In Wisconsin, the future of natural gas in commercial and multi-family projects is in two-pound copper piping—a system that’s easier and less expensive to install than black iron pipe for carrying gas to heating units and water heaters.

Up to 40% savings in labor and material costs are possible with copper. It’s easier and faster to install. Copper simply bends where necessary and joins with flare fittings or silver brazing—no threading needed. It’s flexible but strong, and requires far fewer joints than black iron pipe.

So share in the reality of low-cost natural gas piping in commercial and multi-family projects. For more information, call Al Nehmer at (414) 291-6961.

Wisconsin Architect February 1989
No matter where it is—
if it's asbestos—HSA will find it!

HSA's certified and skilled specialists will seek out the asbestos with the expertise of the hunter stalking its prey.

When you have HSA—
You've got the best!

From the initial survey through the abatement process HSA has no peers. HSA sets the standards by which others are judged.

If you have an asbestos problem—Or even think you have one—let HSA solve it for you.

HSA is fully bonded and insurable. Call or write today!

ATTENTION ARCHITECTS!

For your next project, consult with your local Kohler distributor listed here.

Choosing Sides

Hexsign® Lavatory and Taboret® Faucet. Side with better design and color on your next project. Kohler’s distinctive shapes and exciting color range are not just for residential use. Enameled cast iron fixtures and cast brass faucets stand up to heavy usage in commercial applications. The cost stays within budget. And everyone knows Kohler’s reputation for quality.

When you can have so many designs in so many colors, why go white? Make your project look as good as it functions, by simply choosing Kohler.

There is no equal.
Welcome to the 1989 edition of the "Construction Industry Handbook." Keep it handy. You will find it to be an invaluable reference throughout the year on matters pertaining to the Wisconsin Society of Architects (WSA).

Published as the February issue of Wisconsin Architect magazine, this Handbook is distributed to all members of the WSA as well as engineers, general contractors, interior designers, landscape architects and many others involved in the design and construction industry. In addition, the Construction Industry Handbook is made available to public and private owners in Wisconsin who contact the WSA for assistance in establishing a process for selecting an architect for their building projects.

Your comments and suggestions are appreciated regarding other individuals or organizations that should receive copies of this Handbook as well as any revisions or changes in content that you feel are appropriate.

NOTICE: Wisconsin Architect and/or the WSA are not responsible for materials that have been rendered obsolete or revised since this Handbook was printed.
Why the most advanced CAD system for architects and building designers puts you on the edge.

And keeps you there.

Today, there is a revolutionary CAD system that puts you on the edge—the competitive edge. A CAD system that goes far beyond the ordinary, and gives you the edge in production, presentations, plus a lot more. The name of this system is ARRIS. It is the remarkable system that will instantly show you why ordinary CAD is no longer enough for architecture and building design and management.

THE COMPETITIVE EDGE IN PRODUCTION.
With ARRIS, you don't have to make drawings line by line. Instead, you enter basic design parameters—and let the system do the rest of the work, automatically. So more work gets done, in less time.

THE COMPETITIVE EDGE IN PRESENTATIONS.
With ARRIS, you can create extraordinary design and marketing presentations that help you win more business. For example, ARRIS 3D modeling and rendering allows you and your clients to view your project from any perspective, at any angle, at any time of night or day. And to "walk through" rooms as if they really existed.

PLUS.
ARRIS allows your project teams to share data, drawings and systems—so they can work on entire projects, not just single drawings. Plus, ARRIS will grow as you grow, so you keep your competitive edge.

So be sure to call today for our free ARRIS demonstration. We're your ARRIS Power Dealer—and we can show you how ARRIS provides extraordinary CAD capabilities. And we can also provide you with the very best in training, service, and support. Call now to get the competitive edge.

You can get the competitive edge at:

CADS, INC

The Wisconsin Society of Architects, your organization, is one of the strongest and most respected components of the American Institute of Architects. The WSA's nationally recognized programs and innovative membership services continue to flourish and expand. So too does our membership. We are approaching 1,000 members strong. Much of the credit for the growth in membership is due to the responsive agendas and informative programs developed by the Board of Directors and committees of each of our four local Chapters and the state Society. The continued growth in membership and member participation contributes to the WSA's sound financial base which supports our activities. As a result, we can further broaden the scope of architectural professionalism both in our own local communities and throughout Wisconsin.

As we begin 1989, I encourage all members to continue to support WSA activities and to participate in the many programs provided by your professional organization. These successful programs and activities, such as our innovative Qualification Based Selection program, informative annual Convention, educational Fall Workshop and effective government affairs efforts, offer us further opportunities to advance our profession.

This year, I request the involvement of each and every member of the Wisconsin Society of Architects as we strive to enhance public awareness of the built environment and to demonstrate how we, as architects, can and do help shape that environment. Our goals must include upgrading our position of leadership in our industry and in our communities. We must seek both traditional and innovative means of enhancing our image as responsible architects, while increasing our value as design professionals in the eyes of our clients. In short, we must continue to provide the public we serve with good reasons to respect and to possess greater confidence in architects.

In 1989, the WSA will proceed with an extensive agenda of programs and services. They have been developed and made possible by the increase in membership, our strong financial health and the aggressive initiatives which have been put in place in recent years.

Your Board of Directors will again this year take a long-range view of the various programs and services offered by the WSA in light of the projected financial resources available five years from now. This long-range planning is done so that any required actions and commitments can be made with the proper planning necessary to eliminate unpleasant surprises and to avoid short-sighted solutions. Your input and suggestions about new and/or improved WSA services is an important ingredient in this planning process.

The WSA's government affairs activities are an important part of our package of membership services. An active Legislative Committee monitors and attempts to influence legislation and administrative rules that affect the practice of architecture in Wisconsin. The WSA continues to maintain its liaison with legislative committees, DILHR, DOSFM, DRI and other state administrative agencies in order to be in a position to make recommendations on issues and proposals of importance and concern to Wisconsin architects.

In 1989, the WSA will continue to fund and promote our Qualification Based Selection (QBS) program. This innovative program has been embraced by hundreds of public owners in Wisconsin and is being used as a model by other AIA chapters throughout the country. Through our QBS program, the WSA provides assistance to prospective public clients in establishing an architect selection process based on qualifications and competence. A call to the WSA office regarding any questions you may have about QBS or your experiences with a QBS selection process will help to further develop and improve this evolving program.

In summary, let's all pitch in and continue the traditions of the WSA. We are a volunteer organization relying on member donations of time and energy to achieve our goals and to serve our profession. The returns you gain from your membership are directly proportional to the efforts you put into your membership.

I ask for your continued support and assistance throughout 1989.

Dennis Lyons Olson, AIA
President
Wisconsin Society of Architects
American Institute of Architects
Give your clients more than they ask for.

Save money on commercial and industrial projects with Wisconsin Electric's Smart Money For Business.
We'll give you cash rebates or interest-free loans for energy-efficient systems or equipment. We can help analyze the cost-effectiveness of investing in proven efficiency measures, based on your client's needs and budget.
And we can keep you up-to-date with all the latest information on building comfort systems, like lighting, heating, ventilating and air conditioning systems.
For more information, call your local Wisconsin Electric district office or (414) 221-4900. We'll help your clients save energy and money. And make you look good.

Wisconsin Electric's
Smart Money
For Business

Available only to projects served by Wisconsin Electric. Some restrictions apply. Offers available to existing facilities and new construction projects.
Energy Efficient Clearspan Skyroofs.

Kalwall®/Structures Unlimited, Inc.

© 1988 Structures Unlimited, Inc.
Energy Efficient Clearspan Skylight and Skyroofs by Kalwall®/Structures Unlimited, Inc.

The System transmits diffused daylight, to eliminate lighting energy usage in the daytime. It also controls solar heat transmission to allow maximum heat gain for passive solar applications, or as little as 10% compared to glass to save air conditioning costs. And, it insulates up to 86% more efficiently than single glazing.

There just isn't any other skylight system that can compare!

With our exclusive pre-engineered aluminum structural system, we can provide clearspan skyroofs designed, engineered, manufactured, delivered, and installed complete – under only one contract, one responsibility!

For maximum performance, from 2' x 2' square skylights, through shed, ridge, pyramid, segmented dome, Kalcurve™, or other shapes, on your structure or complete with ours (100' + spans) – Kalwall/Structures Unlimited, Inc.!

Outstanding!
- Lowest construction costs;
- Passive solar capabilities;
- Rugged, yet lightweight;
- Glare-free, diffused light, with no direct sun "hot spots";
- Wide range of design and color possibilities;
- Optional screened, motorized opening roof;
- Virtually maintenance-free;
- Plants thrive;
- Engineered for local conditions;
- CORROSION RESISTANT!
SPECIFICATION SUMMARY:
Structure: Rigid frames of 6061-T6 and/or 6005-T5 aluminum box beams. Corrosion resistant colored finish in a variety of colors.
Spans: Clear spans to 100 feet. Consult factory for wider spans.
Roof: Panels 29/4" thick comprised of 12"x24" aluminum I-beam grid core, in a shoji pattern, and fiberglass faces, with special weathering surface. Roof is engineered to meet local live and wind loading building conditions.
Sidewalls: Translucent insulated panels similar to roof construction. Optional tempered insulated glass.
Insulation: .24"U" Factors standard for 29/4" panel. .15, .19 and .40 optional.
Installation: Delivered and erected by Structures Unlimited personnel. For other options - consult factory.

DESIGN AND TEST DATA
Heat & Light Transmission: Listed below are the light transmissions, shading coefficients, and "U" factors of the many common face combinations of Kalwall Structural Roof Panels. Many others available.

3. Wind (a 2 m.p.h.; 12"x24" Grid; 2½" Panel; Perimeter Aluminum excluded. Expressed as 0.5 lb./ft. - 0.9 lb./ft. - 0.9 ft. Mean Temperature: + 30°F for 24, 19, 15; + 7°F for 40.
4. At 0° incidence angle. Numbers for various panels are calculated based on tests.
Check with Technical Services Department for further clarification. Since this table is of a very technical nature, please consult your heating and ventilation engineer for proper interpretation
Since Kalwall is a composite sandwich, various combinations are possible, and test data should be interpreted from this point of view. Consult Technical Services Department for clarification on your specific job requirements.

Impact: The exterior face will repel a 3½" diameter steel ball, 6.37 lbs., dropped from 95' (60 ft.4b.s. impact). S.P.L. Method B.
Fire Tests: Although Kalwall panels are combustible (ignition temperature greater than 650°F), they will withstand a 1200°F flame for four hours with no flame penetration. Insulated Kalwall panels pass the Class "A" Burning Brand Test (ASTM E-108). A special configuration of Kalwall is a U.L. listed Class A Built-up Roof Unit. The faces can have various Burn Rates and Extents by ASTM D-635. All are less than 2.5 in./min., and the standard interior face is 1 in. or less Burn Extent. Several categories of interior flame-spread/smoke developed by ASTM E-84 tunnel tests are available to meet local building codes. Kalwall is listed by: I.C.B. #PFC 1705; SSBCC #8722; MEA 19-78, and several state and local areas. Whenever reference is made to fire tests, the numerical rating is not intended to reflect hazards presented by this or any other material under actual fire conditions.
Bond Strength: The adhesive shall be heat and pressure resin type engineered for structural sandwich panel use and shall pass rigorous testing requirements specified by the International Conference of Building Officials "Acceptance Criteria for Sandwich Panel Adhesive."

Minimum strength shall be 700 PSI tensile strength by ASTM C-297 after two exposures to six cycles each of severe aging conditions prescribed by ASTM D-1035, and 650 PSI shear strength average by ASTM D-1002 after five conditions.

Weatherability: The color of the exterior face shall not change more than 3.0 Adams Units (Delta E by ASTM D-2244), determined by an average of three white samples after at least 60 months of outdoor exposure in South Florida at 7° facing South.

This makes the Structures Unlimited System the ultimate performer - Kalwall insulated, translucent sandwich panels. No other material insulates thermally, dramatically cuts solar heat build-up, and also transmits softly diffused natural daylight! And for a specific design effect, clear glass, or acrylic and metal faced panels can be integrated into the System.
Special Design Options:

- Kalcurve™ – curved panel systems
- Complete buildings
- Clear glass or acrylic accent panels
- Metal faced accent panels

Kalwall®/Structures Unlimited, Inc.

13 Wisconsin Architect February 1989
Go into any fine home and you'll see what we mean. A beautiful window is more than a way to simply bring the outside inside. It's a way to add shape, excitement, and value to a room. That's why we sell Marvin Windows, the windows made to order just for you. Each one is crafted by hand from fine-grained Ponderosa pine in any shape or size you wish. So it not only looks great, but it fits exactly right. It may not be the easiest way to build a window, but it is the best way. And that's why Marvin Windows are found in some of the finest homes in America. If your home belongs in company like that, we hope we'll be seeing you soon. MARVIN WINDOWS ARE MADE TO ORDER.

The Wisconsin Society of Architects of the American Institute of Architects (WSA) is the 950-member state component of the national organization representing architects and related professionals in the state of Wisconsin. Members from private firms, corporations, industry, government, and education join together to maintain and represent excellence in architecture and the profession. This is accomplished through the many programs the WSA offers its members.

WSA membership offers many different opportunities for education and career development. The WSA is striving to help in advancing each member's architectural skills, professional understanding and career opportunities.

With offices located in Madison, the WSA is directed by a Board of Directors which sets the priorities of the organization and initiates new programs. The Board of Directors consists of 20 representatives from the state's four local Chapters. The president and vice-president of each Chapter automatically are members of the Board. Five Directors-At-Large are elected by the state membership through a statewide election. An Associate member and two student representatives also serve on the Board. The four primary officers compose an Executive Committee and are selected by the Board of Directors from the membership of the WSA.

There are in excess of 45 standing commissions, committees, and short-term task forces which recommend and execute policies, and plan and produce programs. Membership on these state groups is drawn from the WSA membership.

When professional architectural expertise is needed by national, state or local government committees, WSA members are nominated to serve on such committees.

A full-time staff located in Madison and headed by an Executive Director handles day-to-day operations and is available to all Wisconsin members as a liaison to the AIA and as an information center.

The WSA is composed of four Chapters, each having its own officers and accompanying committees and programs pertinent to its part of Wisconsin and its communities. Emphasis of the Chapters is on participation and special events tailored to member needs through local meetings and seminars. All members have the opportunity to affect the direction of their profession and produce progress in many areas.
Would you like to have more technical support when you design meeting rooms?

Look to Midwest Visual, Wisconsin's most experienced installer of audio-visual, video, and computer presentation systems. We specialize in custom systems for conference rooms, board rooms, training centers, and small auditoriums. We can provide the requirements you need for screen sizing, audience seating, front and rear projection rooms, sound systems, control systems, and lighting.

We'd like to help provide your clients with meeting rooms that take full advantage of the latest communications technology. Call us as questions come up in any stage of the design process.

WSA Executive Office

Sandra Swatek. Secretary to Executive Director. In charge of inventorying, purchasing, selling, invoicing and mailing of all AIA documents. Processes newsletters, reports and all Executive Director's correspondence. Is responsible for distributing State Building Commission Agendas and Job Bank Materials. Coordinates DILHR Courier Service.

Nancy Baxter. Advertising & Production Manager for Wisconsin Architect. Coordinates all advertising sales, subscription sales, and other matters pertaining to the income for Wisconsin Architect. Also coordinates the production of Wisconsin Architect and is liaison between printer and WSA.

Darius Van Fossen. QBS Facilitator. Responsible for architectural and owner outreach programs associated with the WSA's Qualification Based Selection (QBS) program. Works with WSA members on promoting and developing the QBS program and educating members regarding this architect selection process. Responds to requests from private and public owners for assistance in establishing the QBS process for selecting an architect. Maintains records on each QBS project and general contacts with architects and owners regarding QBS.

The Tri-Fount™ Washfountain – the best way yet to move traffic through a washroom.

It's as easy as 1, 2, 3.
1. It can wash one or two or three people at once.
2. It meets all barrier-free codes.
3. It's a real cost saver—saving water and energy with each use, saving time and trouble with minimal maintenance through the years.

Each of the three independent spray nozzles is controlled by its own push button, so each user activates a single metered .5 GPM flow of preblended water. It really cuts down on waste and waiting time.

Leg and toe clearances, and required reach to the push buttons and water streams, are well within existing barrier-free codes as well as ANSI A117.1-1980 standards.

Less than five pounds of pressure activates a safe, tempered flow of water which shuts off automatically. Optional backsplash-mounted soap valves are available, too. Concealed spray formers, recessed push buttons, and a rugged access panel provide unsurpassed vandal-resistance.

The Tri-Fount™ Washfountain is also easy to maintain, with front access to all supplies and stops. The unit's metering valve assemblies employ the same basic design as Bradley's field-proven 90-75 metering faucet. Timing can be adjusted from five to twenty seconds by turning a screw—without turning off the water. And if the metering cartridge should ever fail, it can be replaced quickly and easily.

For more information, contact Stickler & Associates, Inc., 333 N. 121st Street, Milwaukee, WI 53226, 1 414 771-0400.

the
CONCRETE advantage

performance
- Proven long life
- Strength increases with age
- Resistance to freeze-thaw

design
- Established rational design
- Can be easily designed to hold stormwater

construction
- Complete job faster
- Easy to construct
- Cold- and hot-weather placement

maintenance
- Low annual maintenance cost
- Proven fewer repairs
- Less maintenance labor and equipment needed

economy
- Competitive first cost
- Proven higher life than competitive material
- Much less expensive per year of average life
- Predictable cost estimates

safety
- Excellent light reflectance for parking lots
- Greater visibility

general
- Increased property values
- Produced locally
- Not subject to foreign embargoes or cartels

Why pay more and get less than concrete? Specify the concrete advantage.

For more information or the name of the ready mixed concrete producer in your area call or write:

WISCONSIN READY MIXED CONCRETE ASSOCIATION

Glass Structure Details

Details 1 through 8 depict the standard conditions for an aluminum framed glass enclosure. Detail 3, No Vent Ridge, shows the glass roof without the ventilation system. Detail 4, Vent Ridge, shows the roof with the vent system. This system is recommended for most applications in conjunction with awning windows because this induces ventilation through the glass enclosure.

The rafter is 3"X1 7/8".

Detail 2 depicts the glass straight eave. A curved eave utilizing bent glass is available.

Roof slope is variable in accordance with individual project requirements.

Note the stepped insulated glass units shown in details 2 and 3. This glass detail allows for a watertight horizontal joint without standing water in the manner of shingle roofs.

Bay spacing is 31", 37" and 49" standard centering. All other widths are readily available. Height is as variable as needed. Clear span is any length as required.

Further details are available upon request and you are invited to submit your project for our recommendations regarding construction details and specifications.

No one knows more about glass rooms than Four Seasons.

Four Seasons is America's largest manufacturer of greenhouse/sunroom additions. We offer Builders and Architects more than nine different ways to add individuality and appeal to both residential and commercial properties. Available in aluminum and wood framed structures with curved and straight frame styles. Four Seasons state-of-the-art engineering and exclusive product features like the Heat Mirror glass curves leave other sunroom companies out in the cold. Call or visit Sun Rooms Unlimited, suppliers and installers of Four Seasons Solar Products, for more information.

A New Perspective on Architectural Design

AutoCAD AEC Architectural customizes the world's most popular computer-aided design software specifically for design professionals. AutoCAD AEC Architectural now taps the full power of 3D to streamline the process of design development, floorplan preparation, and presentation.

Contract documents may be created automatically using the AutoCAD AEC architectural database functions.

Why spend time drafting when you could be designing?

The Overwhelming Choice
In Floor Underlayments.

We’ve poured our underlayments in apartments, condominiums, office complexes, single-family homes and shopping malls. More than 600 million square feet of Gyp-Crete® and Gyp-Crete 2000® have been installed nationwide. For new construction or renovation, they’re the overwhelming choice in floor underlayments.

Here’s why:
- Sound and fire control
- Accepts virtually all finished floor goods
- Pour over wood or concrete subfloors
- No shrinkage cracks
- Pour to depths of 3/8" to 3"
- Accepts foot traffic within 90 minutes
- Fast, efficient installation
- Leveling capabilities

RICHARD ACOTT & ASSOCIATES ARCHITECT
421 Daly Avenue
Wisconsin Rapids, WI 54449
715-421-5110
FAX 715-423-0661

Richard Acott, AIA

Registered Architects: 2
Total Employees: 6

Description of Practice:
Building types break down as 25% residential (apartments, homes), 15% restaurants, 30% churches, 20% restoration and interior design, and 10% offices. The firm has practiced in Wisconsin for 25 years and has received honors for its designs. The principal architect has a degree in art, architecture and architectural engineering and the firm strives to carefully and imaginately combine all three. Of all the different building types, the firm enjoys the churches the most, feeling it is the building type that generally strives for more imagination than some others and wishes it to be built for least, giving the architect the greatest challenge.

Recent Projects:
Water Tower Place, Madison, WI; St. John’s Tower Rehab, Milwaukee, WI; Memorial UCC Church, Madison, WI; Our Savior’s Luth. Church, Oconomowoc, WI; The Fireside Restaurant & Playhouse, Fort Atkinson, WI.

BOURL DESIGN STUDIO
7818 Big Sky Drive
Madison, WI 53719
608-833-3400

Robert R. Bouril, AIA

Registered Architects: 1
Total Employees: 2

Description of Practice:
The Bouril Design Studio was founded on some very basic principles and traditional values. These principles and values are exemplified in our unique personalized approach to providing architectural services. While we believe that high quality design and technical excellence are essential in all construction projects, the ingredient we feel is most important to a successful project is a successful working relationship between you and your architect. Through actively encouraging client participation during the design stages of a project, we help take the mystery out of the design and construction process while making the overall experience more rewarding for our clients.

Total Employees: 65

Description of Practice:
CPR Associates, Inc. is a full-service consulting firm providing services for design of banks, savings & loans, retail stores, corporate office buildings, residences, manufacturing plants, warehouses, transportation facilities, government buildings and major building renovation and restoration projects. Our architects and engineers provide complete in-house services for architectural, structural, HVAC, plumbing and electrical design, as well as building program, zoning code and growth management consultation.
Description of Practice:
Design Center Architects has been practicing architecture for forty years and, in that time, has been involved in a wide range of projects. Though a small firm, we have chosen to diversify our practice. Projects in recent years have included: Single and multi-family homes, condominiums, apartments & hotels; retail and commercial developments; churches, schools and government buildings; and a number of remodeling, restoration and renovation projects.

Recent Projects:
Chetola Resort Hotel & Condominiums, Blowing Rock, NC; "Piano Factory" Outlet Shopping Mall, St. Charles, IL; Expansion & Remodeling of Lake Geneva Post Office & Parking Deck, Lake Geneva, WI; Student Housing Apartments, Boone, NC; Messiah Lutheran Church, Addition & Remodeling, Twin Lakes, WI

DESIGN COALITION INC.

Madison, WI 53703
608-258-8866

Lou Host-Jablonski, AIA
James Glueck, AIA
Registered Architects: 2
Total Employees: 5

Description of Practice:
Design Coalition Inc. has maintained a community-oriented practice in its growth from roots as a community design center in the early '70's. Projects including multi-family housing co-ops and apartments, community centers, church additions, daycare centers, wheelchair accessibility remodeling for public and residential spaces, and housing for battered women and the homeless are recent examples. Commercial projects, often in concert with local development efforts, include retail stores and business district facade renovation for five Wisconsin communities. Regardless of project type, strong interests of the staff have always included design sensitive to context and energy, design for all ages and abilities, and re-use of existing buildings.

Recent Projects:
Reservoir Cooperative, Madison, WI; Bayview Community Center, Madison, WI; Rowe Pottery Works, Cambridge, WI; Os- terhaus Residence, McFarland, WI; Downtown Cambridge Facades, Cambridge, WI.

DESIGN II LTD. ARCHITECTS
131 South Main Street
Fond du Lac, WI 54935
414-922-2383

Steve Schoofs, AIA
Stan Ramaker, AIA

Registered Architects: 2
Total Employees: 8

Description of Practice:
Design II, Ltd. has numerous areas of concentration due to being awarded a high number of church projects, fast food restaurants, motels, government buildings and housing facilities. The firm remains popular with church communities and city/county govern­ments due to their managability of budgets and their accompanying restrictions. Major fast food franchises ranking in the top five in the nation utilize the firm based on their vast experience, and capabilities with functional and contemporary design. Design II, Ltd. has met the challenge of matching original architecture for church facilities which displays quality appreciation for historic preservation. In conclusion, Design II, Ltd. is an attractive choice because of abilities concerning functional design, feasible time schedules and budget guidelines.

Recent Projects:
First Reformed Church, Oostburg, WI; Trinity Evangelical Free Church, Ripon, WI; Budgetel Motel, Madison, WI; Super 8 Motel, Marshfield, WI; Cedar Ridge Condominiums, West Bend, WI.

The combination of services offered by JK/Architecture varies from project to project.
These services are structured to provide flexibility as well as attention to detail. Services are organized to meet each client's unique requirement for a full range of project types. These types include commercial, professional, industrial, institutional and residential categories. Besides new buildings and additions, renovation and conversion of existing buildings represents a significant portion of the services rendered by JK/Architecture.

Recent Projects:
- Dodge County Courthouse Renovation, Juneau, WI; Rock River Walkway Plaza, Watertown, WI; Foelker Residence, Watertown, WI; Kersbergen Residence, Houstond, WI; Horizon State Bank, Neosho, WI.

WILLIS & LILLIAN LEENHOUTS, ARCHITECTS
3332 N Dousman Street
Milwaukee, WI 53212
414-964-1204
Willis C. Leenhouts, FAIA
Registered Architects: 1
Total Employees: 4

Description of Practice:
This firm, established in 1945, was preceded by another architectural partnership, Leenhouts and Guthrie, which did much work in Wisconsin starting in the 1890's. Both firms tended to be innovators and erected many churches, apartments, residences, plus outstanding buildings such as libraries, an award-winning prison, Masonic Temples, schools, and stores. When concrete was new for theaters, warehouses, high-rise apartments and radiant floor heating and passive solar were rediscovered, the Leenhouts used them to excellent advantage.

Recent Projects:
All Saints Cathedral Guild Hall, 2nd floor remodeling for "Living Church" magazine offices, Milwaukee, WI; Four Winds, Mitchell Field Air Port Concessionaire; Cunningham Residence in Fairy Chasm; Lewis Tyner Residence, south of Port Washington, WI; R. Binder Residence addition, Fox Point, WI.

Milwaukee, Wisconsin 53202
414-273-8584

Mark F. Pfaller II, AIA
Lisa L. Kennedy, AIA

Registered Architects: 2
Total Employees: 5

Description of Practice:
The Pfaller firm continues to engage in the general practice of architecture. Our projects are diversified, including a myriad of building types and clients. With Mr. Pfaller's experience and expertise in restoration, rehab and sympathetic design we have continued to specialize in these types of projects and tend to solicit work that utilizes that expertise. Such projects as pure restorations, historic building additions, major remodelings or rehabs in almost all building types are always on the boards, however, we do devote about 40% of our time to new work. We have completed several new office buildings recently and we are working on multiple housing projects. Studies for clients also continue to provide us with research projects. These studies come in the form of historic structure reports, feasibility analysis, design studies, urban design studies, and land use studies. This general practice, we feel, adds to our projects and aids us in being able to provide comprehensive services. We are interested in new work, rehab and restoration projects of all sizes from $20,000 to $100,000,000.

Recent Projects:
Pabst Theater-Milwaukee Center Lobby-Milwaukee, WI; Executives Oaks Condominiums-Dundee, IL; Beachwood II Office Park-Poughkeepsie, NY; Brown Deer Baptist Church-Brown Deer, WI; Heritage School Restoration-Sheboygan, WI.

Description of Practice:
Planning Associates, Inc. is a planning, architectural, and construction management firm with twenty years of experience in office design, retail shopping center, and historical rehabilitation. Our design/build process has been very well received by our customers, and the majority of our work is repeat business and/or client referral. We are keenly interested in working with the various civil divisions of government, particularly in the space needs analysis and subsequent design and construction of public buildings. While our work has been primarily private sector, we have considerable experience in state, county, and local public projects. We want to expand our service to local governments and feel that our well qualified staff can meet the challenges of new or renovated public buildings, including but not limited to libraries, fire stations, police stations, administration buildings, etc.

SCHAEFER ARCHITECTS

13446 North Lakewood Drive
Mequon, WI 53092
414-243-5303

James W. Schaefer, AIA

Registered Architects: 1
Total Employees: 3

Description of Practice:
Our practice is roughly divided equally among three types of architectural work. First of all, we do quite a bit of residential work, both new homes and renovations of existing homes. Secondly, we do commercial work, office buildings, small hotels, churches, etc. Finally, we do restorations, adaptive reuse and historic preservation. Better than half of our commissions, both new work and restorations involve some type of historic architectural design.

Recent Projects:
Rochester Inn, Sheboygan Falls, WI; David Roeming Residence, Mequon, WI; Kohler Foundation Restoration, Pelican Lake, WI; Richardson Furniture, Sheboygan Falls, WI; Holy Mount Carmel Baptist Church, Milwaukee, WI

THE PUBLIC SPACE FURNITURE COMPANY
WSA Membership Benefits

1. Work. Whether you are an employee or an employer, WSA helps you get work by means of job listings, referrals, "how to" seminars and cassettes.

2. Marketing Information. You get no place without this today. WSA organizes seminars, makes available printed material, cassettes, and inserts information in *Wisconsin Architect*.

4. State Agency Contracts are updated with the help of WSA representation. Some past inequities have been corrected and contract language improved.

5. Qualification Based Selection (QBS) program, provided as a public service by the WSA, assists owners in establishing an A/E selection process based on qualifications and competence and the specific needs of public projects.

6. Insurance Rates. Maybe your premium or your exposure can be reduced. WSA has committees working on this and information and advice available.

7. An Eye on Legislation affecting zoning, planning, professional registration, taxes, procurement of services and other matters of interest to the profession and the construction industry.

8. Legislative Relief. WSA has an active Legislative Committee and Minuteman program.

9. An Eye on Building Codes. WSA and AIA committees have been working at state and national levels to improve regulations affecting the design of buildings.

10. Continuing Education programs on all of the timely subjects, like marketing, energy conservation, production efficiency, management, liability and design.

11. Library of architectural books and reference materials is available on loan at no charge. Cassettes, video cassettes and slides on a wide range of important subjects are available at no charge.

12. Exchange of Ideas, Exploration of mutual technical and professional problems at local and state meetings.

13. Learning by Association with other architects and distinguished non-architect guests. Every person you talk to at local or state meetings is an expert on something.

14. You Become Part of effort to maintain and improve high ethical and technical standards. For instance, there has been a lot of discussion on the AIA Code of Ethics and Professional Conduct. Why don't you get in on this?

15. A Forum for presentation of viewpoints. You play a part in establishing the standards of the profession by expressing your opinion at local and state meetings.

16. Participation on Committees. You can be on a local, state or national committee almost for the asking. This could be very broadening and very instructive.

17. Common Front presented on issues important to the profession. Witness WSA activity in support of liability-law reform, a strong statute of limitations for the design and construction industry, qualification-based selection and against sales taxes on professional services.

18. Contract Forms and other documents. These are sold by WSA to members — with same-day service. WSA members pay a discounted price for documents.

19. Hotline newsletter and other communications which keep members up to date on numerous important matters, such as proposed legislation and administrative rules, educational seminars and workshops as well as WSA and Chapter events and activities.

20. WSA Construction Industry Handbook, issued yearly, is a reference for valuable information not found elsewhere. Look through the latest issue and discover its great value.

21. Public Relations program in Wisconsin newspapers and our own magazine, *Wisconsin Architect*, distributed to important people outside the profession. This educates the public and enhances the image of the architect.

22. Status and Prestige enhanced by membership in local Chapter, WSA and AIA. This translates into personal satisfaction and better respect by the community.

23. Information Service on such professional matters as state laws (proposed and enacted), document forms, state administrative structure, licensing, and sources for other needed information.

25. Honor Awards program at both the State and Chapter levels which provide peers recognition, as well as local, state and national publicity to winners.

26. WATS Line. A toll-free phone number to be used in contacting the WSA office . . . 1-800 ARCHITECT.

27. DILHR Plan Delivery. The WSA staff will hand carry your plans to DILHR, pick them up, and return them to you for a nominal fee.

28. Workers Compensation Insurance. WSA members can participate in a group plan which will return a dividend.

29. State Building Commission Agendas are available so that members can keep track of developing state jobs.

30. Video Cassettes are available for use in your office on a variety of topics including fees, project management, project scheduling, and the legal system.

31. Intern Development Program is a methodology for individuals pursuing architectural registration to obtain experience in all areas required for registration. WSA members are active in this program . . . both employers and employees.

32. Young Practitioners Seminars are a chance for young practitioners to come together to discuss a variety of topics of particular interest to them.

33. Professional Competence is mandated by state laws and the Department of Regulation and Licensing. The WSA office actively pursues cases where there have been allegations of actions which are not in compliance with those rules and regulations.

34. An Office Away from Home is available at the WSA office. Parking, library, phone, and walking access to state agencies and the State Capitol are all available.

35. Group Health Insurance is available to WSA members through a very competitively-priced national policy.
Find the Speaker in this Picture

What you see (or don’t see) is an in-the-wall speaker system. Blending into the environment, it’s designed to be heard, not seen. The speakers can be painted or wall-papered over.

We are specialists in custom home entertainment systems, from design to installation. We work directly with you, the architect, to provide the best system for your client. From 22 years of serving commercial and professional clients, we understand the special satisfaction that comes with knowing a system is the best it can be.

You’ll find our designers and installers to be patient, attentive and knowledgeable. We’d never be satisfied with a system until you are.

Let’s talk about the possibilities. Call David Vatland at (414) 733-8539 to find out how we can help you. Get the picture?

Enjoying our 23rd year serving you.
It has been three years since the Wisconsin Society of Architects first initiated its Qualification Based Selection (QBS) program. During this time the WSA has provided assistance to over 600 public owners in establishing an architect selection process.

QBS continues to receive excellent support from WSA members. In addition, owners who have used the process are recommending its use to other owners whom they feel might benefit from establishing a selection process based on qualifications. Architects are assisting owners by sharing the availability of the QBS program and referring them to the WSA office for follow-up by the WSA's QBS Facilitator.

The Wisconsin Association of Consulting Engineers (WACE) and the Wisconsin League of Municipalities both have endorsed the WSA/QBS program and are actively supporting this effort. Several other Wisconsin-based associations also are providing support and are listed in the WSA booklet Selecting Your Architect. This publication is distributed annually to public officials as an insert in Wisconsin Architect magazine.

The QBS program begins with the public owner conducting an analysis of their project status and needs. Assistance is then provided by the QBS Facilitator through information and materials based on the specific needs of the owner and project. This includes meeting with the owner representatives "one on one" and the development of a set of draft materials upon request.

It is important to note that the QBS Facilitator will not engage in any of the following:

- Recommend any firm or firms,
- Provide evaluations or critiques on any architects or firms,
- Dictate the process to be used in the selection of an architect,
- Participate in the interviewing process,
- Participate in the negotiations of an agreement or contract between the owner and the architectural firm selected, or
- Provide cost estimate for architectural services on projects.

Since the QBS service is initiated when a request for assistance is received from the owner, the QBS Facilitator first will ask if the owner is presently working with an architect before the QBS process is begun. This is to avoid the disruption of any existing working relationships between owners and architects.

QBS information available from the WSA includes an informational brochure describing the process and service, a generic set of forms and memos which can be tailored around the specific needs of the owner and project, the WSA booklet Selecting Your Architect, plus examples of actual QBS projects and other sample forms.

The QBS process recommended by the WSA includes the following 12 steps:

1. The owner determines the scope of work.
2. The project time-frame is established.
3. A list of architectural firms is assembled by the owner.
4. A Request for Qualifications (RFQ) is published and/or distributed by owner.
5. These RFQs are received and reviewed.
6. A shortlist of firms is established to be interviewed.
7. A tour of the site and/or facility is arranged.
8. Interviews are conducted.
9. A contract is negotiated with the selected firm.
10. Post-selection communications are made with all firms involved.
11. Other requirements such as referenda are carried out.
12. Evaluation of the process is conducted for use in future building programs by the owner and for improving QBS programs by the WSA.

As the momentum for the QBS program continues, the WSA looks forward to your continued support, input and involvement. For further information on QBS, please contact our QBS Facilitator D. Van Fossen at the WSA office ... 1-800-ARCHITECT (257-8477 in Madison).
Introducing MAX/CAD. The first furniture system designed specifically for computer-aided design and engineering.

Ostara floor tile and Incepa wall tile. A delightful duet from INCERCO. Perfect harmony of appearance, line after line. Solids, murals, mosaics, motifs - all in a medley of colors and sizes. Beautifully in tune with most other tiles, too.

High quality. Easy to clean. There are also Ostara “step-safety” designs for the bath, the kitchen, the poolside—wherever wet surfaces could be a hazard.

When you demand classic harmony at home, Ostara, International American Ceramics (I.A.C.), and Incepa tiles are just the overture you need.
Membership dues are the life blood of any nonprofit organization. They also provide the funds for communication, public relations, continuing education, and other programs. Dues are structured to be fair and equitable to all categories of membership. All income producing projects conducted by the WSA, such as AIA document sales, convention exhibit booth sales, and magazine ad sales, help support WSA programs and at the same time keep dues at a reasonable level.

**ASSOCIATE MEMBER**
Every person who is a legal resident of Wisconsin and is employed in a professional or technical capacity under the supervision of a licensed architect directly related to the practice of architecture, or employed in circumstances recognized by licensing boards as constituting credit towards architectural licensing is welcome to Associate membership.

Upon admission to the National AIA, Associate members may use the suffix "Associate Member of the American Institute of Architects." They receive regular publications of the AIA and are listed in appropriate listings published in AIA.

**National Dues Structure (Associate Member)**
National dues are billed directly from the American Institute of Architects in Washington, D.C. AIA dues are $65.00 per year.

**State Dues Structure (Associate Member)**
1st, 2nd, and 3rd years at 75% of full dues ................. $22.50
Four or more years, full dues ................. 30.00

**PROFESSIONAL AFFILIATE (State Member Only)**
Professional Affiliates are non-architects, registered to practice their professions where such requirements exist, with established professional reputations. Professional Affiliates may include engineers, planners, landscape architects, sculptors, muralists and other artists, professionals in government, education, industry, research, and journalism, and other professionals whose work is related to the practice of architecture.

**STUDENT AFFILIATE (State Member Only)**
Student Affiliates shall be undergraduate or postgraduate students of architectural schools or secondary school students within the territory of this Society.

THE AMERICAN INSTITUTE OF ARCHITECTS

CODE OF ETHICS AND PROFESSIONAL CONDUCT

Preamble

Members of The American Institute of Architects are dedicated to the highest standards of professionalism, integrity and competence. The Canons are broad principles of conduct intended as guidelines for members in fulfilling those obligations. The Ethical Standards are more specific goals toward which members should aspire in professional performance and behavior. The Rules of Conduct are mandatory, the violation of which is grounds for disciplinary action by the Institute. The Rules of Conduct in some instances implement more than one Canon or Ethical Standard.

CANON I
GENERAL OBLIGATIONS

MEMBERS SHOULD MAINTAIN AND ADVANCE THEIR KNOWLEDGE OF THE ART AND SCIENCE OF ARCHITECTURE, RESPECT THE BODY OF ARCHITECTURAL ACCOMPLISHMENT AND CONTRIBUTE TO ITS GROWTH; LEARNED AND UNCOMPROMISED PROFESSIONAL JUDGMENT SHOULD TAKE PRECEDENCE OVER ANY OTHER MOTIVE IN THE PURSUIT OF THE ART AND SCIENCE OF ARCHITECTURE.

E.S. 1.1 Knowledge and Skill: Members should strive to improve their professional knowledge and skill.

R. 1.101 In practicing architecture, members shall demonstrate a consistent pattern of reasonable care and competence, and shall apply the technical knowledge and skill which is ordinarily applied by architects of good standing practicing in the same locality.

R. 1.102 Members shall not undertake to provide professional services if their competence is substantially impaired by physical or mental disabilities.

E.S. 1.2 Standards of Excellence: Members should continually seek to raise the standards of aesthetic excellence, architectural education, research, training and practice.

E.S. 1.3 Public Understanding: Members should strive to improve public appreciation and understanding of architecture and the functions and responsibilities of architects.

E.S. 1.4 Allied Arts & Industries: Members should promote allied arts and contribute to the knowledge and capability of the building industries as a whole.

CANON II
OBLIGATIONS TO THE PUBLIC

MEMBERS SHOULD EMBRACE THE SPIRIT AND LETTER OF THE LAW GOVERNING THEIR PROFESSIONAL AFFAIRS AND SHOULD THOUGHTFULLY CONSIDER THE SOCIAL AND ENVIRONMENTAL IMPACT OF THEIR PROFESSIONAL ACTIVITIES.

E.S. 2.1 Conduct: Members should uphold the law in the conduct of their professional activities.

R. 2.101 Members shall not, in the conduct of their professional practice, knowingly violate the law.

R. 2.102 Members shall neither offer nor make any payment or gift to a local, state or federal official with the intent of influencing the official's judgment in connection with an existing or prospective project in which the members are interested.

R. 2.103 Members serving in a public capacity shall not accept payments or gifts which are intended to influence their judgment.

R. 2.104 Members shall not engage in conduct involving fraud or wanton disregard of the rights of others.

R. 2.105 If, in the course of their work on a project, the members become aware of a decision taken by their employer or client, against the members' advice, which violates any law or regulation and which will affect adversely the safety to the public of the finished project, the members shall:

(a) refuse to consent to the decision, and
(b) report the decision to the local building inspector or other public official charged with the enforcement of the applicable laws and regulations, unless the members are able to cause the matter to be satisfactorily resolved by other means.

R. 2.106 Members shall not counsel or assist a client in conduct that the architect knows, or reasonably should know, is fraudulent or illegal.

E.S. 2.2 Natural and Cultural Heritage: Members should respect and help conserve their natural and cultural heritage while striving to improve the environment and the quality of life within it.

E.S. 2.3 Civic Responsibility: Members should be involved in civic activities as citizens and professionals, and promote public awareness of architectural issues.

E.S. 2.4 Public Interest Services: Members should render public interest professional services and encourage their employees to render such services.

E.S. 2.5 Human Rights: Members should uphold human rights in all their professional endeavors.

R. 2.501 Members shall not discriminate in their professional activities on the basis of race, religion, gender, national origin, age or non-disqualifying handicap.

CANON III
OBLIGATIONS TO THE CLIENT

MEMBERS SHOULD SERVE THEIR CLIENTS COMPETENTLY AND IN A PROFESSIONAL MANNER, AND SHOULD EXERCISE UNPREJUDICED AND UNBIASED JUDGMENT ON THEIR BEHALF.

E.S. 3.1 Competence: Members should serve their clients in a timely and competent manner.

R. 3.101 In performing professional services, members shall take into account applicable laws and regulations. Members may rely on the advice of other qualified persons as to the intent and meaning of such regulations.

R. 3.102 Members shall undertake to perform professional services only when they, together with those whom they may engage as consultants, are qualified by education, training, or experience in the specific technical areas involved.

R. 3.103 Members shall not materially alter the scope or objectives of a project without the client's consent.

R. 3.104 When acting by agreement of the parties as the independent interpreter of building contract documents and the judge of contract performance, members shall render decisions impartially, favoring neither party to the contract.
E.S. 3.2 Conflict of Interest: Members should disclose to clients or owners significant circumstances that could be construed as conflicts of interest and should ensure that such conflicts do not compromise those interests.

R. 3.201 Members shall not accept compensation for their services from more than one party on a project unless the circumstances are fully disclosed and agreed to by all interested parties.

R. 3.202 If members have any business association, direct or indirect financial interest, or other interest which could be substantial enough to influence their judgment in connection with their performance of professional services, the members shall fully disclose to their clients or employers the nature of the business association, financial interest, or other interest, and if the clients or employers object to such association, financial interest, or other interest, the members will either terminate such association or interest or give up the commission or employment.

E.S. 3.3 Candor and Truthfulness: Members should be candid and truthful in their professional communications.

R. 3.301 Members shall not intentionally or recklessly mislead existing or prospective clients about the results that can be achieved through the use of the members' services, nor shall the members state that they can achieve results by means that violate applicable law or this Code.

E.S. 3.4 Confidentiality: Members should respect the confidentiality of sensitive information obtained in the course of their professional activities.

R. 3.401 Members shall not reveal information obtained in the course of their professional activities which they have been asked to maintain in confidence, or which the reasonably prudent architect would recognize as likely, if disclosed, to affect the interests of another adversely. However, under the following exceptional circumstances members may reveal such information to the extent the members reasonably believe necessary:

(a) To stop an act which creates an appreciable risk of significant harm to the public health or safety or property of others and which the members are unable to prevent in any other manner; or

(b) To establish claims or defenses on behalf of the members; or

(c) To comply with applicable law or with this Code.

CANON IV
OBLIGATIONS TO THE PROFESSION

MEMBERS SHOULD UPHOLD THE INTEGRITY AND DIGNITY OF THE PROFESSION

E.S. 4.1 Honesty and Fairness: Members should pursue their professional activities with honesty and fairness.

R. 4.101 Members shall comply with the registration laws and regulations governing their professional practice.

R. 4.102 Members shall not knowingly make false statements or knowingly fail to disclose a material fact requested in connection with their application for registration or their application for AIA membership.

R. 4.103 Members shall not assist the application for registration or AIA membership of a person known by the members to be unqualified with respect to education, training, experience, or character.

R. 4.104 Members having substantial information which leads to a reasonable belief that another member has committed a violation of this Code which raises a serious question as to that member's honesty, trustworthiness or fitness as a member shall report such information to the body charged with enforcing this Code.

R. 4.105 Members shall not sign or seal drawings, specifications, reports or other professional work for which they do not have direct professional knowledge or direct supervisory control; however, in the case of those portions of such professional work prepared by the members' registered consultants, the members may sign or seal said portions of the professional work if the members have reviewed such portions, have coordinated their preparation, or intend to be responsible for their adequacy.

R. 4.106 Members speaking in their capacity as architects shall not knowingly make false statements of material fact.

R. 4.107 Members shall accurately represent their qualifications and the scope and nature of their responsibilities in connection with work for which they are claiming credit.

E.S. 4.2 Dignity and Integrity: Members should strive, through their actions, to promote the dignity and integrity of the profession, and to ensure that their representatives and employees conform their conduct to this Code.

R. 4.201 Members shall not make misleading, deceptive or false statements or claims about their professional qualifications, experience or performance.

R. 4.202 Members shall make reasonable efforts to ensure that those over whom they have supervisory authority conform their conduct to this Code.

CANON V
OBLIGATIONS TO COLLEAGUES

MEMBERS SHOULD RESPECT THE RIGHTS AND ACKNOWLEDGE THE PROFESSIONAL ASPIRATIONS AND CONTRIBUTIONS OF THEIR COLLEAGUES

E.S. 5.1 Professional Environment: Members should provide their associates and employees with a suitable working environment, compensate them fairly, and facilitate their professional development.

E.S. 5.2 Professional Recognition: Members should build their professional reputation on the merits of their own service and performance and should recognize and give credit to others for the professional work they have performed.

R. 5.201 Members shall recognize and respect the professional contributions of their employees, employers and business associates.

R. 5.202 Members leaving an employer's service shall not without the permission of the employer take designs, drawings, data, reports, notes, or other materials relating to work performed in the employer's service by the members.

R. 5.203 Members shall not unreasonably withhold permission from departing employees to take copies of designs, drawings, data, reports, notes, or other materials relating to work performed by the employees in the members' service which are not confidential.

*Due to space limitations, the Preamble has been condensed. The Code of Ethics, with commentary and the full Preamble, is available from the Institute and will be sent to each member upon approval of admission.
Why the most advanced CAD system for architects and building designers puts you on the edge.

And keeps you there.

Today, there is a revolutionary CAD system that puts you on the edge — the competitive edge. A CAD system that goes far beyond the ordinary, and gives you the edge in production, presentations, plus a lot more.

The name of this system is ARRIS™ And it is the remarkable system that will instantly show you why ordinary CAD is no longer enough for architecture and building design and management.

THE COMPETITIVE EDGE IN PRODUCTION.
With ARRIS, you don't have to make drawings line by line. Instead, you enter basic design parameters — and let the system do the rest of the work, automatically. So more work gets done, in less time.

THE COMPETITIVE EDGE IN PRESENTATIONS.
With ARRIS, you can create extraordinary design and marketing presentations that help you win more business. For example, ARRIS 3D modeling and rendering allows you and your clients to view your project from any perspective, at any angle, at any time of night or day. And to "walk through" rooms as if they really existed.

PLUS.
ARRIS allows your project teams to share data, drawings and systems — so they can work on entire projects, not just single drawings. Plus, ARRIS will grow as you grow, so you keep your competitive edge.

So be sure to call today for our free ARRIS demonstration. We're your ARRIS Power Dealer — and we can show you how ARRIS provides extraordinary CAD capabilities. And we can also provide you with the very best in training, service, and support. Call now to get the competitive edge.

IMPORTANT NOTICE
FREE COMPUTER DESIGN SERVICE FOR MASONRY WALLS

THE WISCONSIN CONCRETE & PRODUCTS ASSOCIATION IS OFFERING A NEW SERVICE WHICH WILL ANALYZE OR DESIGN MASONRY WALLS FOR LOW, MID OR HIGH RISE BUILDINGS. THIS SERVICE IS OFFERED FREE TO DESIGN PROFESSIONALS—ARCHITECTS AND ENGINEERS—IN THE STATE OF WISCONSIN.

DATA PROVIDED: The program will check resisting moments limited by steel stress, masonry stress and deflection of the wall. It also checks shearing resistance limited by shear stress and bond strength and checks flexural compressive stresses, both allowable and actual. Once the stresses have been determined, the programs will check various masonry configurations to arrive at the configuration which would be the most economical construction.

94 Wisconsin Architect February 1989
All These Windows Are Now Open For Architects.

It's an open and shut case.
AutoCAD® is the design tool of choice today. But running on the new, powerful Sun386i™ workstation, it's something else again.
One of those "elses" is multitasking.
While AutoCAD is drawing, you can do more than twiddle your thumbs.
You can simultaneously run other AutoCAD tasks. Or other applications based on both the DOS and UNIX® operating systems.

All through a simple mouse-driven, point-and-click graphical user interface.
The Sun386i also has networking built in. No need for extra cards or software. Line any number of Sun386i workstations together and you're networking. Sharing information and peripherals such as plotters and laser printers.
As impressive as this sounds, it's nothing compared to seeing it in person.
So reserve your place now. This is one seminar that will really open your mind.

CADSYS, INC.
Crossroads Corporate Center III

A Special Invitation
to our
AutoCAD AEC/Sun386i Seminar from
CADSYS, INC.

- Architects
- Landscape Architects
- Civil Engineers

Facilities Managers
- Interior Designers

Join us March 30th for this free seminar. See how software created specifically for design professionals may be used to customize the world's most popular computer-aided design software, AutoCAD.

We'll show you how the Sun386i™ workstation can help you and your people really work together. See how you can get more accomplished by simultaneously working with several different programs at the same time or plot a drawing while creating another.

Seminars will present methods for streamlining the processes of:

- Design Development: Learn how quickly a simple 2D bubble diagram may be developed into a 3D model. Site, building, and interior design development will be discussed and demonstrated.
- Floor Plan Preparation: Why spend time drafting when you could be designing? Automatically maintain accurate dimensioning and area information as you design.
- Development of Contract Documents: Discover how schedules such as those for doors, plumbing, or inventory may be created automatically using AutoCAD AEC Architectural database functions, as well as how AutoCAD interfaces with other popular database and facilities management programs.
- Presentation Drawings and Computer Visualizations: See how 3D presentation renderings may be produced, or how you might do an automated on-screen visualization of your design.
- Inputing Existing Drawing Information into the Computer: Learn how to get existing site or building information into your computer so that you may use it.
- Sharing of Office Information and Hardware: See how your entire department can share information and hardware such as plotters and/or printers.

The Wisconsin Architects Foundation (WAF) was formed in 1954 to promote "the science and art of planning and building by advancing the standards of architectural education, training and practice."

The WAF is in its 35th year of supporting architectural education in Wisconsin. During this period, the WAF has contributed more than $130,000 in scholarships to over 160 students. The WAF Board of Directors currently administers an endowment of over $110,000.

Initial efforts by the WAF involved assisting in the development of a school of architecture in Wisconsin. The School of Architecture and Urban Planning at the University of Wisconsin-Milwaukee (UWM SARUP) is now a reality with a fully accredited undergraduate and graduate architectural program.

The WAF continues to maintain a close relationship with SARUP, providing financial assistance for architecture students and program development. WAF grants also are provided each year to student chapters at SARUP, MSOE and several vocational, technical and adult education districts in Wisconsin (WITC, NWTC and MATC) to assist them in developing architectural programs.

The WAF, through a generous gift by Mary Eschweiler, assisted in the establishment of the Wisconsin Architectural Archives. It is now a major depository of architectural documents and is used as a resource for both practicing architects and scholars.

In 1983, the WAF received a gift of the Joseph J. Stoner House in Madison. In 1984, the WAF successfully completed substantial restoration efforts of this National Landmark. The Stoner House now serves as permanent headquarters for the WAF and the Wisconsin Society of Architects (WSA).

Increasing public awareness of architecture represents another goal of the WAF. In recent years, the WAF has joined with the WSA in sponsoring Wisconsin Public Radio. These radio spots, aired statewide every day, have helped to increase public awareness of the architectural profession and are an important component of the WAF's overall educational outreach effort.

The WAF is working to build a better Wisconsin through architectural education. A contribution to the WAF represents an investment in the future of Wisconsin and the state's architectural profession.

WSA members have become increasingly active in contributing to the WAF in recent years. In addition, individuals have been encouraged to consider specific bequests to the WAF as part of their estate planning, and the WAF has been fortunate to receive several such bequests.

Corporations and other organizations also have made significant contributions to the WAF. The Best Block Company, for example, sponsors an annual design competition and provides a significant contribution to the WAF each year in the name of the winning architect. More recently, the WAF was asked to administer the scholarship fund of the Milwaukee Chapter CSI.

In 1987, the WAF began the development of a new effort called "Campaign 300" to broaden the base of financial support and increase its ability to provide annual scholarships to Wisconsin architecture students. The goal of this campaign is to build the WAF's endowment to a level sufficient to provide $25,000 in annual scholarships. Financial support is being sought from Wisconsin corporations, foundations, architects and others involved in the construction industry.

The WAF is governed by a nine-member Board of Directors elected by the membership for three-year terms. The majority of the WAF Board of Directors must be registered architects and members of the WSA.

The members of the WAF encourage your tax-deductible contributions and membership. You can also help by impressing upon those in related professions and in the construction industry of the vitality and benefits of the WAF.

For further information, contact members of the WAF Board of Directors or WAF Executive Director William Babcock.

Reltec Equipment introduces ENVIRONMENTAL SYSTEMS for industrial use.

These doors provide automated self-operating load and unload stations in applications where control of the interior environment is imperative, e.g. computer rooms. Optic Sensing means that the doors remain closed when not in use providing control of humidity, temperature and unfiltered air ingress. For more information, contact Dianne Orringe, Reltec Equipment, Inc., P.O. Box 489, Ferndale, WA 98248 (604) 574-0180.

Kohler Introduces New Barrier-free Shower Module

THE COMPACT NEW 36-by-36-inch barrier-free shower module from Kohler Co. is designed specifically to be compatible with residential settings while meeting the strict requirements for institutional use. It features an optional fold-up seat, which makes it ideal for home use where one resident may need the support of a seat while showering, but other family members need no such special assistance. For more information, contact your local distributor listed in this issue.

Marvin Windows Includes Argon Gas At No Extra Charge On Low E Glass Units

Marvin Windows announces that as of January 1989 it will include Argon gas, a high-tech window and door energy feature, at no extra charge on its standard sized one-lite products with Low E glass. The Argon will be an automatic feature when Low E is ordered on any of Marvin’s standard sized products.

Both Low E and Argon are valuable in helping to save on energy expenses. Low E coating adds significantly to a window’s R value, i.e. from R-2 to about R-4, doubling the R value of an average window with insulating glass. For more information, contact Builders World, Inc., P.O. Box 881, Waukesha, WI 53187 1-800-686-2206.
Light up your life.
Pella gives your imagination full rein. Let our window experts help bring your dreams to life.
We can show you one of the biggest selections of windows, doors, sunrooms and skylights anywhere.

**Plotting Problems?**

GIS Systems has the solution to your pen plotting bottleneck. Our Plotting Service Bureau is the most experienced in the Midwest, utilizing state of the art 400 dot per inch electrostatic plotting technology.
Fast, cost effective, high quality plots.
Monochrome and color, in any size.

We offer:

- Overnight turnaround for local and long-distance customers
- Postscript compatibility
- HPGL and Calcomp formats
- Support for most micro- and mini-computer based CAD systems
- Very high speed modem capabilities, up to 19.2k Baud
- Modem purchase plan
- The best plotting rates in the country
- Volume and contract rates available
