

C O L U M N S

Design Awards '94

Your clients depend on you to be knowledgeable of materials and techniques while still providing professional design expertise. You can depend on John Deklewa and Sons, Inc., for quality workmanship and professional management on all your construction projects.

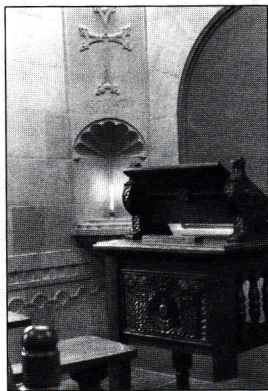

No area general contractor is better known or more respected than John Deklewa and Sons.

One of our recent projects, The Clubhouse at Nevillewood is now home to the Family House Invitational Golf Tournament.

Sweating The Details Is No Sweat

In the seventy-five years since our founding, we've produced some of the most dramatic and functionally well-integrated buildings in Western Pennsylvania, Ohio and West Virginia.

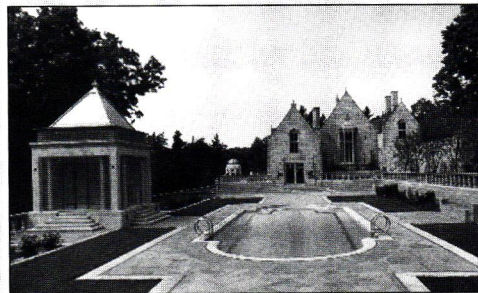

The Armenian room located on the third floor of the Cathedral of Learning at the University of Pittsburgh is the 22nd nationality room to be established at the university. The stone arched room copies the masonry techniques of church and monastery builders of the 11th century. This magnificent classroom was designed by Torkom Khrimiam who emigrated from Armenia in 1978.

We offer a full range of contractor services. Our pre-construction planning and value engineering, for example, can detect trouble spots early to help smooth out the production process. This insures your project comes in on time and on budget.

Whether you're considering renovation and retrofit of an existing structure or new construction, consult the experts at John Deklewa & Sons, Inc.

For a more detailed analysis of your specific needs, contact John E. Deklewa, President at 257-9000.

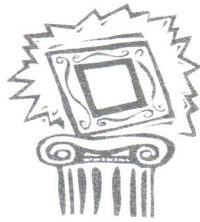

"Elm Court", a 9-acre private estate located north of Pittsburgh, involves unique additions and renovations. For example, the pool above is heated and has an ozone purification system. The deep blue water is surrounded by a granite surface edged in limestone. The pool is lined with hand made ceramic tile. On the left is a pool house sitting area. To the right is the "Fish Slide" built to hold two antique Indian carved marble panels giving the appearance of two carved fish swimming in the current of the fountain.

On the cover: Some of this year's top winners.

AIA Pittsburgh serves 12 Western Pennsylvania counties as the local component of the American Institute of Architects and the Pennsylvania Society of Architects. The objective of AIA Pittsburgh is to improve, for society, the quality of the built environment by further raising the standards of architectural education, training and practice; fostering design excellence; and promoting the value of architectural services to the public. AIA membership is open to all registered architects, architectural interns, and a limited number of professionals in supporting fields.

COLUMNS is published ten times a year by, and primarily for, members of AIA Pittsburgh, A Chapter of the American Institute of Architects. Preference may be given to the selection of works, articles, opinions, letters, etc. of members for publication. However, in the interest of furthering the goals of the Chapter, as stated monthly at the top of the masthead and in the membership directory, COLUMNS will publish the names of and properly credit non-members, whether as participants in the design of works submitted by a member, or as designers of their own work, or as authors of articles, opinion or letters.

Opinions expressed by editors and contributors are not necessarily those of AIA Pittsburgh. The Chapter has made every reasonable effort to provide accurate and authoritative information, but assumes no liability for the contents.

Do It With An Architect

Karen Loysen, AIA President

Welcome to the 1994 Design Awards—

a celebration which recognizes the accomplishments of western Pennsylvania architects. At this annual event the Pittsburgh Chapter of the American Institute of Architects acknowledges architects who aspired to high standards and achieved their goal, as well as clients who placed emphasis on the quality of their projects and builders who took extra care with their craft.

The awards not only recognize architectural structures, but reaffirm the value of working with an architect and the importance of striving for high quality design in our built environment.

The awards not only recognize architectural structures, but reaffirms the value of working with an architect and the importance of striving for high quality design in our built environment. The value of architectural design can be measured in many ways—in economic terms, as when property is improved through an architect's vision, or in property development, when good design creates feasible development opportunities. When an architect imparts distinction to the design of a site or building, its value and marketability are enhanced. Using architects' expertise for the remodeling of existing structures insures that sound technical decisions are made to protect owners' investments.

While matching the ambition of a project to its budget is always difficult, an architect's creative thinking can help an owner make the most of budget dollars. In addition to being an expert in the technical aspects of design it is the finding of poetry in the design solution which is the special contribution an architect can make. An architect is able to lift the spirit, express wit or whimsy, explain a didactic point, bring meaning, calm or awe-inspiring strength to a place through his or her designs. They can envision and bring to reality the feelings and images which make a place wonderful to use, see and remember.

While an architect can create wonderful places, quality in architecture occurs best when the people who use build-

ings care about the space as much as the creator. Good architecture needs to be fostered by those who hire architects—cities, developers, private clients, architectural selection committees. Seeking the most qualified architect is one of the surest means of producing well designed buildings. Merit selection processes and careful matching of architects' skills to projects are essential.

Ultimately, design excellence is in everyone's best interest. The work of an architect is an asset not only to the people who live and work in his or her structures, but can make a difference in the surrounding area and be a marketing tool for a city or region. For successful promotion of tourism, convention business or regional development in Pittsburgh, rigid planning, urban design and architecture standards should be established and followed. This means high standards not only for buildings, but also for transportation and infrastructure networks, parks and public spaces, natural landscapes and riverfronts.

So do it with an architect. Do it as well as possible. Good architecture is worth the effort. Whether you are an architect, client, builder, owner or building user, be inspired by the designs on the following pages to set high standards and strive to meet them. 🏠

Standing Above the Rest

Anne Swager, Executive Director

To begin to articulate our design desires, we have to recognize the difference good design can make in our daily lives.

As we drive about town,

my comments to my children about who built what building and why I like it or don't is one of the quickest ways to elicit loud groans and moans from the backseat. They protest loudly and frequently that no one cares, especially in the backseat, who designed what. The only way to impart any knowledge to them is to throw out small sound bites of information before they have a chance to start channel surfing on the radio. My children are at those awful ages when they have a negative opinion about everything, including what I wear ("too 80's") and who I date ("he's a geek"). But looking on the positive side, maybe some of what I say is beginning to sink in because they are starting to comment about what they see.

I make no bones with my children about my opinion on anything and everything but mostly we talk about places in their neighborhood. Where they live is also where they play and go to school and so, it is most important to them. Our recent attentions have focused on a very small commercial district near our house. The district is old and the buildings mostly suffer from disinterest or modernization attempts from an era when upgrading meant slapping some new materials on a building to render it unrecognizable. Henry, my 11 year old son, commented on a new enterprise in this district (yet another pizza parlor), just the other day. He commended the owners for their efforts to paint and fix up the building but he said it *didn't fit*. It was like covering a gingerbread house with pepperoni—it would look stupid and wouldn't taste very good. In a stunning jump of logic, he announced that the pizza probably wasn't very good either. I was too surprised by his design aptitude to argue with him about jumping the gun on the pizza we hadn't tried. (Besides, it wouldn't have done any good since he is always sure he is right.) It's important to look around our environment to see what works and why. It is also important to commend those that made positive contributions.

Chapters of the American Institute of Architects have an annual awards program to recognize the architect(s) as a designer who makes positive contributions and also, to recognize the client. Sure, the client pays the bill and without them there would not be any new projects, but our recognition goes beyond the obvious. Design is not easily articulated by those of us who are untrained in the discipline. Often because design is not easily explained, it is discounted. Clients deserve recognition precisely because they wanted their building or project to be something more and they said so. Tenser, Phipps and Leeper Corporation wanted to be a good neighbor in their suburban community. The Legent Corporation wanted to minimize the effects of acres of black asphalt for parking cars. The Pittsburgh Child Care Institute wanted a place where children could stretch their imaginations and feel joyful. With architects, these clients accomplished what they set out to do. Their buildings stand out above the rest and send a message to their community that they care.

This year AIA Pittsburgh has also joined with the Master Builders Association to recognize the builders of these projects. Contractors take the vision and have to bring it in on time and within budget. We reward and celebrate the team effort between architect, builder, and client that results in these special places.

To begin to articulate our design desires, we have to recognize the difference good design can make in our daily lives. The public—the users of our places—deserve and sometimes demand that we do this. Today, it's Henry versus the neighborhood pizza parlor. Tomorrow, maybe it will be an entire suburb against Wal-marts and their acres of asphalt. My applause to the architects, builders, and clients who already care and are making a difference. ■

Omni-stone®

Lampus Architectural Pavers

Out-Performs All Paving On Earth

The architectural approach to any structure is literally where excitement in design begins. Let Omni-stone® pave the way for your next major project. Cost effective from Corporate Plazas and Entry Ways to Commercial Sidewalks and Courtyards. Your approach with Omni-stone® will out-perform all paving on earth.

- 8 shapes/9 colors/2 thicknesses
- High Strength: less than 5% absorption rate
- Permanent Line Marking: Contrasting Colors allow pattern for crosswalks or parking spaces
- Compressive strength exceeds 8,000 PSI

The hardest task is selecting which one.

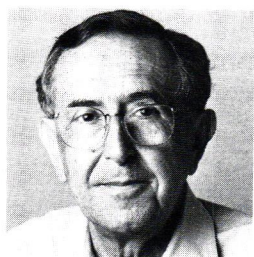

- Unique Textures
- Custom Colors
- Variable Thickness
- Special Styles

What Are Design Awards?

And who gets to judge them?

Cesar Pelli, FAIA

Cesar Pelli, FAIA, has designed numerous award winning projects, including the San Bernadino City Hall in San Bernadino, California; the Pacific Design Center in Los Angeles, California; and the United States Embassy in Tokyo, Japan.

Mark Simon, FAIA

(not pictured: Alexander Purves)

A Design Awards jury, comprised of

architects outside of western Pennsylvania, reviews and evaluates work of AIA members and firms whose principal(s) are members of AIA Pittsburgh every year. There are two categories of design awards, **Architectural Awards** and **Open Plan Awards**, with three levels of recognition—Silver Medal, Honor Award and Citation of Merit. Awards are given at the jury's discretion. The Silver Medal is the highest honor, celebrating an extraordinary building. An Honor Award is given to the best of this year's submissions and a Citation is awarded for a particular aspect of a project that is noteworthy. The jury may award as many or as few Honor Awards and Citations as they like. However, no more than one Silver Medal per category can be awarded and the jury may choose not to award any Silver Medals.

Architectural Awards require an entry to be any work of architecture—such as a building, urban design restoration or interior design—completed since January 1, 1989. Open Plan Awards are open to all designers with architectural degrees and can be unbuilt work, research, theoretical projects and work in the allied arts completed since January 1, 1989. The jurors particularly liked the latter category for it allowed architects to show their creativity as well as the diverse talents an architect has to offer.

Reviewing Trio

Cesar Pelli, FAIA, named one of the ten most influential living American architects in 1991, is the keynote speaker for AIA Pittsburgh's 1994 Design Awards at the Fulton Theatre and the chairperson of the jury for the Architectural and Open Plan Awards. His firm, Cesar Pelli & Associates of New York City, was named AIA Firm of the Year in 1989 and his design of the World Financial Center and Winter Garden at Battery Park City in New York has been ranked among the ten best works in American architecture since 1980.

In addition to Pelli, Alexander Purves, AIA of Alexander Purves, Architect and Mark Simon, FAIA of Centerbrook scrutinized over 70 Pittsburgh design submissions before coming to the conclusions and comments displayed on the following pages. Each juror reviewed all the projects, making his individual short list. All of the short-listed projects were further reviewed and discussed before the jury arrived at a unanimously accepted list of winners: six Honor Awards and four Citations of Merit.

Building Excellence Awards

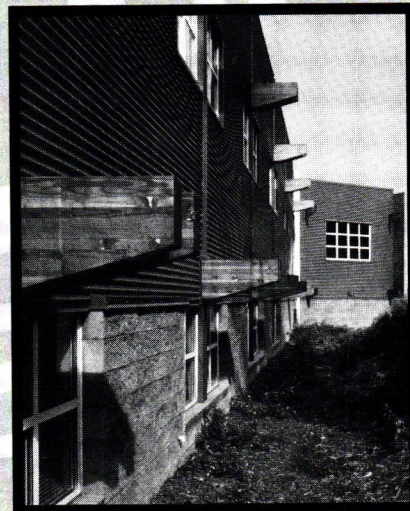

This year AIA Pittsburgh joined with the Master Builders Association for the first time to recognize the builders of high quality projects in our region. Jurors Daniela Holt Voith, AIA of Voith & Mactavish, and builder Thomas Unkefer of Unkefer Brothers Construction Company, selected six winning projects—one Silver Medal, four Honor Awards and two Citations of Merit. These projects appear on the following pages of this special issue of *Columns*.

DESIGN AWARDS

A LOOK AT SOME OF PITTSBURGH'S BEST.

AIA Pittsburgh members have been awarded one Silver Medal, ten Honor Awards and six Citations of Merit for exceptional projects in the 1994 Design Awards. These and other architectural accomplishments fill the following pages.

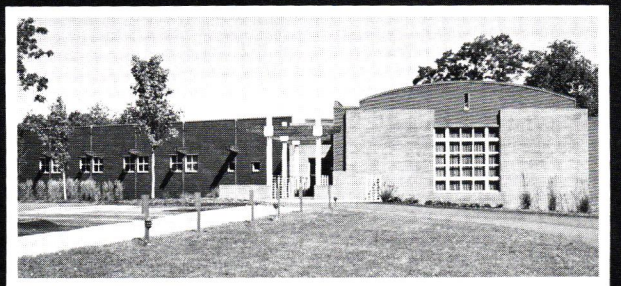

SILVER MEDAL AWARD BUILDING EXCELLENCE

L. P. Perfido Associates
Tenser, Phipps and Leeper
Corporate Offices
Shaler Twp., PA

ARCHITECT: Alan Weiskopf, AIA
CONTRACTOR: TEDCO
Construction Company

"...Site location is highly successful in not having the building impose itself on the surrounding residential neighborhood. The building is a good neighbor."

BUILDING EXCELLENCE

This year AIA Pittsburgh joined with the Master Builders Association for the first time to recognize the builders of high quality projects in our region. Six winning projects were selected.

HONOR AWARD

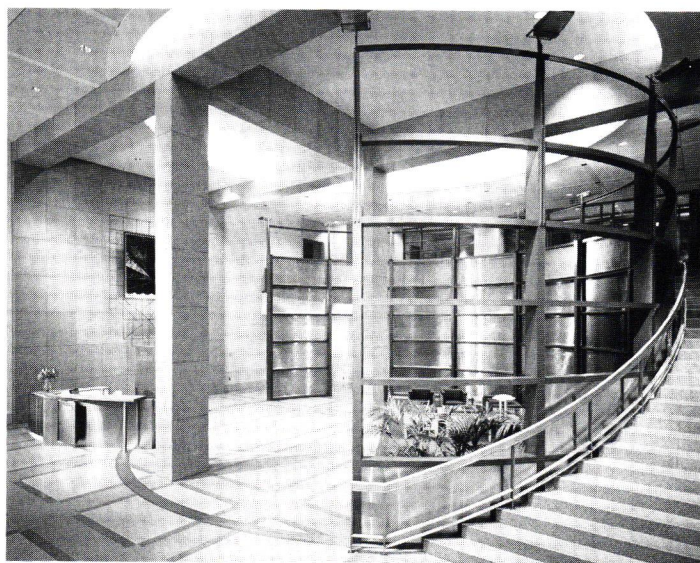

Burt Hill Kosar Rittelmann Associates

AEG Automation Systems Corporation Offices and Assembly & Test Facility

ARCHITECT: David L. Henderson, AIA

CONTRACTOR: Mascaro, Inc.

"...It is a no nonsense building. The award was given because of exceptional service to the client and innovativeness of technique."

HONOR AWARD

M. Raymond Hildreth, AIA Hillman Properties, Inc.

Legent Building

MASTER PLANNER AND DESIGN ARCHITECT: Michael S. Haas, AIA; ADD, Inc.

ASSOCIATE ARCHITECT: Martin Powell, AIA; The Design Alliance

CONTRACTOR: Mellon Stuart Construction Inc. David Meuschke, project manager

"...The integration of the building with the site is exemplary. The parking lot is not just your typical sea of asphalt. The entry sequence is a strong organizing element which relates the two levels of the building."

HONOR AWARD

MacLachlan Cornelius & Filoni, Inc.

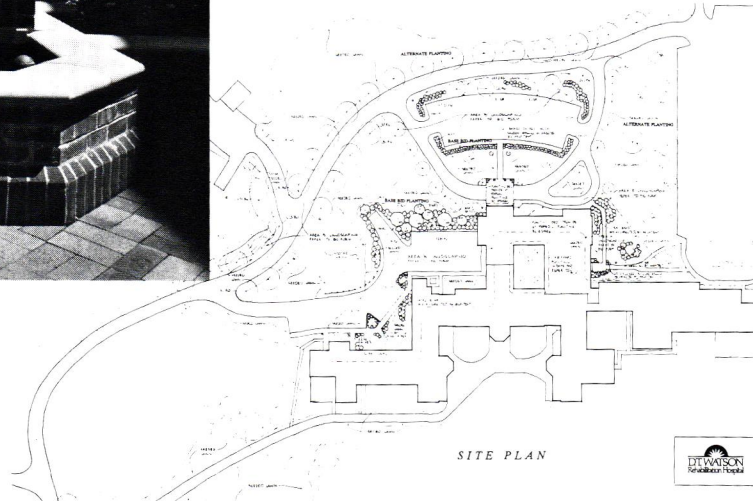

North Court Expansion, D. T. Watson Rehabilitation Hospital

ARCHITECT: Albert Filoni, AIA; Clare Cornelius, AIA

CONTRACTOR: Landau Building Co., Inc.

Edward Hughes, Steve Bishop, Dale Cupec

"...The carpentry was impressive especially the detailing of the door and the medallions. It was refreshing to see true mullion windows. There was an obviously excellent relationship between the architect, builder and client."

SITE PLAN

CITATION OF MERIT

Integrated Architectural Services Corporation

Dollar Bank – McIntyre Branch

ARCHITECT: John A. Martine, AIA

Douglas T. Philp, AIA

CONTRACTOR: Landau Building Company

"...The use of the plastic roof glazing in the drive-through area is particularly well executed. The sheet metal and iron work, particularly the down spouting, is well done."

BUILDING EXCELLENCE

**CITATION OF MERIT
MacLachlan, Cornelius &
Filoni, Inc.**

*P. C. Rossin Campus Center
Washington & Jefferson College*

ARCHITECT: Albert L. Filoni, AIA
Clare Cornelius, AIA
Kenneth K. Lee, AIA
Richard Moninger, AIA

CONTRACTOR:
Landau Building Company
Edward Hughes
Dale Cupec
Gilo Zavala

"...The campus center blends well with the adjoining building in part because of the brick section. The building relates well to the slope and the steps which descend between the two buildings provides an intimate and graceful way to approach the rest of the campus."

Dramatically reduce your health care costs without sacrificing benefits through the AIA HealthAssurance Program.

HealthAssurance is a preferred provider organization from HealthAmerica. And you can get it by becoming a member of The American Institute of Architects (AIA) Pittsburgh.

The AIA HealthAssurance Program can save you 25% to 50% over what you may currently be paying. Compare your rates to the AIA HealthAssurance *TOP* plan:

Single:	\$116.69
Parent/Child:	\$270.73
Parent/Children:	\$282.39
Husband/Wife:	\$325.57
Family:	\$338.41

Low rates usually mean weak benefits. Not so with the AIA HealthAssurance Program. Here are some highlights:

- ✿ Freedom to choose any doctor and virtually any hospital.
- ✿ No charge for doctor's office visits with HealthAssurance participating doctors.
- ✿ \$8 copayment on all prescription drugs.
- ✿ Hospitalization covered 100% with HealthAssurance participating providers.
- ✿ Preventive care services covered — including well baby care, routine gynecology exams and vision exams.
- ✿ Lifetime maximum of \$3 million.

The AIA invites you to become a member and take advantage of HealthAssurance. For more information call AIA Pittsburgh at 412-471-9548. Or, you may contact the exclusive agents for the AIA HealthAssurance Program; Adrian/Sarria Associates. Call Joe Sarria at 412-392-2770 or Barrie Adrian at 412-392-2672.

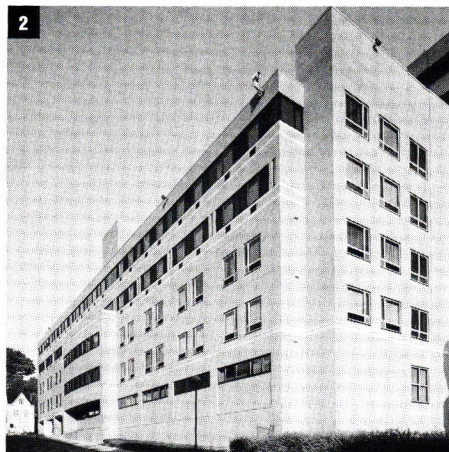

HealthAmerica®

A word about HealthAssurance...

"My firm saved enough money switching to HealthAmerica to more than pay for the firm's AIA dues."

ARCHITECTURAL AWARDS

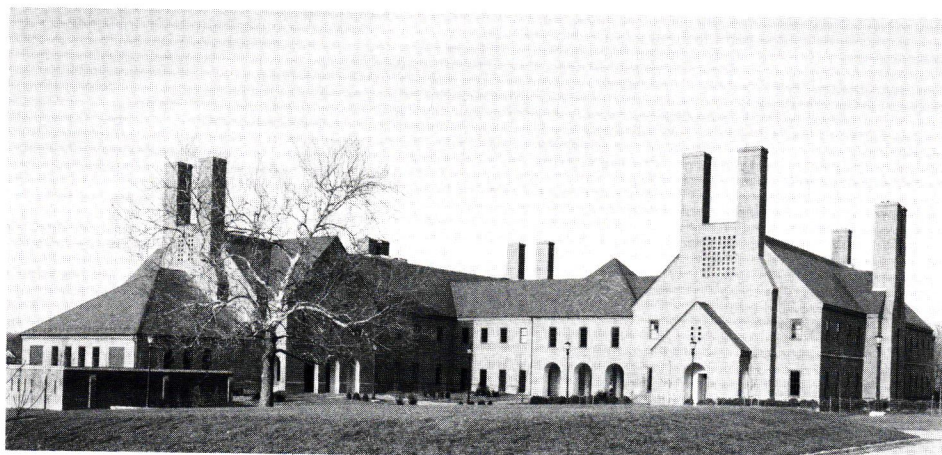

Architectural Awards are comprised of any work of architecture—such as a building, urban design, restoration or interior design—completed since January 1, 1989.

HONOR AWARD
Charles L. Desmone and Associates
Pennsylvania National Bank Building
Pittsburgh, PA

Charles L. Desmone, AIA

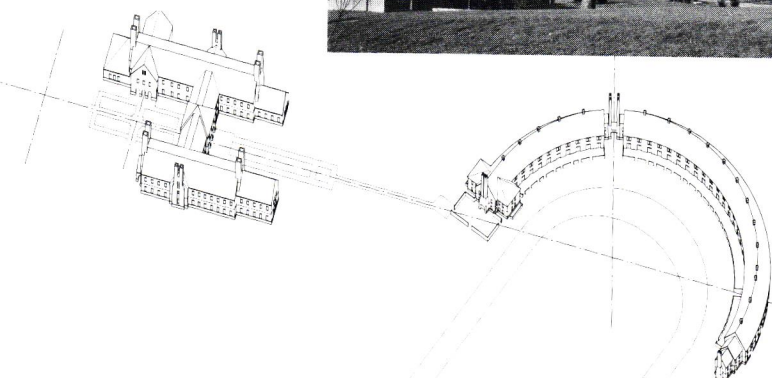

"...The project is successful because they used what they had and did not mess with it. It is simply clear and nothing is trendy."

HONOR AWARD
Bohlin Cywinski Jackson
Townhouses
St. Mary's City, MD

Jon C. Jackson, AIA
Peter Bohlin, FAIA
Bernard J. Cywinski, AIA
Dan Haden, AIA
Robin Kohles
Kelly Vresilovic

"...The science building has beautiful detailing... and the site plan is well thought out."

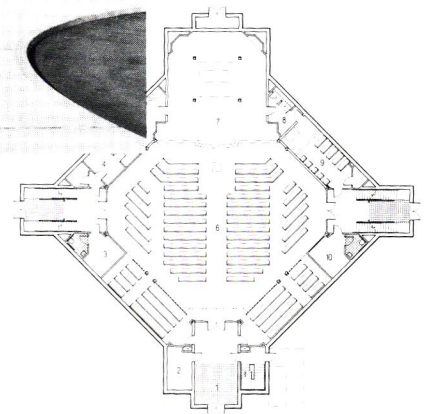

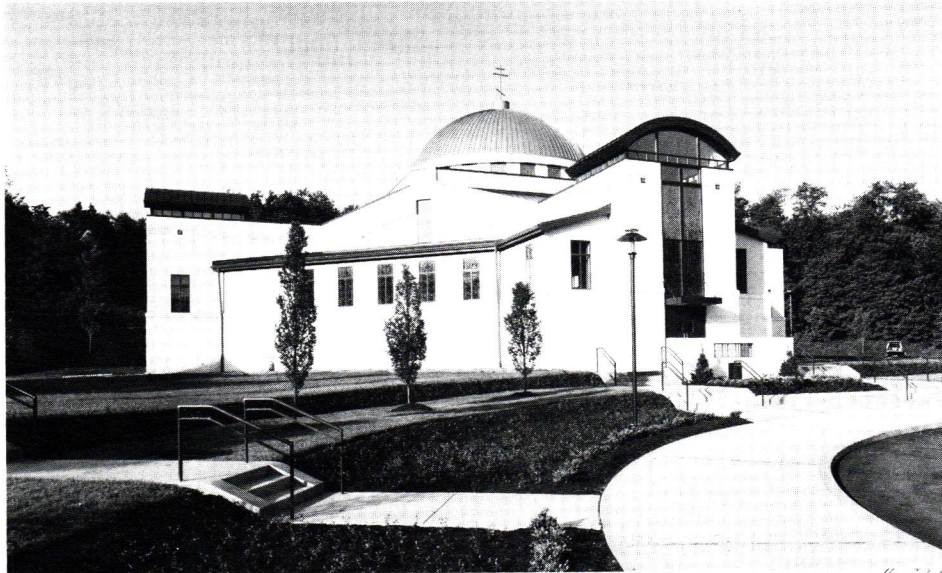

HONOR AWARD
Kingsland Scott
Bauer Havekotte
Architects

*St. John The Baptist
Cathedral and Rectory
Munhall, PA*

Grant Scott, AIA

"...The Byzantine church with its practice is not an element of our general culture. Usually, they are not designed successfully. This one was done well. The exterior massing matches this style of architecture and the masonry forms into a successful infill."

CITATION OF MERIT

Charles L. Desmone and Associates

*The Pittsburgh Child Care Institute
Pittsburgh, PA*

L. P. Perfido Associates**

Walnut Street Garage
Pittsburgh, PA

Leonard P. Perfido, AIA

"...It was an extremely difficult design problem. The jurors appreciate the effort to complement the scale of the community...the consistency of details is excellent."

ArchiCAD®

Ask yourself three questions:

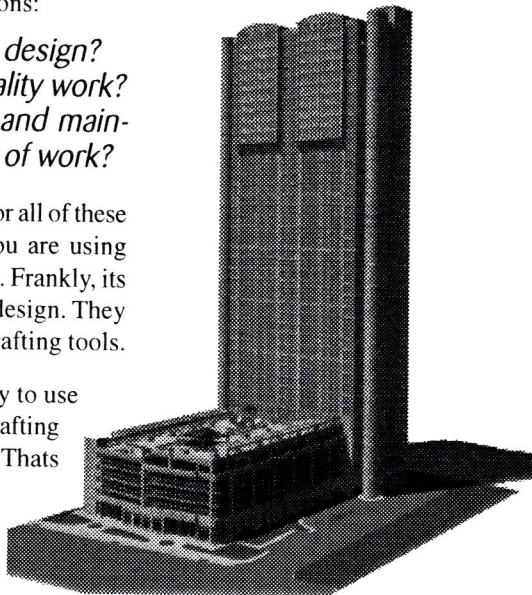

*Do "I" use CADD for design?
Am I doing better quality work?
Have I reduced staff and maintained the same level of work?*

If you answered no to any or all of these questions, chances are you are using *Autocad* or *Microboring*. Frankly, its not fair to ask them to do design. They were created as generic drafting tools.

ArchiCAD is the **only** easy to use integrated modeling and drafting software for Architecture. That's because it was created for architecture only.

Call Don Van Ollefen at 351-6558 to find out how you can use ArchiCAD for design in conjunction with your current 2D/"3D" CADD systems.

Discover the foundation of your future.

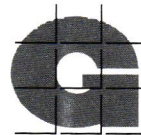

If you are planning a new building or an addition for the future, then you know that a firm foundation is needed. A well-designed plan of action that will take on the demands of day-to-day business while letting you plan for the future. The kind of foundation that will take you into the next century and beyond.

For over 20 years, General Industries has been planning, designing and constructing buildings for many of southwestern Pennsylvania's business leaders. Buildings that are the foundations for their future.

When you need the best in custom designed or pre-engineered construction, build on a name you can trust . . . build on General Industries.

Leading the industry in Custom Engineered Building systems.

OPEN
PLAN

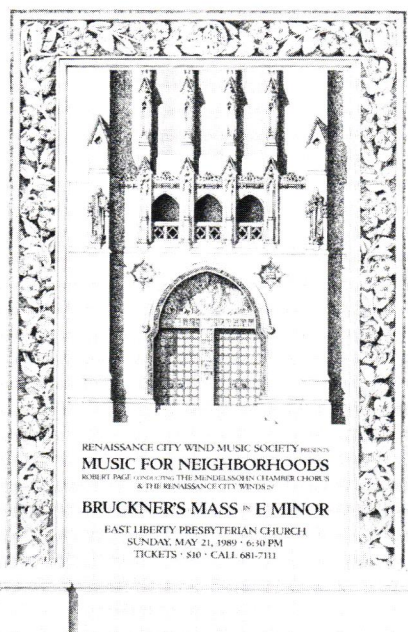

Open Plan Awards are open to all designers with architectural degrees and can be unbuilt work, research, theoretical projects and work in the allied arts completed since January 1, 1989.

HONOR AWARD
William E. Brocious, AIA

*Eucharistic Table for First Lutheran Church
Pittsburgh, PA*

"...The table complements the motions of the priests as well as its surroundings. It blends well with the church and its scale is exact. It is a clever and witty solution."

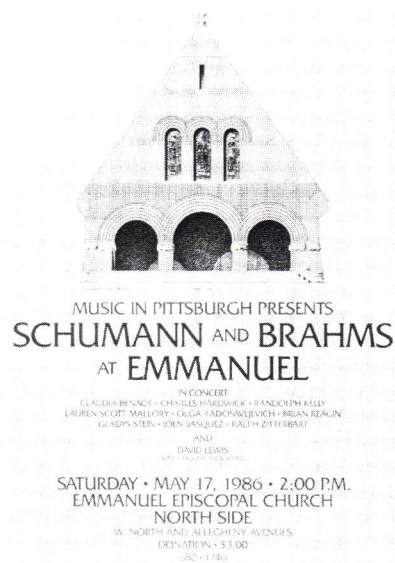

HONOR AWARD
Integrated Architectural Services

Music for Neighborhoods poster series

John Martine, AIA

"...The images were well chosen and the compositions were diversified. The jurors were delighted with the variety."

OPEN PLAN

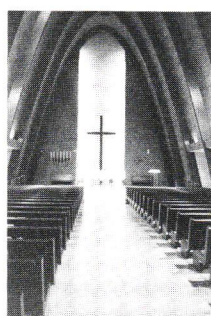

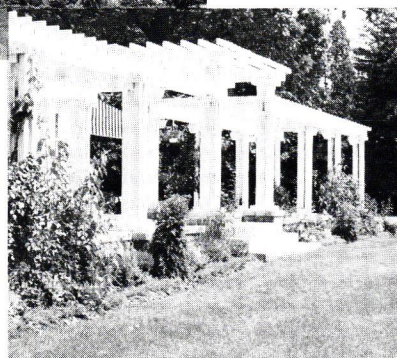

HONOR AWARD

Laura Nettleton Architecture

*Colonial Inn Pergola and Accessible Entrance
Ligonier, PA*

Laura Nettleton

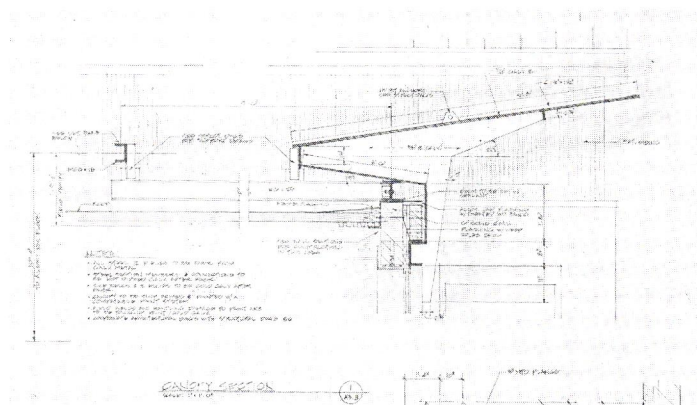

"...The ramp improves the house, makes it richer. This is exactly how accessible design should occur."

HONOR AWARD
Frederick M. Winkler Architect

*Lectern and handrails for the Chancel of Good Shepherd Lutheran Church
Pittsburgh, PA*

"...This lectern is wonderful...it transforms the space. It is clever and designed with great care and sensitivity."

CITATION OF MERIT

City of Pittsburgh

Department of Engineering

*Entrance Canopy Woods Run Fire Station
Pittsburgh, PA*

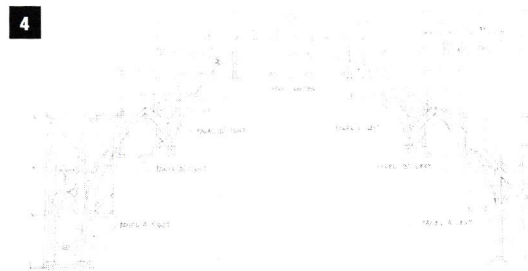

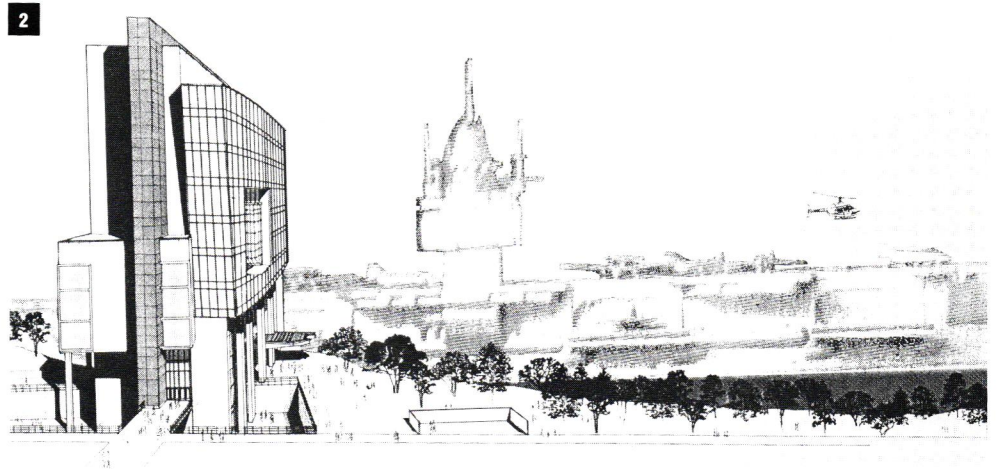

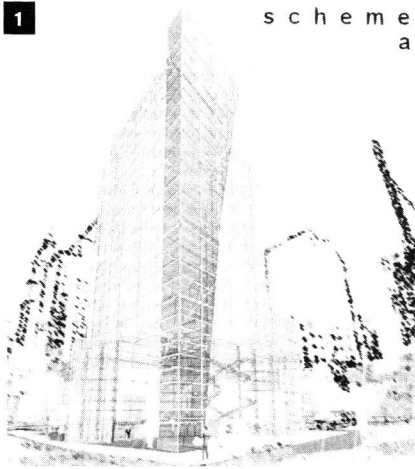

DESIGNER: Jeffrey DeNinno, Associate AIA

ARCHITECT-OF-RECORD: Brenenberg Brown Group

David C. Brenenberg, AIA

"...This was a fun thing that was designed with great care. The canopy responds to the shape of the building well."

OPEN PLAN – entries

Architecture Announcements

Architecture Career Program

Explorer Post 920 has begun another year and will be meeting every other Wednesday beginning October 5. The committee is in need of architects and interns to help high school students explore architecture as a career option. If you would like to volunteer your time, or would like more information, please contact Chip Desmone, AIA at 683-3230 or call the AIA office, 471-9548.

SMPS Meeting

The Society of Marketing Professional Services Pittsburgh Chapter announces its first fall program, *Power—The Last Dirty Word*, October 13, 1994 from 8 to 9:30 am at a location to be announced. The guest speaker will be Phil Dymond of Eastern Westmoreland Development Corporation. Contact Marian Bradley at Reid & Stuhldreher for more information, 261-0700.

Aliquippa R/UDAT

The Pennsylvania Society of Architects is sponsoring a R/UDAT in Aliquippa, PA October 21 – 23. We encourage AIA members to attend the final presentation on Sunday, October 23.

The Aliquippa R/UDAT Team includes:

Paul Farmer, chair/planner
John Axtell, preservationist/historian
Gary Carlough, architect
Jacek Dominick, Associate AIA, urban designer
Steve George, FAIA, architect/airport/URA
Bob Gleason, economist
Patricia Lowry, writer/critic
Larry Neuman, planner
Brock Onque, planner/architect/landscape architect
Eve Picker, urban design
Leonard Plotnicov, urban anthropologist

For further information, contact program director
Richard Glance, AIA, at 276-1245.

ANOTHER REASON TO BUY PELLA® WINDOWS AND DOORS

We'll give you enough space to explore your options.

*You can have windowpane
dividers and Slimshade® blinds
or pleated shades between the
panes of our SmartSash™ II system.*

Up to 1 $\frac{5}{16}$ " to be exact. That's the size of the space between the panes on Pella® Designer Series™ windows and doors with our unique SmartSash™ II glass system. There's room for wood windowpane dividers *plus* our stylish Slimshade® blinds or pleated shades for privacy. And since they're protected between the panes, dusting is strictly optional.

Quality like this only comes from Pella.

BUILT TO IMPOSSIBLY HIGH STANDARDS. OUR OWN.™
