BRICK
IN NORTH CAROLINA
ARCHITECTURE

Tile floors for seventeen new office buildings will prove to be a smart investment.

Cherokee Design Materials was asked by Koger Properties, Inc., Jacksonville, Fla., to supply elegant floor tile for seventeen new buildings located in Koger Executive Centers throughout the South-East. The attractive white 12" x 12", and the glossy brown and emerald colored 8" hexagon tiles that were used in the Koger Executive Center in Raleigh, is one example of good planning by the builder. For he knows that great looking floors will enhance the buildings appearance, and will attract faster rentals, as well as add prestige to the office park. What's more the durable tile will last indefinitely with hardly any maintenance.

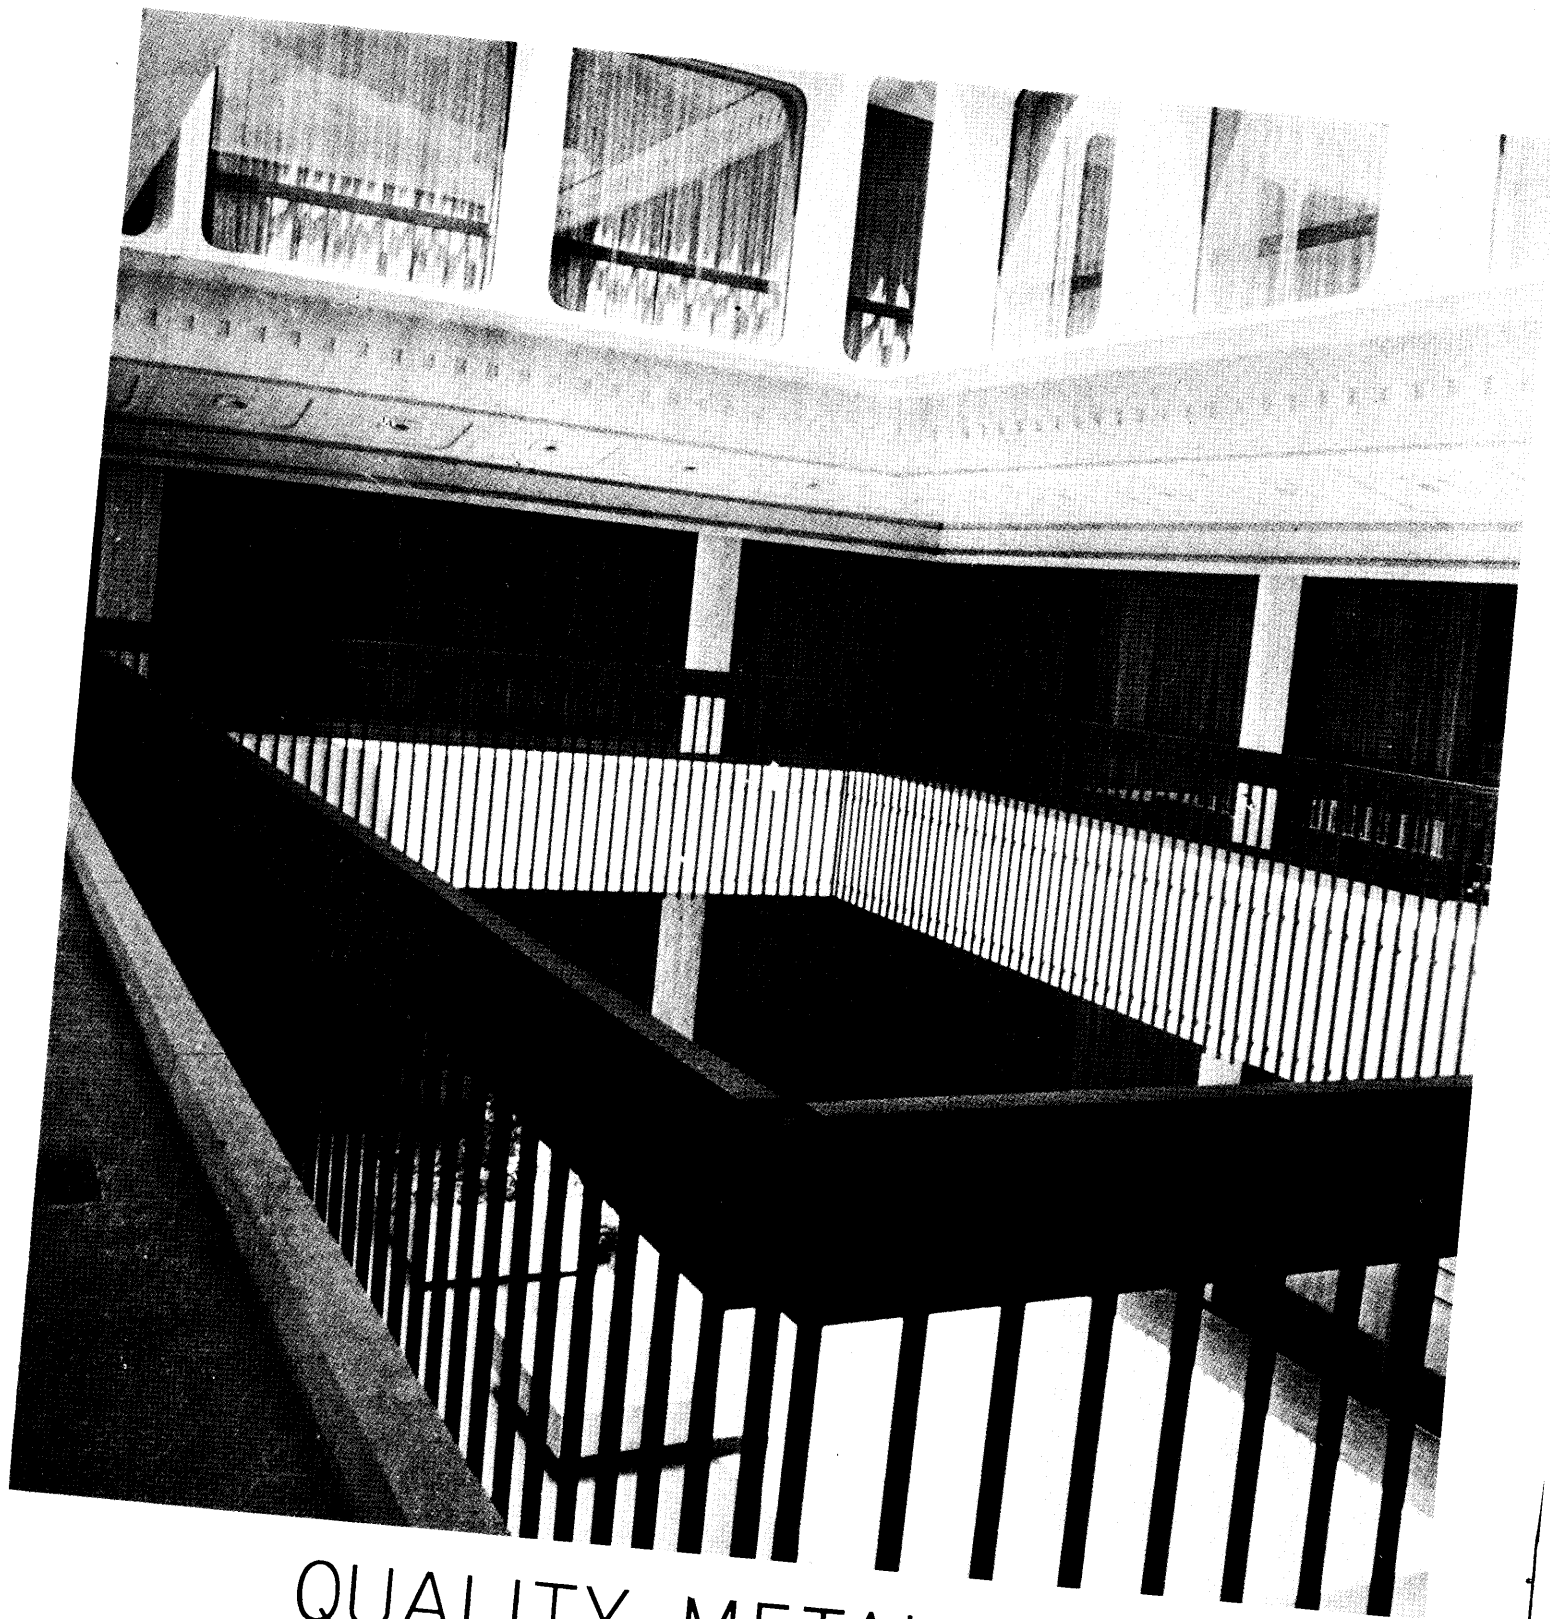

If you are building an office park, shopping center, school, hotel, or home, consider all the advantages of using Cherokee Design Materials. Cherokee carries full stock of over 500 varieties of tile in their Raleigh

warehouse. These beautiful tiles are available in all colors, textures, shapes and sizes. For heavy duty applications, you can use Brick Paving for outdoor and indoor walkways. Cherokee also stocks its full line of building brick on location. Some of these were used on the exteriors of Koger's buildings. You can see all of our design materials at our new showroom and warehouse, or write for colorful catalogs. Cherokee Design Materials, 4027 Beryl Road, Raleigh, N.C. 27606/(919) 828-0541

Handmade brick is almost a thing of the past. It just costs too much to make it that way. But Borden has preserved the beauty of handmade brick and made it with the efficiency of modern methods. It's called Handtique, and it brings back the best in brick.

Only from Borden, the people who make brick.

Vantage-space

**multistory office buildings
...now from Tindall.**

This new concept in 2-to-15 story office building construction has been perfected by Precast Systems, Inc. They offer many advantages such as fast construction, space efficiency, design efficiency, fire resistance, and low heat loss. And perhaps the greatest advantage is the low initial cost. The characteristic, attractive, and prestigious vertical appearance offers a variety of wall shapes and window treatments for the designer. Tindall is a PSI authorized producer of these distinctive and economical precast concrete building systems. Contact us for the Vantage-space brochure and full details.

F. CARTER WILLIAMS HONORED

Williams

The American Institute of Architects has announced that F. Carter Williams, FAIA, of Raleigh, N. C. has been selected to receive the Institute's Edward C. Kemper Award for 1975.

Named in honor of the late executive director of the Institute, the Kemper Award is given each year for significant contribution to the Institute and to the profession of architecture.

The award will be presented at the annual convention of The American Institute of Architects, to be held in Atlanta, Ga., May 18-22, 1975.

Williams' longstanding concern with professional ethics and judiciary matters led to his being named the first chairman of the newly organized AIA National Inquiry Committee in 1974. This committee can investigate charges of professional misconduct, hold hearings, and when warranted, act as plaintiff before professional judiciary boards.

Williams' involvement with judiciary matters includes a term as chairman of the Judiciary Committee of the N. C. Chapter AIA, a term as chairman of the Regional Judiciary Committee for the South Atlantic Region, membership and a term as chairman on the AIA National Judiciary Board, and membership in an AIA task force studying and revising the Institute's Standards of Professional Practice.

Over the past 28 years, Williams has held virtually every elective office in the North Carolina Chapter AIA. He has also played an important role in a variety of professional affairs in North Carolina. As a

member of the N. C. Chapter's Contracts and Fees Committee, he was instrumental in setting up the first graduated fee schedule adopted in the state, making it possible for younger architects to take on smaller commissions at reasonable fees. While serving as co-chairman of the chapter's Legal Affairs Committee, he worked successfully for amendments and improvements to the

state's Architectural Practice Act. As a member of the N. C. Board of Architecture he composed and administered a variety of professional registration examinations.

A graduate of North Carolina State College and the University of Illinois, Williams has been a principal in F. Carter Williams, Architects, since 1946.

A LOT OF PEOPLE WHO KNOW A LOT ABOUT WATERPROOFING ARE GLAD THEY KNOW US.

For instance: architects, home-builders, and contractors. When these people face a difficult moisture control problem, they need results. We can make them look good. That's because we're specialists.

Waterproofing, dampproofing, and caulking. That's what keeps a building dry, and that's our business. Our only business.

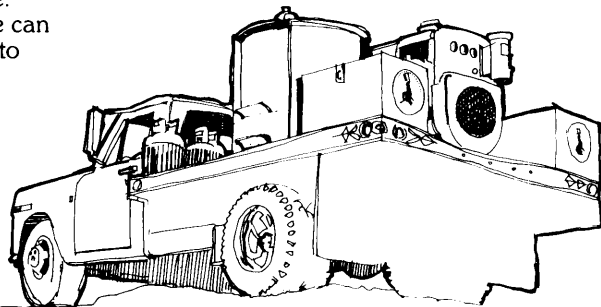

Our employees are bright, energetic problem-solvers. Our president is a civil engineer with over 25 years of experience. Whatever the challenge, we can meet it. From small homes to government housing. From warehouses to cathedrals.

Our specialty — asphalt emulsion systems. We can build up three-layer membrane waterproofing, with protection course, for twenty per cent less than prevailing rates.

In these times, that's no bad thing. Meets government and ASTM specs, too, and comes with a standard five-year guarantee.

With offices in Durham and Greensboro, and an affiliate in Asheville, we can be closer to the site. Less travel time, lower cost. Not only that, but we offer free consulting help with the tough ones.

If your moisture control hasn't been 100% effective, maybe it's time you knew us.

The Jury for the 1975 NCAIA Honor Awards Program met in Cambridge, Massachusetts, in mid-December and selected some entries to receive awards. Announcement of the awards was made at a banquet on February 14 during the Chapter's Winter Convention in Winston-Salem. Jury member, Mrs. Sarah Harkness, FAIA, a principal in The Architects Collaborative firm in Cambridge, made the presentation. Other members of the Jury were Norman C. Fletcher, FAIA, principal in TAC and Eduardo Catalano, Professor of Architecture at Massachusetts Institute of Technology. The Jury had these remarks to make about the program: "There were fifty-five entries; three were given Honor Awards and five were given Merit Awards. There were many good designs so the decision of the Jury was reached only after considerable discussion and thorough review of photographs, plans and slides. The slides were particularly informative. It was more difficult for the Jury to find larger buildings in the top rank than smaller buildings, perhaps because in the smaller buildings there tended to be a more complete carrying through of details, furnishings and character." Entries selected to receive awards and all other entries, except those previously published in NC Architect, are presented on the following pages.

NCAIA HONOR AWARDS PROGRAM

1975

HONOR AWARD

CAMPUS PLANNING NORTH CAROLINA STATE UNIVERSITY Raleigh, North Carolina

North Carolina State University
John T. Caldwell, Chancellor
Owner

Edwin F. Harris, Jr., AIA
Director, Facilities Planning Division
North Carolina State University
Architect

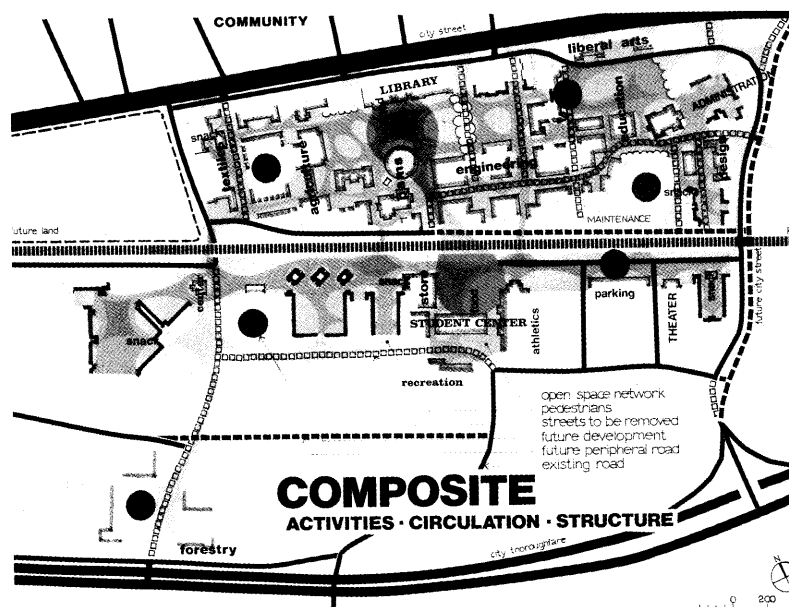

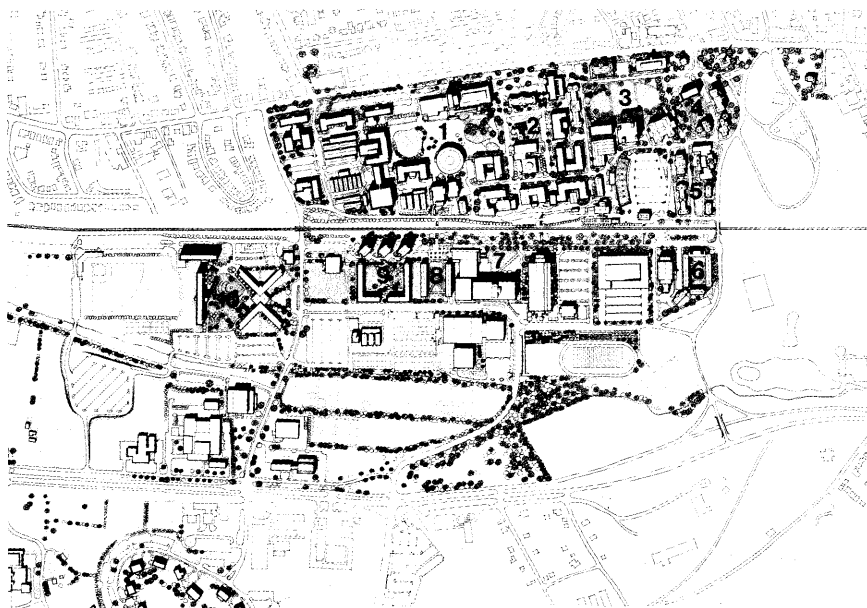

Jury Comments:

This is an important campus analysis establishing future policies of use and growth.

Important nodes of activity are established to strengthen the focal points in the plan.

Consistent separate networks of vehicular and pedestrian circulation have been created.

Beautiful presentation.

HONOR AWARD

WOODMERE APARTMENTS

Charlotte, North Carolina

Headen & Company, Inc.
Owner and General Contractor

Charles L. McMurray, AIA
Architect

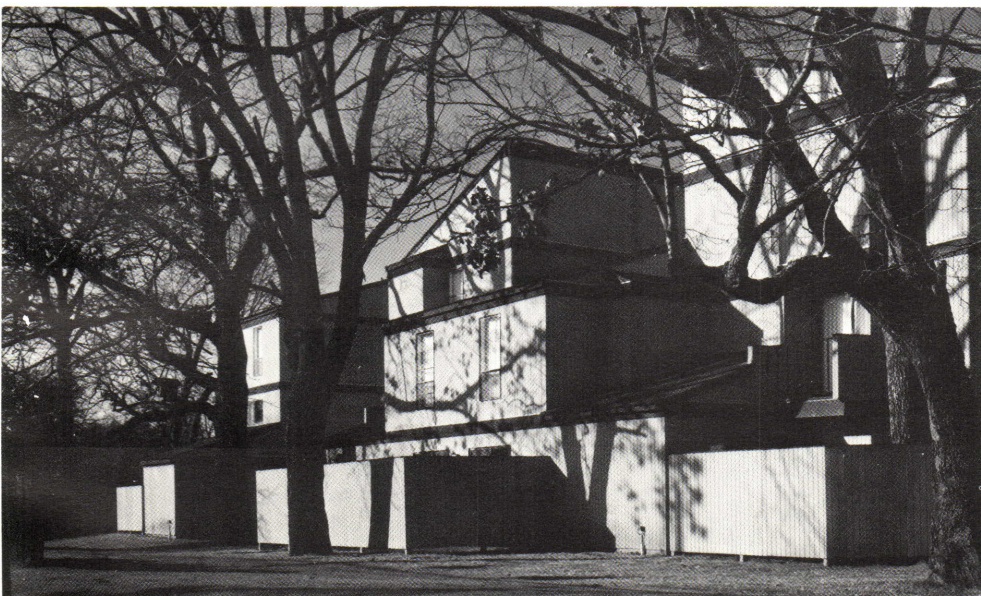

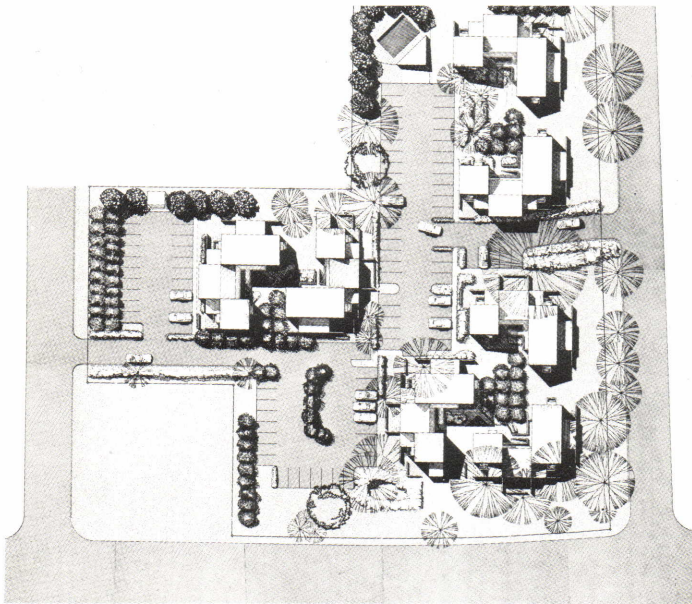

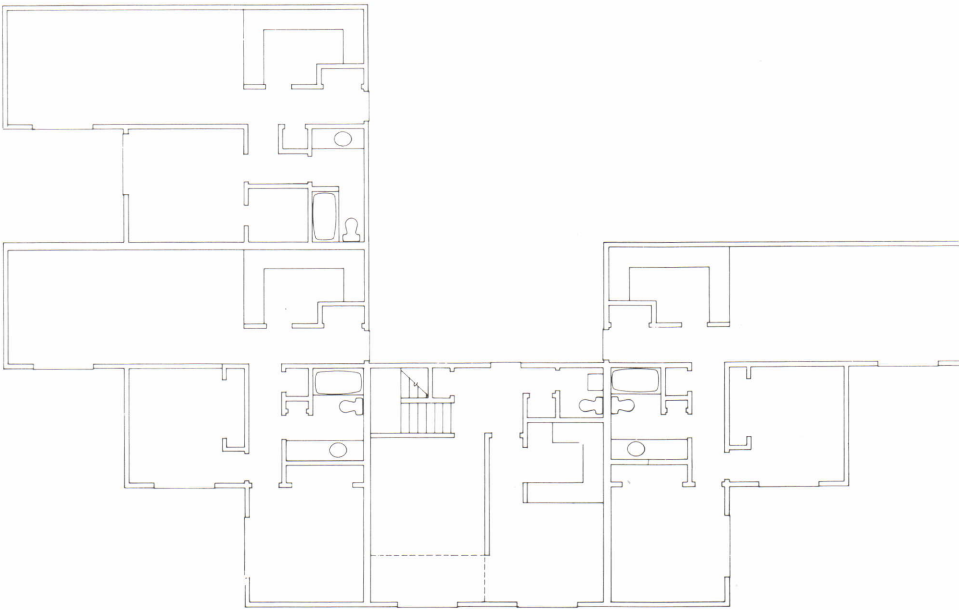

Jury Comments:

The site plan preserves pedestrian space in spite of high parking ratio.

Successful high-density low rise development, very relevant in site planning problems of today.

Houses of different sizes suitable for families, singles or couples in compact relationships with variety of outlooks and privacy.

Represents new type of suburban living.

HONOR AWARD

A HORSE SHED

Southern Pines, North Carolina

Mr. and Mrs. Stanley Cohen
Owners

Monore Builders, Inc.
General Contractor

Basil G. F. Laslett, AIA
William L. Laslett, AIA
Architects

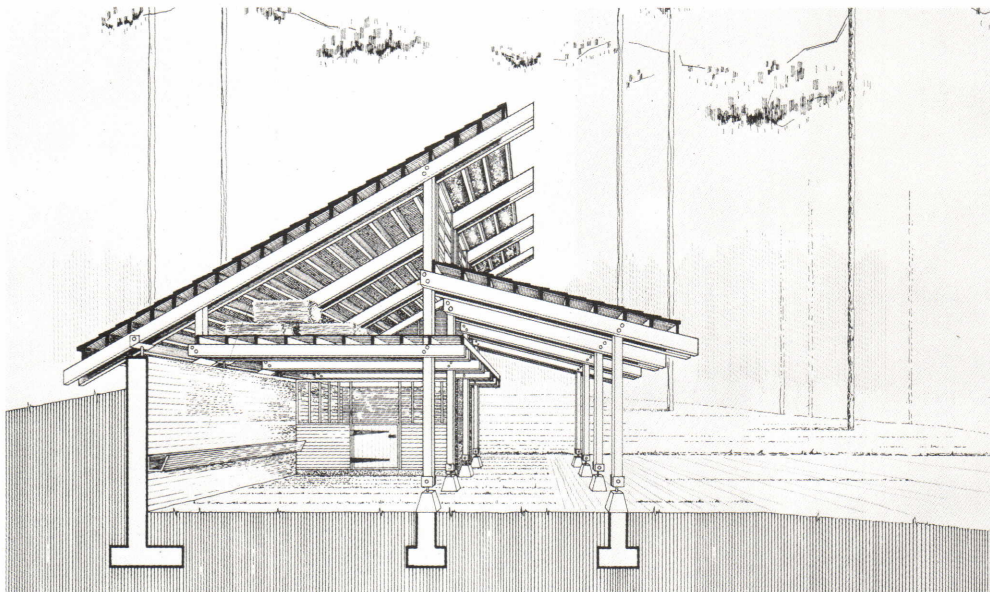

Jury Comments:

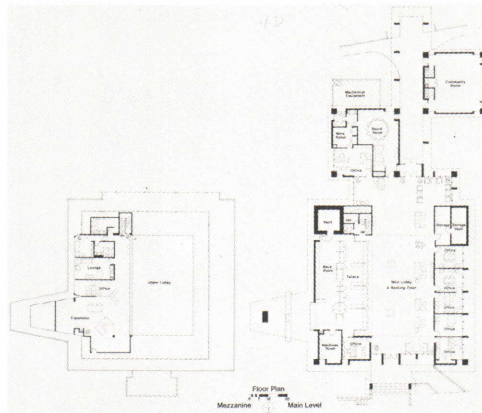

The Shed is a set of extremely simple, indigenous forms or planes fitted sensitively into the landscape.

The construction is the ultimate in simple, expressive and clearly articulated components.

The building supports the tradition that utilitarian structures are still important in creating a pleasant environment.

Lucky horses!

MERIT AWARDS

NEW BANK FACILITY Asheboro, North Carolina

First Peoples Savings & Loan
Association
Owner

Abrams Construction Company, Inc.
General Contractor

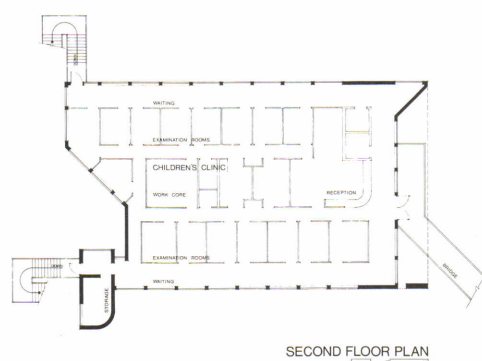

J. Hyatt Hammond Associates, Inc.
Architect

Jury Comments:

Bank well sited to preserve existing oak trees on limited site.

This is an interesting low rise complex with unifying slate roofs.

The interior spaces are attractive, and the furnishings are consistently carried out.

COLONY ROAD PROFESSIONAL CENTER Durham, North Carolina

Medical Campus Associates
Owner

Trout & Riggs Construction Co.
General Contractor

John D. Latimer & Associates
Architect

Roger H. Clark, AIA
Design Architect

Jury Comments:

Sensitive siting among trees.

The building with its setting provides a pleasant and reassuring environment for the children who are cared for there.

The plan is extremely simple, and the forms and materials are treated with great restraint.

The detailing is elegant and carries out the restraint of the concept.

GRAY FOX FARM

Pinehurst, North Carolina

Mr. and Mrs. Leonard Tufts
Original Owners
Diamondhead Corp.
Present Owners

Pinewood Builders
General Contractor

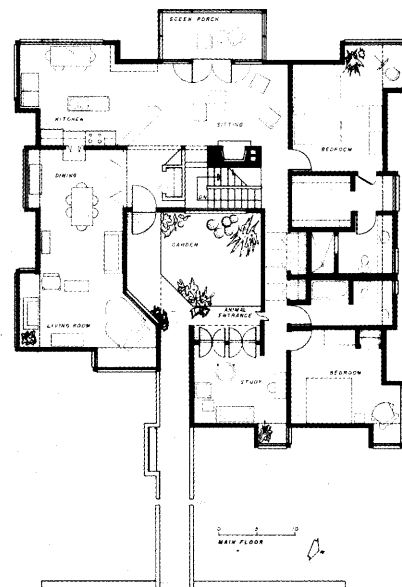

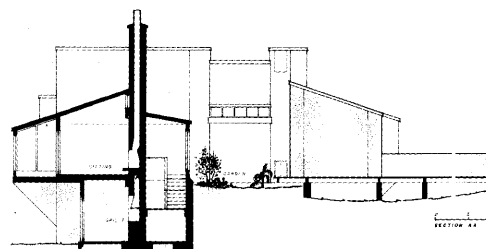

Basil G. F. Laslett, AIA
William L. Laslett, AIA
Architects

Jury Comments:

A unique plan has been developed to take advantage of the views on a sloping site, but also to create a private inner court serving as an apron to the entrances.

The clustering of forms on the hillside makes for a very original design approach.

The white walls and the colored roofs are very appealing in the setting.

PARKING DECKS

Raleigh, North Carolina

North Carolina State University
Owner

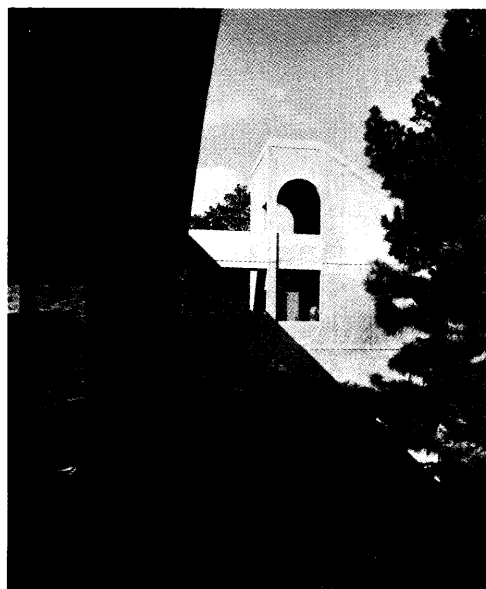

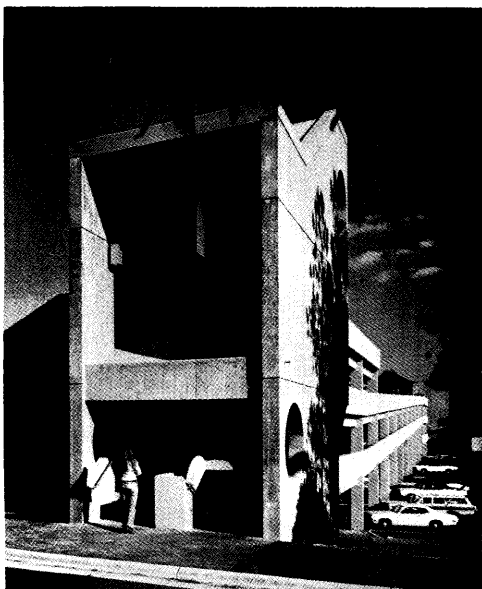

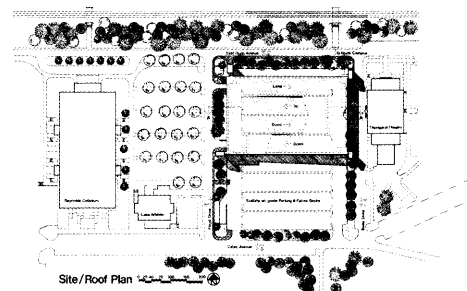

James D. Little Construction Co.
General Contractor

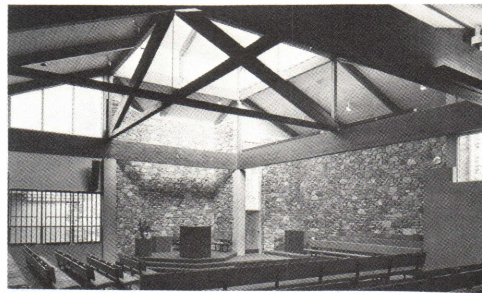

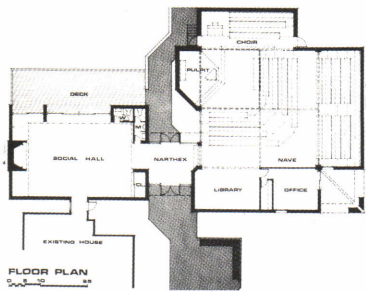

J. N. Pease Associates
Architect

Jury Comments:

Functional and direct garage solution expressed in good architectural concrete.

The garage is lifted out of its utilitarian demeanor by the imaginative and attractive stair towers.

UNITARIAN-UNIVERSALIST CHURCH OF ASHEVILLE

Asheville, North Carolina

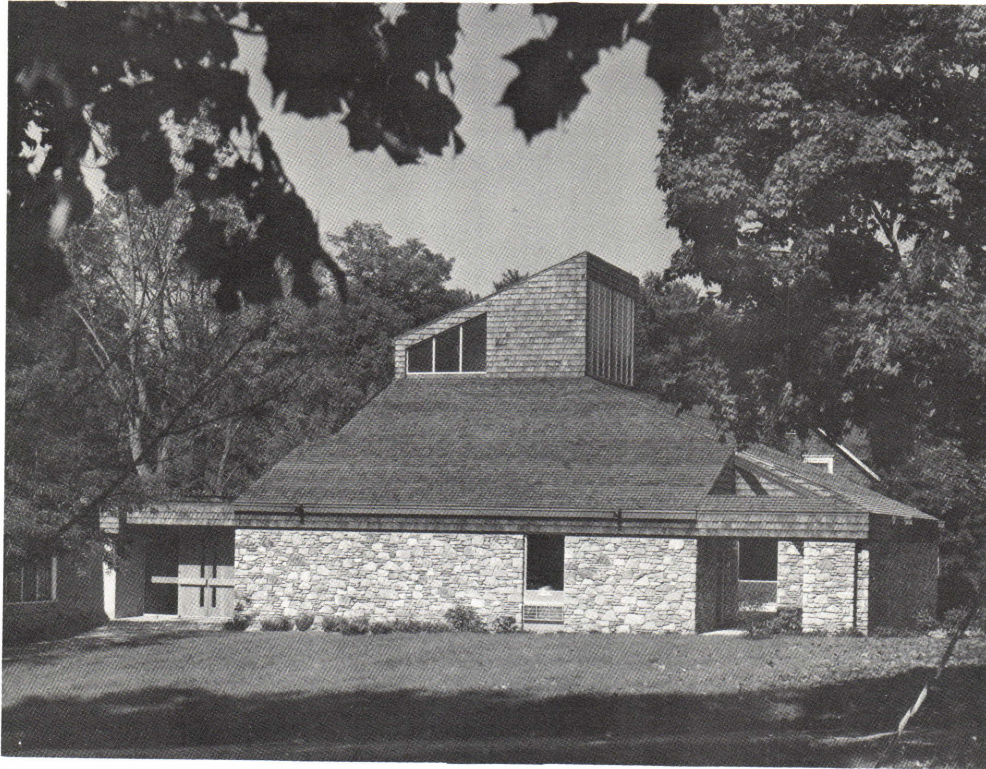

Abbott Construction Co.
General Contractor

Moore-Robinson Associates
Architect

Jury Comments:

This unpretentious design has very handsome interiors combining stone with natural wood trusses.

The exterior fits harmoniously into the site with natural stone walls.

N. C. Architectural Foundation Establishes Fellowship

Participating in the presentation were (l to r) J. Norman Pease, Jr., J. Hyatt Hammond, Chancellor Caldwell, Dean McKinney, Richard L. Rice and Turner G. Williams.

The N. C. Architectural Foundation has established a fellowship in North Carolina State University's School of Design in memory of the late William Henley Deitrick, Raleigh architect.

J. Hyatt Hammond of Asheboro, president of the N. C. Architectural Foundation Inc. and J. Norman Pease, Jr., FAIA, Charlotte architect, presented the first annual check from the Architectural Foundation to Chancellor John T. Caldwell, Dean Claude McKinney and other NCSU officials in a brief ceremony at the AIA Tower, headquarters for the N. C. Chapter, American Institute of Architects. The AIA Tower formerly housed the offices of Wm. A. Dietrick.

The annual fellowship memorializes Deitrick, an architect whose work included completion of the famed Dorton Arena at the State Fairgrounds and many other structures around Raleigh and the state. Deitrick oversaw the completion of the widely noted Dorton Arena after the original architect Matthew Nowicki died.

Rudolph Pate, vice chancellor for foundations and development, said

the annual awards will be placed in permanent trust funds of the N. C. Design Foundation, a statewide organization that raises private funds for the NCSU School of Design.

Dean of Design Claude McKinney cited the need for fellowships in school, which in recent years added graduate programs. "The financial demands of graduate professional education are so substantial that the fellowship is an important instrument in attracting outstanding students. This fellowship bearing Mr. Deitrick's name is doubly important for the School."

In presenting the first of the annual \$1,000 checks for the Deitrick Fellowships to Chancellor Caldwell, Pease said the fund was made possible by a gift from the late Mr. Deitrick and contributions from architects of the State.

Pease noted: "Bill Deitrick was a leader in his profession, a former president in the N. C. Chapter of the American Institute of Architects and winner of many awards given in recognition of his professional achievements."

Hyatt Hammond, president of the Architectural Foundation, said: "Dean Claude McKinney is making great strides with the School of Design . . . North Carolina is a better state because the School of Design was organized here in 1948. Its sound influence is visually apparent in all 100 counties. With the broad vision of this University and its leaders, this School will continue to be one of the nation's leading design schools.

In addition to the Deitrick Fellowship, the N. C. Architectural Foundation awarded NCSU \$3,000 for the general fund in the School of Design, \$500 for the Leslie N. Boney Scholarship and \$2,000 for scholarships for minority students.

Pease pointed out that many of the young architects who worked in Deitrick's office were educated at NCSU.

"It seems particularly fitting," Pease concluded, "that Mr. Deitrick's contributions to his profession and state be recognized by helping prepare others for a life in architecture."

...Folks keep askin' me what's so all-fired good about Sanford Brick. I tell 'em it's the fact that Sanford Brick is made from the best clay and shale in the world...

It's the fact that Sanford brick is made with modern, quality control techniques. A lot of 'em that we thought up ourselves.

It's the fact that just as much pride goes into every brick we make today as did when we fired 'em by hand.

All these things and lots more besides go into makin' Sanford brick the best brick you can buy... for any building purpose.

I oughta know. I help make 'em.

Tribute to John Tyler Caldwell

It was a happy occasion for members of the North Carolina Chapter AIA to have NCSU's Chancellor John Tyler Caldwell attend the Awards

Banquet at the Chapter's Winter Convention. In recognition of his support of the architectural profession, the following tribute was presented to him accompanied by a standing ovation in his honor.

"On this occasion, The North Carolina Chapter of The American Institute of Architects welcomes an opportunity to recognize a distinguished contributor to the human environment, and to honor this last meeting with John Caldwell as Chancellor of North Carolina State University.

"John Tyler Caldwell has been a most understanding personal and professional friend. He represents one of the most intelligent and

sympathetic of clients. He has been sensitive and responsive to the complex problems of humanity, and encouraged and stimulated progressive approach to good design and good architecture.

"He has constantly supported programs of education with a rare understanding of the expanding needs and explosive changes in demands on the architect by contemporary society. His enlightened intelligence, imagination, courage and convictions have inspired us. The past fifteen years of our association with this man have been rich in the gratification of mutual goals of service to the people of North Carolina. This brief expression is in tribute to that happy relationship."

From Binning's, exciting windows for that extra look of beauty in apartments.

BIN-A-WALL versatile curtain wall systems give apartments that extra look of beauty. BIN-A-WALL is an intermediate curtain wall system using between-slab shelf angle or stack construction. This provides aesthetic and structural characteristics that match the high standards of conventional curtain walls, but the sectional elements are lighter with quicker and easier installation and they cost less.

Whether you're building low or high-rise apartments specify BIN-A-WALL on your next project. For more information about BIN-A-WALL, write BINNING'S, Lexington, N. C. 27292, or call 704-249-9193.
