Participating Members of the New Hampshire Chapter

A. I. A.
CARL E. PETERSON

Carl E. Peterson, 66, senior partner in the architectural firm of Peterson, Hamlen and Soule of Manchester, died November 11 at his home on the Mont Vernon Road, Amherst, after a brief illness.

Mr. Peterson was born at Roxbury, Mass., and had been a resident of Amherst for 10 years.

He was a member of the Dorchester (Mass.) Methodist Church and attended the Amherst Congregational Church.

Carl Peterson was a charter member of N. H. Chapter, American Institute of Architects, and has practiced his profession in Manchester since 1932. He was also registered in Maine and Massachusetts.

Mr. Peterson came to Manchester in 1929 and was employed by C. R. Whitcher for three years before opening his own office. Prior to coming to Manchester he was employed by several Boston firms including Cram and Ferguson, Parker, Thomas and Rice and James A. Ritchie.

In the years 1934-36 and again in 1942-45, Mr. Peterson served as chief architect and State Director of the Federal Housing Authority.

He was a graduate of the Harvard College Architectural School and a member of the Harvard Club of New Hampshire.

Active in Masonic activities, Mr. Peterson was a member of Lafayette Lodge, F & AM of Norwood, Mass.; a member of Mt. Horeb Chapter, RAM, of Manchester; a 32nd degree Mason; member of the N. H. Consistory and the Trinity Commandery; member of Bektash Temple, Order of the Shrine, of Concord and a member of the Manchester Shrine Club. He was also a member of the Manchester Kiwanis Club.

Members of the family include his wife, Mrs. Abbie M. (Collins) Peterson; a son, Carl F. Peterson of Lynnfield Center, Mass., and three grandchildren and two nephews.

NEW HAMPSHIRE CHAPTER
PLANS FOR REGIONAL MEETING
IN OCTOBER, 1960

With an attendance of more than 40 members and guests, New Hampshire Chapter AIA held its Fall meeting at the Whip-Poor-Will Golf Club at Hudson, Thursday evening, November 19. President John R. Holbrook presided at the executive meeting and at the dinner meeting.

President Holbrook requested a moment of silence out of respect for the late Carl E. Peterson, a charter member of the chapter. The president reminded the chapter members that they and the community had lost a friend and member who had done much over the years for the benefit of the chapter and the entire community.

A report on the New England regional meeting held at Newport, Rhode Island on October 2, was given by the president. He also accepted on behalf of New Hampshire Chapter the hosting of the 1960 regional meeting to be held in this state in October of next year. The date and place of the regional meeting will be announced at a later date.

Alonzo Harriman, AIA, of Auburn, Maine, regional director of the American Institute of Architects, will be program chairman. A tentative committee composed of the president, Norman P. Randlett and Shepard Vogelgesang will serve to arrange for the regional meeting. Other committee members will be added later by the president.

An illustrated lecture on restoration work of the Wayside Inn at Sudbury, Mass., by Roy Baker of Antrim, highlighted the entertainment program.

Robert Snodgrass was program chairman for the November meeting.

NEW YORK ARCHITECTS
OPPOSED TO STOCK PLANS

Joseph F. Addonizio, Executive Director, N. Y. State Association of Architects, speaking at the N. Y. State Concrete Masonry Association meeting, in October, in New York City, discussed the desirability of the State Architect's office, in Albany, issuing stock plans for small school construction through-out the state. The point was made that more often than not, stock plans structures resulted in buildings not adequately suited to local needs, and often, more expensive. Competitive bidding actually substantiated this.

All plans require adaptation to local conditions and an opportunity to incorporate new materials and eliminate unnecessary facilities.

The N. Y. S. Chapter A. I. A. resolved to advise the legislature of their feelings in this matter. The NYSCMA took similar action.

Carter and Woodruff, Nashua architects, are to exhibit its design of St. George Episcopal Church, at Durham, at the 1960 National Gold Medal Exhibition of Building Arts, opening this month in New York City. The exhibition is sponsored by the Architectural League of New York.

Mr. Carter explained that the exhibit features outstanding church designs from all parts of the United States, with particular emphasis on collaboration of architects and artists, and the integration of their work into the building design. Mr. Carter also stated that December is religious structures, churches, temples and synagogues month at the exhibit.

Work of well known artists is depicted in the design of St. George Church. It includes a fresco mural by Prof. John Hatch of the University of New Hampshire Art Department; a prize winning stained glass window by Robert Sowers of New York City; and a handwoven reredos by Lilly Hoffman of Concord.

Other recent work by the Nashua architectural firm include the Holy Trinity Church at Danvers, Mass., the Temple Beth Abraham in Nashua, and the Unitarian-Universalist Church school wing, also in Nashua.

In addition to the exhibit now being shown in New York, Carter and Woodruff's work has also been exhibited at the Boston Arts Festival, the Addison Gallery at Andover, Mass., and the Currier Art Gallery at Manchester.
ANNUAL POLL SHOWS ECONOMISTS CAUTIOUSLY OPTIMISTIC ABOUT 1960

NEW YORK — What kind of year will 1960 be for business?

The nation's leading economists think it will be a record-breaking year in most respects, but they are somewhat less enthusiastic about the outlook than they were a year ago.

This was the consensus of 273 of the nation's leading economists in business, government and universities polled by F. W. Dodge Corporation in its annual survey of economists' opinions on the business outlook.

In releasing the results of the survey, Dr. George Cline Smith, Dodge vice president and economist, said that the economists, on the average, expected the second half of 1960 to see some tapering off in the rate of growth, and that many expressed some doubts about the outlook for 1961.

A sizeable majority (65 per cent) expect total activity, as measured by Gross National Product, to rise steadily during the year, Dr. Smith reported. But, he pointed out, this was a distinct lessening of optimism from last year's survey, when 86 per cent forecast a steady rise during 1959.

The average expectation of the 273 economists participating in the current survey is that Gross National Product will reach an annual rate of $514 billion by the fourth quarter of 1960, a gain of 6 per cent over the mid-1959 level. The Federal Reserve index of industrial production is expected to rise 3 per cent from the mid-1959 level, reaching 160 by the end of next year. Over the same period, wholesale and consumer prices are estimated at one to 2 per cent higher, Dr. Smith reported.

The forecasts of most of the economists hinged upon a reasonably quick settlement of the steel strike. In addition, several other warning signs were mentioned.

Among them are:
- The labor situation. The economists frequently mentioned the question of other serious labor difficulties which may arise in the months ahead, particularly the possibility of a railroad strike.
- The tight money situation — with possible dampening effects on the economy in general, and on housing and plant expansion in particular.
- Continued inflation. There was not much fear of runaway inflation, but the words "inflationary creep" seemed to characterize the general feeling.
- On the other hand, Dr. Smith called attention to several specific features cited by the economists which might provide an additional upward push. These included:
  - A fillip to the economy after the steel strike, as industry tries to make up for lost time.
  - The need for further inventory build-up, at least during the first half of 1960.
  - The prospects for a good automobile year.
  - The fact that 1960 is an election year.

October 28

Dear Midge Moynihan

Would it be possible to obtain some copies of your October 1959 issue of your trade paper

We were very pleased to share our efforts included in the layout and wish that you and your staff

We would be glad to pick up the issue at your office if you could send it to me

You must have a high circulation as we have heard from N. J. regarding our product

Sincerely,

Bill McManus
Carl M. Sawyer joins G.C. Office

Carl M. Sawyer, former equipment engineer for the New Hampshire Department of Public Works and Highways has been appointed assistant secretary and manager of the Highway Division of the Associated General Contractors of New Hampshire and Vermont. Announcement of the appointment was made by the president of the A.G.C., Robert C. Davison of Manchester.

Sawyer was administrative head of the State Highway Garage from 1944 until his retirement in 1958. A veteran mechanical engineer, Sawyer served for thirty-eight years with the State. He was elected President of the New Hampshire Good Roads Association in 1954 and is widely known in highway contracting circles.

In his new post Sawyer will correlate activities of the newly formed Highway Division of the Associated General Contractors.

The group is comprised of twenty highway construction companies, who account for more than 90% of new road construction in the state.

Sawyer, who resides with his wife and family in Boscawen, will work out of the A.G.C. office, located on the F.E. Everett Highway traffic circle, in Concord.
The Dial Telephone Building in Concord was designed in 1952 with provision for certain future additions, both horizontally and vertically.

An addition of one story and basement on the north side and an addition of two stories and basement on the west are now in the process of construction by David W. Davison, General Contractor.

These additions are basically similar enlargements of the existing facility. The addition is a re-inforced concrete frame with brick and concrete block walls matching the existing work. A third floor may be added at some future date. One bay of the addition is designed to support a television relay tower and further additions to the west are still possible.

ANNUAL N. H. HOMESHOW HELD

The annual N. H. Homeshow was held at the Manchester Armory in September. The show was characterized by the usual large attendance and an excellent assortment of homebuilding and home furnishing displays.

Another feature of the show was the civilian fallout shelter which was the result of cooperative efforts. The Homebrew manager donated the space and H. Homebuilders prepared part of the 10'x10' shelter. State Civil Defense offered supervision and defrayed the costs of some of the signs.

The Manchester Civil Defense unit fully equipped the shelter with a two week supply of food and utensils which would be required for family occupancy.

The shelter was constructed by Seabees of the local N. R. T. C. as a training project.

The immense interest in the shelter was partly due to the excellent job done by those in charge in distributing literature and in answering questions.

Questions asked indicated that people are interested in shelters for their family. That the cost of $211.50 was practical enough to invite further investigation.

There are some problems to be worked out as regards to fire and taxes. However one can only ask if the time is not ripe to once more consider basements in schools and other structures where we have been omitting them?

NEW HOMES TO HAVE SHELTERS

There is considerable concern nationally, over shelters. In Denver contractor Jack C. Hoerner is including a 10' x 13' shelter in each of forty homes now under construction. This includes ceiling, electrical outlets, vertical piping, forty gallon water tank, chemical toilets and radio aerial, in a home selling for $17,500. The contractor estimates that the shelter will add about $290 to the cost of construction. However, no increase has been added to the selling price of the home.

Carl Mitnick, President of the N.A.H.B. visited Russia recently and was very much impressed with the number of shelters they had completed.

Switzerland has recently been added to the long list of countries which have been spending considerable sums of money to go underground.

The school board at Hartford, Conn. recently approved the setting aside Hartford Public High School funds for construction of shelters.

Loans up to $3500 for installation of family shelters in existing houses are eligible for F.H.A. insurance.

The fallout shelter built at the N.J. State Fair this fall was reported to cost $211.50.

Americans carry a great amount of insurance. It is quite possible a $200-$300 investment may prove the best insurance possible. It's a little bit like carrying an umbrella on a rainy day.
