Authors on Architecture: Gonzalez on SoCal Architects

SAH/SCC Lecture & Book Signing, Santa Monica
Sunday, May 19, 2019, 2-4PM

Please join SAH/SCC for a look at the work of some of California’s forgotten architects with author Antonio Gonzalez, as he lectures on his recent book, Architects Who Built Southern California (The History Press, 2019). The event takes place at Santa Monica Central Library (Moore Ruble Yudell, 2006).

In the early 1900s, the population of Southern California exploded and the cities grew at such a rapid pace that builders could hardly keep up. Well researched and well illustrated, the book shines a light on the people behind some of Southern California’s most iconic buildings.

Gonzalez takes readers on a fanciful tour of the works of 10 architects—some more noted (John Austin, FAIA, Albert C. Martin, Meyer & Holler, Julia Morgan, FAIA, and Morgan, Walls & Clements) and some not as much (Harrison Albright, Claud Beelman, Elmer Grey, FAIA, Hudson & Munsell, and Alfred F. Rosenheim).

Beelman, a man who never received a college degree, would go on to design the LA Elks Lodge (Curlett & Beelman, 1924), among dozens of other commissions, including the Eastern Columbia Building (1929). Albright, who worked mostly in San Diego, contributed to LA with the Santa Fe Freight House (1906), now inhabited by SCI-Arc (Gary Paige Studios, 2001). Martin, architect of City Hall (1928) with John C. Austin and John Parkinson, founded an architecture firm that still bears his name more than 100 years later.

Gonzalez, who works at the Architecture and Fine Arts library at the University of Southern California, holds a BA in Journalism from the University of Iowa and a Master’s in Library Science from San Jose State University. In addition to the presentation, books will be available for sale and signing by the author.

Authors on Architecture: Gonzalez; Sunday, May 19, 2019, 2-4PM; Martin Luther King Jr. Auditorium, Santa Monica Central Library, 601 Santa Monica Blvd.; free; seating is available on a first-come, first-served basis; 310.458.8600.
This past March, 350 preservationists attended the Preserving the Recent Past 3 (PRP3) conference in Los Angeles to share the latest strategies for identifying, protecting, and conserving significant structures and sites from the post-World War II era. The two days of conference sessions ranged from historic trends and themes related to recent past buildings, sites, and landscapes, to significant postwar-era sites of underserved communities.

SAH/SCC was asked to reprise its 2012 tour of Conjunctive Points at the Hayden Tract in Culver City. Originally the vision of SAH/SCC Vice President, Jay Platt, the event explored the history of this light-industrial area and the transformative vision of socially conscious developers Frederick and Laurie Samitaur Smith. From the mid-1980s through the present, they have collaborated with noted architect Eric Owen Moss, FAIA, to effect progressive social action through redevelopment, art, architecture, and economic revitalization. During the course of 30 years, the Smiths acquired various properties within Culver City’s Hayden Tract and engaged Moss in an iterative exercise in planning. The result is a district of architecturally experimental buildings, which has become a desirable location for creative industries, artists, and media companies.

For PRP3, Jay delivered an expanded lecture on the history and the context of the Hayden Tract. Afterward, tour-goers traveled via Metro Expo Line from USC to Culver City, where the group was met by project architect Dolan Daggett for an extensive walking tour of the projects. From visionary early buildings, such as Stealth (2001), to recent additions like Vespertine (2016), the tour showcased the evolution of the work of Eric Owen Moss Architects.

After three miles of exploration on foot, the tour ended at the office of the architect, where the group was treated to a viewing of the model for the upcoming (W)rapper building—an engineering wonder. The new tower, with floor plates of 15,000 square feet each, will be supported on a structure of curvilinear, concrete-filled, one-by-five-foot steel tube ribbons. The ribbon system will be located external to the floors, so the floor plates are entirely open and flexible. The ribbons are designed to be resolved at the base of the tower as a series of intersecting hyperbolic support walls that geometrically join ribbons on one elevation with ribbons on the opposite side.

The half-day tour was offered twice during the conference, and attendees included more than 50 architects, historians, and preservationists from around the country. The Hayden Tract tour showcased architecture and revealed a potential historic district unique to Los Angeles—reigniting the need to consider resources that do not yet meet the 50-year threshold for historic significance.

Thank you to Jay and SAH/SCC Treasurer, John Berley, for leading these tours. If you missed the 2012 tour and/or the PRP3 version, we have updated our walking tour brochure to include the more recent projects (available for purchase on Page 5 or at www.sahscc.org).

—Sian Winship
SAH/SCC welcomes author Stuart W. Leslie, PhD, who will give the talk “The Beach Boys: Classified Research With a Southern California Vibe,” based on his contribution to Laboratory Lifestyles: The Construction of Scientific Fictions (edited by Sandra Kaji-O’Grady, Chris L. Smith, and Russell Hughes; MIT Press, 2019), a new book on how advancements in lab design affect the work of scientists. His essay on the aerospace and think tank architecture of the Cold War explores the architectural legacy of local institutions, such as the Rand Corporation and Hughes Research Lab.

And what better location than The Wende Museum of the Cold War? The Wende’s collection of Cold War art, culture, and history from Soviet Bloc countries inspires a broad understanding of the period and explores its enduring legacy. The museum’s new location is the once-abandoned 1949 National Guard Armory, which was renovated by PARAVANT Architects in 2017 as the Culver City home of the museum.

Leslie, a professor at Johns Hopkins University and the author of The Cold War and American Science: The Military-Industrial-Academic Complex at MIT and Stanford (Columbia University Press, 1993), is a dynamic speaker who makes the history of modern science, as told through architecture, accessible to everyone. His work is richly illustrated with archival photographs.

In February 2018, Leslie dazzled SAH/SCC with his presentation “The Romance of Water and Power: Architecture as Advertisement,” an exploration of the commercial and industrial buildings of the Los Angeles Department of Water and Power—from neo-Grecian temples to luminescent Art Deco showrooms—and their role in the community.

Authors on Architecture: Leslie; August 16, 2019; reception at 6PM, lecture at 7PM; The Wende Museum, 10808 Culver Blvd., Culver City; free; reservations required—see order form on Page 6, call 800.972.4722, go to www.sahscc.org, or email info@sahscc.org.
City of Angels: Houses and Gardens of Los Angeles
by Jennifer Ash Rudick; photos by Firooz Zahedi

One would expect a book on tony LA homes to be dominated by Hollywood notables. Refreshingly, the number of homes of those in the fields of architecture, design, and art are more than double those of producers and directors. Curious, though, for a tome about LA homes are the very few ground-up projects, but that is countered by renovations of Modernism’s greats—Rex Lotery, FAIA, Ed Fickett, FAIA, Lloyd Wright, Richard Neutra, FAIA, Rudolf Schindler—and numerous Revival homes. Stylistic modes are duly represented as we get a glimpse into the lives of noted Angelenos, from the classically modern vibe of art and culture mavens Ann Philbin and Cynthia Wornham’s Buff, Straub & Hensons (renovation: Chu & Gooding; landscape: SAH/SCC Life Member Lisa Gimmy), to the wildly eclectic spread of Tony Duquette protégé Hutton Wilkinson, and the surprisingly subdued and unmanipulated Malibu beach house of trendy interior designer Kelly Wearstler. Given that the text stresses interviews and lifestyles of the homeowners, seeing them in their habitats would have added another layer. But, then again, it could hamper the reader/viewer’s ability to live vicariously—and terribly elegantly—through the images of these 27 homes. Personally, I see myself in the Garcia House by John Lautner, FAIA, even though it’s owned by SAH/SCC Life Members John McIlwee and Bill Damaschke.

Vendome Press, 2018, 392 pages, hardcover, $75.

The Art of Outdoor Living: Gardens for Entertaining Family and Friends
by Scott Shrader; photos by Lisa Romerein; foreword by Jean-Louis Deniot

Los Angeles-based landscape designer Shrader and photographer Romerein present the greatest advantage of Southern California living—the luxury of enjoying the outdoors. And luxury is the right word for Shrader’s garden designs. Before delving into 13 gardens, the designer briefly states his principles of design, based on sustainability, lifestyle, and terrain. The garden section begins with Shrader’s own West Hollywood home he dubs his “Laboratory,” and progresses through fecund lushness, regardless of the gardens’ formality or ease. A beautiful touch in the layout is starting each project with a full-page detail of a particular plant species, opposite the opening text, which acts as a visual palate cleanser. The garden party lifestyle and the naturalness of the landscapes show how Shrader seamlessly integrates people, plants, and place.

Roland E. Coate
by Marc Appleton, Bret Parsons, and Steve Vaught

For the second installment in the “Master Architects of Southern California, 1920-1940” series, the authors focus on the work of Roland E. Coate, FAIA, first known as Early California and Monterey Revival homes, and later adding multiple LA revival styles—Spanish, Georgian, Regency, Colonial, to his repertoire. His skill of adapting styles is best summed up by one of his many Hollywood clients, the actress Myrna Loy, who remarked of her 1936 home: “Our architect designed a sprawling clapboard house combining Colonial grace and the contemporary freedom we wanted.” A hallmark of the series is that “Our architect designed a sprawling clapboard house combining Colonial grace and the contemporary freedom we wanted.”

Tailwater Press/Angel City Press, 2018, 208 pages, hardcover, $60.

Bernard Trainor: Ground Studio Landscapes
by Bernard Trainor

Gardens of 12 California homes—from Big Sur north to Healdsburg—are featured through lush photos and personal reflections by Trainor, an Australian-born landscape architect living in Monterey. These modern estates are enhanced by Trainor’s subtle, never shows, gardens and grounds. There’s a gentle touch to the work with the feeling that a swimming pool emerged surrounded by tall grass, or of slightly caged nature as greenery meanders with a stone path. Trainor is well paired with contemporary architects who use materials of stone, concrete, and wood in their natural, authentic states. The landscape and architecture interact as in a dance, gently moving into and around each other, in natural integration and dialogue. Of course, we know this kind of casualness must be carefully planned and executed.

Princeton Architectural Press, 2019, 224 pages, hardcover, $55.

**SOCIETY OF ARCHITECTURAL HISTORIANS / SOUTHERN CALIFORNIA CHAPTER NEWS May/June 2019**
SAH/SCC is a 501c 3 nonprofit organization dedicated to providing its members with opportunities to learn about and experience the rich architectural heritage of Southern California and beyond. Our volunteer board members create tours, lectures, travel tours, and other events that explore the ideas behind the architecture as well as the buildings that result from them. From modern to craftsman, from Spanish Colonial to contemporary, our programs are the best-kept secrets in Southern California!

MEMBERSHIP BENEFITS:
• Advance notice of all SAH/SCC events—important because they usually sell out just to members
• 20-30% discounts on tour and event ticket prices
• Bi-monthly E-news with printable newsletter
• FREE tickets to our annual Members’ Celebration event
• Special Members-Only E-Alerts about upcoming events
• A tax deduction for your membership dues
• The knowledge that you are supporting our mission to increase public awareness of Southern California’s architectural heritage

SAH/SCC MEMBERSHIP FORM

MEMBERSHIP LEVELS THAT FIT YOUR NEEDS!

Fill out the order form below or join online at www.sahsc.org.

$45 Individual – All the membership benefits above for a single individual.

$65 Dual – All the membership benefits for two names at the same address.

$125 Patron – All the membership benefits above, plus priority reservation at our popular and exclusive “Patrons Only” programs, such as “Modern Patrons” and “Contemporary Patrons.” Includes two names at the same address.

$500 Corporate Sponsorship – Annual donation receives Sponsorship listing in the SAH/SCC Website and on SAH/SCC event publications and hyperlink from our Website to yours.

$30 Student (requires scan of valid Student ID) – All the benefits of Individual membership at a 30% discount.

SAH/SCC MEMBERSHIP

_____ Individual membership at $45 each = $_____

_____ Dual membership at $65 each (two names at same address) = $_____

_____ Patron membership at $125 each (two names at same address) = $_____

_____ Corporate membership at $500 each = $_____

_____ Student membership at $30 each = $_____

Total Membership = $_____

SAH/SCC EVENT TICKETS

Postcard From DTLA

On Saturday morning, March 23rd, 25 SAH/SCC members and friends met in Downtown LA in front of Paris Baguette to begin our hard-hat tour of adaptive reuse projects. First stop was the old Hamburger’s Department Store (later May Company) designed by Rosenheim & Curlett in 1906. SAH/SCC Life Member Robert Chattel, AIA, of Chattel, Inc., and Sarah Cahill of Omgivning Architects presented the building’s history and future plans to revitalize it as a mixed-use complex. We got the rare opportunity to experience rooftop views of the Orpheum Theater (G. Albert Lansburgh, 1926) and Eastern Columbia Building (Claud Beelman, 1929; Killefer Flammang Architects, 2006).

After experiencing some of the original remaining historic fabric of the department store, tour-goers visited the Singer Building (Meyer & Holler, 1922) to see the exclusive live/work loft units being created. We got a bonus visit to the Dutch Chocolate Shop (a.k.a. Finney’s Cafeteria) to see its magnificent Ernest A. Batchelder tile. With groin-vaulted ceilings, elaborate images of Dutch life, and Art Nouveau-inspired motifs, it remains one of the most spectacular DTLA spaces. Cahill shared a bit about the challenges of using the historic space in terms of egress requirements demanded by current building codes.

This event, organized by SAH/SCC Board Member Kimberly Bahnsen McCarron, provided the perfect insight into how thoughtful architects and developers are revitalizing the historic core by using the Broadway Theater and Entertainment District Guide, tax incentives, and the Secretary of the Interior’s Standards for the Treatment of Historic Buildings.
