JANUARY 1964

ANNUAL WINTER MEETING
QUEEN CHARLOTTE HOTEL
CHARLOTTE
JANUARY 23, 24, 25
AMBASSADOR 300
HORIZONTAL.Rolling WINDOW

INSTALLATION

With our exclusive "applied track" the primary frame can be installed as construction progresses, with vents and fixed lites installed at a later date. This insures not only the protection of the finish of the vents, but eliminates costly jcb caused glass breakage.

Applied track is adjustable to compensate for "out of square" frame installation.

The polar bear is naturally insulated—with thick, close-growing fur that blocks out the shock of icy arctic waters, keeps him comfortable at 40° below.

SOLITE lightweight masonry units are naturally insulated, too. In Solite millions of tiny air cells block out cold in winter. Then go the polar bear one better: They block out heat in summer, too!

ceramic tile

mid-state tile co.
Ceramic tile by Mid-State is a basic consideration. Mid-State's colorful line allows you unlimited design possibilities, and the convenient Lexington plant and Charlotte warehouse mean fast, dependable service. Tile is ready for shipment and on the job site when you need it. This service and quality has made Mid-State one of the South's largest producers of ceramic tile. See our catalog in Sweets or write for your free copy today.
The entire membership has been saddened by the untimely death of our President, Art Jenkins, in December. Art was an energetic, hardworking president who gave freely of his time to the profession. As we begin a new year, it seems fitting to review some of the accomplishments of the Chapter under his leadership.

Most notable among these I think is the acquisition of the new Chapter Headquarters Building in Raleigh. This building, originally built in 1887 as part of the water works system in Raleigh has long been an historical landmark in that city. It was acquired by the Chapter from one of our most respected members, William Henley Deitrick, FAIA, who practiced architecture in the building for many years. The building which reaches 85 feet into the air, has been renamed the "AIA Tower". Steeped in history and closely associated with architecture through the years, it makes a fitting headquarters for the North Carolina Chapter.

In the Area of service to its members the most notable accomplishments of the Chapter last year were in the field of fees and contracts. Early in 1963 the Fees and Contracts Committee, chaired by James A. Stenhouse of Charlotte, negotiated a new contract form and fee schedule with the Department of Administration of the N. C. Bureau of Property Control. This represented the first real upgrading of these documents since 1953, a period of ten years.

Continuing its work this committee prepared a new Fee Schedule for all work which is designed to give the architect an adequate return with which to furnish the many complicated but necessary services that are required for modern buildings. This schedule was adopted unanimously by the membership at its October meeting and became effective January 1, 1964. A new Fee Schedule is being prepared by the committee and will be distributed to the membership in the near future.

In this same vein the Schools Committee headed by Owen Smith has developed a new Owner-Architect Agreement for use on public school work. This was done in a joint meeting with a committee from the Division of Superintendents of the North Carolina Education Association and has been designed to meet the needs of school boards as well as architects. These will be available shortly. Likewise, the Hospitals Committee under James C. Hemphill, Jr. is working with the Medical Care Commission on a new contract for hospital work. This, of necessity, is moving somewhat slower but will be completed in the near future.

Any summary of the year should mention the School Planning Conference held in Raleigh in October. This, of course, was planned by the Division of School Planning with the support of our Schools Committee. In talking with architects around the state, I have heard nothing but favorable comment on the conference.

All in all, it was a progressive and successful year for the Chapter and Art and his various committee chairmen did an outstanding job. I am looking forward to the same cooperation and hope that 1964 will be another banner year.

S. Scott Varner, Jr.
The 50th Annual Winter Meeting of the North Carolina Chapter of The American Institute of Architects gets underway on Thursday, January 23, at the Queen Charlotte Hotel in Charlotte. Scheduled to address the assembled architects is a distinguished group of men, as pictured on these pages. Thursday afternoon the Executive Committee of the Chapter meets and other NCAIA Committees will also hold meetings in the hotel.

This year, for the first time, The Carolinas' Chapter of The Producers' Council is undertaking an exhibition project in connection with the Winter Meeting. The group, under the sponsorship of the Chapter, has leased an exhibition hall at the hotel where booth space has been allotted to their members and to other manufacturers who indicated an interest in participating in the meeting. All social hours and coffee breaks during the meeting are to be held in this display area to give architects an opportunity to become acquainted with new materials and products on the market and to know the representatives.

Friday's activities will begin with a breakfast for the Executive Committee, Council and Section Presidents, members of the North Carolina Board of Architecture and guests of the Chapter.

Presiding at the opening business meeting of the Chapter on Friday morning will be President S. Scott Ferebee, Jr. Featured speaker at the morning session is Vincent G. Kling, FAIA, practicing architect of Philadelphia. Mr. Kling, whose office staff numbers 120, is well known throughout the country for his many award winning designs, as well as his contribution to the advancement of architectural standards throughout the United States. Mr. Kling's address will surely be a highlight of the meeting.

The Friday afternoon session will be devoted to developing the theme of "Criticism and Response" with a talk by Jim Lucas, Director of Public Relations for Herman Miller, Inc., entitled "The Personal Consequences of Architecture" and an address by Henry A. Millon, Assistant Professor of the History of Architecture and Architectural Design at Massachusetts Institute of Technology.
The Annual Banquet is to be held in the Ballroom of the hotel on Friday evening at 7:30. At this time announcement of the winners of the Tenth Honor Awards Program of the Chapter will be made. The jury for the awards program is Douglas Haskell, FAIA, Vincent G. Kling, FAIA, and Henry A. Millon. Charles M. Sappenfield, AIA, is chairman of the Committee. Presentation of the Third Annual Press Award will be made by William W. Dodge III, AIA, Chairman of the Chapter Public Relations Committee. Featured as banquet speaker is J. Roy Carroll, FAIA, President, The American Institute of Architects. Mr. Carroll, a partner in the Philadelphia architectural firm of Carroll, Grisdale & Van Alen, has been Assistant Professor of Design and Executive Chairman of the Design Staff of the University of Pennsylvania, President of the General Alumni Society of that University, President of the Philadelphia Chapter AIA which awarded him its Gold Medal in 1963, and first President of the Pennsylvania Society of Architects, also recipient of their Gold Medal for his service to the profession. Mr. Carroll's firm were architects for the Philadelphia International Airport, the Youth Study Center, the Philadelphia State Office Building (with the collaborating architects) and the new Law School Buildings at the University of Pennsylvania, among other notable buildings.

The featured speaker for Saturday morning's meeting is Douglas Haskell, FAIA, Editor of Architectural FORUM. Mr. Haskell has been engaged in architectural journalism since 1925 and holds a number of journalistic awards. He has served in an advisory capacity to government housing and planning agencies. Under his editorship, FORUM has paid special attention to problems of urban redevelopment and urban design.

W. E. Freeman, Jr., AIA, Director, South Atlantic Region, AIA, will report on Regional activities at the Saturday morning meeting. Twelve new Corporate Members and two new Associate Members will be inducted into the Chapter at this session.

During the three days of the meeting, special social events have been planned for the ladies during the day, hosted by the Ladies' Auxiliary of the Charlotte Section. A social hour and a dance will be held on Thursday and Friday evenings and coffee breaks are scheduled for the meetings. END

THE JANUARY 1964 SOUTHERN ARCHITECT
Mies Van Der Rohe needs no introduction to the readers of the Southern Architect. Nor do the editors need to contrive a reason for including his work in this issue. Reprinted from the November 1963 issue of the “Inland Architect” by permission of the Chicago Chapter, the American Institute of Architects.
MIES VAN DER ROHE

TWENTY FIVE YEARS OF WORK IN CHICAGO

INLAND ARCHITECT
CHICAGO CHAPTER

AMERICAN INSTITUTE OF ARCHITECTS

NOVEMBER 1963
TWENTY FIVE YEARS AGO MIES VAN DER ROHE CAME TO CHICAGO FROM BERLIN TO BE THE DIRECTOR OF THE DEPARTMENT OF ARCHITECTURE OF WHAT IS NOW THE ILLINOIS INSTITUTE OF TECHNOLOGY. AS OF THAT TIME THROUGH HIS COMPLETED WORKS, HIS THEORETICAL PROJECTS AND AS LAST DIRECTOR OF THE BAUHAUS HE HAD BECOME ONE OF THE VERY FEW EUROPEAN ARCHITECTS OF THE 1920'S AND '30'S WHOSE WORK HAS BECOME A MAJOR FORCE IN TODAY'S ARCHITECTURE AND ARCHITECTURAL EDUCATION.

IN THE PAST TWO AND A HALF DECADES MIES' STRUCTURES, THE MAJORITY OF WHICH ARE FORTUNATELY FOR US IN CHICAGO, HAVE INCREASINGLY DEMONSTRATED THOSE QUALITIES OF DIRECTNESS, CLARITY, EXPRESSION OF PRINCIPLE AND SENSUAL REFINEMENT WHICH DISTINGUISHES HIS ARCHITECTURE AND CHARACTERIZES HIS TEACHING.

INLAND ARCHITECT DEDICATES THIS ISSUE TO MIES' CHICAGO WORK WITH STATEMENTS FROM HIS WRITINGS AND PHOTOGRAPHS OF HIS BUILDINGS AND PROJECTS WHICH WERE SELECTED BY HIM.
ILLINOIS INSTITUTE OF TECHNOLOGY
"GREEK TEMPLES, ROMAN BASILICAS AND MEDIEVAL CATHEDRALS ARE SIGNIFICANT TO US AS CREATIONS OF A WHOLE EPOCH RATHER THAN AS WORKS OF INDIVIDUAL ARCHITECTS. WHO ASKS FOR THE NAMES OF THESE BUILDERS? OF WHAT SIGNIFICANCE ARE THE FORTUITOUS PERSONALITIES OF THEIR CREATORS? SUCH BUILDINGS ARE IMPERSONAL BY THEIR VERY NATURE. THEY ARE PURE EXPRESSIONS OF THEIR TIME. THEIR TRUE MEANING IS THAT THEY ARE SYMBOLS OF THEIR EPOCH.

ARCHITECTURE IS THE WILL OF THE EPOCH TRANSLATED INTO SPACE. UNTIL THIS SIMPLE TRUTH IS CLEARLY RECOGNIZED, THE NEW ARCHITECTURE WILL BE UNCERTAIN AND TENTATIVE. UNTIL THEN IT MUST REMAIN A CHAOS OF UNDIRECTED FORCES. THE QUESTION AS TO THE NATURE OF ARCHITECTURE IS OF DECISIVE IMPORTANCE. IT MUST BE UNDERSTOOD THAT ALL ARCHITECTURE IS BOUND UP WITH ITS OWN TIME, THAT IT CAN ONLY BE MANIFESTED IN LIVING TASKS AND IN THE MEDIUM OF ITS EPOCH. IN NO AGE HAS IT BEEN OTHERWISE."
"TEACHING AND WORKING HAVE CONVINCED ME, ABOVE ALL, OF THE NEED FOR CLARITY IN THOUGHT AND ACTION. WITHOUT CLARITY, THERE CAN BE NO UNDERSTANDING. AND WITHOUT UNDERSTANDING, THERE CAN BE NO DIRECTION—ONLY CONFUSION."

1960

FARNSWORTH HOUSE
"WE REFUSE TO RECOGNIZE PROBLEMS OF FORM, BUT ONLY PROBLEMS OF BUILDING.
"FORM IS NOT THE AIM OF OUR WORK, BUT ONLY THE RESULT.
"FORM, BY ITSELF, DOES NOT EXIST.
"FORM AS AN AIM IS FORMALISM: AND THAT WE REJECT."

1923
"NOTHING CAN EXPRESS THE AIM AND MEANING OF OUR WORK BETTER THAN THE PROFOUND WORDS OF ST. AUGUSTINE: 'BEAUTY IS THE SPLENDOR OF TRUTH'."

1938

"I BELIEVE, THAT ARCHITECTURE HAS LITTLE OR NOTHING TO DO WITH THE INVENTION OF INTERESTING FORMS, OR WITH PERSONAL WHIMS. I BELIEVE ARCHITECTURE BELONGS TO THE EPOCH, NOT TO THE INDIVIDUAL; THAT AT ITS BEST, IT TOUCHES AND EXPRESSES THE VERY INNERMOST STRUCTURE OF THE CIVILIZATION FROM WHICH IT SPRINGS."

1963

HEDRICH—BLESSING PHOTOGRAPHS
UNLESS NOTED OTHERWISE
concrete masonry:
the polygamous building material

POLYGAMOUS: 1. Of, pertaining to, or characterized by polygamy. 2. The state of having more than one mate.

Modern concrete masonry is, without question, the truly polygamous building material. It has been happily married to nearly every major architectural material available: glass, wood, steel, aluminum, marble, cork, veneered paneling, ceiling textures and interior finishing of all descriptions. In the hands of contemporary designers, the new concrete masonry has become the most versatile building material in use.

Can a perplexed designer find happiness with his building materials? Just pick up your phone and call your concrete masonry man. He'll show you how.

P.S. And make sure he's a member of the North Carolina Concrete Masonry Association. That membership is your guarantee of high standards of production and quality.

Aluminum Siding

New and lasting beauty plus freedom from maintenance with special Dura-Cote Aluminum siding by Binning’s, Inc.

- Available in both vertical and horizontal designs.
- Easily installed.
- Covers any surface—frame, brick, block, stucco, or shingle.
- Dirt washes off baked acrylic finish easily.
- Panels are of super strength alloy for greater durability.
- Can’t rust, corrode, warp, rot, or split.
- Termite proof.
- Chemical pre-treatment provides permanent paint bond.
- Choice of white and six beautiful colors.
- Interlocking panels keep out elements, conceals all nail heads.
- Full 12½ foot lengths mean fewer joints, more beautiful job.
- FHA approved.
- Insulating backer-board available.
- Reduces heating and air conditioning cost.

Architects and contractors throughout the Carolinas are benefitting from Binning’s extensive line, prompt delivery by trucks from the Binning’s fleet, Binning’s engineering know-how, and quality products at competitive prices. For more information about Aluminum Siding and other aluminum building products, contact Binning’s, Inc., today! Telephone 246-5131.

PLANS FOR AIA 1964 NATIONAL CONVENTION

The 1964 national convention of the American Institute of Architects will be held in St. Louis, Mo. at the Chase-Park Plaza Hotel from June 14 through June 18.

The theme of this convention was recently announced by the president of the Institute, J. Roy Carroll, Jr., FAIA.

Divided into three major sessions, the theme will be covered in the following manner:

"The Invisible City," which will include urban psychology, sociology, law, history, culture, family and religion.

"The City and the Body Politic," which will include planning, zoning, renewal, pollution control, transportation, taxation and economics.

"The Visible City," which will discuss the visual aspects and the realm of the architect.

The dedication of the Jefferson Memorial Arch, designed by the late Eero Saarinen, is anticipated to take place at the time of the convention.

The AIA Convention will be the first major convention in St. Louis during the city's bicentennial celebration.

TRUSTEE UNDER THE WILL
OF NAPOLEON EUGENE LEBRUN,
AWARDS EVERY SECOND YEAR A STIPEND OF $3,000 FOR TRAVEL OUTSIDE THE U. S. FOR THE STUDY OF ARCHITECTURE.

Qualifications:
U. S. citizenship and residence
Age 23 through 30 years
Architectural office experience of least 1 1/2 years
Beneficiary of no other traveling scholarship
Nomination by a Corporate member of the AIA

Subject of Competition:
A SUMMER COLONY FOR VISUAL ARTS

Program available January 15 — Rendu March 7, 1964

Request for Nomination forms now being received by
CHAIRMAN, LeBRUN COMMITTEE,
NEW YORK CHAPTER, AIA
115 EAST 40th STREET
NEW YORK 16, NEW YORK
FOREIGNERS TO CORRESPOND ABOUT ARCHITECTURE WITH AMERICANS

Americans who are interested in architecture will be able to correspond with people with the same interests in other parts of the world as part of the largest international "pen pal" project ever conducted.

Called the "International Penfriend Program", the project's goal is to promote a better understanding among peoples of the world through person to person correspondence. A million or more persons of all nations are expected to be matched by electronic computer in the next two years.

The project will be conducted by The Parker Pen Company at its Pavilion at the New York World's Fair, which opens April 22. The theme of the Pavilion is "Peace through Understanding through Writing".

Visitors to the World's Fair will be able to sign up for the Program at the Parker Pavilion and immediately receive from the firm's computer, the name and address of their overseas' Penfriend.

Names to be fed into the computer for matching at the Fair currently are being gathered throughout the world by Parker affiliates. Registrants can select the language in which they wish to correspond, the area of the world to which they desire to write, and can choose from 389 specific subjects of interest about which they would like to write.

These include 28 categories under the arts, 13 specific "collecting" interests, 28 different crafts, 10 nature subjects, 84 vocations, and 50 miscellaneous interests, among them baby care, existentialism, retirement and taxes.

Architecture and real estate are two of the 85 vocations included among the 389 special interest categories. Many correspondents are expected to write about their homes or to describe the architecture in their own areas.

A visitor to the Parker Pavilion will be invited to provide similar information on himself, selecting his own personal interest from the list. This information, fed into the computer, will instantly produce the name and address of a person in another country who is just about his "double", in terms of age and interest. On a form provided by the computer, he will be encouraged to write his first letter at the Pavilion.

The Parker Pavilion at the Fair is located on the Promenade of Industry along the eastern side of the Pool of Industry. Information on the program and registration forms can be obtained by writing to The Parker Pen Company, Jonesville, Wisconsin.

ACOUSTICAL PLASTIC: for the lowest cost fireproof acoustical ceilings, old or new construction, .65 sound reduction at half inch thickness.
HOME INSULATION: for attics and walls; harmless, efficient.

ZONOLITE COMPANY

J. D. Wilkins Co.
Architectural Metal
W. Lee St. at Glenwood Ave.
Greensboro, N.C.
An award-winning Horizon Home for Durham shows how to make the most of modern concrete

Architect: Frank A. DePasquale of Carr, Harrison, Pruden & DePasquale, Associate Architects, AIA.
Builder: Herndon Building Company.

Architect DePasquale chose concrete masonry — gleaming white and rough textured — to achieve a special elegance and grace in this attractive home in Colony Park. It is the winner of the Southeastern regional award for excellence of design in the 1963 Horizon Homes Program.

The Horizon Homes Program is sponsored each year by the concrete industries to provide recognition for outstanding architects and builders — and to provide dramatic examples of how modern concrete is helping to create a new concept in design and livability.

No other basic building material is so versatile. Concrete offers the home designer new freedom of expression, brings charm and comfort to modern living.

PORTLAND CEMENT ASSOCIATION
1401 State Planters Bank Building
Richmond, Virginia 23219

An organization to improve and extend the uses of concrete.
How up-to-date are you on this newest trend in floors??

The modern brick floor is the result of important new developments offering ease and economy of installation plus the beauty of warmth, color and texture. And the MODERN BRICK FLOOR is so remarkably practical ... with so many imaginative applications. Use our free advisory service or contact your brick supplier for details.
