Here the Wolfpack howls

Carter Stadium
North Carolina State University, Raleigh

Saturdays in autumn . . . white concrete stands draped with brilliantly colored pennants, fans, bands, cheerleaders . . . tension mounts in Carter Stadium, new lair for the Wolfpack of N. C. State University . . . then a surge of released energy as opposing squads charge out of Finley Fieldhouse, ready for combat.

TV and movie cameras catch the action from 125 feet up. Below, some 41,000 victims of football fever rise and fall with their hopes in a sweeping structure built of Solite lightweight concrete.

Completed in one year, Carter Stadium achieved considerable economies in time, labor, and erection costs through the use of Solite lightweight aggregates. Reduction in dead load was vital to the soaring look of the upper stands.

Dramatic as a last-minute touchdown, Carter Stadium illustrates architectural vision and ingenuity at work with modern materials.

Contractor
T. A. Loving Co.
Romaldo Giurgola, AIA, Chairman, Division of Architecture, Columbia University, announced the seven winners of the 14th Annual North Carolina Honor Awards Program on Friday, February 9.

The architecture awarded was selected from 54 entries of which three are Honor Awards and four are Awards of Merit. The criteria for the selection were based on searching for the best contribution to architecture, achieved with clarity, skill, and economy of means appropriate to the task at hand.

The North Carolina Chapter of The American Institute of Architects proudly presents these projects which represent the work of some of our well known architects and some bright new ones.

This Honor Award Program seeks, as did the earlier ones since the beginning of the program in 1955, to serve as an extension of stimulating design development in North Carolina.

THE SITE PLAN GENERATED A GREAT DEAL OF INTEREST. THE ARCHITECTURE OF THE SINGLE STRUCTURE TENDS TO AN ADEQUATE SCALE OF THE OPEN SPACES WITH SENSE OF UNITY.
THE SEVENTH ANNUAL PRESS AWARDS

Thomas C. Rickenbaker, AIA, announced that Ralph S. Smith of the Winston-Salem Journal and Sentinel is a first place winner and a recipient of $100.00 of the Seventh Annual Press Award sponsored by the North Carolina Chapter of The American Institute of Architects. Honorable mention and $50.00 went to Owen Lewis of the Greensboro Daily News. Both winners were honored at a luncheon on Friday, February 9.

Mr. Smith has worked as an editorial writer since 1961 for the Charlotte News, Washington Star and presently is working for the Winston-Salem Journal and Sentinel. He will soon complete his first novel, under a fellowship, which is to be published in Spring, 1969. The winning entry was an editorial essay, "What Sort of Ruins", which calls for the restoration of the avant-garde architect to the position he held during earlier periods of history. He feels "that too much is happening today in the field of architecture to give such responsibility to those who are blind to the revolution around them. The need for revolutionary rather than conventional thinking in the physical development of our cities and suburbs has never been as important as it is today; and yet our environment still continues to reflect the conservative, middle-ground designs of the profession." Also "that the Americans are turning in ever greater numbers to the outmoded ideas of the past... which robs us of the creativity that would give our age an architectural patent of its own. And this is the most depressing aspect of all: The fact that the characteristics which identify us as a certain people living in a certain age will not be inherent in the physical structures we leave for succeeding generations. What sort of ruins, as Premier Clemenceau put it, will contemporary architecture make when they dig us up two or three thousand years from now?"

Mr. Lewis is an art editor and education editor of the Greensboro Daily News, where he has worked since 1962. In addition, he is on the art faculty of Salem College as director of art exhibits. Mr. Lewis submitted an article, "Architecture on Hill: A Call For Variety", an interview with Alice Mendenhall Welsh, the newest member of the planning board of the Town of Chapel Hill. In it she was quoted "People tend to resist or reject contemporary architecture. Locally there's been criticism of some of the new construction on campus. The criticism has a tendency to be just a lumped emotional reaction rather than any kind of objective analysis... It is pretty ridiculous to build 19th century Revival styles in the Supersonic Transport Age. This era of automation and speed dictates the use of 20th century materials... People enjoy moving through Chapel Hill, and part of the reason is variety—open green spaces, charming homes, winding streets and the campus which is the core of the town, linked of course to the business district... The community and campus need a variety of forms, representing both present and past."
The third annual Craftsmanship Award given to Cohen C. Ludwig by the North Carolina Chapter of the American Institute says "in recognition of his outstanding craftsmanship as a master stone cutter and carver." The award was presented by B. Atwood Skinner, Jr., AIA, at a Pinehurst luncheon on Friday, February 9.

Since 1945 Mr. Ludwig has been employed by Harris Granite Quarries and when not employed by them operates an independent sculpture and carving shop. One of the major works executed by Mr. Ludwig was the carving on the Stone Mountain in Georgia. Walker Hancock, sculptor of the project had this to say, "I feel that special mention should be made of the work of Cohen Ludwig, who shows very great skill in interpreting the forms of the models."

In addition to his obvious talent as a master stone cutter, Mr. Ludwig is a highly personable individual with a splendid attitude, conspicuous initiative, enviable tenacity, and amazing as it may seem, a modesty which one would not expect to find with such talents.
NEW BOOKLET

AIA has published a very informative booklet, “Your Building & Your Architect” to guide the prospective builder, whether it be a corporate czar, a school board or a single home owner, go through the maze of the design and construction process as smoothly as possible. It explains how to choose an architect, what his role and responsibilities are, and how to work with him for the most satisfactory results.

The booklet is an abridgement of a series of articles originally published in “The Architectural Forum”. They were written by Donald Canty, then senior editor of “Forum”, and now director of the Urban Information Center of Urban America and editor of its magazine “City”.

Copies of the booklet are available to those interested in building from Information Services, The American Institute of Architects, 1735 New York Avenue, N. W., Washington, D. C. 20006. Price is 50¢ each.

WRIGHT’S IMPERIAL HOTEL WRECKED

Early December was a sad time for architects who had fought to save from the wrecker’s hammer the famous Imperial Hotel in Tokyo designed by Frank Lloyd Wright. They lost and the first blows on the 45-year-old structure were against its copper roofing as destruction of the red brick and stone building started. The hotel was one of the very few buildings to survive the disastrous 1923 Japanese area earthquake and was known throughout the world. Wright’s widow, Olgivanna Lloyd Wright, flew to Tokyo to aid in the efforts to save the structure.

TOP ARCHITECTURAL CRITICS OF THE YEAR
Lewis Mumford, of Amenia, N. Y., and George McCue, of St. Louis, have been named the winners of The American Institute of Architects' newly established and only awards for architectural critics. Mr. Mumford, constructive critic of man's environment since the 1920's, is the recipient of The Institute's Architectural Critic's Medal, awarded on the basis of a distinguished career devoted to architectural criticism. Mr. McCue, art and urban critic for the St. Louis "Post-Dispatch", received the Architectural Critic's Citation, awarded on the basis of excellence in a single work in the same area. Both are honorary members of The Institute.

The Architectural Critic's Medal and Critic's Citation will be presented to the recipients during the annual AIA convention in Portland, Oregon, June 23-26, 1968.

CONFERENCE ON RELIGIOUS ARCHITECTURE
"The Reality of Tradition: Creativity", is the theme for the 29th National Conference on Religious Architecture to be held April 30-May 3, 1968, at the Statler Hilton Plaza in Miami Beach, Florida. The program includes several major addresses, seminars, exhibits, design competition and tours of religious architecture in the Greater Miami area. Registration information is available from the Conference Coordinator, Mrs. Esther F. Martin, P. O. Box 488, Coral Gables, Fla. 33134.
in 1911 we were using slab wood and sawdust

...now, with modern fuels and improved kilns, we've cut start-to-finish time from two weeks to four days, and upped our capacity to more than 350,000 brick equivalents per day.
