# Crendon are more accommodating ...

To solve the problems of providing industrial accommodation, the architect has to be almost infinitely flexible, both mentally and technically. Crendon frames are designed to contribute to that flexibility - by their range, their variety, and the ingenuity of modular engineering. Crendon show just how accommodating concrete can be ...

*The Crendon Metric 4 provides a flexible, fast and practical system of concrete framing for the widest range of building requirements. It enables a 2-storey arrangement to be achieved with economic standard components and meets all requirements for low pitch roofs. Send for the technical details.*
