Most folks just can't get over the fact that we have more than 6000 shapes, sizes, styles and colors of tile on hand.

Here they were thinking we were a little tile company in Lexington, North Carolina and it turns out we're a big tile company in Lexington, North Carolina.

And a darn good one, too. Just try us. We'll surprise you.

CONSERVATION NUMBER OF THE N. C. ARCHITECT TAKES THE MAGAZINE INTO NEW FIELDS

THE EFFORT OF THE "NORTH CAROLINA ARCHITECT" TO INTEREST THE GENERAL READER AS WELL AS THE ARCHITECT SUCCEEDED BRILLIANTLY IN THE RECENT (JUNE-JULY) CONSERVATION NUMBER.

EXCERPTS FROM THE CONSERVATION NUMBER, OR EDITORIAL COMMENT ON IT, HAVE ALREADY APPEARED IN THE RALEIGH "NEWS AND OBSERVER," THE "CHAPEL HILL WEEKLY," THE "LEADER," AND SOUTHERN PINES' "THE PILOT." ORDERS HAVE BEEN FILLED FOR REPRINTS OF ARTICLES BY JAMES C. WALLACE, KEITH ARGOW AND RITCHIE BELL. SO AT LEAST PARTS OF THE MAGAZINE ARE REACHING A FAR WIDER READERSHIP THAN JUST THE ARCHITECTS OF THE STATE.

REPRINTS FROM THE CONSERVATION NUMBER IN THE "IOWA ARCHITECT" AND THE "JOURNAL OF THE AMERICAN SOCIETY OF LANDSCAPE ARCHITECTS" REFLECT THE INTEREST BY PROFESSIONALS OUTSIDE THE STATE.

NO BETTER WAY THAN THIS HAS YET BEEN FOUND TO PUBLICLY MARK THE ARCHITECT AS A MAN OF WIDE CULTURE, INTERESTED IN MATTERS OF GENERAL CONCERN TO HIS STATE AND TO SOCIETY, AND AT THE SAME TIME DISPLAY EXAMPLES OF HIS PROFESSIONAL WORK.

THE NEXT SPECIAL NUMBER OF THE "NORTH CAROLINA ARCHITECT" WILL DEAL WITH THE PERFORMING ARTS IN NORTH CAROLINA AND WILL POINT OUT THE PART SUCH ACTIVITIES CAN PLAY IN THE DEVELOPMENT OF THE STATE. IT, TOO, WILL BE EDITED BY MR. HARRIS.

RICHARD L. RICE, AIA, CHAIRMAN COMMITTEE ON PUBLICATION
Editor:

My compliments to you on the June-July issue which contained a "Conservation of Natural Resources in North Carolina" section and the articles by James C. Wallace, Dr. A. W. Cooper, Dr. David A. Adams, Keith A. Argow, Sheafe Satterthwaite, Pearson H. Stewart, C. Ritchie Bell, Milton S. Heath, Jr. and Margaret Click Williams.

I do sincerely hope that it is not too late for North Carolina to preserve many of our natural resources which are being spoiled at a very rapid rate. Particular attention should, I believe, be given to the estuarine areas since once these areas have been destroyed, there is no way to recover them, and they are essential to the fish and wildlife along our coast.

The State of Florida has reached such a point in the destruction of their natural resources that they have called a complete halt or moratorium on dredging and filling in the State of Florida, whether on private or public owned property. The State of Maine has reached a similar conclusion; Delaware and Maryland are giving intensive thought to similar action. Unless we find some effective means of regulating and controlling dredging and filling, our coastal waterways in North Carolina will be forced to take similar action.

It has been my privilege to work toward the development of Cape Lookout National Seashore and I have been directly responsible for the purchase of the lands from Cape Lookout north to Ocracoke Inlet. This project has been underway since 1959. At the outset, the thought or idea had not been developed that this would become a National Park.

The original idea was to purchase the land so the State could obtain federal assistance in building barriers and restoring the sand dunes and protect the inland waters from the ocean. Unless something of that sort is done, we are certainly going to lose a large part of Portsmouth Island and Core Banks to the sea and expose the inland areas to the sea. Publication of material on these subjects by your magazine will be a great aid in bringing this problem to the attention of the public.

Again, I appreciate your fine June-July issue.

F. B. Turner
State Property Officer

Editor:

It was a handsome issue, and of course I thought Jim Wallace’s article was excellent.

Margaret Taylor
Institute of Government
U.N.C., Chapel Hill

Editor:

I should like to commend you for your major role in the publication of the Special Number of the NORTH CAROLINA ARCHITECT on Conservation of Natural Resources in North Carolina. The issue is outstanding in every way and a genuine tribute to the fine efforts of you and your staff.

Governor Moore, in his address to the two-day Conference on Beautification held April 7-8, 1966, here in Raleigh, very aptly defined beautification as the logical and orderly development of all of the resources of the State. The Governor's perceptive definition for beautification is now included as an integral part of the By-laws of the Governor's Advisory Committee on Beautification.

The Committee's ultimate goal is for North Carolina to be able to take justifiable claim to the title of the cleanest, most beautiful state in the nation. This is quite an undertaking, but we feel that the people of North Carolina are ready and willing to accept the challenge.

Your splendid efforts in focusing attention in such a fine manner to the critical need for a more responsive appreciation of our heritage is an invaluable contribution to our State, and we are indeed most grateful to you.

James B. Godwin, President
Governor’s Advisory Committee on Beautification

Editor:

I received with great pleasure the June-July issue of NORTH CAROLINA ARCHITECT and would like to renew my compliments again for an excellent job on this publication. I found the comments of the editorial both wise and challenging and feel that the issue was an excellent statement of good sense. It was a beautiful presentation and I believe that the effort on the part of the North Carolina Chapter of AIA could mark a distinct point in the broadening and intensifying of a long neglected gap concerning both our natural and man-made environment.

Kenneth Youngblood
Prince, Youngblood & Masagee, Lawyers
Editor:

Many thanks for the magazine. I know that my wife will be extremely happy to read this particular issue.

Robert M. Shoffner, Assistant Cashier
Wachovia Bank & Trust Co.

EXCERPT FROM The Pilot, Southern Pines, N. C.

The North Carolina Chapter of the American Institute of Architects has performed a notable service for the State in an impressive special issue of its magazine, "North Carolina Architect", devoted to the conservation of natural resources, against a background of the relationship of nature to architecture.

The entire presentation, which draws on the talents of nine special writers—top authorities in such fields as forestry, environmental studies, water resources and State legislation—deserves the highest praise.

Never before, perhaps, has so much solid information and enlightened opinion on both the achievements and the needs of North Carolina in conservation been collected between covers. It would be an apathetic person—be he a public official or an ordinary citizen—who would not be stirred by this collection which combines the documented factuality of the scholar with the vision of the artist and the passion of the reformer.

The whole production bears the stamp of its "great editor", Harwell Hamilton Harris, a renowned Fellow of the American Institute of Architects, who is now with N. C. State University at Raleigh.

His introduction to the Conservation Section of the magazine, an editorial titled, "Why Nature?" is an eye-opener to the layman as it must be an inspiration to the architectural profession.

"Our first concern," he writes, "is to save something of the natural world in which we evolved . . . Our second concern is to learn from nature the secret of creation; where possible to design within the context of nature; where not possible, to discover in the context of the man-made community the workings of natural principle so that in what we do we add principle to principle . . . ."

Of particular interest here is the fact that two of the seven buildings which are beautifully photographed and described at the end of the various presentations—to illustrate the "design within the context of nature" cited by the editor—are the work of a local firm, Austin-Faulk Associates. They are the Country Club of North Carolina, near South-ern Pines, and the Joseph H. Bryan, Jr., combined stable and residence, off Youngs Road.

It is good to learn that "North Carolina Architect" magazine goes to a readership considerably larger than the profession. We wish there were some way the magazine or at least the articles in it could have mass distribution over the state.

Surely some means must be found to collect these articles in a brochure for distribution to each member of the 1969 General Assembly, preferably in advance of the legislative session, when each would have time to read it with care. Of vital concern are such subjects as North Carolina's sadly lagging progress in the creation of State parks; the need to separate the conservation and development functions of the "C & D" department; proposals for the "fusion of city and country" that would avoid mistakes other states have made; the need to protect and preserve coastal salt marshes; and others.

If its wider distribution can be arranged, this landmark collection of studies on the conservation of natural resources in North Carolina could prove to be one of those seminal documents whose influence extends far beyond the readership for which it was originally produced.

EXCERPTS FROM News & Observer
By Jane Hall

The current special issue of the North Carolina Architect — titled "Conservation of Natural Resources in North Carolina" is must reading for every Tar Heel. It is "must" reading because it presents, through the eyes of experts, an appalling picture of a North Carolina in which destruction of natural resources is rapidly approaching the danger point. And man, despite the tremendous strides which science has made in the past few years, is still very much basically dependent upon them.

The authors, however, do point to ways and means whereby the destruction may be stopped and Carolinians' natural resources saved and enhanced for the use and enjoyment of future generations.

But why is an architects' magazine speaking of conservation of natural resources?

Because the directors of the N. C. Chapter of the American Institute of Architects decided there should be special issues of their magazine devoted to matters that concern all citizens . . . .

If we don't do something now, tomorrow may very well be too late.

PLEASURE ISLAND

BLOCKADE RUNNER MOTOR HOTEL
WRIGHTSVILLE BEACH, NORTH CAROLINA

Poised like a blockade runner of old between rolling surf and a calm blue sound, this luxurious hotel surrounds its guests with pleasures. They usually surrender quickly.

Among the modern, luxurious facilities of this uncrowded resort: all guest rooms overlook water... six spacious dining and meeting rooms... a sweeping oceanside terrace and swimming pool... miles of beach fun.

Time-saving and economical construction made full use of Solite's lightweight structural concrete and masonry units. Dead load was substantially reduced in floors, roof deck, columns, walls and partitions. Lower weight was important to the foundation piling, and in the use of lightweight reinforced concrete and prestressed T's in the frame.

Embodying modern design at work with versatile materials, the Blockade Runner makes a charming “island of pleasure” for conventions or personal vacations.
JURY FOR THE 15TH ANNUAL
NCAIA HONOR AWARDS

Three prominent men in the architectural field have accepted the invitation to serve as the jury for the 1969 Honor Awards Program. The awards are the Chapter's highest professional recognition for distinguished achievement in architectural design.

The jury comprises of Douglas Haskell, FAIA, former editor of Architectural Forum; Lawrence B. Anderson, FAIA, Dean, School of Architecture, M.I.T.; and Hugh A. Stubbins, Jr., FAIA, practicing architect of Cambridge, Mass.

Any registered architect practicing professionally in North Carolina, who is a member of the North Carolina Chapter AIA, is eligible to submit entries. Entries of buildings constructed in North Carolina designed by AIA members from other states will also be accepted. All entries must have been completed since January 1, 1958, and those buildings which have previously received Chapter, Regional or National AIA awards will not be eligible for this competition.

Closing date for receipt of entries is December 4, 1968. Judging will take place second week of December at Mr. Stubbins’ office, Cambridge, Mass., and winners will be notified by December 16th. Awards will be announced at the Annual Banquet during the Winter Convention of the North Carolina Chapter AIA at the Carolina Hotel, Pinehurst, N. C., February 6, 7, 8.
COMPUTER PLOTTER ART

Traditional? Surrealistic? Avant Garde?

For lack of a better word, it is called computer/plotter art which was recently shown at the New York Room of the Statler Hilton, Los Angeles. Little known except within the technical world, approximately a dozen framed drawings in color, and black and white, both original drawings and reproductions hung on the walls. These are the products of a collaboration between computers, plotters, and, of course, human beings.

Countless mathematical computations fed into computer and then placed on tape which was run through a plotter created visual work of art. Although angles and curves are shown in the drawings they are actually straight lines. Increasing refinements have produced beautiful pictures, so that the drawings, both originals and reproductions, are now being sought by collectors.

DRAWINGS GIVEN TO NCMA

Ninety-nine architectural drawings by the late Matthew Nowicki have been given to the North Carolina Museum of Art by Raleigh Architect William H. Deitrick.

The drawings as a group are representative of Nowicki's work in Raleigh which included the first design of Dorton Arena and planning studies of the entire State Fair complex, as well as the Erdahl-Cloyd Union at N. C. State University. Some of them are schematic for various projects which Nowicki did in collaboration with Deitrick.
SCULPTURE IN THE PLAZA

Collaboration of construction and art produces a 60-ton, 36-ft.-high Pablo Picasso statue that stands in the middle of the I.M. Pei’s award-winning University Plaza apartment complex in New York City’s Greenwich Village.

The bust of “Sylvette” is an angled slab of buff concrete on which the outline of a pony-tailed girl is etched. The sculpture is a blowup of a 24-in.-high sheet metal sculpture created by Picasso in 1954. After 40 years of dreaming of colossal sculptures, Picasso finally discovered able disciples to translate his works into reality.

The concrete Sylvette is the handiwork of a trio of Norwegian artists, Carl Nesjar, Eric Hesselberg and Sigurd Frague, who have produced Picasso’s works in various European countries.

Donors are Allen Emil, an attorney, and his wife.

INTERNATIONAL SCULPTORS SYMPOSIUM

This country’s first International Sculptors Symposium produced 11 monumental works of art, each representing the individualistic insight of the participants. Jointly sponsored by the Vermont Marble Co., the Vermont Council on the Arts and the National Endowment for the Arts, this Symposium was held in Proctor, Vt. from July 20 to September 20.

Participating sculptors were from the United States, Austria, Japan, Germany, and Yugoslavia.

The sculptors chose to use marble because it reflects an exciting contrast to many modern sculptures which give the illusion of mass and solidarity by envel-
opining space instead of occupying it. Also, marble has an inherent compressive quality which creates a more definitive work; it contributes an element of mass which is lacking in other contemporary art forms.

The significant aspect of the Symposium was the unique opportunity for international artists to work together and exchange ideas, and to discuss individual techniques and problems. Symposium participants voted unanimously to keep the collection intact as the nucleus of a growing Sculpture Park, which, without question, will represent present-day sculpture and architecture in the years ahead.

N. C. ARCHITECTS ATTENDING SOVIET SYMPOSIUM

A. G. Odell, Jr., FAIA, of Charlotte, accompanied by his son W. R. Odell, a student at N. C. State University, Stuart Penn, AIA, of Morganton and Phillippe Gilissen, AIA, of Hickory, are attending the first Soviet-American Symposium. The conference is being held in Moscow and Leningrad. In addition to the lectures, the American group will be given tours in four cities, inspecting historic buildings, imposing public buildings and new construction projects. American speakers will share the symposium lecturing with Soviet Architects and will present talks on American architecture today, and in the future and on urban problems in the United States.

INTERNERSHIP - RESPONSIBILITY

Chapter 83, Architects, of the General Statutes of North Carolina, states that — "the practice of architecture consists of rendering or offering to render services by consultation, investigations, evaluations, preliminary studies, plans, specifications, contract documents and a coordination of all factors concerning the design and supervision of construction of buildings or any other service in connection with the designing or supervision of construction of buildings located within the boundaries of the State, regardless of whether such services are performed in person or as the directing head of an office or organization performing them".

Therefore, when an individual is granted a license to practice architecture in North Carolina, the citizens of the State can reasonably assume that he is qualified and competent in all areas required by law.

In consideration of this, the Board of Architecture requires that a candidate for examination shall have had at least three years of acceptable practical experience in addition to the required academic training. It is, therefore incumbent upon the intern to acquire as broad an experience as possible, and he will be well advised to seek this experience in offices of practitioners who will offer him diversified opportunities during this period of valued learning.

FRANK LLOYD WRIGHT ITEMS OFFERED FOR SALE BY HIS SON

This year, nearly a hundred years since the birth of Frank Lloyd Wright and almost ten years since his death, his son, John Lloyd Wright, offers for sale sixty-six items concerning the life and work of his famous father. These range from an autographed copy of the original edition of the Ausgefuhrte Bauten und Entwurfe van Frank Lloyd Wright, through a wide range of books, personal mementos, original manuscripts, paintings and furniture. The catalogue ends with a first edition copy of My Father Who is on Earth, by John Lloyd Wright, with his father's comments written throughout the pages of the book.

Such an offering, open to libraries, collectors and students may never occur again. Its interest is such that the North Carolina Architect herewith presents the list in full.

2. "Ausgefuhrte Bauten und Entwurfe von Frank Lloyd Wright" original Wasmuth edition from stone plates, two volumes 97 plates (25½" by 17½") deluxe set on Japanese paper with 31 page brochure in German dated Florence, Italian May 1910, and translation 25 pages in English autographed To: "John — from 'Father' who hopes to approve his studies and executed buildings, some day — Frank Lloyd Wright" dated June, 1910 Florence, Italy. (70 buildings)

Also original illustrated 8 page brochure 4½" by 6" by Frank Lloyd Wright 810 Orchestra Hall, Chicago advertising this Wasmuth edition for sale with typewritten change "in view of the limited supply".

3. 14 Individual plates 25½" by 16" from original Wasmuth stone plates of "Ausgefuhrte Bauten und Entwurfe von Frank Lloyd Wright", 1910.

(8½" by 8½", 38 pages).

53. A Taliesin Square-Paper, a Nonpolitical Voice from our democratic minority, May 15, 1941 — Of what use is a great Navy with no place to hide?

54. A Taliesin Square-Paper, January 21, 1941 — article by F. LL. W. on "How I would Rebuild London".

55. A Taliesin Square-Paper, May 28, 1941 "Good Afternoon, Editor Evjue".

56. A Taliesin Square-Paper, July 4, 1941 "Defense".

58. A Taliesin Square-Paper #13 published and printed by the Taliesin Press, 9" by 9", 2 sheets 17" by 17" in mailing envelope addressed to Mr. and Mrs. John Lloyd Wright
on The American Institute of Architecture Citation and The Speech of Acceptance by F. LL. W. March 17, 1949.

59. A Taliesin Square-Paper #14, 1 sheet 17" by 17" in mailing envelope, "We want the truth" by F. LL. W. The Cooper Union New York November 2, 1949.

60. Water color Landscape painting signed "F. L. Wright, April 2, '92 (7" by 12¼")).

61. Landscape water color by F. LL. W. with original matt, unsigned 7" by 5" about 1890.

62. Pen and Ink sketch by F. LL. W. on Japanese tracing paper interior corner of Oak Park Studio (12" by 20") about 1893.

63. One Straight back Chair (about 1905).

64. One Lounge Chair (about 1905).

65. One Copper Golden-rod Holder (1893).

66. Book — **The Only One In Existence** First edition author’s copy — "My Father Who Is On Earth", 196 pages (6" by 8½") by John Lloyd Wright. Published by G. P. Putnam’s Sons, March 29th, 1946, with hand written comments running thru book by Frank Lloyd Wright. Returned to John Lloyd Wright with letter as follows:

"Dear John: Herewith ungracious comments marked on the opus — itself — as I read. Kindly send me another one — will you? Hope you and Frances are happy and get some money as well as fun out of it all.

Love Dad:" — Frank Lloyd Wright April 2nd, 1946.

JOHN LLOYD WRIGHT P. O. BOX #11 DEL MAR, CALIFORNIA 92014
PRODUCERS COUNCIL INSTALLS OFFICERS
The September meeting of the Carolinas’ Chapter, The Producers Council, was held at the White House Inn, Charlotte, on Monday, September 16. Approximately 150 architects and engineers viewed an excellent table top display arranged by P/C members.

Following dinner, new officers and directors of Producers Council were installed for 1968-69. They are: W. R. White, President; W. S. Buchanan, 1st Vice President; James F. Traylor, 2nd Vice President; James A. Davis, Secretary; Bruce Laing, Treasurer.

The Producers Council is planning a medical seminar in Charlotte on November 8.

INCIDENTALLY . . .
Burlington Research and Development Center, Greensboro, N. C. designed by A. G. Odell Jr. & Associates is one of the twenty-five winners in two materials-oriented awards programs. Steel and prestressed awards were sponsored by the American Institute of Steel Construction and Prestressed Concrete Institute . . . . Former N. C. governor Terry Sanford is president of Urban America, Inc., the 4,000 member city improvement group . . . .

National Board of Directors of AIA regrettfully accepted the resignation of Mitchell/Giurgola Associates, architects for the Institute’s projected new Headquarters building in Washington, D. C. The architects feel that resignation is the only course open to them in view of the impasse that has developed in obtaining approval of the Fine Arts Commission . . . .

DESIGN COMPETITION AT RPI
Larry Horne a junior at Richmond Professional Institute was named first place winner in a design competition at RPI sponsored by Mid-State Tile Co., Lexington, N. C. The project objective was a design showing “effective and imaginative uses of ceramic tile.”

Judges were J. Hyatt Hammond, AIA, president of N. C. Chapter AIA; Bonnie Hammond, interior designer; Ray Smith, tile contractor and Mae Smith, Artist.

RALEIGH COUNCIL OF ARCHITECTS ELECTS OFFICERS
At the regular monthly meeting of the Raleigh Council of Architects held at the YMCA on Thursday, September 5, the following architects were elected to serve as officers for the coming year: Horace Taylor, Jr., AIA, president; W. Paul Harrelle, AIA, vice president; Byron W. Franklin, AIA, Secretary; and James T. Quinn, AIA, treasurer. As retiring president, George M. Smart will serve as a member of the Executive Committee.
ARCHITECTS TAKE NOTE

A very comprehensive handbook on prestressed, precast concrete products is offered to architects by Concrete Materials, Inc. This book is more than 600 pages and contains chapters on load tables, ACI 318-63 computer printouts, standard sections, typical design computations, standard connections and standard details. To get your complimentary copy fill in the coupon below.

In asking for bids on future work, please keep in mind the dates of the Annual Convention of Carolinas Branch, AGC—Nov. 10-13, 1968. Please do not schedule bid dates during this period.

Our 16-mil epoxy wall coating smells like nothing at all.

And no odor is just one advantage you get with Kurfees' new KURAMIC COATING ... a high build catalyzed epoxy wall coating. Other good reasons for specifying Kurfees KURAMIC are: simple, two step application; a true 16-mil thickness in one coat; 1/2 the cost of installed ceramic wall tile; and good looks, long wear, high resistance to impact.

Why not get the full story on our Kuramic seamless floor and wall systems. Write J. B. Tabler, Maintenance Coatings Division, Kurfees Paint Company, 201 E. Market, Louisville.
ANNOUNCEMENT
In accordance with the movement to widen the scope of the NORTH CAROLINA ARCHITECT, the Committee on Publication is pleased to announce that James C. Wallace has consented to serve as Contributing Editor — the first member of a distinguished panel which the committee hopes to attract.
