WARDED WINNER

This speculative house by Chapter member, James F. Hilleary, built by Joseph D. Judge, recently won an Award of Merit in The Homes for Better Living Awards program co-sponsored by the American Institute of Architects and House and Home magazine. It had previously won a First Award in the Potomac Valley Chapter Biennial Competition for Awards in Architecture (PVA Vol. 10, No. 3.)

ON THE COVER

NO CURFEW ON COMFORT. Tenants in the New Tamol Building will have their choice of heating or cooling any hour of any day of the year—even on Sunday. But you won't find the heating and cooling outlets in any conventional spot. They're combined with the lighting in one integrated unit. In fact, lighting fixtures double as heating and air conditioning outlets, so floors and walls are freed for furniture. Flexibility is just one of the many advantages of electric heating and cooling. Put them all to work for you in your design for tomorrow. Call PEPCO for facts, figures, case histories—even engineering assistance. There is no charge, no obligation. Call NATional 8-8800, ext. 591 (commercial), ext. 442 (residential).

THE TAMOL BUILDING: 4232 Wisconsin Avenue, Northwest

LIGHTING THE FIRES

The recent announcement of the inauguration of a School of Architecture at the University of Maryland and the subsequent appointment of a Dean to head the Department was welcome news to the Potomac Valley Chapter AIA. The Chapter generally and some of its members specifically, working through the Institute, have been actively crusading for the inclusion of an Architectural School at the University for the past ten years.

Now that it has been accomplished, we have occasion to rejoice but not to relax. For we must continue to give encouragement and cooperation to ascertain that it does not become just another school of architecture. Our best wishes go to new Dean, John Hill, in his endeavor to form a department to justify the name.

We shall await anxiously the announcement of his teaching staff, realizing that the success or failure of a school depends on inspirational educators. Students can and do learn from each other, from seeing and from publications but their fires must be lit and kept burning by dynamic and inspirational teachers if they are to turn out the devoted practitioners we need today.

Hilleary
JOHN WILLIAM HILL
DEAN OF THE SCHOOL OF ARCHITECTURE
UNIVERSITY OF MARYLAND

Dean Hill, a native of Fort Leavenworth, Kansas, received his B.A. Degree from Rice University in 1951 and his Bachelor of Architecture Degree the following year. Subsequently, he spent three years in the service as a Naval Officer aboard the USS Cavalier and in Houston, Texas. In 1955 he returned to work for the firm of Pierce and Pierce while also pursuing graduate work at Rice University. He received a Masters Degree from the University of Pennsylvania in 1959 where he studied under Louis L. Kahn, G. Holmes Perkins and Romaldo Giurgola. Since that time and until his present appointment, he served as associate professor, then professor and chairman of the Department of Architecture at the University of Kentucky and as partner in the firm of Graves, Hill and Associates. Dean Hill is married and the father of four children.
POTOMAC VALLEY CHAPTER ANNUAL GARDEN PARTY

That this year's event was probably the most distinguished in our history was due in part to the wonderful setting, The Octagon Garden, and our good fortune in having as guests our national officers who happened to be in session at the time and added immeasurably to the event. May we always be as fortunate.

Recent Work

The two houses presented by the firm of Maryland University's new Dean of Architecture, have certain points in common. Both are located in Lexington, Kentucky and are farm houses. Characteristically, Blue Grass farm structures tend to be simple and bold in form, are placed in the landscape rather than being of it and are generally single forms located in open country and inclined to be landmarks distinguishable by form variation reflecting directness and simplicity.

a Cassidy point of view...

A quick look at the Capitol Park Townhouses will convince you they're styled for convenient, modern living. And providing the perfect accent to the view of these fashionable homes are Pella Wood Sliding Glass Doors. Designed for years of reliable, trouble-free service, these handsome wood doors snugly keep out the elements, yet allow a beautiful view of that favorite outdoor area.

For the past 35 years, we have been serving Washington architects and builders with a wide selection of quality building products. Cassidy Representatives are always available to assist you in determining the windows, doors and other products best suited for your needs. When planning your next project—be it townhouses, an office building or an industrial complex—call us. We'll show you the value of a Cassidy point of view.
