OUR COVER

Photo Shows Notchway Motel under Construction.
The President's Message

COMMITTEES:—

The membership of the N. H. Chapter of the American Institute of Architects should now be aware of the new committee organization as planned by the National Society. In effect it is much more simple than has been used by the National body in the past, yet for our Chapter it is more thorough and detailed than what we have operated with in the past. By delegating current affairs to the various committees, the Officers and Board of Directors can concentrate on legislation.

By virtue of the above system much of the national and regional information should be piped down to each member. The committee chairman will be posted continually in the N. H. Architect and those members having a question or suggestion on any particular phase need only to contact that particular chairman. This system should stimulate active interest in matters regional and national.

COMPLICATIONS:—

Living in any form these days isn’t simple any more. Because we are an economically interdependant society, it is quite necessary that we become aware of “happenings.” I lament the “up-to-the-minute-on-your-toes” strain of it, time becomes so used up, that there just isn’t time to go fishing and that can be catastrophic. Things seem to be getting done by “group action.” We don’t have many Daniel Websters, but we sure enough have groups for this and that. Perhaps we are a “think-on-the-run” type of generation. Thoreau himself could stand defiantly on the Park Street Subway platform during the 5 o’clock rush and scream his resentment but in nothing flat the mob would have him squeezed in on his way to North Station, where upon alighting he would be arguing the virtues of Red Sox against the Detroit Tigers. As for myself I haven’t seen a baseball game or a summer theatre play this year, and when I answer those who would prod me that all I’ve seen is cows, big cows and little cows, they immediately label me a “dud.”

It takes a tremendous amount of courage these days to do something alone, without consultation, but with conviction.

I don’t know what it is you’ve been wanting to do, but I challenge you to set aside one day to do it and if you come through unscarred, then you’ve enough material for a book—you, sir or madam are a real honest-to-goodness individual.

The use of marble trim with brick wall is particularly appropriate for the Georgian design of the Albany bank shown above. The recessed entrance is lightened and fine details of the doorway accented by continuation of the exterior marble treatment as veneer wall covering and also for heavier construction at the doorway. All marble work is Vermont Imperial Danby. The dark base is Blue Pearl Granite. Both marble and granite were finished by Vermont Marble Company.

Lauds School Architects on Progress

BOSTON — Speaking on “A Trend Toward Better Schools” before the 86th convention of the American Institute of Architects, Stanley Sharp of Ketchum, Gina, and Sharp, New York architects, stated that any advancement toward better schools could be achieved only when the board of education, the architect, and the citizens themselves work together in a cooperative effort.

“Better education for the children of any community can only be obtained by first conducting community long-range planning; it is the parents who must understand and adapt to the ideas which could lead to better schools,” Sharp cautioned.

He praised the progressive strides made by school architects during the past few years, noting that they have concerned themselves more with the educators' needs, and have gained a wider understanding of new design techniques and their effect on environment.

Better Design

According to Sharp, there is a definite trend toward better design in schools. However, the architect must also understand the basic problems and needs of the community involved.

“The architect’s job has not been simplified by his increasing knowledge of school needs and requirements,” Sharp claims. “In spite of new technical developments, new materials, and greater understanding of engineering problems, the educational problems of today remain constant.”

Quoting from government statistics on education, Sharp pointed out that because of the tremendous increase in student population, the educational needs of this country are becoming greater than the capacity of the nation to handle these needs.

The years 1953-54 have seen a 2-million increase in student enrollment, jump the total enrollment to 37 million. It was predicted that at least 45 million students will be enrolled in all levels of the educational system by 1960.

Other factors in determining a trend in school design are rising costs of construction and changing curriculum. School construction costs have increased at a slower rate than all other forms of construction, but money for schools is still limited.

Each change in curriculum, each advancement in teaching, affects design. In terms of school design, this means more space, greater flexibility, more and better equipment—all this in spite of rising costs and the desire for greater economy.

Sharp pointed out that the solution well be a matter of convincing the community to accept ideas which could lead to better and more practical schools. An example of this type of association between architects, school boards, and citizen committees is evidenced in the school district.

New Hampshire Awards Hit Highest Mark in Years

Contract awards for future construction in New Hampshire according to Dodge Reports totals hit the highest first six-month mark of any year and also reached a record June dollar volume.

F. W. Dodge Corporation district manager James A. Harding said the six-month figure of $60,571,000 was also 289 per cent above six months 1953.

Individual six-month classifications which were all substantially above the like period 1953 were: nonresidential, $12,419,000; residential, $14,466,000; heavy engineering, $33,686,000.

The June total was $9,954,000, up 81 per cent from May and 201 per cent above June 1953.

Individual June totals were: nonresidential, $1,968,000 up 24 per cent from May and 46 per cent above June 1953; residential, $7,664,000 up substantially from May and June 1953; heavy engineering, $322,000, down 88 per cent from May and 78 per cent below June 1953.

Contract Awards in New England Set Record

BOSTON—Contract awards for future construction in New England set a new high dollar volume for the first six months of any year according to just announced totals of Dodge Reports. The first-half 1954 figure of $691,341,000 was also 27 per cent greater than the like 1953 per cent.

All individual categories were up over 1953 at the six-month mark; nonresidential at $217,960,000 was up 23 per cent; residential at $304,650,000 was up 28 per cent; heavy engineering at $168,700 was up 113 per cent.

The June construction award total of $114,452,000 was down 18 per cent from May but was up 57 per cent over June 1953.

Individual June classifications were:

- Nonresidential, $47,334,000, up 12 per cent from May and up 71 per cent over June 1953;
- Residential, $51,989,000, down 20 per cent from May but up 64 per cent over June 1953;
- Heavy engineering, $129,000, down 53 per cent from May and up 13 per cent over June 1953.

High Rates of Activity in Construction Awards

NEW YORK—High rates of activity in construction contract awards for commercial buildings, single-family homes, and schools, were among the outstanding trends in the first half of 1954, according to a midyear review by Dr. George C. Smith, economist for F. W. Dodge Corporation.

Disclosing details of Dodge statistics not ordinarily released for publication, Dr. Smith stated that contract awards totaled $691,341,000 in June, compared with $661,200,000 for May.

Northport, L. I., where by properly educating the local citizenry in a long-range public relations program these groups are able to build an outstanding new school.

"In all cases where the public has been familiar with the situation they have own an understanding and a readiness throw away pre-conceived prejudices d accept the new fundamental approach design—the fundamental, logical, economical solution. I believe that better tools of the future will be a result of high architectural competency, coupled with a clear understanding of the basic problems of the community, as well as leadership required to develop understanding in the community," Sharp concluded.

I.A. Standards Left

Virtually Untouched

The 86th annual convention of the American Institute of Architects revised standards of professional practice in nor respects, changing nothing of an essential nature. This was handled at the convention in the form of Document 330, divided into parts on obligations of good practice and mandatory standards. The delegates retained the provision at no architect shall use paid advertising, or self-laudatory, exaggerated or misleading publicity. Factual materials, verbal or visual, which dignify the profession advance public knowledge of the architect's function in society may be presented through public communication media, the document stated. The Board of Directors was given sole power to interpret the standards and its decision will be final.

When planning to build a house it might be good idea to follow the architect home and see the kind of house he lives in.—Ladies Home Journal

Notchway Motel Shows Wonderful View of White Mountains
Notchway Motel, located in Bethlehem in the heart of the White Mountains, was completed in September, 1953 for Richard J. Coney, owner and manager.

The new mountain resort motel was designed by Shepard Vogelgesang, AIA, of Whitefield and Wilford J. Glover of Franconia was the general contractor.

Notchway is designed with off-set units to give privacy to every occupant, and the front is cantilevered over the bank.

The shape of the motel gives the most accommodation afforded by the site. Every room opens directly to a balcony with the lovely view of the Franconia Valley.

Sub-contractors on this project were:

- A. G. Cyr, heating and plumbing, Littleton.
- E. E. Bigelow, electrical contractor, Littleton.
- Manus H. Perkins, grading and excavating, Bethlehem.
- George H. Richardson, surveyor, Littleton.
- Franconia Associates, flooring and furniture, Littleton.

Visiting Architects Enjoyed N. H. Hospitality

New Hampshire played host to architects and their families following the AIA convention with a conducted tour starting Sunday, June 20. After a clambake at Wentworth-by-the-Sea at Newcastle, N.H., Sunday and an over-night stop at Portland, Maine., Monday, the group journeyed back to New Hampshire for luncheon at the Presidential Inn at Conway.

Monday night, the group was housed at Twin Mountains House Hotel and the following day, they journeyed to the Aerial Tramway at Cannon Mountain for a trip to the summit. They also visited the "Man of the Mountain" and Crawford Notch, later continuing on to Vermont and Canada.

Awards—
(Continued from Page 8)

far this year assures a high rate of pay­roll and purchase in the enormous con­struction industry for at least the re­mainder of 1954.

"Since construction contract awards precede actual construction, Dr. Smith said, "the record levels of awards during the first half of 1954 indicate that con­struction activity during the remainder of the year, at least, will be at very high levels.

"This will be reflected directly in con­struction employment and payrolls and in sales and shipments of construction ma­terials. Indirectly, the effect will spread through other fields of activity as a power­ful upward force, since this 35-billion­dollar-a-year industry is one of the main­stays of the national economy."

Dodge previously announced that its first-half total of contract awards report­ed was 17 per cent ahead of the corres­ponding total for 1953; an all-time high for a first-half.

Clair W. Ditchy Heads
AIA for Another Year

With a sizable majority, Clair W. Ditchy, Detroit, was re-elected President of The American Institute of Architects at the 86th Annual Convention, defeating John W. Root, Chicago. Mr. Ditchy now enters his second term. The five-day con­vention was held in Boston, June 15-19, with headquarters at the Hotel Statler.

Earl T. Heitschmidt was elected First Vice-President, succeeding Norman J. Schlossman of Chicago, who had with­drawn as a candidate. Howard Eichen­baum, Little Rock, Ark., was re-elected Second Vice-President, and George Bain Cummings, Binghamton, N. Y., was re­elected Secretary. Leon Chatelain, Jr., Washington, D. C., defeated Edward L. Wilson, Fort Worth, Texas, for the office of Treasurer, succeeding Maurice J. Sulli­van who did not run for re-election.

"Your Client is Probably
Holding Back" says Fortu

Americans can afford much better hous­ing than they have been buying, says Fortune Magazine, in a thought-provoki­ing report on "The Changing Market in Housing."

Despite the boom in house building, people are living below their 1929 stand­ard of housing and have been spending re­tively less for housing now than in 1929. They are buying more cheap houses and fewer better houses, the magazine declares.

Fortune advice: build better houses. The public can afford them and the pub­lic will pay higher prices for higher valu­es. It declares that "The day is close at hand when almost anybody with a job can afford to own a house."

A modern mother is one who can hold a cigarette and a safety pin in her mouth at the same moment.—New Zealand Tablet.

Try jaywalking for that "run­down" feeling.—Louisville Cour­ier Jnl Mag.

PUBLIC RELATIONS—
A cold shoulder never makes a warm customer.—Coal Dealer.

ERROR—
To err is only human, but when you wear out the eraser before you've used up the pencil, you are overdoing it.—Cigar & Tobacco Jnl.

A movie producer was telling a friend about giving his girl friend a string of pearls for her birthday. "Why," said the friend, "don't you give her something practical—like a car?"

The producer smiled and repl’d: "Did you ever hear of a phony car?"—ERKINE JOHNSON, Photo­play.

CONVERSATION—11
The real art of conversation is not only to say the right thing in the right place, but . . . to leave un­said the wrong thing at the tempt­ing mo­ment.—DOROTHY NEVILL. Under Fire Reigns. (Methuen)
Help Yourself!

When suppliers, sub-contractors and others interested in new construction get accurate, up-to-the-minute news on new projects—as they do from Dodge Reports—architects benefit. They save time that would otherwise be wasted answering questions and inquiries, generally obtain a wider range of bids, receive the information they do need when they need it.

That's why, for 60 years, architects have found it sound practice to work with the Dodge organization. Today, as more and more firms in new construction rely on Dodge Reports, it is sounder practice than ever to furnish, through this logical channel, the authentic construction information that guides the right supplier's salesman to the right architect at the right time.

AIA DISCUSSES SCIENCE EFFECT ON DESIGNS

BOSTON—How the rapid developments in science and technology have affected architecture and its impact on education was discussed at the meeting of the Association of Collegiate Schools of Architecture, attended by more than 80 members from throughout the U. S.

The pre-convention session of the collegiate schools group was held at the Harvard School of Design in Cambridge. G. Holmes Perkins, Dean of the School of Architecture, University of Pennsylvania, was chairman of the first part of the session which concerned itself with the needs of human beings and society and its effect on architecture and education.

Civic design, urban renewal and housing were topics of discussion. The group visited Harvard Graduate Center, Massachusetts Institute of Technology and its Hayden Memorial Library.

Walter Bogner, Professor of Architecture, Harvard University, general chairman of the educational group which met in conjunction with the 86th annual convention of the American Institute of Architects at the Hotel Statler in Boston, presided at a wind-up evening dinner at New Ocean House in Swampscott, Mass.

The proposed development of a 28-acre site into a huge shopping center, similar to Rockefeller Center, in Boston's Back Bay was discussed.

Prefab Plumbing Wins Union OK

The AFL plumbers union has passed favorably on National Homes Corporation's factory-assembled plumbing package, ready approved by FHA.

The union move points the way for possible saving of several hundred dollars on the cost of a house. Reducing costs with increasing volume, said National's president, James Price, will mean twice as much work for all trades, including plumbers.
