at least 25 years of age and is of good moral character.

QUALIFICATIONS FOR EXAMINATION. After September 1, 1968, no person shall be eligible for examination until he has satisfactorily completed as a resident student a course of study required for graduation from an accredited school of architecture. In addition he shall furnish evidence that he has a specific record of three years active experience in architectural work under the direct supervision of a registered architect.

In addition the minutes of the Inter-Professional Council meeting in Jefferson City on October 15, 1960, read in part as follows:

GRADUATION TO BE REQUIRED. Although this matter had previously been scheduled for long range legislative consideration, the Council unanimously recommended it for 1961 General-
al Assembly consideration. The recommendation specifies that effective 1968, to be qualified to take registration for architects or engineers, a person must have graduated with a baccalaureate degree in an accredited college-level curriculum, in architecture or engineering, whichever the case might be, and have "x" years of experience in the practice of architecture or engineering whichever the case might be. The number of years experience would be determined by the Registration Board.

The purpose of this legislation is not to create a privileged class but to do all we can to prepare ourselves so that we may serve the general public with greater competence and understanding.

Senator A.L. McCawley, counsel for MARA, is presently perfecting such a bill for presentation to the 1961 General Assembly.

The Officers and Directors of MARA welcome any thoughts the members of MARA may have on this subject.

********

SEE YOU
AT THE - - - -
ANNUAL MEETING
ARCHITECTS DAY
MUEHLEBACH HOTEL
APRIL 29, 1961
KANSAS CITY, MISSOURI

HOLD THIS DATE OPEN.

JANUARY, 1961
JUDGE BERNARD TOMSON
To Head Architect's Day Program

The feature personality and speaker for the Annual Architect's Day on April 29, 1961, in Kansas City, will be Judge Bernard Tomson. Mr. Tomson, a jurist, is also a feature writer in "Progressive Architecture". His column, "It's The Law", has for years reviewed and analyzed legal problems affecting the Architect. Judge Tomson in accepting the invitation, assured Chairman Maxwell Sandford of the Architect's Day Committee, that his remarks and participation in the program will not only be informational in concept, but also controversial. Judge Tomson referred particularly to the point that the Architect must assume leadership in the building industry, not only in legal decisions, but in all phases of the work.

In addition to Judge Tomson, the program will include on Friday evening, April 28, 1961, a tour of the new and beautiful Library and Board of Education building.

The next day on Saturday, April 29th, registration will continue followed by the annual business meeting. Following luncheon, the theme of the program "Project Programming and Translation" will be explored by two Architects, a client, a contractor, and Judge Tomson. This should prove to be a panel that will bring out some very choice and provocative comments.

The evening will include the fabulous cocktail party prior to the banquet featuring Judge Tomson's remark.

The Program Committee extends to every member an invitation to be with them on April 28th and 29th, 1961.

M.A.R.A. BOARD MEETING DATE

The next meeting of the Board of Directors and Officers is set for Saturday, February 11, 1961, at 11:00 A.M., in the Missouri Hotel in Jefferson City, Missouri.
BRIEF MINUTES

The following are thumbnail reports of action approved by the Board of Directors of M.A.R.A. in session December 10, 1960.

MEMBERSHIP CERTIFICATES. It was agreed that M.A.R.A. should print membership certificates suitable for framing and make them available to the membership at cost, about $1.00 each.

DUES WAIVED FOR MEMBERS 75 YEARS OF AGE. Annual membership dues will be waived for members who are 75 years of age or older. The only requirement is that the member will return his regular dues notice with a statement that he is 75 years of age or older.

CODE OF ETHICS. The official M.A.R.A. Code of Ethics, approved by the board of directors, October 8, 1960, was authorized for distribution to all registered architects in Missouri.

Editor’s Note - See pages 9 and 10 this issue.

1961 BUDGET. The 1961 M.A.R.A. budget was unanimously approved, as shown below:

<table>
<thead>
<tr>
<th>Item</th>
<th>Amount</th>
</tr>
</thead>
<tbody>
<tr>
<td>Clerical</td>
<td>$800.00</td>
</tr>
<tr>
<td>Printing</td>
<td>400.00</td>

</tr>
<tr>
<td>Architects Day</td>
<td>1000.00</td>
</tr>
<tr>
<td>Surplus</td>
<td>100.00</td>
</tr>
</tbody>
</table>

$4750.00

To achieve the 1961 budget it was unanimously agreed that M.A.R.A. faces a very tight 1961 financial situation that will be eased in 1962 by increasing 1962 M.A.R.A. dues to $10.00 per member.

Editor’s Note - See page 11 for Financial Summary.

JANUARY, 1961
ARCHITECTS DAY, APRIL 29, 1961. Plans for 1961 Architects Day were discussed. The program and financial responsibilities were approved. The annual meeting will be held Saturday, April 29, 1961, Hotel Muehlebach, Kansas City.

NEW STATE OFFICERS. It is agreed that letters should be written over the signature of M.A.R.A. president, John Hewitt, and mailed to the following state officials, who will assume their duties early in 1961: Governor of Missouri, John M. Dalton; Lieutenant Governor of Missouri, Hillary Bush; President Pro Tem, Missouri Senate, A.M. Spradling; Speaker of the House of Representatives, Thomas Graham. The letters have been mailed. They contain best wishes of M.A.R.A., an offer of cooperation of this Association, and Season's Greetings.

MISSOURI ARCHITECT. The official journal of M.A.R.A., the Missouri Architect, will be published regularly during 1961, issue dates being early in January, April, July, and October. The editor is Dave Pearce, vice-president of the Association. The editor solicits suggestions from members. It was agreed that the April issue will be the Directory Edition and will include a listing of all members who have paid 1961 dues on or before March 10, 1961.

TRIBUTE TO JOHN SWEENEY. Special tribute was unanimously given to John Sweeney, St. Louis, who has served M.A.R.A. faithfully in many areas with special reference to his serving as editor of the Missouri Architect during 1960. It was pointed out that the appearance and content of the Missouri Architect during 1960 was excellent.

PLAN NOW TO ATTEND
AMERICAN CONCRETE INSTITUTE
ANNUAL CONVENTION
FEBRUARY 20-23, 1961
CHASE-PARK PLAZA
ST. LOUIS

MISSOURI ARCHITECT
The profession of architecture calls for men of the highest integrity, judgment, business capacity, and artistic and technical ability. An Architect’s honesty of purpose must be above suspicion; he acts as professional adviser to his client and his advice must be unprejudiced; he is charged with the exercise of judicial functions as between client and contractors and must act with entire impartiality; he has moral responsibilities to his professional associates and subordinates; he is engaged in a profession which carries with it grave responsibility to the public. These duties and responsibilities cannot be properly discharged unless his motives, conduct and ability are such as to command respect and confidence.

Planning, technical guidance, advice and counsel constitute the service of the profession. Given in verbal, written or graphic form, they are rendered in order that buildings with their equipment and the areas about them, in addition to being well suited to their purposes, well planned for health, safety, efficient operation and economical maintenance, and soundly constructed of materials and by methods most appropriate and economical for their particular uses, shall also have beauty and distinction.

In order to promote the highest standards of conduct in the practice of architecture in Missouri, The Missouri Association of Registered Architects adopted the following basic principles for the guidance of the profession:

A. An Architect’s relation to his client depends upon good faith. Before undertaking any commission he should explain the exact nature and extent of his services, and of his compensation therefor. Where a fixed limit of cost is established in advance of design, the Architect must be given freedom in determining the character of design and construction needed to meet as nearly as feasible the cost limit established but should not be understood to guarantee the final cost which will be determined not only by the Architect’s solution of the owner’s fixed requirements but by the fluctuating conditions of the competitive construction market.

It is an important duty of the Architect to keep the owner informed, during the progress of the work, as to the probable cost of construction involved.

B. An Architect should consider the needs and stipulations of his client and the effect of his work upon the life and well being of the public.

C. An Architect may offer his services to anyone on the generally accepted basis of commission, fee, salary or royalty, as Architect, consultant, adviser, or assistant, provided that he rigidly maintains his professional integrity.

D. An Architect should not make use of services offered by manufacturers, suppliers of building materials, appliances and equipment, or contractors, which may be accompanied by an obligation detrimental to the best interest of the client.

E. An Architect’s drawings, specifications and other documents should be complete, definite and clear concerning his intentions, the scope of the contractor’s work, the materials and methods of construction to be used therefor, and the conditions under which the construction work is to be completed and paid for.

F. An Architect should guard equally the interests of the contractor as well as those of the client. The Architect will condemn workmanship and materials which are not in conformity with the contract documents, but it is also his duty to give every reasonable aid toward a complete understanding of those documents so that mistakes may be avoided. He will not call upon a contractor to make good omissions and errors in the contract documents.

G. An Architect in his investments and in his business relations outside of his profession must be free from financial
or personal interests which tend to weaken or discredit his standing as an unprejudiced and honest adviser, free to act in his client's best interests.

H. An Architect should promote the interests of his professional organizations and do his full part of the work of these organizations. He should share in the interchange of technical information and experience with the design professions and the building industry.

I. An Architect should inspire the loyal interest of his employees, providing suitable working conditions for them, requiring them to render competent and efficient services, and paying them adequate and just compensation therefor.

J. An Architect should endeavor to provide opportunity for the professional development of those who enter the profession, by assisting them to acquire a full understanding of the functions, duties and responsibilities of Architects.

K. An Architect should seek opportunities to be of constructive service in civic affairs, and to the best of his ability advance the safety, health and well-being of the community in which he resides.

L. Every Architect should do his part to forward justice, courtesy and sincerity in his profession. It is incumbent on him in the conduct of his practice to maintain a wholly professional attitude toward those he serves, toward those who assist him in his practice, toward his fellow Architects, and toward the members of other professions, and the practitioners of other arts. He should respect the distinction between professional practice and non-professional enterprise.

Note: The Board of Directors herewith acknowledges use of source material supplied by the American Institute of Architects in its official document entitled "Obligations of Good Practice".

NOTICE

Our April Issue will be the DIRECTORY EDITION. It will include an alphabetical listing of all names and addresses of registered architects who pay 1961 M.A.R.A. Dues ($5.00) prior to March 10, 1961. Make dues check payable to "M.A.R.A." and send it to: M.A.R.A., 210 Monroe Street, Jefferson City, Missouri.

ACCOMPLISHMENTS OF M.A.R.A. TO 1961

Sometimes we are requested to justify and to cite some positive reasons why the Missouri Association of Registered Architects is in existence or why we need the help of all registered architects, particularly the dues-paying type. The following, therefore, is a brief listing of some of the Association's accomplishments.

1. Together with the Missouri Society of Professional Engineers initiated introduction of legislation and assisted in securing passage of the Missouri Registration Law for Architects in 1941.

2. Successfully resisted legislative effort to repeal the Missouri Registration Law in three Legislative sessions since enactment of the original law. Maintains this vigilence in all Legislative sessions in Missouri and informs members of pending Legislation pertaining to Architecture and Construction.

3. Maintains study committee and works with M.S.P.E. in a legislative program to improve the Missouri Registration Law.

4. Reviews alleged legal and ethical infractions of the profession of architecture in Missouri. Has investigated cases and filed formal charges with the Registration Board. This work has resulted in suspension of Registration and consequent upgrading of professional aspects of architecture in this state and improving membership adherence to statutes and the M.A.R.A. Code of Ethics.

5. Sponsors Architects Day in Missouri, an annual meeting of Missouri architects whose purpose is an open forum for interchange of ideas pertaining to professional aspects of architecture.

7. Publishes Newsletters from time to time carrying official M.A.R.A. information direct to the membership.
8. Established a state headquarters in Missouri’s capitol in 1960 for expeditious handling of M.A.R.A. affairs.

9. Maintains a membership of about 500 architects registered in Missouri which is the overwhelming majority of those residing in Missouri. M.A.R.A. truly speaks for the profession of architecture in Missouri.

10. Has consistently maintained contact with officials of the State of Missouri in order to acquaint them with architecture and architects in the interest of maintaining continuing good will toward the profession.

MISSOURI ARCHITECT
DATES OF ARCHITECTURAL EXAMINATIONS

Four-day written examinations for registration as an architect will be given by the State Board of Registration for Architects and Professional Engineers at Jefferson City, Missouri,

MONDAY THROUGH THURSDAY, SEPTEMBER 25-28, 1961

Examinations for enrollment as an architect-in-training will be given on the first two days only.
Applicants wishing to take the examination at that time should file applications before July 25, 1961.
The earlier an application is filed the better - early filing insures early processing.
Application blanks may be secured by writing to the Board at the address below.
No sample questions are available.

Precast Haydite Concrete Speeds School Construction

These are Carter-Waters Precast Haydite Concrete arches going into place. They will be roofed with Carter-Waters Precast Haydite Concrete channel slabs. Interior surfaces will be painted and the exterior surfaces left exposed.

Lightweight Precast Haydite Concrete makes quick jobsite erection like this possible. Concrete made with Haydite aggregate weighs approximately one-third less than concrete of equal strength made with ordinary aggregates.

Carter-Waters Precast Haydite concrete members give the economy of long spans, fewer columns, more usable cubic footage, and low upkeep.

If you would like more information about Precast and Prestressed Haydite Concrete, call
