

The image shows the cover of a directory. The background is a photograph of a large brick industrial building, the East Campus Steam Plant, at night. A tall brick smokestack rises from the left side of the building. The building has several large arched windows, some of which are illuminated from within. A modern glass and steel structure is attached to the top of the brick building. The word "DUKE" is visible on the side of the building. In the foreground, there is a small sign that reads "EAST CAMPUS STEAM PLANT" and "DUKE UNIVERSITY". The sky is a deep blue.

This directory serves as historical documentation for AIA North Carolina. Missions, messages and leadership from years past can all be found in previous publications of the "AIA North Carolina Architecture Directory." Unforeseen difficulties have unfortunately delayed a new directory since early 2009. Because of this long break in publishing, this year's directory will cover the years 2009-2011. You will find President's Messages and leadership from 2009 until 2011. Firm and Architect listings however, are current to spring 2011.

Founded in 1857, The American Institute of Architects is the recognized advocate for the architectural profession in the United States.

With a membership of nearly 81,000 architects, interns and students, the AIA actively promotes the highest standards of professional ethics and advances the professional development of its members through continuing education. Speaking with a unified voice, the AIA represents architects in governmental and regulatory decisions that impact professional practice and the quality of life.

The North Carolina Chapter of The American Institute of Architects (AIA North Carolina) was founded in 1913, and is the largest statewide AIA chapter in the U.S. with over 2,200 members. The membership of AIA North Carolina includes about three-quarters of the architects who live in this state.

AIA North Carolina members work and live in every corner of the state, practicing in firms ranging in size from one to 400 persons. The membership is divided into seven geographical sections, located in Asheville, Charlotte, Eastern North Carolina, Piedmont (Greensboro/High Point), Triangle, Wilmington and Winston-Salem.

AIA North Carolina focuses its resources on five key areas, including:

GOVERNMENT AFFAIRS

With its current and future offices both located in close proximity to the State Capitol, AIA North Carolina is well-positioned to represent the architect's view in legislation and public policy development. AIA North Carolina opinions and positions are actively sought by lawmakers when dealing with legislation affecting construction, building codes and planning. Through a separate organization, AIA North Carolina maintains a well-funded political action committee.

PUBLIC AWARENESS OF ARCHITECTURE AND THE PROFESSION

Working through several volunteer committees and its local sections, AIA North Carolina actively pursues a concerted effort to help the public become more aware of architecture and the positive impact architects have on the built environment. The Chapter's annual Design Awards program is a prime opportunity to highlight to the public the finest work by North Carolina architects. Additionally, AIA local sections declare one week each year Architecture Week, hosting a wide variety of activities intended to engage and stimulate the public.

CONTINUING EDUCATION AND PROFESSIONAL DEVELOPMENT

Continuing education is a requirement for licensure renewal and for ongoing membership in the AIA. In 2011, the chapter will offer affordable and accessible programs dedicated to health-safety-welfare subject material. AIA members can participate in Knowledge Communities that specifically target career and practice needs ranging from health care facilities to historic preservation. The 2011 AIA North Carolina Design Conference, *Transform*, scheduled for September 7-10, 2011 in Raleigh, NC, provides architects a four-day opportunity for continuing education opportunities, professional development and networking amongst members from across the state of North Carolina.

MEMBER SERVICES

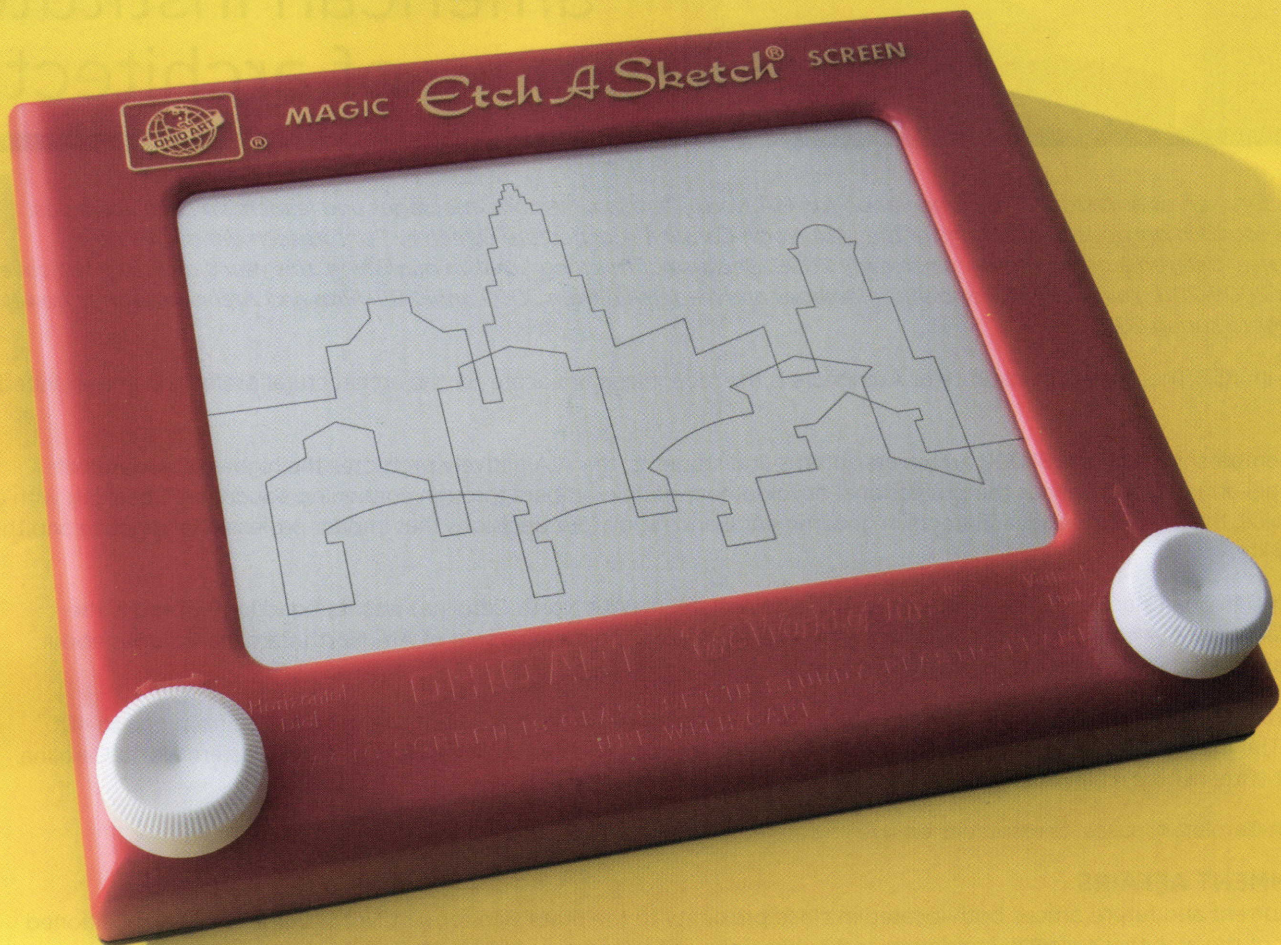

Publications and information are among the most valuable services available to AIA members. Members receive subscriptions to national publications such as ARCHITECT and many digital editions such as Eco-Home and Eco-Structure, along with the AIA North Carolina "News and Notes" newsletter. Websites are maintained at www.aianc.org and www.aia.org

COLLATERAL ORGANIZATIONS

AIA North Carolina maintains and develops relationships with a host of organizations which impact the architectural profession including construction trade associations, state regulatory agencies, accredited schools of architecture and other licensed design professionals.

Mission Statement

The AIA is the voice of the architectural profession and the resource for its members in service to society.

2009 president's message

No one can deny that 2009 was a difficult year, to say the least. Many changes occurred in our profession, our businesses and our personal lives. As difficult as some of these changes were, I still believe that our profession will arrive at the end of this recession (whenever that may be) with smarter business plans, a renewed understanding of the depth of our reach, and a continued passion for exceptional design!

As architects, however, we cannot take our eye off the ball: the future of our profession! Our role, as design professionals, has always been to envision a better future filled with imagination and unlimited possibilities. We cannot allow external forces to craft our personal or professional futures in these trying times. We must continue to lead.

In order to help us meet our potential, AIA North Carolina is working very hard, continuing to advance architects and our profession as leaders in this state and around the nation. Many of you may not even realize some of the great strides that AIANC has made for you in 2009. I would like to share just a few of the successes with you, and I encourage you to look even deeper into our organization to find where AIANC can benefit you.

LEADERSHIP: AIA North Carolina has been and continues to be a leader among other components – Our state ranks fourth in the country with the number of block delegate votes that we carry to the floor of the national convention. This year, I learned first-hand how important these votes are when it comes to transforming our profession for the better. Additionally, AIANC was the first component in the nation to sign and agree to support the Gateway Commitment – the national diversity statement which promotes greater representation of women, minorities, and GLBT members; a cultural ethos of inclusiveness; and mentorship for budding architects-to-be. Besides being the right thing to do, it promotes the profession's sustainability.

CONTINUING EDUCATION: At Grassroots 2009, AIANC received a Component Excellence Award for an "Outstanding Overall Program" for our Continuing Education Academy. Our CEA provides more relevant continuing education hours for its members than any other component. The CE committee, under Director John Wojciechowski's leadership, works tirelessly all year long to ensure relevant programs and a diversity of high-quality presentations.

LEGISLATIVE ACTION: Legislatively, AIANC and its members are extremely well-respected and valued by our political leaders. We fought several tough battles this year (including getting Chapter 11 of the IBC approved!) and expect to continue to work for many new issues for 2010. Legislative Day 2009 was an absolute success, with more than 75 architects & professionals coming to Raleigh to meet with legislators. I cannot tell you enough how important architects are to our political leaders, and your presence DOES make a difference in our profession's long-term results. I challenge you now to include Legislative Day 2010 on your calendar. We need you!

GOVERNANCE: During SARC 2009 in Greenville, (The South Atlantic Regional Conference) the membership voted to approve a By-law amendment to add one additional Director position to the Board of Directors. This amendment directly answers a need to provide more intense and focused attention on the many Legislative actions that occur each year. Although this new Director position is not an "assigned" position, it is thought that the new Directorship will oversee "Government Relations" for our organization. AIANC works continuously to preserve the rights and quality of our profession. This new position will provide leadership on issues that are relevant to our AIANC membership.

Just a word of caution before I close...I do believe that our profession is in jeopardy of losing one of our greatest resources: our young architects and associates. We must meet our responsibility to encourage our young architects and associates to stay involved in the profession; to learn from our experienced members; and to continue to imagine their future with passion and excitement. We must include these valuable individuals in our dreams, goals and plans for the profession and place confidence in their abilities to steer the organization through future challenges when necessary.

At SAR in Greenville, as I was walking the city's vibrantly revitalized downtown area, I noticed that at every fifth step or so, a ground plaque with an engraved quote had been inserted into the sidewalk. One quote, in particular, caught my eye and I want to share the thought with you...

"...if you are heading down a road with no troubles, then you are probably going nowhere..."

I stopped for a moment, and as I pondered the statement, I realized that AIA North Carolina is definitely going "somewhere"- and I was excited to be involved. Years ahead, I hope you will all consider your involvement in AIANC, remembering our shared responsibility - igniting the excitement and passion waiting for us all on the journey.

Honored to serve,

Ann Collier, AIA

90 Church Street
Asheville NC 28801-3622
Phone: (828) 252-0355
E-mail: rleeson@ads-architects.com

Roger is from the farmlands of Indiana and received his degrees from Ball State University. He says, "I learned about energy and sustainable design early because our family was a group of aging 'hippies'". After an internship in Atlanta with Cooper Carry and Associates, he relocated to North Carolina. His career focus has been designs for public clients, especially school buildings. He was a principal architect with Boney Architects and then LS3P Associates. Roger has been an advocate for efficient factory built construction methods. His designs have been among the first to incorporate geothermal technology and to achieve LEED certification for a public school project. He's currently with Architectural Design Studio in Asheville and continues to work for more sustainable communities. He's been active with public service affiliations including the Education Facilities Planners International, and he has served AIA on the Building Task Force and as Director of Membership Services. He's an enthusiastic skier and off-road bicyclist, and he enjoys camping and a variety of sports with his son Connor.

For more than 18 years John has used his skills as an architect to assist owners in pinpointing the issues that yield the proper questions. He in turn seeks to create a building that responds to those questions in ways beyond delivering a project that is on schedule, on budget, and sustainable. John believes that the architectural solutions to those questions should produce an environment that stimulates positive emotions and thoughts—a place that needs to be experienced. His dedication to family, his faith, and public education culminates into an approach to architecture that translates as “service to others.” He is registered in North Carolina, Ohio and South Carolina; and received his Bachelor of Architecture degree from Kent State University in Ohio.

2009 board of directors

South Atlantic Regional Council

The leadership of AIA North Carolina, along with representatives from AIA Georgia and AIA South Carolina, participates in the South Atlantic Regional Council (SARC). SARC enables the AIA components in the South Atlantic Region to share ideas and also maintain liaison with national activities of the Institute.

South Atlantic Region directors serve rotating three-year terms with representation shared equally among the three states. SAR directors attend all Institute Board meetings and also travel the three-state region as a means of communicating and sharing information with AIA members.

SARC convenes at least three times a year. Every three years, SARC hosts a regional convention. The most recent SAR convention was hosted by AIA South Carolina in 2009. The next SAR convention will be hosted by Georgia in 2012.

The South Atlantic Region has two representatives who serve on the Institute Board of Directors. In 2009, those individuals are:

William J. Stanley, III, FAIA,
South Atlantic Region Director
Stanley Love-Stanley, PC
1056 Spring Street NW
Atlanta, GA 30309
Phone: (404) 876-3055

Mr. Stanley was educated at the Georgia Institute of Technology and in 1972 became the first black graduate of its College of Architecture. In 1975 he became the youngest African American ever to receive an architectural registration in the South. Mr. Stanley began his private architectural practice in 1977 with his wife Ivenue Love-Stanley, FAIA; over the years the firm has grown to become one of the largest African-American practices in the country concentrating in architecture, planning, program management, and interior design throughout the U.S. and abroad. Mr. Stanley has lectured and served as a visiting critic and jury member throughout this country, in Europe, and in Africa; his work has been featured in numerous books and periodicals. Mr. Stanley is a past National President of the National Organization of Minority Architects; past President of 100 Black Men of Atlanta and AIA Georgia; past member of Architectural Record Magazine's Advisory Board, Georgia Institute of Technology's National Advisory Board and its Alumni Association Board of Trustees; member of the National Board of Planned Parenthood Federation of America, Southwest YMCA Board, St. Paul A.M.E. Church Trustee and Steward's Board, Sigma Pi Phi Fraternity's Kappa Boulé and Atlanta Life Financial Group Corporate Board; Secretary of the Morris Brown College Board of Trustees; Chairman of the Herndon Foundation Board; and numerous other affiliations.

Elsewhere around the state, CGD's projects include the Brookgreen Gardens Visitors Center (Pawley's Island) and the Worship Center for the First Baptist Church (North Augusta). CGD designed one of the nation's first Ray and Joan Kroc Corps Community Centers for the Salvation Army. Ed attended Clemson University, earning BA and March degrees. He joined the Wells Law Group Architects after graduation, followed by Hughes and Beattie Architects prior to joining CGD in 1983. He was elected treasurer of the Greenville section (1991), followed by terms as its secretary (1992), vice president (1993), and president (1994). Ed was also elected to office at the state component level, as a member of its board (1993-1995), vice president (2001), and president (2002). He was a member of the state's long range planning committee (2003-2005) and the Past Presidents' Society (2007). Regionally in 2001-2002 Ed was on the state's national convention committee for the Charlotte, N.C., event. Ed is married to Susan M. Zeigler, who serves as Financial Manager at Craig Gaulden Davis. They have two children. Claire Gray Zeigler is a 2007 graduate of Savannah College of Art and Design and is working in Charlotte as an interior designer with LS3P Associates, LTD. Tate Weston Zeigler is a senior, political science major at Furman University.

2010 president's message

Mike Cox, AIA

Chinese proverbs notwithstanding, in 2010 AIA North Carolina did what it could to prepare for a better future. Like our members across the state, we did not lack for challenges in 2010.

The dramatic economic downturn and cutbacks that took place at the end of 2008 and the beginning of 2009 did not show up in reduced membership until 2010. It wasn't as bad as we anticipated. The budget for 2010 was 90% of the 2009 budget, including cutbacks in operating expenses, staff and programs. It worked.

Despite extraordinary obstacles, the chapter quietly succeeded on several fronts. Section leadership for all seven sections across the state launched an unprecedented effort to reach out to a distressed membership. Kathie Rainey (Membership Services) worked with individual members and section leaders to make it possible in many cases for distressed members to retain their AIA membership.

Advocacy efforts at the state and national level for construction jobs were very aggressive in 2010. Success was modest in a political arena that continued to face its own difficulties, but the interests of architects and the construction industry were advanced and they will be revisited in 2011.

Rewriting board policies was among the housekeeping efforts that made way for more serious change, like the complete reorganization and separation of the North

Carolina Architectural Foundation, just one of the steps required as part of the creation of the North Carolina Center for Architecture and Design.

Meanwhile, AIA Triangle was recognized at Grassroots for their membership effort and in Miami, a record seven new members were inducted as Fellows in 2010. Back in North Carolina, the chapter held a memorable Design Conference in Asheville, highlighted by the moonlight awards ceremony on the grounds of the Biltmore Estate.

For most of the year, the realization of the Center for Architecture remained as elusive as ever it had been during the past six years. With time running out, 25 members stepped up to close the gap in financing, the AIA tower sold to a responsible owner and Notice to Proceed was given in November for construction of the North Carolina Center for Architecture and Design. We will move into our new home in 2011.

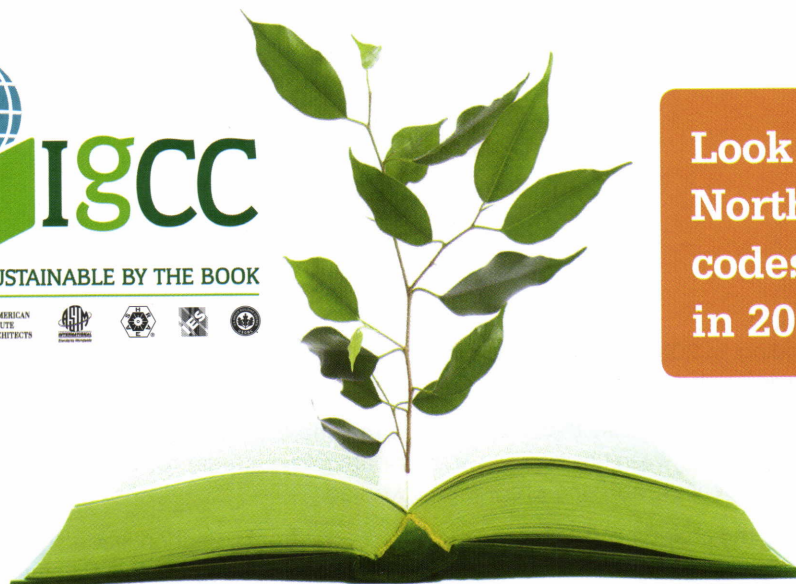

It was a challenging year, but it made the small successes all the more gratifying. Thank you all for your help in moving our association, our profession and our members a little closer to the start of a great decade.

A handwritten signature in dark ink, appearing to read 'M. Cox'.

Mike Cox, AIA

For more than 18 years John has used his skills as an architect to assist owners in pinpointing the issues that yield the proper questions. He in turn seeks to create a building that responds to those questions in ways beyond delivering a project that is on schedule, on budget, and sustainable. John believes that the architectural solutions to those questions should produce an environment that stimulates positive emotions and thoughts—a place that needs to be experienced. His dedication to family, his faith, and public education culminates into an approach to architecture that translates as "service to others." He is registered in North Carolina, Ohio and South Carolina; and received his Bachelor of Architecture degree from Kent State University in Ohio.

2011 president's message

2011 Will Be a Transformative Year

2011 promises to be a transformative year in the life of AIA North Carolina for a number of reasons. First and foremost, changes in technology, a renewed focus on sustainability, changes in project delivery, advances in integrated project delivery, greater collaboration, and an ever increasing competitive job market are transforming the way architects approach projects and design them.

This year will also mark the transformation of our AIA Headquarters. We no longer own the historic AIA Tower in Raleigh and have begun as tenants in the tower for the next year as we construct the new home for the Center for Architecture and Design. The new facility promises to offer new opportunities for us to reach out to our members, our constituents, and the community at large. A new CfAD Program Committee has been empanelled and is developing programs for exhibits, lectures, continuing education

offerings, and a variety of other uses that will elevate the voice of architects across the state and serve as a national model. Construction has already begun and is scheduled to be complete in November 2011.

The AIA Board of Directors will be focusing their attention on achieving the following goals in 2011:

- Create member value by supporting emerging professionals and assisting displaced architects
- Create a strong Design Conference that addresses current trends in design and practice
- Collaborate and provide better communication among all 7 AIA NC Sections
- Advocate for the profession through legislative agenda and working with allied professionals
- Establish new programs in the Center for Architecture and Design that serve members and community

AIA NC has many action items to work on for the coming year as we look to serve our members. The Architectural Foundation will gain independence from the AIA Board of Directors and will serve as an integral vehicle for funding programs in the new Center for Architecture and Design. The Public Relations Committee will ensure the success of our publications outreach with our new strategic partner, Naylor, LLC. The Membership Committee will launch a member value campaign that will show the tangible value of being an AIA member. Emerging professionals will be engaged with relevant programs that address mentorship and leadership training. Communications amongst the Sections will be enriched by a concerted effort to synchronize and share information so that members can take advantage of the full offerings across the state.

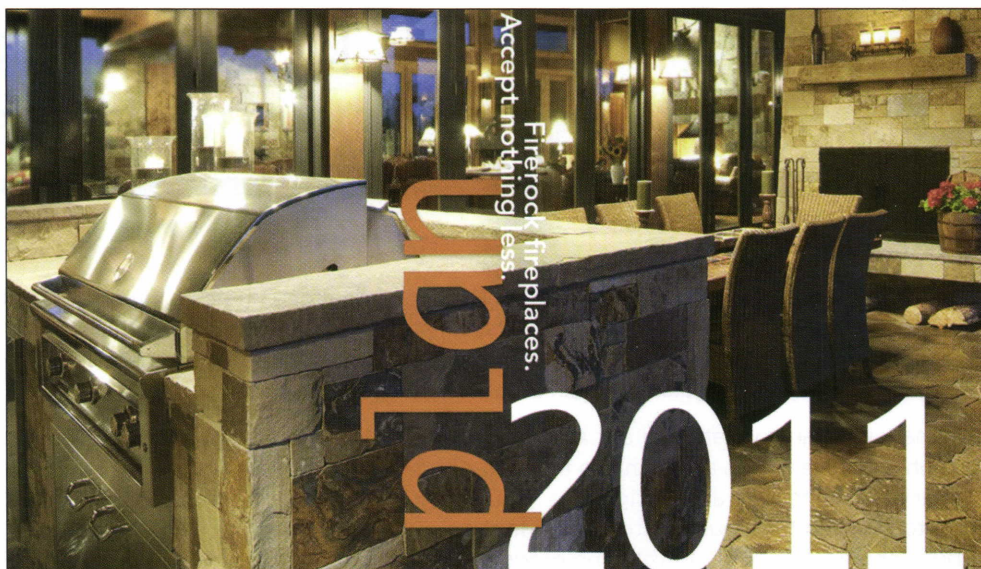

AIA National instituted a new strategic planning document called "The Weave" last year and has encouraged components across the country to adopt this structure for their planning efforts. AIA NC and its seven Sections have begun implementing the Weave and will make our strategic plan available to our membership online in the first quarter of this year. Members are encouraged to search other components' Weave documents to see what is happening around the AIA components around the country.

Advocacy continues to be a strong area of attention in the coming year, largely led by the efforts of Ken Mayer, Governmental Affairs Director, and the Joint Recovery Coalition. AIA will be advocating on your behalf for freeing up money to move projects forward and to get architects, engineers, and the construction industry back to work. Your participation is needed throughout the year as we take our agenda to the State Legislature.

Our 2011 annual Design Conference will promote transformation as we explore practices in architecture and design and the impact that technology, integrated practice, and sustainability are playing on reshaping our profession.

I look forward to serving you in the year ahead, and encourage you to stay engaged in the AIA. Our future depends on it.

For more than 18 years John has used his skills as an architect to assist owners in pinpointing the issues that yield the proper questions. He in turn seeks to create a building that responds to those questions in ways beyond delivering a project that is on schedule, on budget, and sustainable. John believes that the architectural solutions to those questions should produce an environment that stimulates positive emotions and thoughts—a place that needs to be experienced. His dedication to family, his faith, and public education culminates into an approach to architecture that translates as "service to others." He is registered in North Carolina, Ohio and South Carolina; and received his Bachelor of Architecture degree from Kent State University in Ohio.

David Crawford, Hon. AIA

Executive Vice President

David Crawford joined AIA North Carolina at the beginning of 2001 after serving as Executive Director with AIA San Diego for 10 years. Prior to that, he served as Director of Professional Practice and Assistant Director of Government Relations with the AIA California Council for four years.

Crawford received his B.A. in Political Science from California State University, Fullerton. He was selected to finish his undergraduate work as part of the Cal State University system's prestigious Sacramento Semester Program. Following graduation in 1984, he worked briefly as a political operative for a California State Assembly member and then began his legislative career as a manager for the state's first online legislative tracking service. He began his lobbying career in 1986 with the California Probation, Parole and Correctional Association.

Crawford sat on the Board of Directors of the two accredited architecture schools in San Diego for five years and served on various city and regional advisory committees. He is a member of the American Society of Association Executives and in 1996-97 chaired the California Council of Architectural Component Executives (California CACE). In 2006, he was President of the National Council of Architectural Component Executives.

Jo Ellen High

Business Manager/Programs Director

Jo Ellen High joined the AIA North Carolina staff in August 1989. Some of her duties as business manager include managing the financial records, maintaining records for AIA-PAC and NC Arch. Foundation, and serving as staff liaison for the annual design awards program. For five years prior to working with the AIA, High held a financial position with the Biblical Recorder, the news journal for the Baptist State Convention, headquartered in Raleigh. High attended business college and received an accounting certificate in 1970. She has previous experience in the fields of insurance and mortgage banking. After 21 years of service, Jo Ellen will officially retire in March of 2011.

Marynell Gehrke

Director of Special Events

Marynell Gehrke joined the AIA North Carolina staff in January 1995 after working since 1992 with Olson Management Group, an association management company. As director of special events, Gehrke acts as staff liaison for the convention (Summer Design Conference) and continuing education committees and all AIA North Carolina meeting and conference planning. Gehrke received a Bachelor of Science degree from the University of North Carolina in industrial relations in 1984.

Kathie Rainey

Director of Member Services

Kathie Rainey joined AIA North Carolina in 1998 as Administrative Assistant to the Executive Vice President. A North Carolina native, she comes from Pinehurst, but calls Raleigh home now. Her many years of retail management bring a strong background of customer service to our members. Her experience as an executive assistant in various corporate settings is well suited to the AIA.

Keri Dixon

Director of Programs and Communications

Keri Dixon joined AIA NC in June 2010. Keri is a graduate of Western Carolina University in North Carolina and studied Professional Writing and History. Keri has a background in communications, and previously worked as the Director of Communications for The Episcopal Diocese of East Carolina. She has experience with creating and maintaining websites, electronic newsletters, and magazines (digital and print), as well as experience creating short videos and photographic coverage of events. She uses these skills as a part of the AIA NC staff to offer members services for sharing information throughout the state. Her major responsibilities include the production of the Architect newsletter, maintenance of the AIA NC website, and email updates to AIA members through the News & Notes. Her background in communications makes her well suited for creating an active and interactive environment for AIA NC members.

GOOD DESIGN

MAKES A DIFFERENCE

For almost 150 years, members of the American Institute of Architects have worked with each other and their communities to create more valuable, healthy, secure, and sustainable buildings and cityscapes. AIA members have access to the right people, knowledge, and tools to create better design—and help clients and communities make their visions real.

Visit www.aia.org to see enhanced collaboration in action.

The American Institute of Architects bestows the recognition of Fellowship for achievement in architecture on members who have contributed notably to the advancement of the profession of architecture. With the exception of the Gold Medal, fellowship is the highest honor the AIA can bestow on a member. It is conferred on architects with at least 10 years of membership in the AIA who have made significant contributions in the following areas: the aesthetic, scientific, and practical efficiency of the profession; the standards of architectural education, training, and practice; the building industry through leadership in the AIA and other related professional organizations; advancement of living standards of people through an improved environment; and to society through significant public service.

Founded in 1952, the College of Fellows includes approximately five percent of the total AIA membership. Those advanced to fellowship can use "FAIA" after their names in recognition of their contributions in design, education, research or public service.

AIA north carolina chapter awards and honors

AIA North Carolina announced its 2008 award winners at the Design Awards Banquet held on the evening of Saturday, August 23, 2008 at the Westin Hotel in Charlotte, North Carolina.

In 2009, the award winners were announced on Saturday, August 22 at the North Carolina Museum of Natural Sciences in Raleigh, North Carolina.

The 2010, winners were announced during an awards banquet held at the gardens at Biltmore Estate in Asheville, North Carolina on Saturday, September 18, 2010.

A five-person Awards committee, appointed yearly by the Chapter president and chaired by the immediate past president, is responsible for reviewing the nominations and selecting a recipient.

AIA North Carolina - F. Carter Williams Gold Medal

This is the highest honor presented by the Chapter to a member of AIA North Carolina. It is awarded to an individual in recognition of a distinguished career or extraordinary accomplishments as an architect. The Gold Medal was created by the Board of Directors in 1976. The first recipient was Luther Snow Lashmit. Until 1998, Lashmit was the only architect to receive this award. It was at that time re-named in honor of the late Raleigh architect F. Carter Williams, FAIA. The Williams family has established an endowment in support of the Gold Medal.

ELIGIBILITY

A current or deceased member of AIA North Carolina is eligible to receive the Gold Medal. No more than one such award shall be made in any year. Individuals who are current members of the Chapter Board, one year removed from the Board or members of the Awards committee are ineligible for consideration.

NOMINATIONS

Nominations may be made by members, the public, or by AIA North Carolina sections.

Please contact AIA North Carolina at 919-833-6656 for nomination deadlines. Nominations should include the following information:

- A nomination letter that summarizes the contributions made by the individual
- A brief biography of the nominee not to exceed four pages

- Miscellaneous material (clippings, articles, etc.) not to exceed three pages
- Letters of support, not to exceed five, from AIA North Carolina members; letters should be explicit in their recommendation and contain specific reasons for support.

GOLD MEDAL RECIPIENTS

AIA North Carolina Firm Award

The AIA North Carolina Firm Award shall be awarded to a North Carolina firm that has consistently produced quality architecture with a verifiable level of client satisfaction for a period of at least 10 years as an established presence in this state. This award is the highest honor the Chapter can bestow upon a firm.

ELIGIBILITY

North Carolina architectural firms practicing under the leadership of either a single AIA North Carolina member principal or several AIA North Carolina member principals are eligible for the Firm Award. In addition, firms that have been reorganized and whose name has been changed or modified are also eligible, as long as the firm has been in operation in North Carolina for a period of at least 10 years. Although firms that are headquartered in other states or firms that perform the majority of their work in other states or countries are eligible, the firm's work and impact within the state of North Carolina shall be of primary consideration. A firm owned or managed by the Chapter president, president-elect or members of the Awards committee shall not be eligible for consideration.

NOMINATIONS

Nominations may be made by members, the public, or by AIA North Carolina sections. Please contact AIA North Carolina at 919-833-6656 for nomination deadlines. The nominations should include the following information:

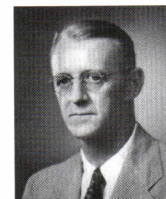

- A nomination letter by a member, AIA North Carolina Section or a representative of the public, summarizing the firm's contributions in terms of design excellence and client satisfaction
- A brief biography of all firm principals and a history of the firm
- A firm brochure (if available)

AIA North Carolina Gold Medalist J. Hyatt Hammond, FAIA has established a fund to provide scholarships for young professionals to attend the AIA North Carolina Summer Design Conference.

ELIGIBILITY

Eligibility is restricted to AIA North Carolina associate members and architect members who have been licensed for less than 10 years.

APPLICATION PROCESS & SCHOLARSHIP PRESENTATION

AIA North Carolina makes scholarship applications available in the months prior to the AIA North Carolina Summer Design Conference. Submitted applications are reviewed by board members of the North Carolina Architectural Foundation. Winners are notified at least one month prior to the Summer Design Conference. Scholarship money is provided to the recipients after the conference, based upon receipts provided up to a total of \$500.

code of ethics & professional conduct

PREAMBLE

Members of The American Institute of Architects are dedicated to the highest standards of professionalism, integrity and competence. This Code of Ethics and Professional Conduct states guidelines for the conduct of members in fulfilling those obligations. The **Code** is arranged in three tiers of statements: Canons, Ethical Standards and Rules of Conduct:

- *Canons* are broad principles of conduct.
- *Ethical Standards (E.S.)* are more specific goals toward which Members should aspire in professional performance and behavior.
- **Rules of Conduct (Rule) are mandatory; violation of a Rule is grounds for disciplinary action by the Institute.**

Rules of Conduct, in some instances, implement more than one Canon or Ethical Standard.

The **Code** applies to the professional activities of all classes of members, wherever they occur. It addresses responsibilities to the public, which the profession serves and enriches; to the clients and users of architecture and in the building industries who help to shape the built environment; and to the art and science of architecture, that continuum of knowledge and creation, which is the heritage and legacy of the profession.

Commentary is provided for some of the Rules of Conduct. That commentary is meant to clarify or elaborate the intent of the rule. The commentary is not part of the **Code**. Enforcement will be determined by application of the Rules of Conduct alone; the commentary will assist those seeking to conform their conduct to the **Code** and those charged with its enforcement.

Statement in Compliance With Antitrust Law

The following practices are not, in themselves, unethical, unprofessional, or contrary to any policy of The American Institute of Architects or any of its components:

- (1) Submitting, at any time, competitive bids or price quotations, including in circumstances where price is the sole or principal consideration in the selection of an architect;
- (2) Providing discounts; or
- (3) Providing free services.

Individual architects or architecture firms, acting alone and not on behalf of the Institute or any of its components are free to decide for themselves whether or not to engage in any of these practices. Antitrust law permits the Institute, its components, or members to advocate legislative or other government policies or actions relating to these practices. Finally, architects should continue to consult with state laws or regulations governing the practice of architecture.

CANON I General Obligations

Members should maintain and advance their knowledge of the art and science of architecture, respect the body of architectural accomplishment, contribute to its growth, thoughtfully consider the social and environmental impact of their professional activities, and exercise learned and uncompromised professional judgment.

E.S. 1.1 Knowledge and Skill: Members should strive to improve their professional knowledge and skill.

Rule 1.101 In practicing architecture, Members shall demonstrate a consistent pattern of reasonable care and competence, and shall apply the technical knowledge and skill which is ordinarily applied by architects of good standing practicing in the same locality.

Commentary: By requiring a "consistent pattern" of adherence to the common law standard of competence, this rule allows for discipline of a member who more than infrequently does not achieve that standard. Isolated instances of minor lapses would not provide the basis for discipline.

E.S. 1.2 Standards of Excellence: Members should continually seek to raise the standards of aesthetic excellence, architectural education, research, training and practice.

E.S. 1.3 Natural and Cultural Heritage: Members should respect and help conserve their natural and cultural heritage while striving to improve the environment and the quality of life within it.

E.S. 1.4 Human Rights: Members should uphold human rights in all their professional endeavors.

Rule 1.401 Members shall not discriminate in their professional activities on the basis of race, religion, gender, national origin, age, disability or sexual orientation.

E.S. 1.5 Allied Arts & Industries: Members should promote allied arts and contribute to the knowledge and capability of the building industries as a whole.

CANON II Obligations to the Public

Members should embrace the spirit and letter of the law governing their professional affairs and should promote and serve the public interest in their personal and professional activities.

E.S. 2.1 Conduct: Members should uphold the law in the conduct of their professional activities.

Rule 2.101 Members shall not, in the conduct of their professional practice, knowingly violate the law.

Commentary: The violation of any law, local, state or federal, occurring in the conduct of a Member's professional practice, is made the basis for discipline by this rule. This includes the federal Copyright Act, which prohibits copying architectural works without the permission of the copyright owner. Allegations of violations of this rule must be based on an independent finding of a violation of the law by a court of competent jurisdiction or an administrative or regulatory body.

Rule 2.102 Members shall neither offer nor make any payment or gift to a public official with the intent of influencing the official's judgment in connection with an existing or prospective project in which the Members are interested.

Commentary: This rule does not prohibit campaign contributions made in conformity with applicable campaign financing laws.

Rule 2.103 Members serving in a public capacity shall not accept payments or gifts which are intended to influence their judgment.

Rule 2.104 Members shall not engage in conduct involving fraud or wanton disregard of the rights of others.

Commentary: This rule addresses serious misconduct whether or not related to a member's professional practice. When an alleged violation of this rule is based on a violation of a law, or of fraud, then its proof must be based on an independent finding of a violation of the law or a finding of fraud by a court of competent jurisdiction or an administrative or regulatory body.

Rule 2.105 If, in the course of their work on a project, the members become aware of a decision taken by their employer or client which violates any law or regulation and which will, in the members' judgment, materially affect adversely the safety to the public of the finished project, the members shall: (a) advise their employer or client against the decision, (b) refuse to consent to the decision, and (c) report the decision to the local building inspector or other public official charged with the enforcement of the applicable laws and regulations, unless the members are able to cause the matter to be satisfactorily resolved by other means.

Commentary: This rule extends only to violations of the building laws that threaten the public safety. The obligation under this rule applies only to the safety of the finished project, an obligation coextensive with the usual undertaking of an architect.

Rule 2.106 Members shall not counsel or assist a client in conduct that the architect knows, or reasonably should know, is fraudulent or illegal.

E.S. 2.2 Public Interest Services: Members should render public interest professional services, including pro bono services, and encourage their employees to render such services. Pro bono services are those rendered without expecting compensation, including those rendered for indigent persons, after disasters, or in other emergencies.

E.S. 2.3 Civic Responsibility: Members should be involved in civic activities as citizens and professionals, and should strive to improve public appreciation and understanding of architecture and the functions and responsibilities of architects.

Rule 2.301 Members making public statements on architectural issues shall disclose when they are being compensated for making such statements or when they have an economic interest in the issue.

CANON III

Obligations to the Client

Members should serve their clients competently and in a professional manner, and should exercise unprejudiced and unbiased judgment when performing all professional services.

E.S. 3.1 Competence: Members should serve their clients in a timely and competent manner.

Rule 3.101 In performing professional services, members shall take into account applicable laws and regulations. Members may rely on the advice of other qualified persons as to the intent and meaning of such regulations.

Rule 3.102 Members shall undertake to perform professional services only when they, together with those whom they may engage as consultants, are qualified by education, training, or experience in the specific technical areas involved.

Commentary: This rule is meant to ensure that members not undertake projects that are beyond their professional capacity. Members venturing into areas that require expertise they do not possess may obtain that expertise by additional education, training, or through the retention of consultants with the necessary expertise.

Rule 3.103 Members shall not materially alter the scope or objectives of a project without the client's consent.

E.S. 3.2 Conflict of Interest: Members should avoid conflicts of interest in their professional practices and fully disclose all unavoidable conflicts as they arise.

Rule 3.201 A Member shall not render professional services if the member's professional judgment could be affected by responsibilities to another project or person, or by the member's own interests, unless all whom rely on the member's judgment consent after full disclosure.

Commentary: This rule is intended to embrace the full range of situations that may present a member with a conflict between his or her interests or responsibilities and the interest of others. Those who are entitled to disclosure may include a client, owner, employer, contractor, or others who rely on or are affected by the member's professional decisions. A member who cannot appropriately communicate about a conflict directly with an affected person must take steps to ensure that disclosure is made by other means.

Rule 3.202 When acting by agreement of the parties as the independent interpreter of building contract documents and the judge of contract performance, members shall render decisions impartially.

Commentary: This rule applies when the member, though paid by the owner and owing the owner loyalty, is nonetheless required to act with impartiality in fulfilling the architect's professional responsibilities.

E.S. 3.3 Candor and Truthfulness: Members should be candid and truthful in their professional communications and keep their clients reasonably informed about the clients' projects.

Rule 3.301 Members shall not intentionally, or recklessly, mislead existing or prospective clients about the results that can be achieved through the use of the members' services, nor shall the members state that they can achieve results by means that violate applicable law or this Code.

Commentary: This rule is meant to preclude dishonest, reckless, or illegal representations by a member either in the course of soliciting a client or during performance.

E.S. 3.4 Confidentiality: Members should safeguard the trust placed in them by their clients.

Rule 3.401 Members shall not knowingly disclose information that would adversely affect their client or that they have been asked to maintain in confidence, except as otherwise allowed or required by this Code or applicable law.

Commentary: To encourage the full and open exchange of information necessary for a successful professional relationship, members must recognize and respect the sensitive nature of confidential client communications. The law does not recognize an architect-client privilege, however, the rule permits a member to reveal a confidence when a failure to do so would be unlawful or contrary to another ethical duty imposed by this Code.

CANON IV

Obligations to the Profession

Members should uphold the integrity and dignity of the profession.

E.S. 4.1 Honesty and Fairness: Members should pursue their professional activities with honesty and fairness.

Rule 4.101 Members having substantial information which leads to a reasonable belief that another member has committed a violation of this Code, which raises a serious question as to that member's honesty, trustworthiness, or fitness as a member, shall file a complaint with the National Ethics Council.

Commentary: Often, only an architect can recognize that the behavior of another architect poses a serious question as to that other's professional integrity. In those circumstances, the duty to the professional's calling requires that a complaint be filed. In most jurisdictions, a complaint that invokes professional standards is protected from a libel or slander action if the complaint was made in good faith. If in doubt, a member should seek counsel before reporting on another under this rule.

Rule 4.102 Members shall not sign or seal drawings, specifications, reports, or other professional work for which they do not have responsible control.

Commentary: Responsible control means the degree of knowledge and supervision ordinarily required by the professional standard of care. With respect to the work of licensed consultants, members may sign or seal such work if they have reviewed it, coordinated its preparation, or intend to be responsible for its adequacy.

Rule 4.103 Members speaking in their professional capacity shall not knowingly make false statements of material fact.

Commentary: This rule applies to statements in all professional contexts, including applications for licensure and AIA membership.

E.S. 4.2 Dignity and Integrity: Members should strive, through their actions, to promote the dignity and integrity of the profession, and to ensure that their representatives and employees conform their conduct to this Code.

Rule 4.201 Members shall not make misleading, deceptive, or false statements or claims about their professional qualifications, experience or performance, and shall accurately state the scope and nature of their responsibilities in connection with work for which they are claiming credit.

Commentary: This rule is meant to prevent members from claiming or implying credit for work which they did not do, misleading others and denying other participants in a project their proper share of credit.

Rule 4.202 Members shall make reasonable efforts to ensure that those over whom they have supervisory authority conform their conduct to this Code.

Commentary: What constitutes "reasonable efforts" under this rule is a common sense matter. As it makes sense to ensure that those over whom the architect exercises supervision be made generally aware of the Code, it can also make sense to bring a particular provision to the attention of a particular employee when a situation is present which might give rise to violation.

CANON V

Obligations to Colleagues

Members should respect the rights and acknowledge the professional aspirations and contributions of their colleagues.

E.S. 5.1 Professional Environment: Members should provide their associates and employees with a suitable working environment, compensate them fairly and facilitate their professional development.

E.S. 5.2 Intern and Professional Development: Members should recognize and fulfill their obligation to nurture fellow professionals as they progress through all stages of their career, beginning with professional education in the academy, progressing through internship and continuing throughout their career.

E.S. 5.3 Professional Recognition: Members should build their professional reputation on the merits of their own service and performance, and should recognize and give credit to others for the professional work they have performed.

Rule 5.301 Members shall recognize and respect the professional contributions of their employees, employers, professional colleagues and business associates.

Rule 5.302 Members leaving a firm shall not, without the permission of their employer or partner, take designs, drawings, data, reports, notes or other materials relating to the firm's work, whether or not performed by the member.

Rule 5.303 A member shall not unreasonably withhold permission from a departing employee or partner to take copies of designs, drawings, data, reports, notes or other materials relating to work performed by the employee or partner that are not confidential.

Commentary: A member may impose reasonable conditions, such as the payment of copying costs, on the right of departing persons to take copies of their work.

CANON VI

Obligations to the Environment

Members should promote sustainable design and development principles in their professional activities.

E.S. 6.1 Sustainable Design: In performing design work, members should be environmentally responsible and advocate sustainable building and site design.

E.S. 6.2 Sustainable Development: In performing professional services, members should advocate the design, construction, and operation of sustainable buildings and communities.

E.S. 6.3 Sustainable Practices: Members should use sustainable practices within their firms and professional organizations, and they should encourage their clients to do the same.

RULES OF APPLICATION, ENFORCEMENT AND AMENDMENT

APPLICATION

The **Code of Ethics and Professional Conduct** applies to the professional activities of all members of the AIA.

ENFORCEMENT

The Bylaws of the Institute state procedures for the enforcement of the **Code of Ethics and Professional Conduct**. Such procedures provide that:

- (1) Enforcement of the **Code** is administered through a National Ethics Council, appointed by the AIA Board of Directors.
- (2) Formal charges are filed directly with the National Ethics Council by members, components or anyone directly aggrieved by the conduct of the members.
- (3) Penalties that may be imposed by the National Ethics Council are:
 - (a) Admonition
 - (b) Censure
 - (c) Suspension of membership for a period of time
 - (d) Termination of membership.
- (4) Appeal procedures are available.
- (5) All proceedings are confidential, as is the imposition of an admonishment; however, all other penalties shall be made public.

Enforcement of Rules 4.101 and 4.202 refer to and support enforcement of other Rules. A violation of Rules 4.101 or 4.202 cannot be established without proof of a pertinent violation of at least one other Rule.

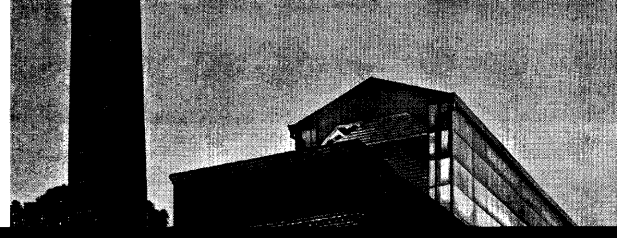

AMENDMENT

The **Code of Ethics and Professional Conduct** may be amended by the convention of the Institute under the same procedures as are necessary to amend the Institute's Bylaws. The **Code** may also be amended by the AIA Board of Directors upon a two-thirds vote of the entire Board.

***2007 Edition.** This copy of the **Code of Ethics** is current as of December 2007.

continuing education mandatory for licensure and membership

North Carolina architects must fulfill a program of continuing education each year in order to renew their licenses. Continuing education has been a membership requirement for the American Institute of Architects for several years now. The two requirements are slightly different, but compatible.

Here's the bottom line: AIA architects in North Carolina should obtain a total of 18 learning units per calendar year. Of these 18 hours, at least eight hours must be in subjects designated as Health, Safety, and Welfare (HSW). Of these eight HSW hours, at least four hours must be about a Sustainable Design (SD) topic.

State Licensure Requirements

Each year, North Carolina architects must complete a verifiable program of 12 contact hours of continuing education. The contact hours must be in health-safety-welfare subject material. Contact hours may not be carried over from one calendar year to the next. HSW Programs provided by AIA registered providers will be accepted by the North Carolina Board of Architecture. The licensing board will also accept an AIA member's continuing education transcript as evidence of continuing education fulfillment.

AIA Requirements

Developed to demonstrate AIA members' lifelong commitment to learning, the AIA Continuing Education System (CES) enhances knowledge, competency and competitiveness. In summary, the Institute's plan includes the following:

- Members must have 18 hours of continuing education per year in order to maintain membership.
- The 18 hours must include eight contact hours in health/safety-related subject matter.

AIA North Carolina Continuing Education Academy

AIA North Carolina has successfully launched an aggressive effort to provide its members affordable, accessible and relevant continuing education. The AIA North Carolina Continuing Education Academy is the winner of the 1999 AIA/CES Award for Excellence. AIA North Carolina was the only AIA chapter or component in America to win this prestigious award for excellence in continuing education programming and member service.

In 2011, AIA North Carolina plans to offer seminars at various locations around the state. The AIA North Carolina Design Conference, scheduled for September 8-10 at the Raleigh Convention Center in Raleigh, North Carolina, provides an opportunity for members to fulfill their requirements in a compressed period of time.

Visit the AIA North Carolina website at **www.aianc.org** for an updated listing of continuing education programs in the Southeast. In addition, the seven local sections of AIA North Carolina typically offer AIA/CES programs at their meetings.

Where AIA CES Records Are Kept

The CES record-keeping is performed at the AIA National Headquarters in Washington D.C. Call **1-800-242-3837 ext. 3** for questions or comments on AIA/CES records. This record-keeping center monitors contact hours earned by AIA members and keeps track of registered providers. AIA members may monitor their continuing education progress and transcripts by visiting AIA Online at **www.aia.org/education/index.htm**.

architectural education

N.C. State University

The Department of Architecture at N.C. State University was established in 1948 as one of two original academic components in the School of Design. The School of Design experienced a long period of development, establishing a reputation for innovation. In the fall of 2000, the department was given school status and the school was granted college status.

The College is presently led by Dean Marvin J. Malecha, FAIA, who was appointed to the position in August 1994. Robin Abrams, Ph.D., AIA, was appointed Head of the School of Architecture, and leads the school as the first woman to hold that position.

The School of Architecture has grown its mission and curricular offerings over the years to include programs leading to the following three degrees:

Bachelor of Environmental Design in Architecture (BEDA)

A four-year pre-professional curriculum that serves as the foundation for the two advanced programs. The curriculum includes a balance of general studies (English, mathematics, science and humanities), design studio courses and architectural support courses (history, technology, methods and theory).

Bachelor of Architecture (B. ARCH)

A one-year professional curriculum that builds on the four-year BEDA or other equivalent program.

Master of Architecture (M. ARCH)

Three tracks lead to the professional M. ARCH degree: *Track I* is a two-year program for holders of the BEDA or equivalent four-year pre-professional degree; *Track II* is a three-semester second professional degree program for holders of the B. ARCH degree; *Track III* accepts students with degrees in non-architectural fields into a three and one half year program.

Both the B. ARCH and M. ARCH are professional degrees accredited by the National Architectural Accrediting Board. The most recent accreditation action took place in 2006 extending accreditation of both programs for six years. The College of Design annually admits 130 freshmen and transfer students into one of five studio-based programs. Following an interdisciplinary fall semester, students begin their architectural studies in the spring semester of the first year. For information about the undergraduate admissions standards and procedures, contact the College of Design, N.C. State University, Box 7701, Raleigh, NC 27695-7701.

Admissions to the B. ARCH and M. ARCH programs are by application to the School of Architecture. For additional information, contact the School of Architecture, College of Design, N.C. State University, Box 7701, Raleigh, NC 27695-7701.

UNC Charlotte

The School of Architecture, within the College of Arts + Architecture, at UNC Charlotte graduated its first students with professional degrees in 1976. In 2010, the School received its seventh consecutive full term accreditation from the National Architectural Accreditation Board (NAAB). The College is led by Dean Kenneth Lambla, AIA, and the School of Architecture is led by Director Christopher Jarrett. The curriculum provides a balance between theory and application, and general and professional education. Students may pursue a double major or minor in another field such as urban design, urban studies, art, construction management, and business/real estate development. The curriculum is organized as follows:

Undergraduate Programs

Bachelor of Arts in Architecture (B.A. in Arch.)
Bachelor of Architecture (B. Arch.)

The Bachelor of Arts in Architecture (B.A. in Arch.) is the pre-professional, four-year undergraduate program in architecture. In the first three years, students are enrolled in general education and core architecture courses, including architectural design studio in the first year. In design studios and seminars, which occur each semester, students acquire the fundamentals of visual and spatial design, problem solving, conceptualization, technology and environmental influences. In the fourth year, students select design studios and seminars related to topical interests such as energy and sustainability, digital design methods, urban design and conceptual themes. In addition, students extend their knowledge of architectural history and technology while having the opportunity to pursue individual interests through architectural elective seminars. The B.A. in Arch. is awarded at the end of the fourth year.

In the fall semester of the fourth year, students may elect to pursue one of two professional degrees in architecture granted by the School: 1) the Bachelor of Architecture (B. Arch.) is the professional "undergraduate-level program" leading to the NAAB-accredited Bachelor of Architecture degree; or 2) the Master of Architecture (M. Arch.) is the professional "graduate-level program" leading to the NAAB-accredited Master of Architecture degree.

For the B. Arch. degree, students complete an additional one-year curriculum consisting of a comprehensive architectural design project coupled with advanced courses in building technology, professional practice and architectural electives. The Bachelor of Architecture (B. Arch.) is awarded at the end of the fifth year.

Graduate Programs

Master of Architecture (M. Arch.)
Master of Urban Design (M.U.D.)

The Master of Architecture (M. Arch.) is the professional "graduate-level program" in architecture leading to the NAAB-accredited Master of Architecture degree. The M. Arch. provides flexibility for both students who have a degree in a field other than architecture (MI-track) as well as those who have an undergraduate degree (B.A. or B.S.) with a major in architecture (MII-track).

MI-track students complete a three-year curriculum that begins in the second session of the summer semester. In the first year, students acquire the fundamentals of visual and spatial design, problem solving, conceptualization and environmental influences. In addition to design studio, they take introductory coursework in architectural history and theory, building technology, and visual skills. In the second year, MI-track students are aligned with the curriculum for MII-track students, completing a two-year curriculum consisting of a comprehensive architectural design project and advanced graduate design studios coupled with courses in contemporary theory, design methodology, building technology, professional practice and architectural electives. The final year provides an opportunity for advanced, focused design exploration and research.

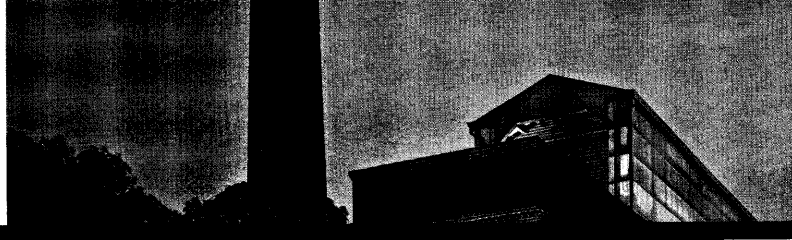

The Master of Urban Design (M.U.D.) is a 12-month, three-semester program focusing on cities and suburbs that are being reshaped by shifting demographics, global capital, information technology and environmental sustainability. The M.U.D. Program is located off-campus, in the University's Center City Building in Uptown Charlotte. Dual-degrees with Geography and Business are available for both the M. Arch. and M.U.D. degree programs.

Within the school, there are several research centers and laboratories that provide a point of contact for students to engage in funded research projects with the faculty. Research in high performance building and optimization protocols, day lighting and energy analysis, digital design and interactive visualization, and urban design takes full advantage of the schools' advanced computing, software and digital fabrication facilities.

The school's International Summer Study programs travel to diverse destinations that have recently included China, Italy, Spain and Portugal, and Switzerland, with an upcoming trip planned for Eastern European capital cities. The SoA regularly hosts exchange students, and SoA students have opportunities to study abroad at other institutions in China, the Netherlands, Denmark, Germany, Finland, England, Mexico and Australia.

The school accepts transfer students for advanced standing from other NAAB-accredited schools. More detailed information may be obtained by going to www.soa.uncc.edu or by writing the School of Architecture, UNC Charlotte, Charlotte, NC 28223.

N.C. board of architecture

The North Carolina Board of Architecture, established by the General Assembly in 1915, is responsible for enforcement of the laws and regulations governing the practice of architecture in the state. A major task is to determine the qualifications of applicants who seek licensure in this state.

The Board is comprised of seven members appointed by the Governor, five of whom are licensed architects appointed for five-year terms. Two of the members of the Board are not licensed architects and represent the interests of the public at large. The public members serve at the pleasure of the Governor.

In order to qualify for a license to practice architecture in North Carolina, an applicant must meet the following minimum requirements:

- 1) An accredited professional degree in architecture
- 2) Three year internship
- 3) Pass all divisions of the ARE (Architectural Registration Examination)

The current board members are:

Charles H. Boney, FAIA, Jr., Member
Wilmington

Barbara A. Field, FAIA, President
Asheville

Kiki Teague, Treasurer Public
Winston-Salem

Thomas P. Turner, FAIA, Jr. Secretary
Charlotte

Cheryl C. Walker, FAIA, Vice President

national council of architectural registration boards

The National Council of Architectural Registration Boards was established in 1920 to assist member boards in carrying out its duties, foster the enactment of uniform architectural laws, develop examinations and establish standards for certification requirements in education and training, to perfect its procedures for verifying the qualifications of applicants and determining their eligibility for certification and establish and maintain reciprocal registration between states having registration laws.

The NCARB is a non-profit corporation with all legally constituted boards of architecture in the United States as members, including the North Carolina Board of Architecture. To be eligible for NCARB certification, architects must submit satisfactory evidence that they comply with the standard for education, training, examination and character and have been registered by a member board.

The NCARB will, upon request of an individual architect, secure, authenticate, and record factual data of the applicant's education, training, practice and character. This record will be forwarded to any state board upon request of the applicant.

Certification shall be given to an applicant holding a council record verifying that the applicant has complied with the council's standards of education, training, practice and character; and that the applicant has passed an examination conforming to the council's standards of content, extent and length of time.

Certification by the NCARB is recommendation to all registration authorities that registration be granted to the holder without further examination. Most board members accept NCARB certification as conclusive evidence of an architect's eligibility of registration. It is, however, not a national registration.

AIA political action committee

The AIA-PAC has achieved high success rates in terms of its contributions to winning candidates and its ability to influence legislation. It has played a prominent role in enhancing the image of AIA North Carolina among state legislators and in establishing architects as a respected source of information for legislators.

LEGISLATIVE SUCCESS

Since its formation in 1986, the AIA North Carolina Political Action Committee (AIA-PAC) has become increasingly successful in the political arena and has been of major assistance to AIA North Carolina in advancing its legislative agenda.

A long string of legislative victories have been achieved by AIA North Carolina in the last decade including:

- Qualification-Based Selection for architects on public projects
- Greater flexibility for single-prime contracting on public projects
- Statutory strengthening of the Architectural Practice Act (G.S.83A)
- Passage of a \$1.8 billion statewide bond issue for school construction
- Qualified immunity for architects as volunteers in declared emergencies
- Clarification of a seven-year statute of repose
- Securing the single prime contracting option on government projects
- Passage of \$3 Billion higher education bond for construction

AIA North Carolina has also been successful in defeating or altering legislation, which could have a negative effect on the architectural profession. Issues like interior designer licensing, stock school plans and professional service taxes have all been stopped in past legislative sessions. In addition, AIA architects have been appointed by the Governor and legislative leaders to key positions on regulatory and advisory boards and commissions.

MISSION OF AIA-PAC

The AIA-PAC was established to assist the architects of North Carolina in gaining access to state legislators for the purpose of establishing an effective forum on issues facing the profession. Its mission is to work to create an environment in the North Carolina General Assembly and Council of State, which is conducive to accomplishing the goals of the architectural profession.

Three specific objectives guide the activities of the AIA-PAC. These are:

- To solicit contributions.
- To make contributions to candidates who will be influential in determining the future course and the practice of architecture in North Carolina.
- To generally educate or inform the membership of AIA North Carolina concerning legislative and political issues affecting the profession.

The AIA-PAC is organized and operated on a voluntary, non-partisan basis to preserve and promote the status of architecture through the pursuit of its objectives. The organization is governed and supervised by a Board of Directors composed of 21 members of the AIA-PAC, with a minimum of one member from each section of AIA North Carolina. Each Director is appointed to a term of three years, with no Director being appointed to more than two consecutive terms.

To maintain established levels of candidate contributions and ensure the continued effectiveness of AIA North Carolina's Government Affairs Programs, AIA-PAC needs continued and increased financial support from members and friends of the profession. Records and information about AIA-PAC are maintained at the offices of AIA North Carolina.

north carolina architectural foundation

The North Carolina Architectural Foundation (NCAF) was established for the purpose of promoting architecture as a discipline and a profession in North Carolina. Since 1948, the NCAF has supported architectural scholars, researchers and students and has provided grants for exhibitions and publications about architecture.

The mission of the NCAF is:

- Architectural Research
- Architectural Principles
- Educational Programs
- Architectural Scholarships
- Public Awareness
- Continuing Education
- Historic Preservation

In 2011, the Foundation will become a major contributor to the overall programming and success of the AIANC Center for Architecture & Design.

The Foundation operates on private gifts. Contributions to the NCAF may be sent to:

Kamphoefner Prize

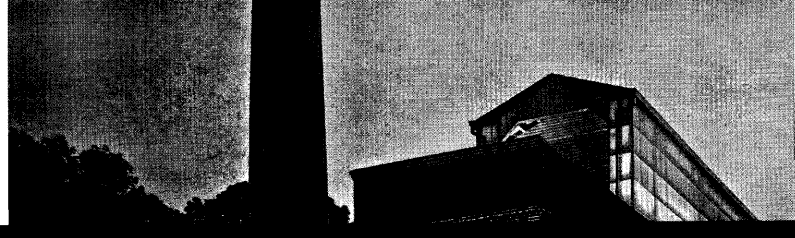

The Foundation awards the Kamphoefner Prize of \$10,000 to an AIA North Carolina member who exhibits excellence in the Modern Movement of architecture. The prize is funded through an endowment bequeathed by Henry and Mabel Kamphoefner. Henry Kamphoefner was the founder and original dean of the N.C. State School of Design. In years when a prize winner is not selected, two \$5,000 scholarships are awarded to students at the N.C. State School of Design.

REVISIT

BRICK

BRICK IS NATURAL TO THE CORE

Brick is one of the world's original "green" building materials.

Its unsurpassed life cycle, exceptional energy efficiency, natural ingredients, minimal waste and countless recycling options are just a few of the properties that make brick the superb sustainable material it has been for thousands of years.

Revisit brick and discover how it can help you achieve environmentally friendly, sustainable LEED[™] certified projects.

Quite simply,
Brick is of the Earth.
