# Building a new branch office?

## Build it better with First Family Brick

Building, re-modeling or simply adding-on . . . be sure to call for *first family* brick. The exclusive blend of clays found in *first family* brick assures your branch of new strength, unique and lasting beauty — the look of “home office” quality. Build

it better — build it right . . . with *first family* brick.

Brick from Boren, Kendrick, Broad River. Crafted with pride, fired with beauty.

# Emphasizing the quality of excellence ...this all-concrete school was designed as a complete instructional vehicle

The attractive new Archer Elementary School provides more-than-adequate facilities for students to work alone, for small groups to work together, and for larger groups to mingle as part of the instructional program.

This high degree of flexibility—so vital in a day of ever-changing patterns of enrollment—was accomplished without sacrifice of economic considerations. The per square foot cost of the entire structure was just \$9.66.

The basic requirements for today's schools—economy, flexibility and beauty—were attained by a total use of modern concrete, from the precast, prestressed roof

system to the insulated slab-on-grade floor. Reinforced concrete frames are used throughout the classroom areas while exterior walls are of white concrete brick backed up by concrete masonry. Interior partitions are also of concrete brick or block. Heavy-traffic areas feature terrazzo floors.

Communities everywhere are finding that concrete ideally meets the requirements for modern education structures. Your community can, too.

# our best salesman

Our best salesman is our product, ceramic tile. Leading architects and contractors have learned that Mid-State's quality is superb. This line is extensive with the needed shapes, sizes, colors and designs. Equally important is Mid-State Tile Company's dependable service. Your order is filled from a planned inventory and on the job site when you need it. To learn more about Mid-State's beautiful, practical, ceramic tile, see our catalog in Sweet's or write for your free copy. Even better, request that our representative come calling with "our best salesman."

## THREE BUDGET HOUSES

It is a common misconception with a large number of potential clients that an architect is not interested in designing for the modest budget. The three houses illustrated here were all designed with this consideration as a point of departure, all take advantage of a compact square plan with the minimum of exterior wall and roof area and a minimum of circulation.

## RESIDENCE OF DR. & MRS. GUSTIN F. KIFFNEY

chapel hill

architect

**ARTHUR R. COGSWELL, JR., AIA**

chapel hill

general contractor

Edward Mann Construction Co.

chapel hill

Total square footage: 3,000

Cost per square foot: \$10.90

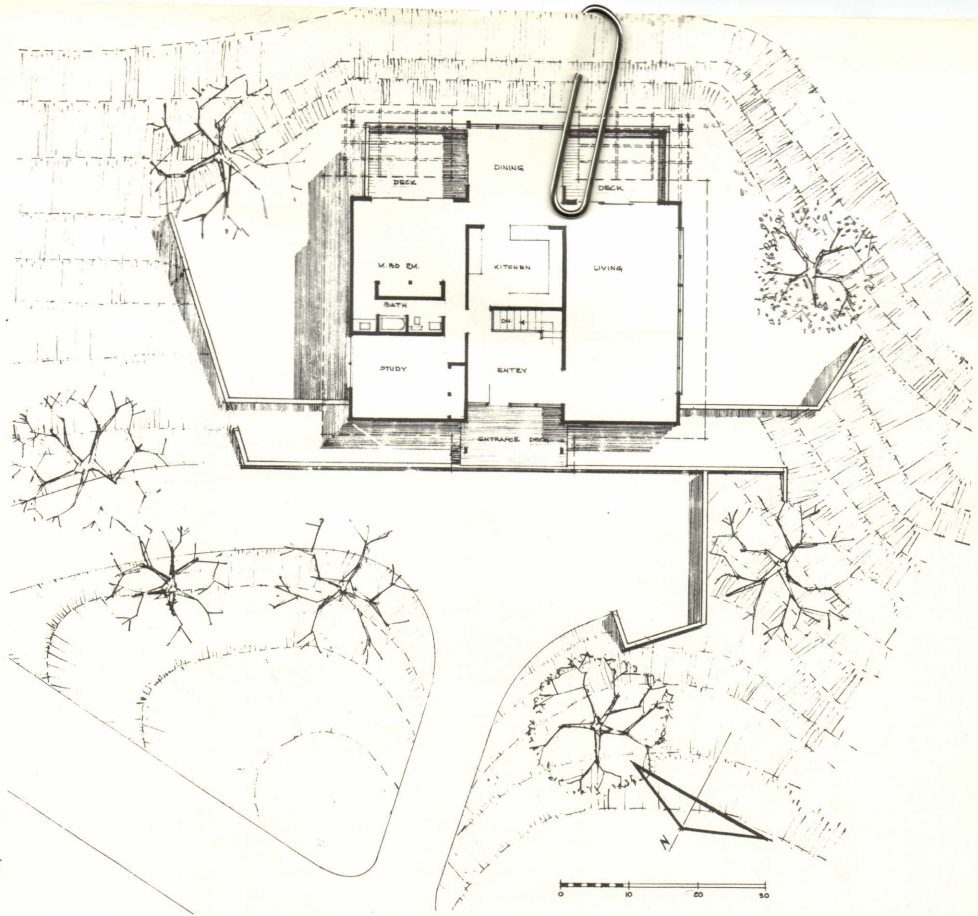

This compact structure was designed to provide, within stringent budget limitations, a plan that would give maximum privacy to a family of seven. The five children range in age from 12 to 4 and a major requirement was provision of a bedroom for each in such a way that privacy for the parents was assured.

As will be seen in the plan, children occupy the lower floor and have outdoor access from the playroom around which their bedrooms are arranged.

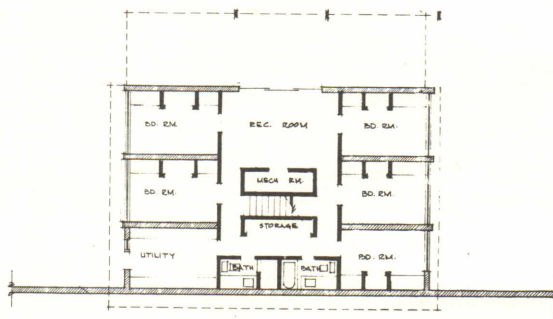

The very steep lot was terraced for driveway access, and the upper floor is the entry level.

The lower level is of common flashed brick and supports an upper floor of wood frame. Exterior siding is rough sawn red cedar and beams are rough pine.

## **RESIDENCE OF DR. & MRS. LOUIS DE ALESSI**

durham

architect

**BRIAN SHAWCROFT, AIA, ARIBA**

raleigh

general contractor

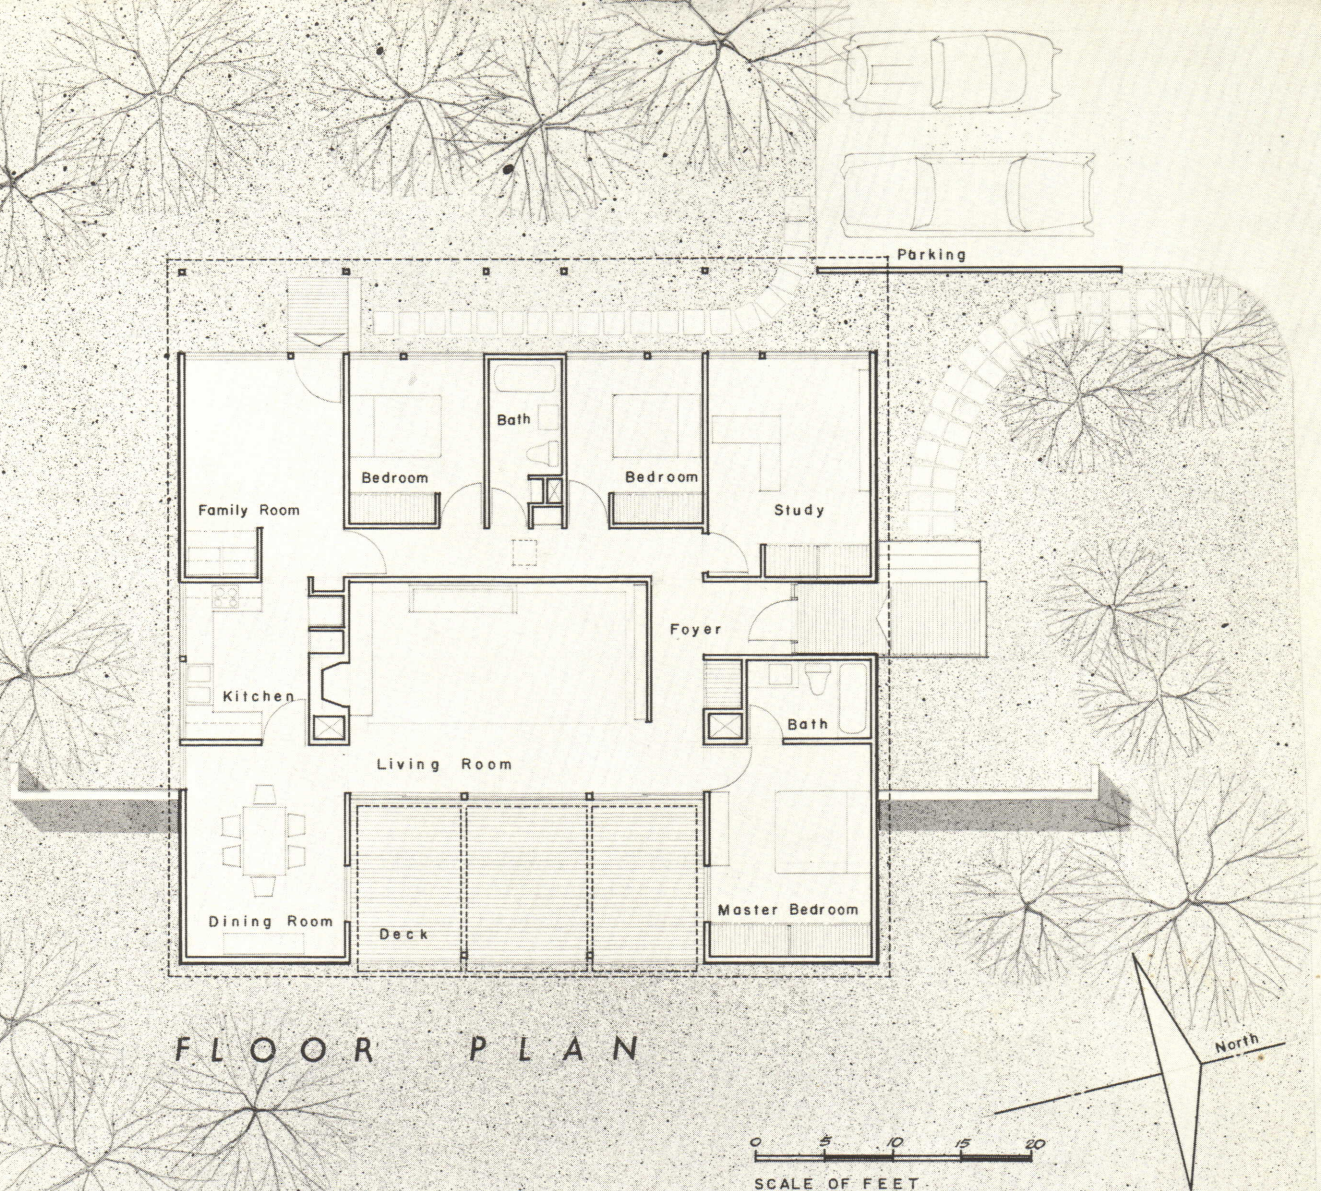

C. S. Witt, Durham

Total square footage: 1,850

Deck 300

Cost per square foot: \$10.75

The site, a rather narrow but deep wooded lot sloping up from the street affords one good view through the trees towards the road to East. The problem was to gain this aspect from the house without the loss of privacy from the street and to screen the car parking from both the main entrance and street. A square plan was adopted to give maximum floor space on one level raised above the site in order that the inset deck cuts off the view from the street to the central living room lit from the deck.

This allows the use of the entire living room and deck area to be experienced as one space, divided only by

sliding glass doors. The views to the North, South and West have been controlled by the retention of trees and further planting is planned due to the unsightly adjacent properties.

The bedrooms and other rooms in the house are of modest dimensions with the circulation being kept to the minimum, a function of the square plan, the space under the house is used for storage and mechanical equipment.

The entire living space is air-conditioned from a central unit, the construction is of traditional wood framing with windows built to Architect's details.

## MACON SMITH NAMED 1966 NCAIA PRESIDENT

MACON S. SMITH, AIA

Raleigh architect Macon S. Smith, AIA, partner in the firm of F. Carter Williams, Architects, was elected as 1966 President of the North Carolina Chapter of The American Institute of Architects. Mr. Smith's election came during the Annual Fall Meeting of the North Carolina Chapter of AIA held at the Mid Pines Club, Southern Pines, on Saturday, October 23. Mr. Smith will assume presidency of the Chapter on January 1, replacing retiring President Leslie N. Boney, Jr., AIA, of Wilmington.

Other officers and directors elected at the meeting were: James C. Hemphill, Jr., AIA, of Charlotte, First Vice President and President-elect; J. Hyatt Hammond, AIA, Asheboro, Vice President; W. Stewart Rogers, AIA, Asheville, Vice President; B. Atwood Skinner, Jr., AIA, Wilson, Vice President; Robert W. Carr, AIA, Durham, Secretary; and Richard L. Rice, AIA, Raleigh, re-elected as Treasurer.

Directors elected to serve for two years were: Leslie N. Boney, Jr., AIA, Wilmington; Joseph N. Boaz, AIA, Raleigh; Beemer Harrell, AIA, Hickory; J. Norman Pease, Jr., AIA, Charlotte.

Directors who will serve for one year are: Thomas T. Hayes, Jr., AIA, Southern Pines; S. Scott Ferebee, Jr., AIA, Charlotte; Ralph W. Crump, AIA, Winston-Salem; and Thomas P. Turner, Jr., AIA, Charlotte.

Luncheon speaker for the meeting was Robert J. Piper, AIA, Architect and Planner, of Washington, D. C., and a member of the staff of The American Institute of Architects. Subject of Mr. Piper's talk was "Our Profession's Response to Contemporary Demands". Special guest of the Chapter was Bernard B. Rothschild, AIA, of Atlanta, Georgia, Regional Director of the South Atlantic Region of AIA.

Incoming President Smith is a 1941 graduate of the School of Design, North Carolina State University. He is married to the former Jeanette Williams of Decatur, Georgia, and they have two children, Stephen, 15, and Patricia, 13.

Approximately 100 architects and their wives attended the one-day meeting.

## NCAIA OFFICERS AND DIRECTORS 1966

### SOUTH ATLANTIC REGIONAL DIRECTOR

Bernard B. Rothschild, AIA, of Atlanta, Georgia, partner in the firm of Finch, Alexander, Barnes, Rothschild & Paschal, was named for a three year term as Regional Director of the South Atlantic Region of AIA at the Annual Meeting of The American Institute of Architects held in June. Since June Mr. Rothschild has attended the two Chapter meetings and one meeting of the East Carolina Council of Architects.

## New Scholarships Announced

Two architectural scholarships for the Fall of 1966 at the School of Design of N. C. State University. That was the announcement made by A. L. Haskins, president of the North Carolina Architectural Foundation at the October meeting of the North Carolina Chapter of A.I.A. at Southern Pines. This is something the architects of North Carolina have wanted to do for a long time and they expressed the hope that this was just a starter. They are concerned for the talented young men and women of our State and want to be of help where help is needed and justified.

The two scholarships will be available to the deserving junior or senior architectural student next fall at the School of Design. Final selection will be made by the Directors of the Foundation and announcements of recipients will be made next Spring on the basis of information furnished as to scholarship and need. Those desiring to be considered should file their name with Dean Henry L. Kamphoefner or with Mrs. Betty Silver, Executive Secretary of N. C. AIA.

These scholarships have been made possible by the contributions of those individual architects of North Carolina who are seriously concerned for the future of the profession in this State, and by friends of deceased members of N. C. A.I.A. The North Carolina Architectural Foundation will gladly accept contributions or bequests from members of the profession or the public and will administer such funds for scholarships and other architectural educational needs as may be requested. No gift is too small to help in the continuation of this program in other years and donations of larger amounts may be

made by individuals, offices or organizations to establish through the Foundation annual scholarships for the young men and women of North Carolina. The North Carolina Architectural Foundation, Inc. was chartered in December of 1963 by former presidents of the North Carolina Chapter of American Institute of Architects. The present directors are: A. L. Haskins, Jr., president; Richard L. Rice, secretary; Leslie N. Boney, Jr., Robert L. Clemmer, S. Scott Ferebee, Jr., A. G. Odell, Jr., F. Carter Williams; and Mrs. Betty W. Silver, executive secretary. Offices are in the A.I.A. Tower Building, 115 W. Morgan Street, Raleigh, North Carolina.

### GOVERNOR APPOINTS NEW BUILDING CODE COUNCIL

Governor Dan Moore named on Thursday, November 4th, the following persons to the North Carolina Building Code Council: J. J. Barnes of Fayetteville, reappointed to a term expiring July 31, 1971.

New appointments were: Clinton B. Galphin of Raleigh replacing Richard F. Booth of Raleigh; John V. Fox, Jr. of Greensboro replacing the late Rodney B. Breece of Wilmington; Harold C. Shirley of Monroe replacing Jack Covington, Winston-Salem who resigned; W. H. Gardner, Jr. of Durham replacing H. B. Foster of Greensboro who resigned; and Jack Baber of Asheville replacing James A. Stenhouse of Charlotte who resigned.

The terms of Galphin and Fox expire July 31, 1971; Shirley and Gardner will serve until July 31, 1967; and Baber's term runs until July 31, 1969.

Mr. Baber is a member of the North Carolina Chapter of The American Institute of Architects and has recently served as a Director of the Chapter.

## BRICKLAYING CONTEST HELD AT STATE FAIR

Robert Larry Throneburg of Hickory is North Carolina's "Champion Apprentice Bricklayer of 1965." Throneburg won a \$200 bond, an engraved trophy, and the championship title in a field of 44 apprentice contestants who matched their skills in the annual contest held at the State Fair October 11th. Throneburg has been training on the job as a bricklayer apprentice for the past 15 months. Hickory Construction Company is Throneburg's employer.

The North Carolina Chapter AIA is a regular sponsor of the contest. Representing the Chapter and serving as a judge for the occasion was Herbert P. McKim, AIA, of Wilmington, Chairman of the NCAIA Public Relations Committee. Mr. McKim will present certificates to Throneburg and the Hickory Construction Company at special ceremonies to be held in Charlotte this month.

**Positions Open for Architects** — The Division of School Planning, North Carolina Department of Public Instruction, has vacancies in its architectural positions. It will accept applications from capable architects who are interested in a career position or in working for approximately two years or more. Write, call, or see Dr. J. L. Pierce, Director, Division of School Planning, N. C. Department of Public Instruction, Education Building, Raleigh, N. C. Phone (area code 919) 829-3707.

## Our Customers said "Look Pretty Please!" So we did with the New Flush Imperial Door

New IMPERIAL Doors are available now in two models—the "Windsor" Series 638, 1 1/4" thick, and the "Barclay" Series 634, 1 1/4" thick. Both feature full flush design, easily adaptable to any glass or louver treatment, integral hinge reinforcement, integral lock reinforcement, and integral fully welded perimeter channel.

Handsome is as handsome does, and this new-as-this-hour design is flush, smooth—not a seam to be seen. Adaptable to every interior, new IMPERIAL comes with a glass frame section including a snap in glazing bead for easy conversion to any glass treatments. A wide variety of louver treatments are possible. (Means that every IMPERIAL Door in stock can answer many, many requirements.) And, for more savings, IMPERIAL is *reversible*—no "handing." No trouble to hang square, IMPERIAL will *stay* square because it's made of heavy gage steel with a complete perimeter channel fully welded—no sag, bind, warp, or split, ever. Rust-inhibited, all surfaces are five-step phosphatized—and IMPERIAL is preprimed so you're not delayed by paint preparation. We prepackage the doors to protect these surfaces, thus you can be sure every one is ready when you need it. Need doors right now? Ask for IMPERIAL, the finest door made today. We'll deliver immediately, out of complete stocks waiting in our network of warehouses.

■ **MANUFACTURING DIVISION
