Bronze O.S.&Y. gate valve with field-installed supervisory switch

- Expensive, complex switch installation
- Big, heavy, cumbersome
- Traditional O.S.&Y. design
- UL listed, FM approved, 175 psi

慢关蝶阀

Slow-Close butterfly valve with "built-in" supervisory switch

- Simple installation with optional, prewired "built-in" switch
- Half the size, half the weight
- Patented, award-winning butterfly design
- UL listed, FM approved, 175 psi

比比看其他的阀门，也！

你可以进一步现代你的灭火保护喷淋系统通过替换球形和角度提阀门我们专利的Butterball®蝶阀阀门。优点包括全流量通过，手柄操作，四分之一转操作。UL列出，FM批准。

Dear Colleague:

I should like to begin by expressing my sincere thanks to the Board of Directors and the Society for their trust in me. It is indeed an honor and a privilege to serve as your President, representing the membership of the Wisconsin Society of Architects, AIA.

Our "Society" numbers over 700 members and constitutes approximately 70% of the registered practicing Architects in the State of Wisconsin. Our membership is continuing to grow, we see improved participation and opportunity in Society activities, and our economic condition is solid. The voice of the WSA has gained strength throughout the State; in the legislature, in DILHR, and in our sister organizations which represent all facets of the building and construction industry. We must keep in mind however, that we still have much to accomplish. The media needs to be more aware of the importance of architecture in our society and certainly we have far to go to strengthen our public image and to inform all people of "what it is an Architect does" and "what is fair compensation" for those services.

Webster defines the word "Society" as follows: "A group of human beings broadly distinguished from other groups by mutual interests, participation in characteristic relationships, shared institutions, and common culture." The latin base, "Societas", mean fellowship, union, a sharing. It is my hope that during 1983 we can all put aside some of our "self interests" for the perpetuation and growth of our "Society" and our profession through sharing, through union, and through fellowship. This approach offers no guarantees of success but if we "go it alone" we will surely fail.

My best wishes to all of you for a happy and prosperous year.

Sincerely,

Glenn M. Johnson, AIA
President 1983
Wisconsin Society of Architects
American Institute of Architects
Patio Doors Need Help!
So do balconies, porches and windows.
Roll-a-way provides it all.

Storm protection. Effective protection from high winds, driving rain and dangerous flying debris.

Security and privacy. Absolute protection from burglary and vandalism. Operate completely from inside the home, roll down, lock automatically and cannot be opened.

Insulation. Reduce energy loss through drafty windows and doors. Effectively blocks outside noise, heat, and even cold, from getting in.

Environmental control. Adjustable built-in air vents allow for proper air ventilation and total control of light entering the home. Helps protect furnishings from the harmful effects of the sun.
Wisconsin Society of Architects
Construction Industry Handbook

The WSA Construction Industry Handbook is published as the February issue of the Wisconsin Architect as a reference handbook for all readers on matters pertaining to the Wisconsin Society of Architects, as well as hard-to-find reference material for architects and others involved in the construction industry. A special recognition to Walter Zoller, AIA, for his efforts in advocating the preparation of this Handbook.

The circulation of the Handbook is to all members of the Wisconsin Society of Architects of the American Institute of Architects (WSA). Additionally, copies of the Handbook have been sent to members of the Associated General Contractors, consulting engineers, interior designers, landscape architects, and many other individuals involved in the design and construction industries.

Your comments and suggestions are appreciated with reference to other individuals or organizations that should receive copies of this Handbook next year, as well as revisions or changes in content that you feel are appropriate.

One last word. Please continue to refer to the advertising portion of the Handbook when looking for products or services. Without this support the Wisconsin Architect and this Handbook would not be possible.

NOTICE: The Wisconsin Architect and/or the WSA are not responsible for materials that have been rendered obsolete or revised since this Handbook was printed.

- Low temperature radiant heating
- Passive solar design

GYP-CRETE PROVIDES

- Fire and sound control
- Lightweight economy
- The smoothing of irregular surfaces
- Thermal efficiency
- Occupancy ahead of schedule
The American Institute of Architects may bestow a fellowship for achievement in architecture on members who have notably contributed to the advancement of the profession through outstanding accomplishments in one or more areas of design, science of construction, literature, education, service to the profession, public service, historic preservation, research, urban design, government, industry, or architectural practice.

A fellowship in the American Institute of Architects is so distinctive an honor that its bestowal is a serious responsibility. For this reason, the Institute requires that the achievements of each nominee for the honor be carefully considered by the nominators and by the Jury of Fellows which awards the honor. The nomination for advancement to fellowship is made by members who know the nominee well. The Jury of Fellows, consisting of six distinguished members of the Institute, studies and evaluates the achievements of each nominee under consideration. The Jury is not permitted to deny an advancement until the denial has been voted upon at three separate annual meetings.

The Jury of Fellows may obtain its own evidence of the standing and achievements of a nominee, by written communication or otherwise. The Jury must rely largely on the representations made to it by members who have had close association with the nominee. For that reason, the greater responsibility for merited advancement lies with the nominators, sponsor, and references of the nominee. The nominators should feel certain that the nominee's achievements have sufficient distinction to make them notable contributions to the advancement of the profession.

The WSA Board of Directors has established a tentative schedule of its meeting dates and locations for 1983. Board meetings normally convene at 10:00 a.m. and are completed by mid-afternoon, with a break for lunch. The meetings are open to all members. Should you be interested in attending a Board meeting, or joining the Board for lunch, please contact the WSA office to confirm the meeting date and place, and to make a lunch reservation. The Board welcomes your input and participation.

EXCELLENCE IN MASONRY

ARCHITECT: Osen Schroeder Partnership, Architects

PROJECT: American Packaging & Machinery
Ashwaubenon, Wisconsin

Sponsored by:

MASONRY INSTITUTE OF WISCONSIN, INC.
4300 W. Brown Deer Road, Milwaukee, WI 53223
(414) 355-7800
TO: MEMBERS OF WISCONSIN SOCIETY OF ARCHITECTS
AMERICAN INSTITUTE OF ARCHITECTS

We are pleased to announce that American Packaging & Machinery has been selected for "Excellence in Masonry". A representative from Osen Schroeder Partnership, Architects describes the project as follows:

"I was extremely pleased to have received the "Excellence in Masonry" award.

American Packaging and Machinery desired a cost effective, durable and esthetically pleasing exterior for their new facility in Green Bay, Wisconsin. Through the efforts of the concrete block manufacturer, I was able to select the proper colors, textures and configurations necessary to create the human scaled, tailored image, American Packaging and Machinery wished to project.

Single scored, split faced, tan colored block was chosen for its pleasant modular scale. Four fluted, chocolate brown blocks were set on end to give a dynamic horizontal element to the office. This four foot band separated at the manufacturing structure to express the distinction between the two masses. Two feet terminated at the office while two feet continued as an intermediate band around the manufacturing facility to break the field of tan block.

I think the project speaks well of an industrial client with an eye toward architecture.

I would like to applaud the masonry industry for their continued efforts to make a most practical product beautiful."

Congratulations to Osen Schroeder Partnership, Architects for "Excellence in Masonry".

Very truly yours,

MASONRY INSTITUTE OF WISCONSIN, INC.
The right way to design a high-density storage & filing system is to begin with this book.

Well-detailed information is mandatory for your product evaluations. The typical pages shown here from our new 36 pp. planning guide book, presents data on Spacesaver high-density storage & filing systems with clear and concise graphics created specifically for architects. The piece is loaded with planning criteria, systems details, design ideas and case studies in a full spectrum of architectural applications. A provocative and comprehensive resource guide for professional use. Yours for the asking.

Introducing
a better solution to
building access problems.

Cheney Handi-Lift II
Vertical Wheelchair Lift.

The new Handi-Lift II Vertical Wheelchair Lift offers an ideal solution to the problem of providing safe stairway and building access for people with physical problems including those confined to wheelchairs, especially in areas where height is a problem. That’s because the new Cheney Handi-Lift II has a lifting height range of 4 to 12 feet — the highest available in the country. And the Cheney Handi-Lift II is more space efficient. It requires less floor area than competitive units, yet still provides a full 12 square foot lift platform. Designed and built by the Cheney Company, the Handi-Lift II is backed by Cheney’s years of engineering excellence and adapts to both indoor and outdoor applications in private homes, churches, schools, office buildings and industrial plants. And it’s available in a variety of colors, textures and panels to blend attractively with any decor.

For more information on how Cheney can help solve today’s access problems, check your Sweets Catalog or contact Darlene Lewis (414) 782-1100.

BUILDING A BETTER WISCONSIN THROUGH ARCHITECTURAL EDUCATION

The Wisconsin Architects Foundation (WAF) was created in 1954 for the purpose of supporting Architectural Education in Wisconsin, principally through scholarships and grants. To date, almost $75,000 has been distributed to 140 students.

In recent years, the WAF contributions to Scholarships have been exclusively to UW-Milwaukee students. With greater financial resources, the WAF would be able to support Wisconsin students at other institutions as well as offering grants and prizes for programs that relate to the improvement of the practice and profession of Architecture in Wisconsin.

The advertisement pictured on this page will be appearing monthly in the Wisconsin Architect. The members of the WAF encourage your contributions, either by way of annual membership or donation to the endowment fund. Tax deductible contributions and membership are an act of participation in support of the strength and vitality of the Architectural Profession in Wisconsin.

Within the next several months the WAF will contact all Wisconsin Architects, along with numerous other individuals and corporations who support and appreciate architecture. You can help by undertaking your annual membership and endowment donation to the WAF. You can additionally help by impressing upon those in related professions and industry of the vitality and benefits of the WAF.

For further information, contact current members of the WAF or our Executive Director, Eric Englund.

Benefits of Membership in WSA

1. Work. Whether you are an employee or an employer, WSA helps you get work by means of job listing, client referral, "how to" seminars and cassettes, etc.

2. Marketing Information. You get no place without this today. WSA organizes seminars, makes available printed material, cassettes, inserts, etc., in the Wisconsin Architect.

3. Firsthand News affecting the practice of architecture by means of committee reports, Hotline, Wisconsin Architect, etc.

4. State Agencies' Contracts are updated with the help of WSA representation. Some past inequities have been corrected.

5. AE Selection by means of bids is an invitation to disaster. You know it; does your prospective client know it? Get the background and current information on this development.

6. Insurance Rates. Maybe your premium or your exposure can be reduced. WSA has committees working on this. Information and advice to give you.

7. An Eye On Legislation affecting zoning, planning, professional registration, taxes, procurement of services and other matters of interest to the profession and the construction industry.

8. Legislative Relief. WSA has an active legislative committee and minute-man program.

9. An Eye On Building Codes. Committees have been working at state and national levels to improve regulations affecting buildings.

10. Continuing Education programs on all of the timely subjects, like marketing, energy conservation, production, etc.

11. Library of architectural books is available on loan at no charge. Cassettes and slides on a wide range of important subjects are available at no charge.

12. Exchange Of Ideas, Exploration of mutual technical and professional problems at local and state meetings.

13. Learning By Association with other architects and distinguished non-architect guests. Every person you talk to at local or state meetings is an expert on something.

14. You Become Part Of effort to maintain and improve high ethical and technical standards. For instance, a lot of discussion is taking place now on the new revision of the AIA Standards of Professional Practice (the 'Code of Ethics'). Why don’t you get in on this?

15. A Forum for presentation of viewpoints. You play a part in establishing the standards of the profession by expressing your opinion at local and state meetings.

16. Participation On Committees. You can be on a local, state or national committee almost for the asking. This could be very broadening and very instructive.

17. Common Front presented on issues important to the profession. Witness WSA activity against competitive bidding.

18. Contract Forms and other documents. These are sold by WSA to members — with same-day service. WSA members pay a discounted price for documents.

19. Hotline and other communications which keep members up to date on numerous important matters. For instance, a synopsis of Senate and Assembly bills which are of interest to us are included after a review by a committee and attorney.

20. The Wisconsin Society of Architects, Construction Industry Handbook is issued yearly, is a reference for valuable information not found elsewhere. Look through the latest issue and discover its great value.

21. Public Relations program in Wisconsin newspapers and our own magazine, The WISCONSIN ARCHITECT, distributed to important people outside the profession. This educates the public, uphold the image of the architect.

22. Status And Prestige enhanced by membership in local chapter, WSA and AIA. This translates into personal satisfaction and better respect by the community.

23. Information Service on such professional matters as state laws (proposed and enacted), document forms, state administrative structure, licensing, sources for other needed information.

24. Job Bank, for employees searching for employers and vice versa.

25. Honor Awards program at both the State and Chapter levels which provide peer recognition, as well as local, state and national publicity to winners.

26. WATS Line - A toll free phone number to be used in contacting the WSA office.

27. DILHR Plan Delivery - The WSA staff will hand carry your plans to DILHR, pick them up, and return them to you for a nominal fee.

28. Workmans Compensation Insurance - WSA members can participate in a group plan which will return a dividend.
Two neighboring buildings of comparable size...started at the same time. The first tenant was in the Trammell Crow Company's elegant Lincoln Center I last November ...some five months before the nearby steel and brick building could be occupied.

JON HAMMES, MANAGING PARTNER, MILWAUKEE, THE TRAMMELL CROW COMPANY, WEST ALLIS, WISC.

"J. W. Peters, working closely with our architect, engineer and contractor, provided a building—including structural frame—of exceptional quality. Its exposed aggregate surfaces are both attractive and almost maintenance free. Construction time now has greater economic importance than ever."

"Lincoln Center I was our first prestressed concrete building in West Allis, Wisconsin. Pleased? We look forward to working with J. W. Peters on Lincoln Center II."

FIRST...will not be LAST

JW PETERS AND SONS
West Market St., Burlington, WI 53105
414/763-2401 [Burlington]...414/272-7222 [Milwaukee]...312/782-4691 [Chicago]
The Wisconsin Society of Architects of the American Institute of Architects (WSA) with over 700 members is the state component of the national organization representing architects and related professionals in the state of Wisconsin. Members from private firms, corporations, industry, government, and education join together to maintain and represent excellence in architecture, the profession and to the public. This is accomplished through the many programs the WSA offers its members.

WSA membership offers many different opportunities for education and career development. The WSA is striving to help in advancing each individual's architectural skills, professional understanding and career opportunities.

With offices located in Madison, WSA is directed by an Executive Committee which sets priorities of the organization and initiates new programs. The Executive Committee consists of 17 representatives from the state's four local chapters. The president and vice-president of each chapter automatically are members of the Executive Committee. Five Directors-At-Large are elected by the state membership from the local chapters through an at-large election. The four primary officers of the Executive Committee are selected by the Executive Committee itself — from the membership roster of the WSA.

There are in excess of 45 standing commissions, committees, and short-term tasks force which recommend and execute policies, plans and produce programs. Membership on these state groups is drawn from the WSA membership.

When professional architectural expertise is needed by national, state, or local government bodies, members are nominated from the WSA to serve on such committees.

A full time staff headed by an Executive Director, located in Madison, handles day to day operations and is available to all Wisconsin members as a liaison to the AIA and as an information center.

The WSA is composed of four chapters, each having its own Executive Committee and accompanying committees and programs pertinent to its part of Wisconsin and its communities. Emphasis of the chapters is on participation and special events tailored to their needs through local meetings and seminars. All members have the opportunity to affect the direction of their profession and produce progress in many areas.
Wherever you build in Wisconsin, FABCON’S there.

MILLER BREWING COMPANY, MILWAUKEE — Warehousing facilities built with Fabcon insulated sandwich panels provide long-term savings through reduced maintenance requirements.

DISTRIBUTION CENTER, DODGEVILLE — The integral insulation in the 36' long ground-to-roof Fabcon wall panels provides outstanding energy efficiency for lower operating costs at this 150,000 sq. ft. warehouse-distribution center.

HERITAGE WAFFER CO., RIPON — This addition to an existing cookie plant was notable for its 54 foot high wall panels. Fabcon panels are cast on rolling beds up to 700' long then cut to precise shapes and lengths.

HELFAER RECREATION CENTER, MARQUETTE UNIVERSITY, MILWAUKEE — A multi-use recreational facility with molded finish wall panels for visual interest and an open span interior for recreational use.

MID-WISCONSIN BEVERAGE, WAUSAU — Fabcon panels have been specified at four Pepsi-Cola manufacturing facilities in recent years. The structural stability provided by Fabcon is a strong selling point.

PEPSI-COLA BOTTLING, EAU CLAIRE — Continued selection of Fabcon panels is a testament to owner satisfaction with price, performance and appearance.

MID-WISCONSIN BEVERAGE, INC.

STEWART DAIRY, MARSHFIELD — Food production facilities take advantage of Fabcon's smooth interior wall surfaces. Nothing more than simple painting is required to provide an easy-to-clean and hygienic finish.

HELFAER RECREATION CENTER, MARQUETTE UNIVERSITY, MILWAUKEE — A multi-use recreational facility with molded finish wall panels for visual interest and an open span interior for recreational use.

Today you'll find buildings using Fabcon prestressed precast concrete wall panels and floor planks throughout the state. Whether it's an office, manufacturing plant, warehouse, apartment or public building, talk to Fabcon before you build. Find out more about Fabcon building techniques and how they can mean a better building at a lower cost. Request our FREE booklet by contacting our local office.

WARNING!

KOHLER PRODUCES SIDE EFFECTS.

Take one Kohler Perma-Wall™ bath surround and brace yourself for the side effects:

Colors — like you've never seen before. Because they've never been on surrounds before. Bright, bold colors that will match Kohler baths already installed or on your mind.

Forms and textures — ones that excite your selling senses. Perma-Wall is a five-piece surround made of durable ABS. It has two molded-in soap dishes and acrylic grab bar.

Visions of ease — the kind every installer seeks. Perma-Wall fits most 5” tubs. There are only two end pieces, two corner pieces and a backwall to put up and the adhesive and sealant are furnished.

Perma-Wall is a product of Kohler research and is now available for national consumption.

But beware. Its beauty, durability and simplicity can be habit forming.

See us for more information about this and other fine Kohler products.

What is the American Institute of Architects?

The American Institute of Architects (AIA) is the national professional society of the architectural profession in the United States. It has over 36,000 members who are licensed architects. The AIA's national headquarters and staff are located in Washington, D.C. It has 50 regions and 250 component chapters across the nation, and a number of Women's Architectural Leagues. Student chapters are active at many colleges and universities. The professional society has three major missions:

1. to maintain and improve the competence of today's practitioners,
2. to create a sufficient supply of well-trained practitioners for tomorrow, and
3. to represent the Institute before professional and industry groups, government, and the public so that good design is encouraged by law and demanded by the community.

Institute programs are financed through members' dues and include a continuing concern with architectural design, structure, and materials; business and production aspects of architectural practice; architectural education and research; urban design; public affairs; governmental affairs; inter-professional and industry relations; and other subjects of interest and importance to the AIA's membership and to the public.

The AIA's programs and activities are guided by its officers, directors, committees, and members, and are carried out by its members and staff at the national, regional, and local levels.

THE AIA'S BEGINNINGS

The American Institute of Architects was founded in 1857 by a small group of architects who met in New York City, in a building near Trinity Church on Broadway, to explore ways of improving their profession.

They had much to do. By all accounts, architecture was at a low ebb, and really did not exist as a profession in this country. Until the middle of the 19th century, according to one writer, architecture in the United States was "the trade of carpenter-builders and the game of gentlemen-amateurs".

The architects who met near Trinity Church wanted to improve their public status and do something about the unbridled competition between architects which then prevailed. The result of their meeting was a resolution to form a professional society. Richard Upjohn, architect of Trinity Church, was elected president of the new organization.

Raising the ethics, standards and competence of the architectural profession was no easy task for the founders of the Institute. There were no architectural schools and few books. Adult education for young practitioners was unknown. But, the new organization overcame these problems one by one, and soon the AIA was issuing technical publications. It later added standard documents on such important matters as contracts and owner-architect agreements. In 1913, the first issue of The AIA Journal was published.

In 1899, the AIA moved to Washington, D.C., occupying the historic Octagon House, which it subsequently purchased. Built starting in 1798 and completed in 1800, the Octagon served as the temporary White House after the British burned the presidential mansion in the War of 1812. The Octagon was the AIA's national office until after World War II when the Institute moved to a new headquarters building behind the Octagon House. The Octagon was then opened to the public and has since been designated a National Historic Landmark.

In 1969, additional restoration was undertaken.

THE AIA TODAY

Membership in the AIA is open to every licensed architect who is a citizen of the United States and can satisfy his local AIA chapter and the Institute's Committee on Membership that he has the necessary professional qualifications.

The Institute is vitally concerned with architectural education and training. Professional schooling of architects begins with five or six years of study in an accredited school or college of architecture. Then, three years of internship in an architect's office are required. It is now mandatory that architects take rigorous written examinations to be licensed or registered to practice in all states and territories. The National Council of Architectural Registration Boards serves as a clearing house for state licensing boards in this regard. In 1940, the AIA helped to organize the National Architectural Accrediting Board. Today, there are 63 schools of architecture in the United States accredited by NAAB. Most architectural schools have AIA student chapters. There is close cooperation between the AIA and the faculties of the colleges and schools which are members of the Association of Collegiate Schools of Architecture.

Members of the Institute may be recognized by the use of the letters "AIA" after their names. The letters "FAIA" after an architect's name signify that he is a Fellow of the AIA, an honor bestowed for achievement.
Natural gas. Efficient, dependable natural gas. There's a good supply of proved reserves for the present and vast untapped reserves for the future.

If you have questions or need information, contact us. Wisconsin Natural Gas, 233 Lake Avenue, Racine, Wisconsin 53403, (414) 637-7681. We have the complete natural gas story including availability, pricing and conservation information so you can design the future...with natural gas.
STUDENT ORGANIZATIONS

University of Wisconsin - Milwaukee
School of Architecture and Urban Planning

Current officers of the Student Chapter - American Institute of Architects of the School of Architecture and Urban Planning at the University of Wisconsin-Milwaukee are left to right: Vice President J.T. Heater; Secretary Laurence Saint-Germain; Treasurer Renee Hytry; and, seated, President Lisa Kennedy.

Wisconsin Indianhead Technical Institute
Architectural Research Club

Pictured below are the officers and advisor of the club for 1982-83.

Left to right: Cory Daniel, treasurer; Randy Larrabee, president; Kathy Kendzior, secretary; Ernie Zesiger, vice-president; and Gary Magee advisor and Architectural Commercial Design instructor.
Spancrete. Floors and walls are not the whole story.

Spancrete. You know our name because of our long-standing reputation for excellence in pre-cast, pre-stressed concrete floor slabs and wall panels.

At Spancrete, however, we also make a wide range of architectural pre-cast walls, beams, columns, single and double tees up to 115 feet in length, stairways and much more.

We are constantly adding innovative new products and custom forms to our line. For example, we now manufacture insulated wall panels that sandwich a layer of insulation between an interior hollow core panel and an exterior concrete slab.

Just like the well-known Spancrete floor and wall panels, all our products and systems are designed to close tolerances and well-defined specifications. Dependable technical data (live loads, fire rating, insulation factors, etc.) give you the flexibility to build with optimum architectural and structural design. The Spancrete story. Make sure you hear it in full detail before you start your next building.

2. Karen Linley. Executive Secretary. Assistant to the Executive Director. Manages all financial records and accounts of WSA. Dues collection. Assists as needed with convention planning and implementation, fall workshop, other special events. Membership secretary. In charge of master information records. Schedules all mailings.

3. Sandra Swatek. Secretary to the Executive Director and Girl Friday. In charge of inventorying, purchasing, selling, billing and mailing of all AIA documents and codes. Processes Newsletters, Addenda and all Executive Director’s Correspondence. Handles employment service, library and multiple miscellaneous problems.

4. Lynn Ruenger. Advertising Director for the WISCONSIN ARCHITECT. Coordinates all advertising sales, subscription sales, and other matters pertaining to the income for the WISCONSIN ARCHITECT. Educates WSA members and advertisers regarding the value of advertising in the WISCONSIN ARCHITECT.

Architects usually call the WSA office with questions on ethics, documents, application for license in another state, renewal of license, supplemental dues, questions on insurance, etc. And we’re always on the phone helping someone to locate a job in an architectural office, or assisting an architect in finding someone to fill a vacancy.

A great many calls come in from all segments of the construction industry and legal profession inquiring about codes, documents and legislation.

Innumerable calls are received from the general public — prospective clients in need of architectural services seeking guidelines as to how to go about retaining an architect. What do they do? and What do they charge? are the most frequent questions asked by the unsophisticated callers.

While the great majority of calls formerly came from individuals seeking architectural services on a very small scale (a residence, an addition to an existing building), more and more calls are now being received from prospective clients with considerably larger projects in mind, i.e., a library, an educational building, a municipal complex. We use all of these instances as opportunities to educate the public on the true nature and value of architectural services, advising them on the best method of selection, etc.

No matter what the need — call us. We’ll do our best to fill it.

WSA Movie Collection

A CHILD WENT FORTH
"Our cities are central - we can't
loose them, we must make them
work." A thoughtful and innova-
tive film which first examines the
effect the inner city environment
and schools have on children
and then presents constructive
solutions. Examples of new
architectural design of schools
shows how a good environment
for learning is created. An in-
teresting converted warehouse
is used to offer new experiences
in art, music, etc. The possibili-
ties are endless. A good atten-
tion holding film - fast moving,
good music background. 28 min-
utes, 16mm, color, sound, up-to-
date (mid-late 70's), good for high
school to adult.

ARCHITECTURE USA
A celebration of "modern" Ameri-
can Architecture as of the late
1950's. Compares the modern
home of today to the days of the
parlor. Also looks at offices,
schools, churches, hospitals,
etc. with the theme "Bet-
ter Life Through Better Architec-
ture". Probably best used as an
historic study of American patri-
otism in the cold war years. 25
minutes, 16 mm, color, sound,
1950's, grade school age.

THE BEST WE CAN DO
The American Dream: moving out
to the suburbs, the ideal com-
munity. This dream community,
however, often is a nightmare.
Poor planning, identical houses,
a non-practical non-community.
This film examines possible rea-
sions why these poorly planned
communities happen the way
they do and then shows exam-
les of "the best we can do" -
some well-designed communi-
ties. Actions that can be taken
by citizens to assure this good
planning are included: amending
zoning ordinances, reorganizing
government financing programs
and recognizing the importance
of good architectural design. 15
minutes, 16 mm, color, sound,
mid-60's, junior high school -
adult.

CONVERSATIONS WITH AN
ARCHITECT
Throughout history architecture
has been a dominant part of the
environment and has reflected
the needs and values of the so-
ciety. What are the needs and
values of today's society? "Con-
versations With an Architect" 
takes the viewer into an archi-
tect's office, to meetings with
clients and other professionals,
and into other areas of the plan-
ning process as the architect
deals with shortages of building
materials, energy concerns, the
desire for more efficient and plea-
sant working and living environ-
ments, the practicality of remod-
eling old instead of building new,
etc. The film uses as examples
a school, office, housing project,
and then on a larger scale goes
to Reno, Nevada where a volun-
teer group of architects from the
AIA assess the city's problems
and help to develop a plan for
future urban planning. 30 min-
utes, 16 mm, color, sound, 1976.
good high school movie, could
be used for adults, produced for
AIA by Madison Productions,
Madison, Wisconsin. Has ac-
companying brochures.

DESIGNING A BETTER
TOMORROW
Examines the concept of archi-
tecture, comparing it to art,
music, sculpture, etc. Identifies
the factors which go into the de-
signing of a building: scale, form,
color, texture, social purpose,
etc. Shows what you learn in
architecture school. 14 minutes,
16 mm, color, sound, 1960's
(somewhat outdated in appear-
ance), junior high or high school
career film.

DOWNTOWNS FOR PEOPLE
When you want to go someplace
special, somewhere beautiful
and exciting, with open space for
a leisurely stroll, a place where
everything is happening, where
do you go? DOWNTOWN!! Many
of us when thinking of a trip
town conjure up pictures of
crowds of people, noisy and
congested traffic, and choking
exhaust fumes. This film shows
examples of successful down-
towns planned with people in
mind - mostly in European cities
we admire and vacation in with
their beautiful fountains, plazas,
outdoor cafes, street vendors,
etc. and a few American exam-
les. This film reminds us that
we are human and challenges us
to be aware and involved in the
urban planning of our down-
towns because "a vital down-
town happens only with intent".
24 minutes, 16 mm, color, sound,
1971, good for junior high - adult,
brochure.

THE NOISEY LANDSCAPE
This film criticizes the mass of
neon, and garish store signs that
litter our cities creating chaos
and ugliness. Expresses the
need for a comprehensive plan
of order and design that people
can enjoy and shows some ex-
amples of successful redesign
— Ghirardelli Square in San Fran-
cisco, Cross Keys in Baltimore,
etc. Suggests the use of graphic
design and color to communicate
to people. 13 minutes, 16 mm,
color, sound, late 1960's - 1970's,
junior high - high school.

RIGHT OF WAY
A commentary on the lack of
planning in our city highway sys-
tems which often creates the
situation of pedestrian vs. motor-
ist. Shows examples of aesthetic
and practical ways to balance
pedestrian and auto movement
such as tunnels through build-

wiscarchitect:february 1983
ings and the blending of build­nings and highways. 14 minutes, 16 mm, color, sound, mid-60's (out-of-date style and K-Mart mu­sic but message still relevant), junior high to high school.

NO TIME FOR UGLINESS
The ugliness in our cities - no trees, suburban uniformity, pol­lution of lakes and rivers, deteri­oration of buildings, garish signs, etc. Who did it? Banks, realtors, government, all of us who didn't stop it. Who suffers the consequences? We all do. What can be done? Design good build­ings, revive the center of the cities, good quality low in­come housing, plant trees, bring river and people together instead of hiding it, etc. What can you do? Become aware of what is wrong and why, promote busi­ness leadership, call on archi­tects. 26 minutes, 16 mm, color, sound, mid-late 60's, junior high, high school, adult, booklet.

WSA Slide Collection

WHAT DO THEY HAVE IN COMMON?
This slide presentation shows 23 architectural projects de­signed by women. The projects represent a wide range of de­sign styles located throughout the United States. From Wiscon­sin are four buildings designed by Lillian Scott Leenhouts: Ted Friedlander residence, Door County; Pau Hausmann resi­dence, Lapham Peak; Sam Gates residence, Wauwatosa; and Cambrudge Apartments for the elderly, Milwaukee. 48 slides, no sound, designed to run continu­ously in any public space, in­cludes handout brochures iden­tifying slides.

BUILDINGS, BLAZES AND BOX-OFFICE
Slide presentation with script for reading about fire safety in build­ings. Uses as a point of refer­ence the current movie "The Tower­ing Inferno" with Paul Newman playing the architect. Discusses what architects do to help make buildings fire safe, and what everyone can do to protect him/ herself. 62 slides, script for ar­chitect or teacher, good for age 10 to high school or adult, add­ing or substituting slides of lo­cal buildings and situations, where appropriate, can add in­terest.

HOW ARCHITECTURE SPEAKS
Thirty-two slides of buildings with an audience participation quiz on how architecture speaks through form, scale, color, tex­ture, and materials. Along with each slide of a building the audi­ence has three adjectives to choose from for example: peace­ful, awkward, soaring, to de­scribe what best defines the building. An answer sheet is pro­vided for architect or teacher. Good for school groups junior high or high school.

SAVING ENERGY IN THE BUILT ENVIRONMENT
Based on the AIA's energy policy reports, this slide presentation explains how energy-conscious building design can help reduce our dependence on nonrenew­able fossil fuels, and stresses the role of the architect in de­signing and redesigning build­ings for energy efficiency. 55 slides with a script, suggested introductory remarks and hand­out brochures, high school or adult.

CAREER AWARENESS PACKAGE
A good overview of what archi­tecture is and what an architect does. Covers architecture in his­tory, the contributions of sculp­ture, various theories of what architecture is or should be, etc. Covers a large range and depth of information. 80 slides, accom­panying script, good for high school and adult audiences.
THE AMERICAN INSTITUTE OF ARCHITECTS
STATEMENT OF PRINCIPLES

PREAMBLE: Members of The American Institute of Architects are dedicated to design excellence and the highest standards of professionalism, integrity and competence. The following principles are guidelines for the voluntary conduct of members in fulfilling that obligation. They apply to all professional activities, wherever they occur. They address responsibilities to the public, which the profession is expected to serve and enrich; to the clients and users of architecture, who sustain it and give it life; to colleagues in architecture, and in the building industry, who help to shape the built environment, and to the art and science of architecture, that continuum of knowledge and creation which is the legacy of the profession.

I. MEMBERS SHOULD ACCEPT THE PRIMACY OF LEARNED AND UNCOMPROMISED PROFESSIONAL JUDGMENT OVER ANY OTHER MOTIVATION IN THE PURSUIT OF THE ART AND SCIENCE OF ARCHITECTURE.

This is the essential definition of professionalism. Its application pervades and underlies all other ethical principles.

II. MEMBERS SHOULD CONFORM TO THE SPIRIT AND THE LETTER OF ALL LAWS GOVERNING THEIR PROFESSIONAL AFFAI RS.

Through their training and licensing, architects have been entrusted with the responsibility to protect public health, safety and welfare in the performance of professional duties. This obligation begins with registration laws and extends to laws governing business practice, political activity and social responsibility.

III. MEMBERS SHOULD UPHOLD THE CREDIBILITY AND DIGNITY OF THE PROFESSION.

The credibility of the profession is advanced by the dedication, proficiency and integrity of its members and by their achievement of architecture of the highest functional and design excellence. It is detrimental to the public image and the credibility of architects for members to exploit their professional status in any endorsement, publicity or business that is undignified or unrelated to architecture. To endorse a building product, system or service for a consideration is unprofessional, as is the use of misleading advertising, testimonials and other presentations.

IV. MEMBERS SHOULD THOUGHTFULLY CONSIDER THE SOCIAL AND ENVIRONMENTAL IMPACT OF THEIR WORK.

The construction and use of the built environment consumes significant amounts of resources and impacts directly upon society and the environment. Members should seek to complement and support environmental quality, conserve resources and respect the heritage of the past. They should be advocates for the needs of building users and through their designs seek to enhance the pleasure and satisfaction of all who are affected by their work.

Recognizing that the knowledge and attitudes of the public affect the quality of architect's contributions to society, members should promote public awareness and appreciation of the role of the built environment in advancing the quality of life. They should be involved as citizens and professionals in matters of policy and planning relating to these issues.

V. MEMBERS IN ALL THEIR PROFESSIONAL ENDEAVORS SHOULD SUPPORT HUMAN RIGHTS AND SHOULD NOT DISCRIMINATE AGAINST OTHERS.

Members should be fair and equitable in all their professional undertakings and relationships, including their dealings with their associates, employees and employers. In the course of carrying out their professional responsibilities, members should not discriminate against anyone or any group for reasons of race, creed, color, national origin, age or handicap, and should strive to provide equal opportunities for all.

VI. MEMBERS SHOULD BE CANDID AND TRUTHFUL IN THEIR PROFESSIONAL COMMUNICATIONS.

The integrity of the profession depends upon truth and candor in all forms of communication. There is no justification for misleading discourse. This principle applies to advertising, promotional endeavors and presentations. It also applies to reports and proposals, which should not create confusion or unreasonable expectations on the part of clients because of lack of information or clarity.

Design solutions and other presentations should be based on adequate information so that they do not deceive a client or mislead a potential client in evaluating the capabilities of the architect. Since improperly structured design competitions carry the same risk, members should advise the competition sponsors of recognized professional standards.

VII. MEMBERS SHOULD SERVE THEIR CLIENTS OR EMPLOYEES IN A THOROUGH AND COMPETENT MANNER.

Members should evaluate their resources and ability to perform given tasks and should undertake only assignments which they and their associates are competent to perform. They should not neglect responsibilities.

Wisconsin Architect February 1983
entrusted to them. Members should exercise informed judgment on all issues affecting the client or employer, establish compensation and conditions conducive to competent performance, and accept responsibility for the quality of their work.

VIII. MEMBERS SHOULD RESPECT THE CONFIDENCES OF THEIR CLIENTS, EMPLOYEES AND EMPLOYERS.

The traditional professions have long recognized that their members are obligated not to violate the confidentiality of information acquired through their professional relationships. For architects, however, this principle is not protected by law and it may be in conflict with other important values. When such conflicts arise, members should resolve them by weighing the alternative consequences, including applicable legal requirements and the dictates of conscience.

IX. MEMBERS SHOULD DISCLOSE TO A CLIENT OR EMPLOYER ANY CIRCUMSTANCE THAT COULD BE CONSTRUED AS A CONFLICT OF INTEREST AND SHOULD ENSURE THAT SUCH CONFLICT DOES NOT COMPROMISE THE INTERESTS OF THE CLIENT OR EMPLOYER.

While not inherently unethical, conflicts of interest can and often do provide the context for unprofessional conduct and damaged professional relationships. Disclosures made in a timely, complete and forthright manner is the first step toward an ethical resolution: the performance of a member in a position of apparent conflict is the final measure of integrity. A member holding an interest, or representing a client or employer with an interest, that could be affected by the member's professional judgment exercised on behalf of others should decline to offer such judgment unless the circumstance is fully disclosed and accepted by all parties. Members should never be compromised by influences or motivations, monetary or otherwise, not directly related to the achievement of architecture of the highest order. They should not violate positions of trust or responsibility to further their own business interests. In making commentary or providing professional judgment on a given issue, they should disclose the source of any compensations related to that issue. They should not accept compensation from more than one party to a contract for the same service.

X. MEMBERS SHOULD ACKNOWLEDGE, RESPECT AND GIVE APPROPRIATE CREDIT FOR PROFESSIONAL CONTRIBUTIONS OF EMPLOYEES, ASSOCIATES AND COLLEAGUES.

Members should respect the reputation of others as they would their own. They should share credit for work, honors and awards with employees and associates who contribute to a team effort. They should not claim credit for the work of others in seeking a commission or employment. They should acknowledge that architecture is one art among many and should facilitate the work of the allied professions, arts and crafts.

Members should recognize an obligation to speak out on matters of public significance to their art and profession, but in so doing, should be guided by professional knowledge and conviction and bear no malice of purpose.

XI. MEMBERS SHOULD COMPETE FAIRLY WITH OTHER PROFESSIONALS AND SHOULD NOT OFFER OR ACCEPT ANY BRIBE OR IMPROPER CONTRIBUTION OR GIFT TO OBTAIN OR GRANT WORK OR TO INFLUENCE THE JUDGMENT OF OTHERS.

It is in the best interest of clients, the public and the profession for members in pursuit of business opportunities to support fair and open competition based on professional merit. Unfair or illegal practices employed to gain a competitive advantage or influence the judgement of others are professionally unacceptable. Members using agents or employees to seek or perform work should take full responsibility for their performance and ethical conduct. Members should assure that such agents or employees understand and be guided by these ethical principles.

XII. MEMBERS SHOULD MAINTAIN AND ADVANCE THEIR KNOWLEDGE OF THE ART AND SCIENCE OF ARCHITECTURE, RESPECT THE BODY OF PAST ACCOMPLISHMENTS AND CONTRIBUTE TO ITS CONTINUED GROWTH.

It is the responsibility of all members to develop and maintain their knowledge of the art and science of architecture and to be guided by that knowledge in all professional actions. Colleagues should share and disseminate technical information and strive to improve their professional competence. Members have an obligation to maintain and advance the learning and competency of the profession and continually seek to raise the standards of design excellence, research, training and practice. They should support the educational process, improve the standards of architectural education and assist students and interns in their training and development.

PRESTRESSED CONCRETE INSTITUTE
1983 will be an exciting year for the Wisconsin Architect.

The Editorial Board has selected magazine themes for the coming year (listed below), and once again invites you to enhance the quality and scope of the magazine by submitting your projects and articles. This is an opportunity to share your work and ideas with other professionals in the field. In addition, your published article can be purchased in quantity, separately from the magazine, to use as a marketing tool. Additional copies of the Wisconsin Architect are also available.

To have your article considered for publication in the Wisconsin Architect, mail copy, and photos or drawings if available to: Editor, The Wisconsin Architect, 615 East Washington Avenue, Madison, WI 53703. Photos are encouraged, provided they are black and white glossy, and clear. Photos should be accompanied by a brief description of the project, and the design goals. The deadline for receipt of articles is two months prior to the month of publication, i.e., February 1 for April issue, etc.

**APRIL**

**INTERIOR DESIGN AND LANDSCAPE ARCHITECTURE**
Stories, articles and pictures pertaining to interior design, space planning, and landscape architecture.

**JUNE**

**ARCHITECT AS A DEVELOPER**
Stories, articles and pictures pertaining to buildings in which Wisconsin architects are developers.

**OCTOBER**

**HEALTH CARE**
Featuring health care projects designed by Wisconsin architects.

**MAY**

**RESIDENTIAL BUILDINGS**
Stories, articles and pictures of residential projects designed by Wisconsin architects.

**SEPTEMBER**

**CORRECTIONAL INSTITUTIONS**
Stories, articles and pictures of correctional work done by Wisconsin architects.

**DECEMBER**

**RESTORATION, ADAPTIVE REUSE, AND PRESERVATION**
Featuring projects, materials, and concepts demonstrating creative techniques to restore, preserve, and adapt well-designed older buildings . . . both interior and exterior.
Multi-Chambered PVC window systems for effective energy conservation.

Trocal framing's low U-factor (0.312 BTU/HR/FT²/°F) saves fuel.

All joints and sections are fused together to form a one-piece, solid frame and sash. No joints to seal.

Economical to install - requires no maintenance.

Trocal PVC windows won't swell, pit, peel, rot or dry out. No painting or repainting is ever needed.

Trocal profiles interchange to permit infinite variations.

Suit any new design or construction purpose and are equally suitable for renovations.

Color-keyed to architectural scheme.

Available in seven attractive colors to blend with the facade. Interior side remains white. Colors are permanent, can't peel off, fade, or deteriorate.

Competitive in initial costs with thermal-break aluminum and wood systems.

In 1980 the WSA Board of Directors endorsed the awarding of Citations for Distinguished Service in conjunction with the Annual Honor Awards Program. These citations are issued to individuals or groups in recognition of their contributions to architecture, architecture awareness, and related subjects. Any WSA member may recommend an individual or group for receipt of this Citation. Such a recommendation will be presented to the Board of Directors for consideration and action.

If you would like to nominate an individual, company or organization to receive a Citation for Distinguished Service, please contact any member of the Board of Directors; Wayne Spangler, AIA, 1982 Honor Awards Program Chairman; or the WSA Office.

SPACE EFFICIENT
STORAGE SYSTEMS

UA Uses and Applications
Sani-Shelf Shelving has multiple applications in all residential and commercial buildings. For example:
- Clothes Closets
- Linen Closets
- Pantries
- Basements
- Utility Rooms
- Garages
- Motels — Hotels
- Nursing Homes
- College Dormitories
- Hospitals

OP Overall Product
Available in two colors, Bright White and Dark Brown. The epoxy hard nonporous durable surface is non absorbent, will not yellow or become sticky.
Sani-Shelf system is complete with four widths of linen or storage shelving, two widths of shelf and rod (for clothes hangers) and two widths for shoe racks.

CC Code Acceptability, Certification

**Membership Information**

REGULAR MEMBERS are architects who are legal residents of and have been licensed or registered by any state, the District of Columbia or any U.S. Territory.

ASSOCIATE MEMBERS are persons who are legal residents of Wisconsin and are employed in a professional or technical capacity under the supervision of a licensed architect directly related to the practice of architecture, or are employed in circumstances recognized by licensing boards as constituting credits towards architectural licensing.

PROFESSIONAL AFFILIATES (State members only) are non-architects, registered to practice their professions where such requirements exist with established professional reputations. Professional Affiliates may include engineers, planners, landscape architects, sculptors, muralist and other artists, professionals in government, education, industry, research, and journalism, and other professionals whose work is related to the practice of architecture.

STUDENT AFFILIATE (State members only) are undergraduate or post-graduate students of architectural schools or secondary school students within the territory of the WSA.

When ratio of technical and professional employees to principals is 10 or more. Officers of the corporation are considered principals.

- $175.00
- 1st, 2nd & 3rd year: $22.50
- 4 or more: $30

**Principal of Firm 'B' Scale**
When ratio is less than 10 to 1

- $157.50

**Employee of a Firm**

- $105.00

**Government Employee** who supervises 10 or more people

- $122.50

**Government Employee** who supervises less than 10 people

- $105.00

**Industry Employee** who supervises 10 or more people

- $175.00

**Industry Employee** who supervises less than 10 people

- $105.00

**Employed in Education — Tenured Position**

- $122.50

**Employed in Education — Non-tenured Position**

- $105.00

**DUES NOTES**

The AIA Regular Member is also responsible to the Institute for supplemental dues beginning on January 1 of the year following admission based upon the number of registered architects in the firm (both employees and employers as of January 2) at the rate of $160.00 each. The firm will be given a credit of $90.00 against its supplemental dues obligation for each such registered architect who is an AIA member.

Invoices for national and state, dues will be mailed in December.

Members who have not paid WSA dues by July 31 shall be in default and shall be so notified. Members still in default as of September 31 shall be terminated.

Wisconsin Architect February 1983
We put names on their faces...

People want to get in and out of your business quickly. But they can’t, if they can’t find what they want.

At Derse Technical Signage, we manufacture interior and exterior sign systems that make it easy for people to find what they’re looking for. Our experience is the result of years of manufacturing and maintaining sign systems for hundreds of Wisconsin businesses and Health Care Facilities. And because we are also a part of a national network of 30 franchised manufacturing companies, we can offer you fast, local service on all your signing needs, anywhere in the country.

Let us help put names on their faces. Write us today for a free brochure.

INTRODUCTION

If you are contemplating the construction of a building, be it a small porch addition to a home or a multi-million dollar medical school, your first step should be to contact an architect who is the single professional who is equipped through training and experience to guide you through the entire building process. The roster that follows this article has been developed to provide you with an alphabetical listing of architectural firms in Wisconsin who have at least one principal who is a member of the Wisconsin Society of Architects and affiliated with the American Institute of Architects. Only those firms that completed the necessary questionnaire are listed.

In recent years the economics of construction have changed the context with which construction is undertaken. Inflation, high interest rates, fluctuations in labor and materials supplies, and other factors have all increased the cost and complexity of new building construction. Architects, as leaders of the building profession, have responded to these problems with innovative approaches in the delivery of their services. This article attempts to provide an overview of the important features of the three major delivery processes now available in procuring architectural services. It is important to note that the discussions of these different approaches are simplified.

No matter which approach is followed, the owner should draw on an architect's expertise early in the planning process. An architect can help develop the program, define the building requirements, minimize costs, expedite construction, provide innovative design input, and coordinate the entire building process in order to provide the owner with the most economical building in the least amount of time. Architects are also well equipped by training and experience to provide guidance on which project delivery approach is best suited to the project's needs. This choice can be a major factor in determining the cost and quality of the project.

DESIGN — BID — BUILD

This is the traditional method used in a vast majority of buildings. The architect is retained to prepare detailed design and construction documents. When the final design and construction documents are approved by the owner, they become the format for soliciting contractor's bids and awarding a construction contract. During the construction process, the architect acts as the owner's agent, administering the construction contract and monitoring the progress and quality of the contractor's work as provided by the contract between the owner and the architect.

This approach has numerous advantages including:

1) It is a reasonably straightforward and administratively simple process.
2) It maximizes the owner's involvement in decisions pertaining to the project.
3) It provides a firm cost figure prior to the beginning of construction.
4) During the construction process it insures that the owner's interests are looked after by a knowledgeable professional.
5) While there are admittedly numerous variations to this approach, its use is most generally accepted and basic.
6) Through the process of time, standard form contracts, procedures, and court decisions have evolved which provide specific guidance to the use of this process.

CONSTRUCTION MANAGEMENT

In its simplest form, Construction Management is a specialty service where the owner pays a fee to a construction manager for managing the project. This service is most often in addition to contracting with an architect. Different versions of Construction Management occur which can provide confusion to those who are new or not familiar with the changing building industry. Some architectural firms include construction management (CM) among their professional services. Others add it only when projects are complex. Either way, in some situations an experienced constroct
tion manager can provide the designer with detailed cost information specific to the project on cost, labor and market conditions, availability and delivery schedules for equipment and materials, and construction technologies. The owner usually contracts with both the architect and the CM, allowing all three parties to work together in a team approach, permitting the owner control in design and construction quality and giving the owner assurance for adherence to budget and time scheduling.

**DESIGN-BUILD**

In the two delivery approaches previously discussed, the architect normally maintains its separate identity and its role as the owner’s agent. In design-build, this is not the case. Instead, the architect is part of a firm or partnership that both designs and constructs the projects. The intent in this kind of delivery system is that the owner develops a single-point responsibility i.e. a single entity responsible to the owner for design, construction, time scheduling, and a guaranteed maximum price. Since in many instances the design-build entity is required to maintain a guaranteed maximum price in changing costs markets, the owner’s program and control may have to be tailored to enable the design-build team to build and buy at a cost which is within the guaranteed maximum price. One of the primary distinctive characteristics of a design-build approach is that the architect designing the project is a part of the design-build firm, as opposed to the architect’s traditional responsibilities acting solely as the owner’s agent.

**SELECTING THE BEST APPROACH**

Not all of these delivery approaches are suitable for every project. The choice between these approaches, and between the many possible variations to each approach, is best made with the guidance of an architect. The architect’s familiarity with local construction practices, market conditions, and the owner’s specific requirements, priorities and constraints can provide the best guidance regarding the delivery approach to be used.

In working with your architect multiple variables will be identified which will determine the best delivery approach. Considerations of cost, occupancy date, design control, construction quality, financing, etc. all should be taken into account in determining with your architect the best approach for the project.

We encourage your review of the following roster to provide you with architectural firms who should be contacted in the early stages of planning in order to assist you with some of these decisions. The itemization of services shown on the attached roster reflects recent work. A particular firm may offer professional services in other fields which have not been listed by virtue of their education, experience and staff. The WSA makes no warranty or representation regarding the competence or specialization of architects or firms identified in this directory.

New single-ply?
Protect it against roof traffic damage!

Styrofoam BRAND

No matter which type of membrane you apply, insulating it with STYROFOAM® brand insulation gives new roofs a long-term lease on life. Besides delivering big energy savings, STYROFOAM protects membranes from foot traffic, mechanical abuse, freeze-thaw cycles and ultraviolet degradation. Plus, using STYROFOAM is easy, fast and economical.

WARNING: STYROFOAM brand insulation is combustible and should be properly installed. For roofing applications it should be provided with an adequate protection. For specific instructions see Dow literature available from your supplier or from Dow.

TEAK and KARPAWOOD  
for parquet floors

The warm, natural look of a Teak or Karpawood parquet floor is treasured now more than ever before. These two imports are a delight to those who love the rich-grained beauty of wood.

TEAK is the ultimate in beauty, elegance and prestige . . . yet, it is very hard and will last for decades.

KARPAWOOD, known in Thailand as ironwood, is harder than oak, and has an extremely low coefficient of expansion.

Both woods are available from our Chicago warehouse in many UNfinished and PREfinished patterns.

Phone (collect) for free samples, brochures of 80 floor designs, technical information, prices. Or, write:

Thailand Teakwood Importers, Inc.
