FEBRUARY 1951
VOLUME 19 No. 2
CONDUCT JOINT PRODUCT LITERATURE COMPETITION

A BUILDING PRODUCTS LITERATURE COMPETITION is being conducted jointly by The American Institute of Architects and The Producers' Council, Inc. All entries and nominations must be received by March 15, 1951.

In connection with the Competition, Theodore Irving Coe, Technical Secretary of the A.I.A., sent the following letter to Fred A. Luber, Secretary of the Wisconsin Architects Association:

"We enclose The Announcement of THE 1951 PRODUCT LITERATURE COMPETITION, sponsored by The Institute and The Producers' Council.

To accomplish its objective, To acknowledge excellence in product literature directed to architects, and to aid manufacturers in increasing the effectiveness of such literature, calls for the widest possible expression of opinion on the part of Members of The Institute who are most concerned with the technical and informational value of product literature.

We solicit your assistance in stimulating the interest and active cooperation of the members of your Chapter in selecting and nominating product literature they deem worthy of consideration by The Jury of Award.

You will note that nominations must be received not later than March 15, 1951, and that Members of The Institute need not submit samples of selected literature but merely clearly identify such documents in communications addressed to the Department of Education and Research.

We trust we may have your active cooperation."

Feeling this to be such a worthwhile project, the Board of the Wisconsin Architects Association suggests that "Samples of such literature to be submitted for the competition awards be posted at the coming State Convention."

THE PURPOSES

The purposes of the Competition are (a) to acknowledge excellence in product literature directed to architects and (b) to aid manufacturers in increasing the effectiveness of such literature.

The competition is open to all manufacturers of building materials and equipment. All entries must be received by March 15, 1951. To be eligible, the product literature must have been produced since January 1, 1949, except for Class I literature which must be currently available.

CLASSIFICATIONS

Awards will be made to three classes of literature.

Class I. Literature concerned primarily with basic technical information. Includes manuals, handbooks, and any material offering principally general information on design, specification, methods of application, standards of workmanship, maintenance, and the like.
Second Annual Convention
WISCONSIN ARCHITECTS ASSOCIATION
and
NORTH CENTRAL STATES REGIONAL CONFERENCE
PLANKINTON HOUSE, MILWAUKEE, WISCONSIN

THURSDAY EVENING, FEBRUARY 15
5:00 P.M. — Registration opens on Mezzanine for Annual Business Meeting of Wisconsin Architects Association
7:30 to 8:30 P.M. — Annual Business Meeting, West Room, Third Floor, Pres. Berners Presiding
8:30 P.M. — Exhibits by Producers’ Council, Wisconsin Chapter, Mezzanine

North Central States Regional Conference

FRIDAY, FEBRUARY 16
8:30 A.M. — Registration Opens on Mezzanine for Regional Conference
9:15 A.M. — Address of Welcome
9:30 to 10:30 A.M. — Seminar — “Schools”; Guy E. Wiley, Architect for Milwaukee School Board, Moderator
10:30 to 11:30 A.M. — Seminar — “Radiant Heat”; Dr. C. W. Colby, Executive Vice President, Lemay Corporation, Moderator
12:00 to 2 P.M. — Joint Luncheon, Wisconsin Architects Association and Producers’ Council
Guest Speaker: Marshall Mays, Building Materials Division, NPA, Washington, D.C.
2:00 to 3:00 P.M. — Seminar — “Arches and Shelves”; Charles S. Whitney of Ammann & Whitney, New York-Milwaukee Consulting Engineers, Moderator.
3:00 to 4:00 P.M. — Seminar — St. Paul Group sponsors a discussion on the Rochester State Hospital for the Mentally Ill; R. C. Reinecks of Ellerbe & Co., Architects and Engineers, Rochester, Minn., Moderator
4:00 to 5:00 P.M. — Seminar — “Relocation of Retail Districts,” Kenneth C. Welch, A.I.A., Grand Rapids, Mich., Moderator
6:00 to 6:30 P.M. — Producers’ Council, Wisconsin Chapter, Host at Cocktail Party, Lotus Room, Mezzanine
7:00 P.M. — Annual Dinner, Sky Room, President Edgar H. Berners, Toastmaster
Speaker: George Gilbert Groman
Subject: “How Other People Talk”

SATURDAY, FEBRUARY 17
10:15 to 11:00 A.M. — Seminar — “Factors Relating to Masonry Construction”
Morton O. Withy, Dean, College of Engineering, University of Wisconsin of Wisconsin and Chairman Wisconsin Registration Board of Architects & Professional Engineers, Moderator
11:00 to 12:00 Noon — Special Presentation by the Chicago Chapter, A.I.A.
12:30 to 1:00 P.M. — Cocktail Party, Wisconsin Chapter, A.I.A., Host
1:00 P.M. — Luncheon — To Be Announced
Discussion — “Contemporary Architectural Education”. Panel composed of Ray Childs Jones, Robert G. Cerney and H. E. McClure

The ladies are cordially invited to attend the Annual Dinner and Luncheons
with regard to a class or type of product, where the emphasis is upon the problem of where and how to use the product to best advantage, rather than on the merits of a particular make. This does not imply that the publication may not be that of an individual manufacturer, nor that mention may not be made of the specific application of the general principles to his own product.

Class II. Literature offering technical information confined to the particular products of a single manufacturer. Includes catalogs, catalog-manuals or combinations of product data with data on use and application, wherein emphasis is centered primarily on the products of an individual manufacturer.

CLASS III. Literature of primarily promotional nature. Includes any literature of intentionally less complete nature — sheets and short folders such as reminders, announcements, testimonials, test data, case histories, or other information supplemental to Classes I and II, intended to keep the manufacturer's name in the architect's attention. While promotional, it must be informative, educational, and directed to architects rather than the trade or the general public.

The Jury of Awards will make the final determination of the class in which each entry will be judged.

ENTRIES AND NOMINATIONS

Entries in the competition will be received direct from manufacturers or their advertising agencies and from individual members or Chapters of The American Institute of Architects.

(a) Manufacturers or their agencies may enter one or more pieces of their own literature by sending three samples of each entry addressed as follows: Technical Director, The Producers' Council, Inc., 1001 Fifteenth St., N. W., Washington 5, D. C. A fee of $10.00 shall accompany the entry or entries of each manufacturer or organization. Payment of the above fee will entitle the entrant to a copy of the report of the Jury of Awards.

(b) Individual architects or The Institute Chapters may nominate one or more pieces for the competition by letter reference addressed to Department of Education and Research, The American Institute of Architects, 1741 New York Avenue, N. W., Washington 6, D. C. The Institute will then request the Producers' Council to secure the necessary sample from the manufacturer subject to payment of fee as mentioned above.

The Jury of Awards will be informed of the number of times that any publication is nominated by architects or by The Institute's Chapters.

THE JURY OF AWARDS

The Jury of Awards will consist of five architects appointed by The American Institute of Architects.

In each class a limited number of Certificates of Merit will be awarded. Certificates of Exceptional

MARQUETTE 8-1080
1114 N. 4th St. Milwaukee 3, Wis.
Merit may be awarded, at the discretion of the Jury of Awards, but their number is limited to three, one in each class.

At the discretion of the Jury of Awards, Honourable Mentions may also be awarded in limited number, for the purpose of giving recognition to some feature of a publication which does not demonstrate the overall excellence required to justify a Certificate of Merit.

Awards will be announced and presented during the Annual Convention of The American Institute of Architects, in May 1951, and the literature receiving awards will be placed on exhibition at the Convention. Thus manufacturers whose literature is selected for these awards will receive special recognition before a large group of the nation's leading architects.

In addition to announcing the selections, the Jury of Awards will prepare a statement analyzing their reactions to the material submitted, with particular attention to that which receives an award, together with such further comment as they believe will assist the producers of building product literature in making their publications directed to architects more welcome and more effective.

REQUIREMENTS

3. Class I and II only.
(a) Literature intended for filing shall fit standard letter file. It is strongly urged that pieces intended for standard letter file carry the appropriate A.I.A. file number in such location as to aid in filing the material. Presence of an A.I.A. file number is not compulsory, but will be given appropriate weight by the Jury.
(b) Literature intended for shelf filing shall be so bound as to stand on usual library shelving. Size shall be optional. Clear identification of the subject shall appear on the backbone.
(c) Literature intended for filing in flat or suspended form shall have no size limitation.
(d) All pieces must be dated by year of publication, readily discernible.

4. Class III only.
No limitation is placed on size, format, dating, or file number.

Charles W. Valentine, 72, a member of the Wisconsin Architects Association, died Wednesday, Jan. 31, at Mount Sinai Hospital, Milwaukee.

Mr. Valentine, one of Milwaukee's best known architects, had been connected with architectural organization affairs for almost fifty years.

Starting as an apprentice in the office of Ferry & Clas, he spent the great number of his professional years practicing independently. His last five years were spent in the office of Brust & Brust.

---

Adequate Wiring Starts Here

Adequate Wiring, included in building plans today, can prevent electrical "growing pains" tomorrow.

Adequate Wiring is planned and engineered to fit each specific building.

Adequate Wiring avoids electrical obsolescence that leads to "profit paralyzing" alterations.

We Invite Consultation on Wiring Plans

The Electric Company

Architectural Concrete

ideal for structures of any style or size or purpose

Better than words the above photographs describe the beauty and adaptability of architectural concrete. It is ideal for buildings of any kind, size or style.

Architectural concrete possesses great strength and durability. Yet it can be molded economically into ornamentation of unusual delicacy. It meets every other essential structural requirement—firesafety, low maintenance expense and low-annual-cost service.

By applying the tested and proven principles of quality concrete construction, architects can design architectural concrete buildings that will resist weather conditions prevailing in any part of the country. Our 70-page booklet, “Design and Control of Concrete Mixtures,” is available free to help you design quality concrete structures. It is distributed only in the United States and Canada. Write for your copy today.

A national organization to improve and extend the uses of portland cement and concrete through scientific research and engineering field work
LIGHTING DISCUSSIONS

A series of discussions on "Lighting Data for Designers" is being sponsored by the Milwaukee Section of the Illuminating Engineering Society. There will be six meetings in all, held every second Monday at 7:30 P.M. at the headquarters, Engineers' Society of Milwaukee Bldg., 3112 W. Highland Blvd., according to I. L. Illing, Chairman of the Educational Committee.

The first discussion on "Light Sources of Today," was held Feb. 5. Further discussions and dates are:

FACTORS IN LIGHTING DESIGN — FEB. 19

Obviously not a complete course in lighting design, since this would take many sessions, but an interesting discussion of how we see, what we need to see with, and why, and an evaluation of the factors necessary to produce these results. Since the surroundings of both the light sources and the individual affect the lighting results and the physical and psychological reactions of the observer, these conditions will be surveyed and evaluated.

LIGHTING FOR SEEING (Schools-Offices)—MAR. 5

The lighting problem in interiors devoted practically entirely to seeing is radically different from that in interiors devoted to selling merchandise (stores) or interiors devoted to manufacturing (factories). New techniques are being continually developed and these latest practices will be analyzed.

LIGHTING FOR SELLING (Stores, Showwindows, Display Areas)—MAR. 19

Virtually all manufacturer products eventually land in stores. The end products of all of the country's mines, farms, mills and factories are finally offered to customers in merchandising establishments. It goes without saying that these products of all our endeavors should be presented in their best light.

RESIDENTIAL LIGHTING APPLICATION—APR. 2

The old-time concept of lighting fixtures as "the jewelry of the home" has largely disappeared. Portable lamps have been the accepted method of lighting homes for some time. The selection of this equipment is usually not dictated by the designer of the home. Within the past few years new architectural lighting tools have become available, again bringing the final aesthetic results within the jurisdiction of the person having the original concept.

LIGHTING FOR RECREATION—APR. 16

Recreation usually involves sports. Sports being competitive, demand fast action — and fast seeing. Sports contemplate both participants and observers, and both angles must be considered. Hence satisfactory lighting must permit flawless playing technique for participants and a relaxing environment for observers.
PRODUCERS’ COUNCIL, WISCONSIN CHAPTER

Following the Annual Business Meeting of the Wisconsin Architects Association, Thursday evening, Feb. 15, at the Plankinton House, the architects will visit the Producers’ Council exhibits displayed on the Mezzanine.

Owing to the large membership and required space, exhibitors will be confined to members of the Council.

The National members and their local representatives who are affiliated with the Wisconsin Chapter of the Producers’ Council and will be in charge of their respective exhibits, are:

*No Exhibit

HONOR AWARDS PROGRAM

Wilbur H. Tusler, Regional Director, North Central States District, asks, through President Edgar H. Berners, that all Wisconsin entries for the A.I.A. 1951 Honor Awards Program be submitted at the earliest possible date.

KOHLER QUALITY has all the advantages home-planners want

THE LUSTROUS BEAUTY of durable, glass-hard Kohler enamel, the harmony of matched sets with good proportions — these form the surface appeal of Kohler quality. Even more important is the Kohler reputation for long serviceability, created by the satisfaction home owners find in the reliability of every working part.

The Cosmopolitan Bench Bath is of non-flexing iron, cast for strength and permanent rigidity, and coated with the famous Kohler enamel. The Dalney shower and bath fitting features the diverter handle which directs water to shower head or bath. The Jamestown vitreous china lavatory is equipped with Central mixer type fitting. All fittings are chromium-plated, durably made. Kohler Co., Kohler, Wis.
See Sweet's for all the facts on Milcor* Metal Lath and Milcor* Metal Trim — first choice for modern firesafe construction.

48 pages of essential information at your fingertips

Here are the contents:

**Metal Lath**
- Advantages of Milcor Metal Lath
- Properties of Milcor Metal Lath
- Milcor Metal Lath Types
- Milcor Channels

**Lathing Accessories**
- Corner Beads
- Base Screeds
- Picture Moulds
- Window and Door Casings

**Partitions, Furring, and Fireproofing**
- Milcor Solid Partition System
- Milcor Steel Stud Hollow Partition
- Milcor Furring System
- Suspended Ceilings
- Fireproofing Details

**Metal Trim and Base**
- Applications of Milcor Metal Trim
- Metal Window Stools and Trim
- Applied Metal Trim
- Metal Trim Residential
- Metal Bases
- Clip-on Metal Bases
- Base Coves and Moulds
- Chair Rails
- Picture Moulds — Applied
- Stop Moulds and Fillets

**Metal Blackboard Trim**

**Stay-Rib Reinforcing Lath**

**Milcor Steel Roof Deck**

**Milcor Building Accessories**
- Access Doors
- Louvers and Roof Ventilators

Milcor Metal Lath and Accessories are accepted everywhere as a standard of quality for modern firesafe construction. And your new 1951 Sweet's File gives you the complete Milcor story:

- The proper use and practical application of Milcor Metal Lath and Accessories and Milcor Metal Trim in buildings you design.
- Handy reference tables that give fire resistance ratings, safe load recommendations, etc.
- Installation photographs and architectural drawings showing construction details.
- All the data you need for detailing designs, writing specifications, and drawing up estimates.

If you need an extra copy of the Milcor Manual for your specification writers, it will be sent without obligation.
