The AIA National Convention
in Las Vegas

“Advance Registration Assessment”

$250.00 Anticipated C.E. Registration Fee in 2005
-$150.00 Advance Registration for AIA LV Members
$100.00 Potential Savings to AIA LV Members

We need your approval and your pledge to pay your advance registration fee through an assessment of $150.00. The assessment would be included on your 2003 AIA National dues invoice and would be payable in two ways over the next two years. (1) You can pay the $150.00 at one time in 2003 and receive an additional $25.00 discount ($125.00), or (2) You can pay the $150.00 in two payments of $75.00 each, one in 2003 and the balance in 2004.

The request for the assessment will be brought before the membership for approval at the September Membership Meeting scheduled for 6PM on Wednesday, September 18th, at the UNLV School of Architecture. Attend the meeting and vote to approve the “Advance Registration Assessment”. Take the first step in preparing the Chapter to host the Convention in 2005.
Learning is Fun
I hope everyone had an enjoyable and relaxing summer. With the end of summer brings the start of school. Our September meeting will be at UNLV focusing on the status of the college and the state of architectural education.

Congratulations to the UNLV School of Architecture on its three year accreditation renewal. Hopefully we will have a new Director under contract before the meeting. If so, that person will give a short presentation on their background and their goals for the school. President Carol Harter has also been invited to share her thoughts on the presentation on the Convention Steering Committee. The letter clearly explains what the assessment is and the reasons for it. Every chapter that hosts the national convention assesses its members to provide seed money with which to plan and make preliminary purchases. With national expecting approximately 25,000 members to attend the conference, that's going to take a lot of first class planning. I encourage everyone to attend the September 18th meeting, get better informed (if necessary) and vote Yes to the Advanced Registration Assessment.

Advanced Registration Assessment
I trust all the members have received a letter from Brad Schulz, Chair of the 2005 AIA Las Vegas Convention Steering Committee. The letter clearly explains what the assessment is and the reasons for it. Every chapter that hosts the national convention assesses its members to provide seed money with which to plan and make preliminary purchases. With national expecting approximately 25,000 members to attend the conference, that's going to take a lot of first class planning. I encourage everyone to attend the September 18th meeting, get better informed (if necessary) and vote Yes to the Advanced Registration Assessment.

A HEARTFELT THANK YOU
Kelly and I have been so touched and comforted by the outpouring of concern, good thoughts and prayers from all of our friends in AIA following the passing of my mother. Each of your cards, calls and words of comfort have helped us, more than we can say, to get through a very difficult time. Our thanks to each of you.

WELCOME NEW MEMBERS
We are pleased to welcome these new members to AIA Las Vegas:

ASSOCIATES
Roger Conine, Assoc. AIA
Hnedak Bobo Group
Patricia Stissi, Assoc. AIA
Balente Development

ALLIED
Bonnie Fogel
Unica Homes, Inc.
Ruth Taylor
Polar Carpets & Rugs

BRIEFS:
CONGRATULATIONS AND BEST WISHES to David Frommer, AIA and Heather Curry, married August 25th at Lake Tahoe, and now enjoying a fabulous honeymoon in Australia.
Congratulations to Dekker, Perich, Holmes, Sabatini Architects for receiving the 2002 AIA Western Mountain Region Architectural Firm Award.
Congratulations to Pat DePuy who has been promoted to the position of Regional Sales Manager for Frazee Paint. Pat has been in the paint business for over 30 years and has lived in Las Vegas since 1986. He is an active member of the AIA Las Vegas Chapter and the CSI and AGC associations as well.
John Klai, AIA and Dan Juba, AIA, principals of Klai Juba Architects, announce the election of John Wald, AIA to associate in the firm. Wald a 1990 graduate of North Dakota State University has been a Project Manager with Klai Juba since December, 1995, when the firm was established.
The Richardson Partnership is busy these days...TRPinc recently moved into a larger office space in the Hughes' Airport Center. The firm now employs 7 full time staff members and has been open since 1996. They were recently selected by the Associated General Contractors' Association to design the tenant improvements to their new office building; and also selected by the Plumbers & Pipefitters Local 525 to design their new Apprentice Training Center (JATC). They also designed Ahern Equipment Rentals new maintenance / operations building on Bonanza Road.
Ninio & Moore performed design geotechnical services in support of CH2M Hill for the 2538 Zone Reservoir Inlet/Outlet Pipeling project.
The final design phase of the new North Las Vegas Justice Facility project by RAFI is underway, and progressing as scheduled. The new facility will include three courtrooms, holding cells, a warrant service area, office space, judges' chambers, booking, video court, visitor's area and service areas. Site improvements include utility services, parking, landscaping, lighting and other site related items.
The AIA Nevada Excellence in Design and Service Awards are only one month away. Everything you need to know is right here.

**Date:** October 12, 2002
6pm reception, 7pm dinner, 8pm awards

**Location:** John Ascuaga's Nugget, Sparks NV

**Banquet Tickets:** $60 each - Party table for 8
(includes wine and sponsor recognition) $650

**Call 775-827-6600 to order**

**Accommodations:** John Ascuaga's Nugget
$95 per night - Call 1-800-648-1177 or 775-356-3300 to reserve a room at the AIA rate

**Transportation:** 1 hour flight or 7 hour scenic drive

Included in the event will be the highly anticipated unveiling of this year's Excellence in Design winners as well as the awards ceremony for the AIA Nevada Service Awards. The event will include a silent auction to benefit the re-entry program at Truckee Meadows Community College featuring one of a kind artwork and gift packages.

If the banquet itself is not enough to entice you, consider these Special Events:

**Juror's Reception:** October 11, 2002 7pm
John Ascuaga's Nugget

**Golf Excursion:** October 12, 2002 6:30am
The Dragon golf course at Nakoma Resort - $150
(www.nakomaresort.com) Limited to 32 golfers
Call 775-827-6600 to reserve a spot

**Tour:** Frank Lloyd Wright Designed Clubhouse
- free with golf - Nakoma Resort

Don't delay, make your reservations today.

2005 AIA NATIONAL CONVENTION
Randy Lavigne, Executive Director

On May 12-14, 2005, the Las Vegas Chapter of the American Institute of Architects will host the AIA National Convention here in Las Vegas! In the history of the AIA, this is the first time that Las Vegas has ever been chosen as the location of our organization's convention. This provides a wonderful opportunity for our Chapter to showcase our exceptional city and to highlight the contributions and the innovations made by our AIA members in creating the most visually exciting, entertaining and livable communities in the country.

In order for our Chapter to host an event of this magnitude, we need the support and collaboration of all our members. At the same time we want to be sure that all our members receive the benefits of this endeavor.

By 2005, it is anticipated that the Registration Fee for participation in the Convention Continuing Education programs will be as much as $250.00 per person. As the “hosting Chapter” AIA Las Vegas has negotiated with AIA National for all Architect and Associate members of AIA Las Vegas to be registered in advance for the Convention at a discounted rate of $150.00 each. So, each AIA LV member will receive a discount of potentially $100.00. (This special discounted fee is contingent upon the approval of the $150.00 Advance Registration Assessment by our AIA Las Vegas members.)

Every Chapter that hosts the Convention (Colorado, the Carolinas, San Diego, Chicago) uses this method of advance registration in order to secure the necessary advance funding. AIA Las Vegas is no different. In order to secure the “seed money” we need to plan and prepare for the Convention for the next three years..... We need your approval and your pledge to pay your discounted registration fee through an assessment of $150.00. The assessment would be included on your 2003 AIA National dues invoice and would be payable in two ways over the next two years. (1) You can pay the $150.00 at one time in 2003 and receive an additional $25.00 discount ($125.00), or (2) You can pay the $150.00 in two payments of $75.00 each, one in 2003 and the balance in 2004.

The request for the assessment will be brought before the membership for approval at the September Membership Meeting scheduled for 6PM on Wednesday, September 18th, at the UNLV School of Architecture. We are asking that you support your Chapter by attending the meeting and voting to approve the "Advance Registration Assessment".

Your approval is very important. It will make it possible for everyone to win. and together we can prepare and host the most memorable AIA National Convention in the history of the Institute.

983 Days until C-Day!
Welcome Back to School

The September Membership Meeting will provide a “welcome back to school” for students, faculty, staff AND for the professional community. Join us on Wednesday, September 18th at the UNLV School of Architecture, at 6PM for the “AIA Welcome Back Reception”.

This meeting will provide an opportunity for our members to celebrate the accreditation, possibly welcome the new Director and discuss ideas of what it takes to educate an architect. President Carol Harter, Dean Jeff Koep, Interim Director Bob Tracy, and UNLV Advisory Chair Ray Lucchesi have been invited to discuss the real requirements of educating architects and design professionals in our changing academic and professional worlds.

Also, an important piece of Chapter business will be conducted. The request for the “Advance Registration Assessment” will be brought before the membership for approval. We are asking that you support your Chapter by attending the meeting and voting to approve the “Advance Registration Assessment”.

Make your plans to attend and RSVP to 895-0936 right away.

AIA LV FALL PUTTING TOURNAMENT
FRIDAY, SEPTEMBER 13TH

SOLD OUT!!! The 9th Annual AIA Las Vegas Fall Putting Tournament is sold out and is being held at 6PM on Friday, September 13th at Angel Park Golf Course. There are fabulous prizes, great food, good company, challenging competition and a lot of fun for everyone.

The Fall '02 semester is about to begin and, once again, the School of Architecture is grateful for the continued support of the professional community to help us provide the myriad of curricular offerings in Architecture, Interior Design, and Landscape. The pool of adjunct faculty is deep in teaching qualifications and broad in experience. The strength of the program is the sustained commitment made by the professional community to the School...and our students are the beneficiaries.

The activities this Fall '02 semester, from guest speakers to exhibitions, promise to be exciting and stimulating. I hope to see all of you at as many of these activities as you are able to make with your busy schedules. Be sure to mark your calendars! Also, be on the lookout for announcements this September regarding the search for a new Director and the expansion of the Sogg facility. We hope your summer was enjoyable and rewarding and, for those professional members who are on our adjunct list of faculty, we welcome you back for what promises to be a most interesting and stimulating Fall semester.

The next program to be presented by the Committee for Livable Communities will focus on the South County Airport Environs Master Planning. It will be presented on Tuesday, September 24th at 6PM, UNLV School of Architecture.

Please mark your calendar and plan to attend.

If Walls Could Talk, They'd Say HCE.
That's because we're behind so many. Over the past 18 years, we've provided the highest quality HVAC, plumbing and electrical design solutions for more than 2500 projects in the fastest growing metropolitan area in the country. Whatever your project—Public Works, Commercial, Hospitality, Technology, Medical, Industrial/Manufacturing, Educational—we can solve your mechanical and electrical design problems. Check out our hidden talents at www.harrisengineers.com

COMMITTEE FOR LIVABLE COMMUNITIES (CLC)
Chuck Kubat, AIA -Co-chair

The next program to be presented by the Committee for Livable Communities will focus on the South County Airport Environs Master Planning. It will be presented on Tuesday, September 24th at 6PM, UNLV School of Architecture.

Please mark your calendar and plan to attend.

JOINT ASSOCIATION CHARITY DRIVE

Each year, the AIA, APWA, CSI, AGC, ACEC and other affiliated organizations, lead by Peggy Pound, APWA Chair of Charity Events, join together to raise money and toys for local children's charities. This year we are sponsoring Renardo Martinez Pre-School (110 Children - Ages 4-5). It is our plan to put a coat and a pair of new shoes on each child and host a Christmas Party with a Santa Clause at the school. We will be registered at Target and Toys R Us, so anyone wishing to make a contribution can do so.

Contributions and donations can also be made at the Joint Association Charity Luncheon, being held on December 5th, 11:30AM at Palace Station (upstairs meeting rooms). The cost of the luncheon is $25.00 pp. RSVP to Peggy Pound at 804-2070 or e-mail PeggyP@GCWallace.com.
AIA LAS VEGAS 2003 BOARD OF DIRECTORS

AIA LAS VEGAS PRESIDENT'S MESSAGE
Craig Palacios AIAS, ASID, President AIAS Las Vegas

As this year's AIAS Las Vegas president I would like to publicly thank all of the firms and the AIA for the years of support that you have given us. Every year our organization receives support from firms and from the AIA Las Vegas, in various forms, including financial. Usually these benefactors receive no recognition, not even as much as a thank you letter from us. However, year after year AIAS can rely on the support being there. It is one of my goals this year to not only continue the relationship between AIA and AIAS, but to further it. I believe that each organization is vital to the other.

We are currently building an AIAS Las Vegas Web Site. Member, Spencer Hardy (last years president), has spearheaded the project and hopes to have it running by Spring Semester.

AIAS-ASID Newsletter issue one is scheduled for release August 30. AIAS member Jared Ledo has been elected editor and chief. Jennifer Strasner President of ASID has formatted the journal and has taken responsibility for production of the first issue. The newsletter will cover current issues, a calendar of events, and student written articles.

The School of Architecture sent President Craig Palacios and Vice President Jeff Wagner to 2002 AIAS Grassroots convention in Washington D.C.

AIA 2002 BOARD EXECUTIVE BOARD
President: Craig Palacios - Craig is a fourth year student pursuing a dual degree, a Bachelors of Science in Architecture and a Bachelors of Art in Art History. He is also a member of ASID and the plaster and cement Masons Union local 797. Craig is an intern at the firm Sandberg & Small Architecture.

Vice Pres: Jeffrey Wagner - Jeff Wagner is a fourth year architecture student. He has implemented and coordinates the high school mentorship program.

Secretary: Spencer Hardy - Spencer is a fourth year architecture student. He was president of AIAS for the past two years. Spencer is an intern at Lucchesi, Galati Architects inc.

Treasurer: Kip Katich - Kip is a fourth year architecture student. He was a recipient of the 2002 AIA Las Vegas Scholarship. Kip Interns at the firm Lineworks.

REPRESENTATIVES
1st Year: No Rep./ 2nd Year: No Rep./ 3rd Year: Bojana Jamborcic and Monique Neugebauer / 4th Year: Eric Bond / 5th Year: No Rep./ 6th Year: No Rep.

NEW Elected Positions - Graphic Designer: Myles Sciotto 4th year (last years vice president) Events Coordinator: Carly Bennett 3rd year
Every building has come into existence only after a need for it has been articulated. From the beginning of human civilization, architects have prepared rudimentary or complex instructions on how to create buildings for shelter, leisure, worship, and commerce. Beginning in the eighteenth century, buildings became more complex but it was not until the Industrial Revolution at the beginning the nineteenth century that specialized building types came into existence. This growth of specialized building types contributed significantly to the increased need for comprehensive programming activities.

Contemporary interest in programming began in 1966 when the American Institute of Architects published its first booklet on the subject entitled, Emerging Techniques of Architectural Practice. While AIA has declared programming as a separate and important activity within the architectural delivery process, AIA has not formally adopted a position that would elevate programming to the level of a standard basic service on the B-141 agreement. (A forthcoming article will explore the impact of AIA’s position. For example, did you know that architecture firms are losing millions of dollars a year in potential services fees to accounting and business consulting firms who offer strategy and planning services to facility executives?)

The definition of architectural programming varies widely among scholars and practitioners. Some view programming as a necessary and prerequisite step whereby the programmer uses a systematic process of gathering and analyzing information about a building or setting, and then uses that information to create guidelines for the performance of that setting. Others view programming as separate from design and one that should be performed by the building’s owner. Still others perform cursory programming activities and rely on drawings, matrices, and diagrams to show basic departmental adjacencies, space requirements and circulation patterns. The American Institute of Architects has defined programming as the process of leading to a statement of an architectural problem and the requirements to be met in formulating a solution. Generally, the programming process involves steps of data collection, data analysis, data organization, communication of data, and evaluation. Each program is a customized statement of needs and aspirations relating to the building. Robert Hershberger, FAIA, professor at the University of Arizona College of Architecture, Planning, and Landscape Architecture, has defined programming as the first stage of the architectural design process in which the relevant values of the client, user, architect, and society are identified; important project goals are articulated; facts about the project are uncovered; and facility needs are made explicit.

According to Hershberger there are four basic programming approaches that architects use today: the Design-Based Architectural Model, the Knowledge-Based Architectural Model, the Agreement-Based Architectural Model, and the Value-Based Architectural Model.

The Design-Based Architectural Model assumes that programming and design occur simultaneously. Usually the architect meets briefly with the client to gain a general understanding of the project’s needs and programming proceeds as the architect creates varying design concepts for the building. The client selects the design concept that best suits his needs and the designer modifies the design as the design process continues toward the construction documentation phase.

During the late 1960s, a second programming model emerged as the Civil Rights Movement enveloped our country. The Knowledge-Based Architectural Model assumes that the ensuing design solution should support the needs of the inhabitants of the building. This design movement arose to correct misalignments between people and the built environment especially for large complex buildings such as prisons, hospitals, and governmental office buildings. This approach has never gained much momentum, perhaps due to its emphasis on the social sciences.

The third model described by Hershberger is the Agreement-Based Architectural Model. This approach to programming assumes that the programmer is a facilitator of knowledge. He or she meets with key individuals such as CEOs, senior executives, or building committee members and directs them to acquire the necessary programmatic information needed for the design phase of the project. The key to the success of this approach is in the programmer's ability to gather accurate information from the client and relay this information to the designer of the building. The most notable example of this programming approach is seen in the problem-seeking approach of William Peña. The problem-seeking model emphasizes the separation of programming and design: programming being analysis and design being synthesis. The model involves over 140 considerations categorized into five major programming steps: goals, facts, concepts, needs, and problem. The fifth step, which states the problem, is the transition point where programming meets design. The five steps are each filtered through four major considerations: function, form, economy, and time.

Hershberger outlines one final approach to programming and he refers to it as the Value-Based Architectural Programming Model. Value-based programming is simply the accumulated strengths of the first three approaches discussed above. Hershberger refers to his model as the "HECTTEAS" model, which is the acronym for the value areas he tests during the programming phase of design. The value areas are: (continued on page 10)
2002 C.E. LUNCHEONS

The following is a list of the C.E. Luncheons that are scheduled for 2002. Watch for details and updates on this page:
- **September 26th** - “Civil Litigation” by Burke & Associates
  Location TBA
- **October 24th** - AIA COTE Committee C&A Floor Coverings
- **November 21st** - Topic TBA
  Ninyo & Moore

CLARK COUNTY ENERGY MANAGEMENT WORKSHOPS

Clark County and the U.S. Department of Energy’s Rebuild America program are sponsoring a series of workshops aimed at educating government and the public on energy management practices. Each of these workshops will be registered for AIA C.E. Credit.

Workshops will be held at the Clark County Government Center Chambers (500 S. Grand Central Pkwy. 1st Floor) as follows:
- **September 13** - Total Building Controls
- **October 11** - Commissioning
- **November 8** - Envelope (windows & roofs)
- **December 13** - Energy Star Procurement

Individuals interested in attending can RSVP to 455-5528 or by e-mail at admiservinfo@co.clark.nv.us. You must sign-in at the workshop in order to receive your AIA C.E. Credit.

SMPS EDUCATIONAL SERIES:
The Shortlist Interview Toolbox
Thursday, September 26th - 9:30A-12:30P
Clark County Library Conference Center
1401 E. Flamingo Road
Registered for 3 AIA C.E. Credits
SMPS Members $45.00 / Non-members $55.00
Call 798-5156 to register

CONNECTIONS: (continued from page 9)
Human: Functional, social, physical (ADA), and psychology.
Environmental: Site, climate, context, resources, and waste.
Cultural: Historical, institutional, political, and legal.
Technological: Materials, systems, and processes.
Temporal: Growth, change, and permanence.
Economic: Finance, construction, operations, maintenance, and energy.
Aesthetic: Form, space, color, and meaning.
Safety: Structural, fire, chemical, personal, and criminal.

Regardless of the differences among definitions of programming or differences among theoretical approaches to programming, one common assumption does exist among the majority of architectural programming approaches such as those described in the preceding paragraphs and that is: The primary purpose of programming is to determine the needs and requirements for the design of the proposed building. Applying this assumption further, the assumption that underlies a large percentage of architectural design theories and corresponding design activities is that the purpose of architecture is to create a “great” piece of artwork - a beautiful object. In other words, many design professionals approach building design from the vantage point of the building itself. Supporting this perspective, architect Phillip Johnson has said, “The job of the architect is to create beautiful buildings. That’s all.”

In a forthcoming article, I shall explore an alternative view of architecture and one that assumes that the building is an object and a subject. This alternative view also assumes that the building is an active participant in the lives of social actors and that it can act as an agent for organizational, communal, environmental, societal, and generational transformation. And, perhaps most fundamentally, this alternative view assumes the architect engages in the practice of “place-making.”

About the author:
Valerie Bugni is an organizational and social researcher with Lucchesi, Galati Architects, Inc. If you have a comment or idea for an article, send her an email at vbugni@lgainc.com or telephone her at 702-263-7111.
**THE BEST CONTRACT DOCUMENTS JUST GOT EASIER TO USE.**

AIA Contract Documents were created from a consensus of contractors, attorneys, architects and engineers. They've been finely tuned through 110 years of legal precedent. And now they are easier to use than ever before thanks to:

* 11 new or revised documents
* Faster-printing “DRAFT” watermark for clean, readable copying and faxing
* Multi-seat licenses
* Improved navigational aids and formatting

To order call or visit your AIA Las Vegas office - 702-895-0936
Rooms 135/136 Sogg Architecture Bldg, Brussels Street
UNLV Campus
