Separate

Equal!

... particularly when you compare separate contracts with single contracts. That's when the merits of the separate contract system become obvious. Separate contracts aren't merely equal to single contracts; they're far more advantageous.

Mechanical systems have become too complex to leave any of their elements to chance. That's why letting SEPARATE MECHANICAL CONTRACTS is so important.

Awarding SEPARATE MECHANICAL CONTRACTS to reputable mechanical contracting firms assures technical knowledge, experience, and quality workmanship. Specialists are employed to perform highly specialized work.

The results are better efficiency for architects and engineers, proven economy for clients.

Compare separate contracts with single. By every standard, the separate method isn't just equal. It's much superior.
When considering your attendance, and that of your co-workers at the 1975 New Ideas Convention, consider the following. In a time when the economy is topsy turvey; the demand for energy conservation is ever present; the consideration for the handicapped is a must; environmental impact statements are no longer the exception, but the rule; when contractors are advertising that they are the answer to all clients building problems; when compensation for architectural services is in question; when examination systems for registration for professionals are under attack; when the statute of limitations is declared unconstitutional; implementations of new codes means horrendous increases in cost of construction and yet development money has been pulled out; when the anti-trust departments at both federal and local levels are making hay with professional societies, this certainly indicates the need for the profession to pull together, work together, and join together in the '75 New Ideas Convention. The convention is designed for updating and retooling of old skills as well as developing new skills and in turn joining forces to attack that which I have mentioned above. — AJC

You may be one of several A.I.A. members in your firm. However, this year’s registration allows for non-member guests of W.A.I.A. members. The importance of the topics and the variety of new ideas will touch every member of your firm’s staff, so make time available for them to attend the W.A.I.A. New Ideas Convention. If only one day can be spared, registration allows this and the attendee will be able to take part in any one of the three days activities so that exhibits are available to him or her, as well as one or two of the top-notch seminars and/or social events. Now is the time for your total staff to retool for the projected upswing in the need for architectural services several months from now.

A must for all architectural firms in the state will be the Thursday afternoon seminar, April 24, on Compensation Guidelines for Architectural Services, with Ward Deems, F.A.I.A., Chairman of the Charrette that developed the book Guidelines for Services/Compensation Management, to be available in early April. This seminar will be one of the first in the country to introduce the compensation guidelines method, which according to Weld Coxe, could become one of the best marketing tools of the architect yet devised. We are advised from the AIA publishing house that copies will be available in time for our convention and the approximate cost will be $8.00 per copy. Each firm should have at least one copy of the basic book. Forms which would be used on each of your specific projects will be available through the Chapter document service. Ward Deems will take up step by step through the process, which presents a clear understanding of professional services to architect/owner/consultants in a manner which eliminates many misunderstandings.
AN ENVIRONMENTAL RELATIONSHIP

When isn't the environment a critical part of the architect's challenge? And to be in compatible harmony with all environments, from in city to suburban to country to land development programs, Belden Brick manufactures the largest selection of color, size, and texture in the industry — over 200 variations. We supply the tools for the creative architect. Your nearest Belden Dealer will gladly show you the facts, or write us at P.O. Box 910, Canton, Ohio 44701.
This seminar presents an opportunity for you to bring, as your guests to the convention, the consultants you work with, who also need to know of this compensation management process. They will enjoy the day at the convention, with its many activities and this very pertinent seminar. Your guests will only be required to pay the non-member daily guest registration fee, which includes the walking lunch in the exhibit area as well as the seminars.

In line with the Convention Committee's desire to keep costs down at convention events, you should take advantage of the special discount for early registration. Please note on the registration form the dollars saved by submitting your registration prior to April 10. Also, this year there is a discount for attendance at all three days of the convention. Ticketed events have been kept at a minimum and yet with the cooperation of the Abbey, we will have a fine array of food and drinks at reasonable prices. One special note — all cocktails served in the exhibit areas will be reduced 25 cents from the amounts charged at the Abbey's lounges, which are open to the public, but in other parts of the Abbey complex.

The 1975 Convention Committee has announced the choice of prizes for members who attend the convention and exhibits at the '75 New Ideas Convention. Two baskets of select wines will be given away at each exhibit viewing. A grand prize will be given away on the third day at 12:30 P.M., during the exhibit time. The grand prize, to the lucky member, will be a certificate for the winning member's choice of $150.00 worth of AIA select books and/or documents. Members must be present to win the baskets of wine, however, you need not be present to win the grand prize of books and/or documents. Winners will be chosen from attendance verification at the 75 exhibit booths. Members will register at the various booths and numbers will be drawn accordingly.

In an attempt to keep the cost of convention attendance low, the Chapter has approved the policy that spouses of W.A.I.A. members will have free registration for the Convention. They would only be responsible for the cost of ticketed functions and have the option of attending women's activities or buying walking lunch tickets if they will be touring the exhibit areas on Wednesday or Thursday. Spouses may attend all seminars and exhibits of the Convention free, but must obtain registration badges at the registration desk.

Since the total Chapter office staff is needed at the Convention site, the W.A.I.A. Chapter office will be closed April 22, 23 and 24. An answering service will be available so that document orders could be made by phone or messages left for the staff, who will return the calls as soon as possible.

From May 1 through August 31 the regular Chapter office hours will be 8:30 A.M. to 12:00 Noon and 12:30 P.M. to 4:30 P.M.

There will be a message center at the Convention where members and staff may be contacted. Calls must be placed to the Abbey switchboard and will be relayed to the message center in the registration area. The Abbey phone number is 414/275-6811. The message center will be in the capable hands of the Southeast Section Women's Architectural League.
RUMORS THAT THERE ARE BUILDING SYSTEMS MORE VERSATILE THAN MASONRY ARE TOTALLY WITHOUT FOUNDATION.

INTERNATIONAL MASONRY INSTITUTE
Suite 1001, 823 Fifteenth Street, N.W., Washington, D.C. 20005

B. M. & P. I. U. Local No. 8 Wisconsin
Upon recommendation of a National Task Force, the National A.I.A. Board of Directors resolved to implement a program for strengthening State Components. The basic thrusts of the program are: "(a) to establish 50 state societies of similar structure, but varying in size, (b) to bolster and motivate the structured societies of all states, but most particularly those 24 states which are presently unable to provide comprehensive and communicated services to all its membership, (c) to offer all societies so diverse a selection of programs and funding opportunities that each society can frame a program tailored to its local, membership, and self-imposed goals". A target date has been set for the completion of the essential restructuring process by the time of the 1976 Convention in Philadelphia.

Since Wisconsin has a structure similar to that being recommended by National, the changes will basically amount to changes in terminology only, i.e., the Wisconsin Chapter will become the Wisconsin Society of The American Institute of Architects. Under the Society will be four Chapters, similar to what we presently call Sections. The four Chapters will be able to have within their boundaries Section units tailored to that particular locale of the State not covered adequately by the Chapter. Such Sections could be organized in the Kenosha/Racine area and/or Beloit/Janesville area or others. The organization would then be geared better to individual problems and programs in the State.

The W.A.I.A. Executive Committee received recommendations from Chairman, Douglas H. Smith, A.I.A., and his Task Force on Restructuring of the Chapter, based upon National recommended guidelines. Several modifications and changes were made and the Executive Committee approved the restructuring at their board meeting on March 13, 1975. The proposed restructuring and appropriate Bylaw changes will be printed and distributed to voting members of the Chapter and placed on the Annual Meeting Agenda for consideration by the Chapter. If passage occurs at that time, Wisconsin will be in the forefront of meeting the deadline to have the restructuring process completed by the 1976 A.I.A. National Convention. All members are urged to read carefully the changes to be made, and to attend the Annual Meeting scheduled for April 23 at 2:00 P.M. at the Abbey in Fontana, Wisconsin. Discussion and action will be taken at that time on this very important subject.

Other Annual Meeting Agenda items include reports and actions dealing with a variety of professional concerns such as energy, codes, statute of limitations, examination processes, in addition to the announcement on the ballot vote for Directors-at-Large plus the announcement of this year's Architecture Week Chairman, and the Convention Chairman and site for 1976.

The UNISTRUT® Space-Frame system utilizes standardized components to achieve maximum design flexibility with predictable cost. Structures built from this unique system add eye appeal to shopping malls, schools, office buildings, restaurants—wherever the needs for function and visual impact meet. And ease of assembly frequently shortens construction time.

Available in 4 and 5 foot, as well as 1.2 and 1.5 meter planning modules. Write for complete information.

NEW FROM SPANCRETE:

a complete line of solutions
to meet your building requirements.

Remember when Spancrete stood for the finest in pre-cast, pre-stressed floor slabs? Well, we still stand for that and a whole lot more. Now we offer a complete range of pre-cast, pre-stressed concrete products and both standard and custom building systems. Furthermore, we ease your building problems in another way. Our product and systems are designed and engineered to close tolerances and well-defined specifications. Dependable technical data (live loads, fire ratings, insulation factors, etc.) mean that you can create the optimum architectural and structural design for long-term livability.

This then is Spancrete:

DOUBLE TEE WALL PANELS ARE FUNCTIONAL FOR ALL PHASES OF THE AMERICAN BUSINESS WORLD:

INDUSTRIAL BUILDINGS • RETAIL STORES • MUNICIPAL BUILDINGS

Specifications

DEPTH:
- 12" to 15½", overall
WIDTH:
- Up to 8'-0", nominal
LENGTH:
- Up to 35' (We offer special designs for longer units as noted on page 7)
STEM DATA:
- 4'-0" o.c.; Project 10"; Taper:
  - 5½" to 7½"
CONCRETE:
- Minimum 5000 psi @ 28 days
REINFORCING:
- Prestressing strands and mild steel to meet job requirements
INSULATION:
- 1" rigid styrofoam
HEAT TRANSMISSION:
- (U) Value
  - 5½" Flange, 1" styrofoam-0.16-0.19
FIRE RESISTIVE:
- 2-hour fire resistive capability

Practical Solutions to: special design considerations • fullest use of space maximum construction economies • flexibility • interior wall mobility

Double Tee Wall Panel components may be used for partial, full-story or multiple-story heights — for either curtain or load-bearing walls. They are available in plain, sculptured or exposed aggregate, and they may also include insulation materials for improved thermal characteristics.

Introducing

THE NEW

Spectra-Glaze

A MAJOR TECHNICAL BREAKTHROUGH...

WHAT IT IS
A satin-gloss finish for concrete block with a revolutionary surface that is easy to clean and keep clean.

WHAT IT DOES
Provides quick-and-easy cleandown for the masonry contractor and soap-and-water maintenance from then on.

ADVANTAGES
All the advantages of traditional SPECTRA-GLAZE® block... thru-wall loadbearing construction, excellent insulation, permanent sanitary finish, fire ratings, two-faced units, etc.

PERFORMANCE
Meets Federal Specifications, OSHA and USDA requirements for glazed surfaces. Permanent integral bond between finish and block eliminates blistering and peeling.

APPEARANCE
48 Standard Colors in satin-gloss finish, choice of scale and texture with Scored and Sculptured faces. Neat 1/4" exposed mortar joint in regular 8" coursing.

WHAT TO DO
Send for samples, prices or further information.

PHONE COLLECT... OR WRITE:

I, FRSHGRFUCNCRT COLOR IDCFI BCGF WITH KOHLFR.

Take home buyers and remodelers on a bathroom decorating safari—with Fresh Green leading the way. Here's Fresh Green in Kohler's 6-foot Caribbean tub with safety grip rails. The toilet is the low-silhouette, smartly styled Rochelle; with the bidet as a companion piece. In foreground: the Lady Vanity, a shampoo lavatory that can double as a baby bath.

FRESH GREEN.
GREAT COLOR IDEAS BEGIN WITH KOHLER.

Alterna fittings, in gold electroplate, feature four sets of changeable accent inserts. Water controls for bath tub are the Rite-Temp, single-control unit that maintains water temperature despite changes in water pressure. For more great bath, powder room, and kitchen ideas write Kohler Co., Kohler, Wis. 53044.

...makes good parking good business!
The Universal Kar-Stop

... a new design with exclusive Angl-Edge

... maximum strength with vibrated, reinforced concrete

... positive anchoring with 16 inch steel pin

... drain slots to supply efficient drainage and assure a clean lot
Good Parking Is Good Business

Modern mass motoring demands parking areas for every enterprise, whether for customers, employees or both. Convenient, practical parking facilities colate good will—help make the all-important “first impression” a good impression.

Designed and engineered to park the maximum number of cars in any area, the Universal KAR-STOP combines economy and stability into the leading car parking bumper. Proper spacing insures against stumbling accidents in the dark. Consider these features:

**PERFORMANCE**
Only Universal has the exclusive Angl-Edge. When Universal KAR-STOP engages a wheel, the force of the blow is directed downward — not parallel to the ground — thereby eliminating sheared pins.

**DURABILITY**
Precast from “Vibrated” concrete, Universal KAR-STOP lasts indefinitely — maintenance free and free from cracking and chipping.

**EASY, QUICK INSTALLATION**
Universal KAR-STOP can be installed on any surface. Just drive in the pins furnished with each unit and it’s ready for use. If desired, installation will be handled by A.H. Krueger, Inc.

**ECONOMY**
An economical original purchase, Universal KAR-STOP’S maintenance free use continues to add to its value.

**PORTABILITY**
Universal KAR-STOP can be moved and relocated without residual damage to parking lot surface.

**CONVENIENCE**
Universal KAR-STOP checks cars against the tire without wheel damage, yet is low enough to clear bumper and tail pipe.

**APPEARANCE**
Attractively designed Universal KAR-STOP’S smooth, concrete finish can be painted if desired.

Cutaway drawing below shows exclusive Angl-Edge and 16 inch steel pin. Angl-Edge checks car, directs force of blow downward. 16 inch steel pin, driven through surface grips sub soil, prevents shifting.

---

**SPECIFICATIONS**

for Universal KAR-STOP

**WEIGHT:** approx. 200 lbs.
**DIMENSIONS:** 6" x 6" x 7"
**DRAINAGE SLOTS:** 1-1/2" x 24" (2)
**REINFORCED:** 1/2" D.R. rods
**CONCRETE:** vibrated 7 bag mix
**ANCHORED:** 3/4" x 16" pins (2)

**MODEL 6**

**WEIGHT:** approx. 240 lbs.
**DIMENSIONS:** 7" x 6" x 6"
**DRAINAGE SLOTS:** 1-1/2" x 24" (2)
**REINFORCED:** 1/2" D.R. rods
**CONCRETE:** vibrated 7 bag mix
**ANCHORED:** 3/4" x 16" pins (2)

**MODEL 10**

**WEIGHT:** approx. 255 lbs.
**DIMENSIONS:** 7" x 6" x 7"
**DRAINAGE SLOTS:** 1-1/2" x 24" (2)
**REINFORCED:** 1/2" D.R. rods
**CONCRETE:** vibrated 7 bag mix
**ANCHORED:** 3/4" x 16" pins (2)

**MODEL 20**

**WEIGHT:** approx. 320 lbs.
**DIMENSIONS:** 8" x 6" x 9"
**DRAINAGE SLOTS:** 1-1/2" x 24" (2)
**REINFORCED:** 1/2" D.R. rods
**CONCRETE:** vibrated 7 bag mix
**ANCHORED:** 3/4" x 16" pins (2)

**MODEL 40**
Typical Parking Arrangements...

1. Straight in parking either side with center row, 2 cars deep bumper to bumper.

2. Angle parking either side, center traffic lane.

3. Angle parking on both sides with center row 2 car deep angled.

PARKING INSTALLATIONS

The following is a list of parking areas designed by Krueger and equipped with Universal KAR-STOP:

K-Mart Stores
Allen Bradley Co.
Air National Guard
Wisconsin Telephone Co.
Hotpoint, Division of General Electric Co.
City of West Allis
Kohls Food Stores
Evinrude Motors
Jewel Food Stores
U.S. Post Office
American City Bank
East Troy High School
West Fair Mall Shopping Center, West Bend

Each installation now parks a maximum number of cars, conveniently and without costly recurring maintenance.

Have Krueger Design Your Parking and Equip It With Universal KAR-STOP®

A. H. KRUEGER INC.
The Honor Awards Competition by the Wisconsin A.I.A., is an annual event in which outstanding architectural achievements are recognized. This year, in addition to the usual criteria for design excellence, energy conservation and accessibility for the handicapped were highlighted in the Jury’s approach to recognizing architectural achievement.

The Judges for the Honor Awards Competition were chosen from related environmental, energy and accessibility disciplines, in addition to that of architecture. They were: Byron Bloomfield, Monument, Colorado, Architect and Consultant in energy conservation. Bloomfield is best known in Wisconsin for his work in developing and leading the environmental design curriculum at the UW-Madison Campus. He is President of a multi-disciplined design firm in Colorado, providing consulting services in energy systems. Y. C. Wong, F.A.I.A., a Juror from Chicago, Illinois, is principal of his own architectural firm, and is noted for his urban design, primarily in dense urban areas. Bruce Murray, a landscape architect, and Associate Professor of Landscape Architecture at the UW-Madison Campus, brought to the Jury, his experience in regional planning and environmental impact. As a native Wisconsinite, he is extremely familiar with the State, its topography, natural balance and beauty. The fourth Juror, Dr. Imre Gyuk, brought to the Jury his knowledge and expertise in the area of accessibility for the handicapped. Dr. Gyuk serves on the Governor’s Task Force on Problems of People with Physical Handicaps, serving as Chairman of the Subcommittee on Housing, Buildings and Grounds. He has done extensive research in the areas of Human Ecology, Environmental Degradation and Climatic Adaption with relation to housing.

Selected for the 1975 Honor Awards were the following projects:

The College of Creative Communications — Green Bay Campus, The University of Wisconsin, Green Bay, Wisconsin by Johnson-Wagner-Isley & Widen, Inc., Architects, Milwaukee, Wisconsin; Project Designer, Wendell H. Isley, A.I.A.

The Second in the Honor Award category selected was the Interpretive Education Building for Schlitz Audubon Center, Milwaukee, Wisconsin by Office of Fitzhugh Scott Architects/Planners, Inc.; Designer, Thomas A. Briner; Project Architect, Bruce Jackson; Interiors, Gary B. Swetish.

Four Merit Awards were identified by the Jurors. They are: Classroom Building, University of Wisconsin - La Crosse, La Crosse, Wisconsin by Hackner, Schroeder, Roslansky & Associates, Inc., La Crosse; Design Director, Roger D. Roslansky, A.I.A.; Project Architect, Alden Mehlhoff.

Another project receiving a Merit Award was the Steak House, Devil's Head Lodge, Merrimac, Wisconsin by the firm of Goebel - Balestrieri and Associates, Elkhorn, Wisconsin.

Also judged in the Merit Award category was the Wisconsin Alumni Research Foundation Office Building on the Campus of the University of Wisconsin - Madison by Flad & Associates Architects - Engineers - Planners, Madison; Principal in Charge, Joseph H. Flad, F.A.I.A.; Partner in Charge, Thomas K. Nisbet and Project Architect, Franklin McNutt.
Three good reasons for selecting Weil-McLain

**THE CHOICE**—Choose from a complete line of oil, atmospheric gas, and combination gas/oil boilers, from 187,800 to 6,069,900 BTU/Hr.

**THE FLEXIBILITY**—Match any job requirement with a choice of factory-tested packages, factory-assembled sections, or individual sections.

**THE QUALITY**—Only Weil-McLain has such quality features as flame-retention oil burners, asbestos rope seal, short draw rods, multiple tankless water heaters, forced draft firing and, of course, cast iron construction. Choice, flexibility, and quality...three good reasons for contacting your nearest Weil-McLain distributor.

Wisconsin Architect/March, 1975
The fourth Merit Award was made to Brust-Zimmerman, Inc., Milwaukee, Wisconsin for the West Bend Marine Bank, West Bend, Wisconsin. The Project Designer was Steven Bach; Project Coordinator, Jim Willmas; Interior Design, Robert E. Lewcock and Project Administrator, John J. Brust, A.I.A.

Four Special Mention Awards were made by the Jury, two of which were won by the firm of Larson, Playter, Smith, Eau Claire, Wisconsin. They are the Office Building for Royal Credit Union, Eau Claire, Wisconsin; Project Architect, Joseph E. Seymour. An unusual restoration project in Laconia, New Hampshire was recognized by the Jury for a Special Mention Award to Larson, Playter, Smith Architects.

The Como Office Building, Appleton, Wisconsin was awarded Special Mention to the firm of James B. Zwack, Associates, Ltd., Appleton, Wisconsin.

Brust-Zimmerman, Inc., winner of a Merit Award, also won a second award in the Special Mention category for the Milwaukee Catholic Home, Milwaukee, Wisconsin; Project Administrator, David P. Brust, A.I.A.; Interior Designer, Robert E. Lewcock; Assistant Interior Designer, Joan Jenquin and Field Coordinator, Anton Goskowicz.

The above ten awards were selected from forty-six submissions by members of the Wisconsin Chapter of the American Institute of Architects. The goal this year of the Honor Awards Committee, and the Executive Committee of the W.A.I.A., was to identify, not only excellence in design, but foresightedness in design concerning energy conservation and accessibility for the handicapped.

An Honor Awards Banquet will be held at the Annual Wisconsin Chapter of the American Institute of Architects Convention at the Abbey in Fontana, Wisconsin on April 22, 1975. The architectural firms winning awards will be recognized, along with the owners and contractors connected with these various projects.

Chairman of the 1975 Honor Awards Program is Jerry W. Spencer, A.I.A., of the Western Section. The Committee members are: Jay A. McLean, Frederick F. Wegener, Raymond C. Matulionis, Paul H. Ament, Jeffrey M. Dean and Henry K. Kanazawa, A.I.A.

Wisconsin Architectural Archives are to be established under the terms of a major gift made to the Wisconsin Architects Foundation by Mary H. Eschweiler, wife of the late Theodore L. Eschweiler. President Ronald G. Bowen, A.I.A. announced recently that the Foundation had been given the collection of drawings and other documents of Eschweiler and Eschweiler, a firm that extends back more than 75 years, plus funds for their indexing and the establishing of a reference system that would be useful for other collections that might be given to the Archives.

President Bowen has appointed a standing committee, with Foundation Vice President Robert L. Yarbro, A.I.A. as convenor, Mr. Gordon D. Orr, Jr., A.I.A., Mr. Roger M. Herbst, A.I.A., Mr. Allen J. Strang, F.A.I.A., and Mr. Thomas L. Eschweiler, A.I.A. elected Chairman. The Committee is currently negotiating with the Milwaukee Public Library, which currently has the Eschweiler collection in its custodial care, for a possibly permanent location for the archives.
You'll find that a sprinkler fire protection system can be a liberation movement in itself! You get new freedom in materials selection and a wider latitude in building code provisions when a sprinkler system is included in your plans.

More wood and other interesting materials may be permitted under updated codes or through negotiated offsets. Fire wall requirements go down; so it's possible to have more open spaces or make more use of moveable non-bearing walls for building adaptability. Insulation of supporting members may not be required. Greater building height may be allowed.

All of these factors can be cost savers and may more than pay for the fire protection system. As a bonus your client gets a greater assurance of continuity of use of the building.

Fire protection underwriters are so sure of the value of sprinkler fire protection that they normally reduce fire insurance premiums substantially. Premium savings alone often return the cost of the system in 5-7 years or less. And then go right on benefitting your client.

If you have questions about sprinkler fire protection systems, just write or call United Sprinkler.

Architects' liberation movement
Congratulations are in order to Willis and Lillian Leenhouts as notice has been received that they each have been elected to the College of Fellows and will participate in the investiture of new Fellows at the upcoming National A.I.A. Convention in Atlanta, Georgia. They join 59 others this year across the country elected to this honor. The Leenhouts’ join a much more select group of Fellows in that they are one of 3 married couples in the United States who have been elected to Fellowship. Only one other couple was elected in similar fashion at the same time. Their dedication to the profession and their activities over many years certainly has laid the ground work for this well deserved recognition by their peers.

Mrs. Mary King, who has served the Chapter in the area of membership services and document services for the past three years is leaving the position. Mr. and Mrs. King are expecting their first child. Our thanks and best wishes go to Mary and her husband.

Joining the W.A.I.A. staff and assuming the responsibilities of membership and document services is Mrs. Judy Flaws, who recently joined us and will be working with Mrs. Kerry Stanger on the office staff.

The Wisconsin Architect/Punch List is offering one page in upcoming issues to members and individuals from allied disciplines and fields to write editorial comment. The Speak Out page in the Punch List will be used not only by members, but such suggested personages as Mrs. Ello Brink, Don Buettner, Bert Fredericksen, Paul Brown and others that you might suggest. Direct your copy or inquiry to Alan J. Carlson, Executive Director, W.A.I.A., 788 N. Jefferson St., Milwaukee, Wisconsin 53202.

The following new member was recently approved by the Executive Committee:

WILLIAM J. CETERA, Associate member of the Southeast Section

The following membership advancements were recently approved by the Executive Committee:

ROBERT L. ERDMAN, Corporate member of the Southeast Section

RONALD T. GILLEN, Professional Associate of the Western Section

The following transfer was recently approved by the Executive Committee:

EDWIN O. ECKERT, A.I.A., transferring from the St. Paul Chapter, A.I.A. to the Wisconsin Chapter, A.I.A. - Northern Section

By recent action of the Executive Committee, ALBERT F. KEYMAR, A.I.A., was approved for Emeritus Membership.

Our sympathies are extended to the family of Mr. Alvin E. Grellinger, A.I.A., retired president of Grellinger-Rose & Associates, who passed away this month.
IF YOU'RE PLANNING A BUILDING, AMERICA'S ENERGY CRISIS JUST MAY HAVE BECOME YOUR BIGGEST PROBLEM.

But there's a new computerized analysis program from Trane that can help you. It's called TRACE... Trane Air Conditioning Economics.

Before you design your next building, TRACE can evaluate thousands of design variables that can affect energy consumption and building cash flow.

Whatever your air conditioning need, check with Trane first because we are one of the few manufacturers with capability to provide complete, single source supply and service for commercial and industrial heating and cooling equipment.

For further information on TRACE or other Trane capabilities, contact your nearby Trane sales office or write The Trane Company, Commercial Air Conditioning Division, La Crosse, Wisconsin 54601.

CLEAN SIGHT LINE DESIGN, ENGINEERED FOR QUICK INSTALLATION

Highest industry standards — we meet or exceed the specifications set by American National Institute for aluminum doors and windows.

Our horizontal sliding and projected windows are designed with custom capabilities, allowing you a broad range of design possibilities — giving you a unique ability to combine various kinds of windows together.

- Thermal-Barrier Design
- Clean Sight Lines
- Engineered for Quick Installation
- Highest Standard of Quality
- Broad Range of Design Possibilities
- Anodized, Hardcoat and Painted Finishes

WHY?
Is U.S. Insulation Co. The Largest Builder of Freezer Storage Space?

QUALITY — You are invited to see any project built, talk to any client - You can see the difference.
PRICE — The most highly competitive contractor known - Ask any insulation company who they would rather not bid against.
SERVICE — We're there when you need us with the best equipment, best trained men anywhere.
TIME — We do in eight weeks projects that may otherwise take twelve weeks.
ESTIMATES — We will price out in 24 hours, offer budget or preliminary figures without obligation.
VARIETY — We do not manufacture a product we must sell you - We can give you the best combination of products to do the job better - At lower cost - At lower maintenance cost - At lower operating cost. We are approved contractors for more major systems than anyone.
STABILITY IN PRICING — We have more jobs at firm prices than anyone. (No escalation on many projects)
KNOWLEDGE — You deal directly only with highly trained personnel. Engineers specifically trained in insulations With many, many years experience.
FLEXIBILITY — We will do your work anyplace.

the GUARANTEED COPING COVER SYSTEM

We guarantee our new PERMASNAP COPING SYSTEM against water leakage. Period.
The secret is a styrene gutter chair at each joint that quietly carries water away.
We also make sure the system stays in place. Without expensive imbedded anchor bolts. A special adhesive replaces them. And it sticks against 60 lbs per square foot of uplift.
Permasnap Coping Covers are also simple to install. (It has to do with the “snap” in the name, but it’s simpler if you see it for yourself.)
All in all, it’s a pretty simple system. Only three parts. And we guarantee all of them. Specify Hickman.

Whatever your building needs, look first to Varco-Pruden

We have the same approach to immense industrial plants that we have to smaller commercial structures: We reduce the cost and calendar requirements of custom building. Our way — structural integrity is assured; quality is predictable and so is price! You will enjoy working with us. We take pride in living up to Varco-Pruden's promise — complete competence inspires complete confidence.

Wisconsin architect/march 1975
It wasn't his fault. Oscar is a fairly neat fellow. But an overflow of manuals, active work files and incoming memos got the best of him. And one day he just disappeared. Right in his office.

Take a minute and listen to Louise Forrer.

"As designers of business interiors, we're committed to research the amount and type of paper flow within an organization. It's a part of our total approach concept to business design planning. And while color schemes, draperies, carpeting and art are important, it's basic that an efficient work area is available to people."

"Our award-winning design team is one of the finest in the country. We take the responsibility to get the job done with careful attention to each detail. Some people want a complete service. Others require assistance in selected areas of design. But whatever your requirements are, we'll meet your needs."

Call Forrer Business Interiors. Or visit our showroom. Find out why over 750 clients aren't disappearing in their offices today.

the ideal way of integrating "ROOF DECKS" and structure for an economical and rational building

Not only are DUWE DULITE ROOF DECKS an economical engineering approach for tasteful architectural expression, but much more too. For example, DULITE ROOF DECKS —

- Have a two-hour fire retardent value as stated by the Insurance Rating Bureau. This means building owners are assured a higher safety factor and lower insurance premiums.
- Are Underwriters' Laboratories approved.
- Have a high insulating quality that is equal to 2" rigid board insulation.
- Permit energy savings through reduced heating costs.
- Help owners meet OSHA requirements for sound control because of their acoustical effectiveness (NRC = .75).
- Allow for "nailability" where desired to cover them with various types of roofing materials on sloped or flat roofs.
- Have a light, gray natural finish that can easily be spray-painted.
- Are produced with a "textured surface" for added decorative attractiveness.

- Weigh no more than 10 pounds per square foot.
- Are made with DuCrete aggregate, the lightest and strongest aggregate available.
- Consist of roof slabs in three thicknesses — 3", 3-1/2", and 4" and a variety of lengths up to 8'4". Standard lengths are 4 and 5 foot.

Bomanite, the patterned concrete, brings new dimension to concrete surfaces.

Bomanite is an attractive surface with the appearance and character of brick, tile, or cobblestone, in a wide variety of colors, patterns, and textures.

Bomanite is a proven process, widely used around the world for malls, sidewalks, crosswalks, and other interior-exterior paving applications.
