Quarterly Meeting of AIA Held at Manchester Alumet Club

More than 40 architects and their guests attended the first 1960 business meeting and dinner of the New Hampshire Chapter of the American Institute of Architects, held February 19 at the Alumet Club in Manchester. Guest speaker was Marvin I. Adelman of the firm of Sasaki, Walker and Associates of Boston, landscape architects. His subject was "Landscape Architecture."

Nicholas Isaak, chairman of the committee on bidding procedures, presented progress report to the membership. Philip S. Tambling was introduced to members as a junior associate. Richard Koehler was general chairman charge of the meeting.

Nold Perreton appointed Airman for May Meeting

Arnold Perreton of Concord was named Airman for the May meeting which is to be held in Concord. Further details of the coming meeting will be announced at a later date.

At the May meeting, officers for the coming year will be elected, and a nominating committee was named at the February meeting to bring in a slate of officers. Named to this committee were Richard Koehler, Stephen P. Tracy and Norman Randlett.

Joseph F. Lampron of Manchester andrice E. Witmer of Portsmouth were elected delegates to represent New Hampshire Chapter, AIA, at the National Convention to be held in San Francisco, July 18 to 22.

The two delegates were elected at the February meeting held in February at Manchester. Other members of the chapter have under consideration plans attending the convention.

George F. Soule becomes corporate member

George F. Soule, formerly of Peterson, Hamlin & Soule, Manchester Architects, became a corporate member of N. H. Chapter, AIA, at the February meeting.

Mr. Soule has opened an office for the Practice of Architecture at 1008 Elm Street, Manchester.

Walter F. Gill new representative for Dodge Corporation in N. H.

Walter F. Gill, since 1948 a reporter for the F. W. Dodge Corporation, has taken over his duties as reporter for Dodge in the New Hampshire area and northern Essex County in Massachusetts. He succeeds Gordon Marshall as a reporter, although Mr. Marshall remains with the company in the sales department, covering New Hampshire, Vermont and northern Essex County.

A native of Boston, Mr. Gill served as a reporter in the Boston area, and parts of Massachusetts, southwest of Boston, for 12 years.

Mr. Gill attended Northeastern University Night School of Engineering for three years and is a veteran of the Korean War. He is married, has four children and makes his home at 297 Pearl Street in Manchester.
N. H. CONTRACTORS TO ATTEND A.G.C. CONVENTION

Following is a list of the A. G. C. members who are planning to attend the 41st Annual Convention of the A. G. C. in San Francisco, on March 21st through 24th.

Mr. and Mrs. Parker Rice, Manchester Sand, Gravel & Cement Company of Manchester; Mr. and Mrs. Robert Davison, Davison Construction Company of Manchester; Mr. and Mrs. E. D. Swett, E. D. Swett, Inc., of Suncook; Mr. and Mrs. Halsey Weaver, Weaver Brothers Construction Co. of Concord; Mr. and Mrs. Frank Whitcomb, Frank Whitcomb Construction Co. of North Walpole; Paul Harvey, Harvey Construction Co. of Manchester; Mr. and Mrs. Milo Pike, L. M. Pike & Son of Laconia; Mr. and Mrs. Walter Smith, L. M. Pike & Son; Albert Crandall, Aetna Casualty & Surety, Boston, Mass.; Guy MacMillin, The MacMillin Company of Keene; Tom Power, Executive Secretary.

GIBBS and CREER TO RECEIVE MEDALS

WASHINGTON, D. C.—The American Institute of Architects' Allied Professional Medal will be conferred on Mr. Frank Gibbs, a Naval Architect, of New York. The award will be presented by the president John Noble Richards, FAIA, the Institute's annual convention in San Francisco, April 18-22.

Also to be honored at this time will be Philip D. Creer, FAIA. He will receive the Institute's Edward C. Kemper Award for his long and outstanding service to the Institute as Chairman of the January Committee.

Mr. Gibbs, partner in the firm of Gibbs & Cox, Naval Architects and Marine Engineers, has been the recipient of numerous distinguished awards and honorary degrees. His firm has designed many large passenger and cargo vessels and naval ships of various categories. Among the former are passenger ships, among the latter are battleships and submarines. During World War II, the firm had the end of World War II, directed the preparation of working plans of more than 60% of all ships of major size, including battleships and submarines constructed in American Shipyards and Navy Yards during the war.

Mr. Creer, Director of the School of Architecture, University of Texas, is a partner in the architectural firm of Creer & Roessner, Austin, Tex. He is the designer of many architectural works, including public housing, commercial, industrial and institutional buildings. He has served on several public agencies as well as on a number of AIA committees. The coveted Kemper Award is granted each year by the AIA Board of Directors to an AIA member who has made significant contributions to the Institute and to Architecture.
AMOUS ARCHITECT WINS AIA GOLD MEDAL

WASHINGTON, D. C.—Ludwig Mies van der Rohe, FAIA, world famous architect and retired director of the Department of Architecture and City Planning of the Illinois Institute of Technology has won the 1960 Gold Medal of The American Institute of Architects.

Mies van der Rohe was elected for this honor by the AIA Board of Directors meeting at Institute headquarters at the Octagon in Washington, D. C.

The famous architect will receive the coveted award at the annual dinner of the AIA convention in San Francisco on April 21, 1960.

Mies van der Rohe was born in 1886 in Aachen, Germany, and, like two other

(Continued on Page 11)

SPRAGUE'S #4 DISTILLATE FUEL OIL

Sprague at Portsmouth now offers a special fuel oil for use

- where #6 (Bunker "C") fuel oil is not considered practicable
- where #5 blended oil results in inefficient operation, excessive service calls, or unsatisfactory performance
- where #2 fuel oil is over 20,000 gallons per year

This is SPRAGUE'S #4 DISTILLATE, a refined product of consistent analysis, delivered to Portsmouth by tanker direct from the refinery, and stored separately in a 4,000,000 gallon capacity tank.

The use of SPRAGUE'S #4 DISTILLATE eliminates the problems of poor combustion and excess soot caused by variations in the oil's characteristics from load to load, does away with starting failures in cold weather, high preheating costs, and ludge precipitation in storage tanks, and requires less attention and service.

Deliveries of SPRAGUE'S #4 DISTILLATE are made in Sprague trucks throughout New Hampshire and into Maine, Massachusetts, and Vermont.

SPRAGUE'S #4 DISTILLATE is competitive in price with #5 blended oil and superior in performance. Let one of our representatives tell you more about it.

Telephone Portsmouth, GEneva 6-4120 for further information.

Partitions—Wood framing plywood finish. Electrical—Fluorescent lighting; Heating—Extension of existing heating system, unit heaters; Sprinkler System—Extension of existing system.
world famous architects, Walter Gropius and LeCorbusier, apprenticed in the office of Peter Behrens in Berlin. Mies' first building, the Kroeller house at The Hague, Holland, completed in 1912, caused a sensation in architectural circles for the classic simplicity which still denotes his most recent buildings such as the Seagram building on New York's Park Avenue.

A first vice president of the German Werkbund, which strove to bring artists and manufacturers together to improve industrial design, Mies became the director of the Bauhaus school of design in Dessau and later Berlin, Germany.

After the Nazis closed the Bauhaus, Mies, who had meanwhile built a reputation as the architect of some of Europe's most modern buildings, emigrated to the United States in 1938 and became the Director of Architecture at the Armour Institute, later the Illinois Institute of Technology, in Chicago.

SPRAGUE FUELS for New Hampshire consumers

Sprague has a fuel to satisfy most heating and process load requirements

**Industrial Fuel Oils**

- #4 Distillate
- #5 Blend
- #6 Bunker "C" (Residual)

**Bituminous Coals**

Southern Tidewater and Northern All Rail coals for underfeed, spreader, or chain grate stokers and pulverized fuel units

Sprague has a New Hampshire organization on the spot to serve the entire state

- A tidewater terminal at Portsmouth handling a full range of Industrial fuel oils and quality Southern West Virginia coals.
- A fleet of fuel oil and coal trucks for complete delivery service, and facilities for making rail shipments of both coal and fuel oil.
- A sales and engineering force available to you offering factual information on the type of fuel best suited to each installation's equipment.

Telephone our representatives at Portsmouth, GEneva 6-4120 for sales service.

Gosling Road — P. O. Box 478

PORTSMOUTH, NEW HAMPSHIRE

Home office at Boston — Offices serving customers in 24 States and Canada.

In addition to the Seagram Building, on which he collaborated with Philip Johnson, he designed a great many of the buildings on the IIT campus, the glass-enclosed apartment houses at 860 Lake Shore Drive in Chicago, and Cullinan Hall, an addition to the Houston (Texas) Museum of Fine Arts.

Mies, who learned his first lessons of building from his father, a master mason and the proprietor of a small stone cutting shop, never received a formal architectural education. Nevertheless, his contributions to architectural thought and his influence on young architects quite possibly exceeds that of his building designs. An ardent advocate of simplicity and functional forms, Mies' pronouncement that "less is more" is widely quoted in architectural circles. "Architecture," Mies has said, "is the battleground of the spirit" and must be a true symbol of our time.

The New

NUTT BUILDING

(stores and offices)

NASHUA, N. H.

This commercial building is to replace an original 3-story building that was destroyed by a $1,500,000 fire July 1959. It contains two stories and insurance agency. The partition between the stores is designed to be removed. One store is desirable. The framing of the roof is designed for future vertical expansion. The insurance office section will be completely air conditioned and will provide both summer cooling and winter heating. A 10,000 watt auxiliary electrical unit is provided in the heater room for emergency use. Parking facilities will accommodate 130 cars.

A brief outline of materials follows:

Foundations — Existing granite and new reinforced concrete; Exterior Walls — Brick and concrete block backers; Basement Floors — Concrete slab on earth; First Floor — Steel joists and poured concrete slab; Roof — Steel joists and poured concrete slab; Roofing — Vapor sheet insulation, built-up roofing; Windows — Aluminum awning, wood sash on street facade; Flooring — Vinyl tile; Partitions — Masonry block stud; Ceilings — Acoustical; Lighting — Fluorescent; Heating — Stores — forced hot water; Office section — forced warm air, gas fired; Special Items — Intercommunicating telephone system, dictating system with central recording station and dictating stations at desks; Brick painted white on street facade.

for

The New

NUTT BUILDING

Nashua, N. H.
The Temple Beth Abraham was designed as a symbolic, yet efficient, and economical structure providing a focus for both the religious and the social life of the community.

The low wing contains a small chapel, the rabbi's office, four classrooms, a large lounge, and a library. The sanctuary will seat 96 and by opening the folding partition more than 200 can be seated for high holidays. With the partition closed there is a large hall with stage served by a complete kitchen designed for catered meals. There is also a large parking lot behind the building.

The Ten Commandment Tablets, the Memorial Alcove Eternal Light, the Eternal Light over the Ark, and the Menorah are designed and made by George Salo of Sutton, New Hampshire. Lilly Hoffmann of Concord, is designing and weaving the Ark curtains. The reading desk, the Ark, and paneling work is designed by the architects.

Singleton Construction Co., Inc. of Tewksbury, Massachusetts are the general contractors.
The new parish hall facilities for the North Congregational Church in Portsmouth include the parish offices, a chapel for small weddings, a family room (the church’s "living room"), a sizable kitchen, a large fellowship hall of flexible design, and eighteen classrooms. Two of the larger classrooms are separated by a folding partition so that the space can be joined together for Boy Scout use. Even though the building is quite large, as its prime users are children, every effort was made to keep modest in scale. From the main entrance the building appears only one story in height, the slope in the lot permitting most of the lower por to have windows completely above grade.

There is provision for a sizable parking area behind the building as well as space to add to the building if future demands require it.
This building houses sales, accounting, administrative, warehousing, repair and garaging areas. The main entrance wall is veneered with light shades of red brick; with opaque and translucent white Kalwall panels. The rest of the building is concrete block and corrugated siding painted either white or dun.

The corridor walls have a plastic wood-grain dado; the doors from the corridor are several colors to break the monotony. The general color scheme is light green, white and yellow.

DAVID W. DAVISON, GENERAL CONTRACTOR
Manchester, N. H.

This warehouse was designed for efficient mechanical handling of beer and liquor. Most shipments come in by rail and are packed in palletized loads. The warehouse is laid out to a pallet module with the minimum circulation space and minimum interference from the columns. The warehouse section is nearly square to get the maximum capacity with the least amount of wall. There is a maintenance shop with pit attached to the garage-truck loading area. Trucks are loaded with belt fed telescoping booms.

The office section has, in addition to the usual facilities, a large "hospitality" room that can be used by outside groups for meetings. This room has its own outside entrance, lobby, kitchen, bar, and toilet facilities; it also serves as the sales conference room for the distributing company.

Total area 28,319 square feet; 551,000 cubic feet.
Q. Our office doesn't seem to have any established policy regarding promotions. Is this common in Architecture?
A. Yes. It is known as the Law of Tooth-Fang and Bring-in-Some-Work.

Q. In the utter chaos that exists in manufacturers' claims for similar products—what do you think is the answer? The C. S. L. The AIA's Building Products Registry? Testing Laboratories? Or payola?
A. The AIA's Building Products Registry. Have you enrolled?

Q. Is a "slush fund" to promote legislation favorable to architects unethical?
A. Not unless it is used to bribe or buy votes.

Q. Our firm name—McCrackin, Miller, Hiett, Hockett and Dronberger is a tongue twister for any switchboard operator. What alternative do you recommend?
A. "Architects."

Q. We saw an ad recently "FOR SALE—Large Drafting Table with Drawers. Also Spirit Duplicator" but when we called the phone didn't answer. Can you put us in touch with the right party?
A. For which item?

Q. Do you think it is ever wise to look the client straight in the eye and admit a mistake? I can look one straight in the eye but that's as far as I get . . .
A. See your oculist.

Q. What does it mean when Architectural Critic Cranston Jones calls an Ed Stone building "rich Madeira" and Mies van der Rohe's style "a dry martini"?
A. He is over-coffee-ed.

Q. What do you think is the answer? The C. S. L. The AIA's Building Products Registry? Testing Laboratories? Or payola?
A. The AIA's Building Products Registry. Have you enrolled?

Q. What's eating George V. Russell, FAIA, of California, when he says about Architects, "We make noises about Architects, "We make noises about anything or anybody."
A. About Buckminster Fuller, he once said, "Bucky has more integrity than any man I have ever known."

Q. What's eating George V. Russell, FAIA, of California, when he says about Architects, "We make noises like a profession and behave like church mice?"
A. This is Mr. Russell's colorful way of describing apathy.

Q. The two draftsmen in my office have an annoying habit of hanging their coats over the triangles. What should be done?
A. Try getting some coat hangers first and if this doesn't work, offer raises.

Q. As practitioners in a medium-sized town we have offices on the same floor of the National Bank Building as our only local competitors. They have a sign on their glass door, "Do It Yourself—Then Call Us." This sometimes gives our clients ideas. Help.
A. See your rental agent.

Q. Why do Savings & Loan Associations refuse F. H. A. mortgages but welcome and advertise the Government's $10,000 insurance of their depositors?
A. What is sauce for the goose is not always profitable when applied to the gander.

Q. What is a Ghost Thinker?
A. A Ghost Thinker tells the Ghost Writer what to say.

Q. When the Colonial Fathers laid out Pittsburgh's "Point," do you recall they ever dreamed it would one day be just a freeway interchange?
A. No. George Washington had his teeth but he was in good health generally and never had nightmares.

Q. I see where at Lehigh University this year they are going to try to teach the Mechanical Engine "creative thinking?" Do you believe they will succeed?
A. Possibly. Look at Rube Goldberg.

Q. I went to the 25th Birthday dinner for the F. H. A. in Pittsburgh and presented paying $12.50 for the place. Wasn't F. H. A. originally set up for the poor?
A. Get with it, Man. Next question.

Q. Is it true that out on the West Coast they are putting advertising messages in Chinese fortune cookies now?
A. Yes. But a Senate Investigating Committee is already at work.

Q. Why do some renderings look like cartoons?
A. A funny question deserves a funny answer. Ha.

Q. Is it true that American cities have become places only for the very poor or the very rich or the slightly odd?
A. Yes, according to William H. Whyte Jr.'s The Exploding Metropolis. (We number ourselves among the latter incidentally).
